1957 Regular Session

Budget Message

By

GOVERNOR GOODWIN J. KNIGHT

1957-58 Budget

To the Senate and Assembly of the Legislature of California:

I submit the Budget for the State of California for the fiscal year beginning July 1, 1957, and ending June 30, 1958, in compliance with the provisions of the State Constitution.

State finances are currently in excellent condition. Revenues have again exceeded our estimates. We have again been favored with greater prosperity than our economic advisers dared forecast a year ago. By reason of the greater revenues and some substantial savings in expenditures, the carry-over surplus available for general purposes will be considerably greater than anticipated. This carry-over surplus, when added to the revenues estimated for the year, will finance the recommended expenditures without an increase in tax rates or new revenue measures.

This is a budget for another year of progress by a State coping with the problems of a continuing great growth in population and an expanding economy. The recommended expenditure programs have been developed with the objective of providing a high standard of public service with the greatest possible economy.

REVENUE ESTIMATES

In all but one of the past five years the budget revenue estimates for the General Fund have proved to be too conservative, as the following tabulation will show:

	*Original Estimate **	*Actual Receipts*	*Difference*	
			Amount	*Percent*
1951-52	$638,579,659	$734,025,725	$95,446,066	14.9
1952-53	742,396,513	773,977,227	31,580,714	4.3
1953-54	803,835,183	798,083,615	—5,751,568	—0.7
1954-55	822,168,251†	879,122,544	56,954,293	6.9
1955-56	856,548,435	1,005,040,608	148,492,173	17.3

* Adjusted for estimated effect of revenue measures adopted by the Legislature.
† Includes $19,418,604 received as a result of the United States Supreme Court decision regarding tideland oil royalties.

I should like to emphasize that the differences were due to unforeseen economic developments, rather than poor workmanship in estimating.

You can see that being too conservative or too optimistic by but a few percentage points can make a difference of a good many millions of dollars.

This year's estimate, as in previous years, has been made in the light of a very careful appraisal of the economic situation, after consultation with economists representing industry, utilities, banking, the Federal Government and universities, at conferences held both within the State and nationally. There is a general unanimity of opinion that there will be a further moderate increase next year above the present high levels of income and business volume. I submit the estimates for the 1957-58 Fiscal Year with assurances that there have been diligent efforts to make them dependable forecasts, and that by no means are they intentionally over-conservative.

EXPENDITURES

Total Expenditures—All Funds

The expenditures for the 1957-58 Fiscal Year as recommended, including the estimated fixed charges, total $1,947,964,993, an increase of $119,580,110 or 6.5 percent, over the estimated expenditures of the current year. The greater part of the increase is required by the inexorable demands of growth. A relatively small part is attributable to proposals for improvements in standards. I have already discussed in the message delivered to you last week the major policy matters which involve budget considerations. I shall briefly review them here. You will find more detailed explanations in the budget schedules.

STATE OPERATIONS

Higher Education

The heaviest increase in State Operations is for higher education. Enrollments in the State colleges are projected to grow from 47,331 this year to 54,190, an increase of 6,859 students in just one year. Expenditure requirements for the State colleges are recommended at $40,329,827, an increase of $6,277,549, or 18.4 percent, over this year's total.

For the University of California, enrollments for next year are estimated at 42,559, an increase of 2,876, or 7.2 percent. The University's operations will require, in addition to its own revenues, State appropriations of $82,304,685 for the 1957-58 fiscal year—an increase of $6,766,880, or 9 percent.

Highway Patrol

All right-thinking people are aroused by the frightful record of traffic accidents. Those who have given this great problem serious study are unanimous in their recommendations that one of the most important needs in combating it is increased patrolling of the highways. Accordingly, this budget makes provision for adding 370 uniformed men to bring its total force to 2,434. This is the maximum increment which can be recruited and trained in the time available. This addition in manpower, with related auxiliary costs, will increase the total operating budget for the Highway Patrol from $22,153,875 to $24,837,414.

I am recommending that in order to expedite this badly needed increase in the Patrol, a deficiency appropriation be submitted immediately to provide funds so that 100 of this additional force can be recruited and put into training at the earliest possible time during the current fiscal year.

Mental Hygiene

Appropriations aggregating $92,195,419, an increase of $7,931,148, or 9.4 percent, are recommended for the operations of the Department of Mental Hygiene, its hospitals for mentally ill and mentally retarded, and its clinics and research centers. A substantial part of this increase is for improvements in medical and nursing staffing. Included also is a recommended fund of $200,000 for the beginning of an organized research program. We can take a great deal of satisfaction in California's forward-looking mental hygiene program.

Improved treatment methods have resulted in such a significant increase in therapeutic releases of patients from the hospitals that we are now in a position to reduce our forecast of new hospital beds required. We can point to good evidence of the realization of the prediction that improved medical treatment would result in economies in the long run.

Natural Resources

Provision is made for stepping up the activities of the Department of Natural Resources, especially of the Division of Forestry, for which an increase of more than $2,000,000 is proposed as the first step in the implementation of the 1956 Fire Plan adopted by the State Board of Forestry. A substantial increase is also proposed for the Division of Beaches and Parks, with its rapidly growing park system.

Fish and Game

The budget for the Department of Fish and Game is continued at approximately the present level. Your attention is directed, however, to the fact that the revenues under present license fee schedules will not continue to sustain the present expenditure program, and that some adjustments are necessary in order to keep the Fish and Game Preservation Fund solvent.

Water Resources

Appropriations aggregating $8,395,001, an increase of $1,717,552, are recommended for the newly created Department of Water Resources, including provision for the State Water Rights Board and the State Water Board. Our water development program has now reached the point where an effectively organized and staffed Department of Water Resources is an absolute necessity. The budget and the organization plan for the new department and its related boards have been developed after very thorough study, both by the Department of Water Resources and by the Department of Finance.

Other Items

The above constitute the items of major expenditures and greater increases. Other items which deserve special comment and your particular attention are:

Board of Equalization: Provision is made for intensified work by the Division of Assessment Standards, for increased assistance to county assessors and for more complete property assessment sampling work. Increase in staff for the Sales Tax Division is also recommended, primarily because of the work brought on by the Uniform Sales Tax law relating to county and city sales taxes.

Department of Justice: Increased staff is proposed in the Attorney General's office and in the Division of Criminal Identification to meet greater workloads.

Industrial Relations: Much needed additions to the staffs of the Division of Industrial Safety and the Division of Industrial Accidents are recommended in order to meet a serious backlog as well as an increase in current workloads.

Corrections: The Department of Corrections will require an increase of $1,773,499, approximately 6.7 percent over the current budget of $26,560,880, to carry on its program.

Youth Authority: The Youth Authority will require an increase of $1,403,030 for a total of $11,817,771. The principal purpose of this rather substantial augmentation is to activate new facilities which will be ready for occupancy during the 1957-58 fiscal year.

Motor Vehicles: The Department of Motor Vehicles will require a substantial increase in its budget, primarily to keep pace with heavy workload increases, but also to permit more effective driver license examinations and expanded driver-improvement activity, in order to deal with the increased number of drivers involved in accidents and the expanding law enforcement program.

Athletic Commission: The admissions-tax revenues from boxing and wrestling matches have fallen off so seriously that some adjustment will be necessary to keep this self-supporting activity solvent.

Salary Adjustments: The budget includes funds to carry out the recommendations of the State Personnel Board, whose report indicates quite clearly that a general increase in State salaries approximating five percent will be necessary in order for State pay levels to keep pace with those prevailing for comparable employment in private industry and other governmental jurisdictions. A sufficient amount is included for special salary adjustments. Provision is made for a similar increase for the University of California. I recommend, also, your consideration of the need for adjustments in the salaries of elective and appointive officials.

CAPITAL OUTLAY

The 1957-58 Budget for Capital Outlay is the greatest in the State's history. Almost one-half billion dollars will be required for the following capital outlay programs:

State Buildings	$175,840,642*
Beaches and Parks	15,297,978†
Wildlife Conservation	2,111,941
District and County Fairs	2,764,189
State Highway Program	248,206,640
Water Development—Feather River Project	40,100,000
Flood Control Projects	5,410,000

* Including $50,000,000 from the State Construction Program Bonds.

† Includes funds for 1960 Winter Olympics.

State Building Program

We are continuing to budget for state buildings in accordance with the five-year program. It has been necessary to make revisions, however, to give effect to increased construction costs and to accelerate the timing of certain projects, primarily those relating to higher education, so as to meet increased enrollment trends. Here again higher education presents the heaviest need, with more than $90,000,000 recommended for State colleges and some $23,000,000 for the University of California.

Residence Halls

In addition to the classrooms and related campus facilities, the budget proposes an outlay of $17,181,800 for student residence halls for all of the State colleges and at least one such facility for the University of California. There has been a long delay in providing residence halls for students on State college campuses. A thorough study shows without question that our system of State colleges cannot function properly without providing living quarters for students who come from long distances. The only equitable alternative would be to provide a State college in every community. The study indicates that the rentals charged the students should be sufficient to amortize approximately half the cost of the residence halls. The proposal to use proceeds from State bond funds for this purpose is made with the definite understanding that student rentals will be such as to repay the State for at least one-half the bond service costs, and will be pooled for that purpose.

Other Projects

Other important features of the building program include $11,500,000 for the new medium security facility for the Department of Corrections, a badly needed State building in San Bernardino, more than $19,000,000 for State hospital structures for the Department of Mental Hygiene; and $1,082,895 for the State's share of constructing another group of armories for the Military Department.

Bond Funds

It is recommended that $50,000,000 of the newly authorized State Construction Program Bonds be issued to meet a portion of the cost of this program, the remainder to be financed from current revenues. This is in accordance with the plan of financing recommended when the $200,000,000 bond issue was proposed; that is, that the bond funds be allocated over the remaining four years of the five-year building program to supplement funds from current revenues. We plan to schedule bond sales in such manner as to minimize interest costs.

Beaches and Parks

The amounts shown for Beaches and Parks are in line with the five-year plan of acquisitions and improvements previously submitted and generally included in the approved 1956 Budget Act. The amounts shown for 1957-58 for acquisitions are the estimates of the outlays which will be accomplished in that year. Improvement projects are those of highest priority.

Included along with the Beach and Park program is the estimate of expenditures for facilities for the 1960 Winter Olympics.

1960 Winter Olympics

The Legislature has already appropriated $5,000,000 to finance the construction of facilities in Squaw Valley to accommodate the VIIIth Winter Olympic Games which are scheduled to be staged there in 1960.

Since the matter was last before the Legislature, the California Olympic Commission has concluded that instead of providing temporary facilities merely for the special use of the 1960 Winter Olympics, it would be advantageous to establish this area as a permanent winter-sports facility for the benefit of our citizens and winter sports athletes everywhere.

I concur in this recommendation, and I further recommend that in order to carry out this objective State-owned facilities in Squaw Valley be incorporated into the California State Park system, and that following the Winter Games in 1960 these facilities be operated under the jurisdiction of the State Division of Beaches and Parks, either directly or through concessionaires.

In order to finance the construction of permanent facilities and to incorporate them into the State Park system, it is estimated that an additional $2,500,000 will be necessary. It is my recommendation that this money be made available. This should be done as an urgency appropriation so as to avoid any delay in a very tight time schedule. It is my firm belief, however, that much of the money already appropriated, and that which I hope will hereafter be appropriated for this purpose, will be returned to the State Treasury over a period of years through revenues derived from the use of these facilities, so that the cost to the State will thus be minimized.

I am confident that great honor will come to California as the result of our being hosts to the winter-sports athletes of the world, and that this opportunity to contribute to international good will will overshadow the direct economic benefits we shall derive from this effort.

Feather River Project

In the budget submitted a year ago I recommended funds for the initial phases of the Feather River Project as a definite commitment to go forward with the full project as rapidly as possible. I suggested that if sufficient progress were made by the time of your convening in January, an additional appropriation should be made as an urgency measure. Such progress has been made and there will be before you an urgency bill to appropriate $25,190,000 to construct those portions of the Feather River Highway and the Western Pacific relocations in the reservoir site which can be started immediately.

For further uninterrupted progress I am recommending in this budget for the 1957-58 Fiscal Year appropriations totaling $38,019,300 for the next phases of the project which you will find fully detailed at page 1349.

I propose that these appropriations be made from the State's share of the moneys derived from oil and gas production from the Long Beach tidelands. I further recommend that the entire amount now accumulated in the so-called Investment Fund from this source, together with the amounts to accrue to this fund in the 1957-58 Fiscal Year, approximately $164,000,000 in all (including the above recommended appropriations) be transferred to a special fund dedicated specifically to water development. There can be no more urgent or more appropriate use of these moneys.

Even this rather substantial sum is, of course, only a relatively small part of the outlay which must be made for the full accomplishment of our needed water development.

Flood Control

The heavier expenditure for this segment of flood control costs is accounted for largely by increased outlays for the State's share of the San Joaquin River Flood Control Projects. Under Local Assistance for Flood Control you will find a considerable reduction in the amounts needed for this particular year.

Other Capital Outlay Programs

The other programs for Capital Outlay listed above are projected at substantially the present year's level. It should be noted that in addition to the $248 million of State funds for highway construction and improvements, more than $134 million in federal funds will be available. The total program approved by the Highway Commission therefore amounts to almost $383 million.

LOCAL ASSISTANCE

The State's obligation for financial assistance to counties, school districts, and other units of local government continues to make up the largest of the three main sections of the State's budget. The total of all local assistance for the 1957-58 fiscal year is estimated at $964,825,469, which is 49.5 percent of the State Budget and involves a total increase of $29,685,337 over the expenditures for the current year.

Subventions for Education

School Apportionments: The largest single expenditure item is State aid to the public school system, estimated to require apportionments aggregating $498,630,621 in 1957-58 —an increase of $37,714,936.

Representatives of the public schools point out that there has been no per pupil increase in the amount of State support since 1953; that the entire burden of meeting higher unit costs has fallen on the local property taxpayers; that most school districts have been required to exceed the normal maximum tax rates fixed by statute; and that many districts are encountering serious financial problems in maintaining proper educational standards. I have a very real sympathy with the plight of these districts. There can be no doubt that in many areas school enrollments are increasing at far greater rates than is the value of the taxable property in those areas. I am sure that a good case can be made for financial relief derived from a tax base which is broader than the property tax. You may be assured of the full cooperation of this administration in your consideration of this extremely important problem.

Child Care Centers

I am recommending and anticipating that you will extend the Child Care Center Program which under present legislation would expire June 30, 1957. Provision is contained in the budget for $4,604,048 to continue this now well-established program for the 1957-58 fiscal year.

Subventions for Social Welfare

The subventions for Social Welfare will require $150,099,569 in 1957-58. This includes the State's share of the Old Age Security, Aid to Needy Children, and Aid to the Blind Programs. The largest of these is the $106,345,350 required for Old Age Security.

The 1956 Federal Social Security Act amendments provide federal funds for a new program, Medical Care to Public Assistance Recipients, to begin July 1, 1957.

Federal money is to be provided separately from the existing sharing formulae as follows:

(1) ½ of costs up to an average of $6 per month for each adult recipient
(2) ½ of costs up to an average of $3 per month for each child recipient
(3) ½ of the administrative costs incurred by State and local agencies

Enabling legislation must be adopted at the 1957 session to make the federal funds available in California. The basic unmet need of these people is medical care. This federal legislation opens the way to make this highly desirable improvement in our programs for the aged, blind and needy children. Your favorable action on the necessary State legislation has my most hearty recommendation. You will observe that our summary statement of the General Fund includes a reserve of $14,000,000 which can be applied to meet the State's share of this badly needed addition to our social welfare program.

Subventions for Flood Control

As pointed out under Capital Outlay, there is a substantial reduction in 1957-58 requirements for subventions for flood control, which total $7,064,000, as compared with $16,485,575 for the current year. The State's share of meeting the Los Angeles County Flood Control District's requirements are at the more normal level of $2,859,000, as compared with the $11,695,075 allocation for 1956-57.

Other Subventions

Subventions for public health, roads and highways, and other purposes are generally projected substantially at current levels. Fortunately there is no necessity to repeat the $14,500,000 appropriation for storm and flood damage repair enacted at your last session.

I direct your attention to the proposed appropriation of $3,000,000 recommended on an urgency basis during the current fiscal year to meet the cost of the special poliomyelitis vaccination program.

STATE FINANCIAL SITUATION

I am pleased indeed to be able to submit to you another budget which can be financed within the existing revenue structure without increased tax rates or additional revenue measures. Our higher level of prosperity has made this possible, since our major tax sources are geared to business volume and income levels.

A few years ago it would have seemed incredible that our State tax system would be called upon to support an annual budget of almost two billion dollars. Even with our anticipated high revenue yields, we must recognize that our estimated outgo from the General Fund will exceed income for the year by $84,500,000* and that we must draw upon the carry-over surplus to meet this current deficiency. The budget as proposed will leave intact the Revenue Deficiency Reserve Fund of $75,000,000 in addition to a modest unappropriated surplus in the General Fund.

If our economic situation continues at present trends and if there are no substantial additions to the State's expenditure program, there appears to be a good prospect of continuing for still another year beyond 1957-58 without the necessity for new revenue measures. A projection of General Fund income and outgo through the fiscal year 1957-58 as proposed by this budget and through the following year 1958-59, as shown in the following tabulation, indicates the narrow margin of approximately $25,000,000 by which revenues would fail to meet expenditure requirements after exhausting the carry-over surplus. New or additional taxes for the 1958-59 fiscal year could probably be avoided, either by drawing upon reserves or by making some adjustment in expenditures.

ESTIMATED FINANCIAL OPERATIONS OF THE STATE GENERAL FUND

(Projected through 1958-59, in millions of dollars)

Outgo:	*1956-57*	*1957-58*	*1958-59*
State Operations	$343.7	$401.8	$452.3
Capital Outlay	86.0	112.5	51.3
Local Assistance	693.9	741.5	787.0
Total Outgo	$1,123.6	$1,255.8 *	$1,290.6
Income	1,088.2	1,171.3	1,240.0
Surplus (—Deficiency) of Current Revenues	—35.4	—84.5	—50.6
Prior Year Surplus	145.7	110.3	25.8
Year End Surplus	110.3	25.8	—25.2

* Includes $14,000,000 reserved for medical care for recipients of public assistance.

There are too many uncertainties to enable us to forecast with accuracy so far into the future. This projection is conservative and makes no provision for any substantial additions to the State's expenditure program. There are a great many forces tending to increase State expenditures at far greater rates than the revenues are likely to expand. A most careful and continuous scrutiny of our expenditure program is essential if excessive State tax burdens are to be avoided.

I welcome your careful review of this budget and I offer my full cooperation to aid you in its consideration.

Respectfully submitted,

Goodwin J. Knight

Governor

January 14, 1957

Letter of Transmittal

Honorable Goodwin J. Knight, *Governor of California*
State Capitol, Sacramento, California

Dear Governor Knight: Transmitted herewith are the summary tables and detailed statements for the Budget of the State of California for the Fiscal Year July 1, 1957 to June 30, 1958.

The revenue estimates have been determined after a careful appraisal of trends and after consultation with national and state economists. They are based on what appears to be the most reasonable forecast of economic conditions.

The expenditure requirements have been carefully reviewed consistent with furnishing necessary services and meeting the State's obligations. They are in compliance with your policies and instructions.

Again we have had excellent cooperation from department heads and staff members, and I wish to express my appreciation for their cooperation.

Respectfully yours,

John M. Peirce

Director of Finance

January 14, 1957

Schedule 1-A

GENERAL FUND ACCUMULATED SURPLUS, JUNE 30, 1957 RECONCILIATION OF THE CHANGES FROM THE PREVIOUS BUDGET ESTIMATE

ACCUMULATED SURPLUS, JUNE 30, **1957** (as estimated in the **1955-56** Budget)		$20,333,236
Effect of 1956 Legislative action:		
Increases to expenditure program:		
Additional forest fire protection	$879,127	
Additional funds for salary increases	4,150,000	
Additional funds for Feather River Project	4,838,000	
Net increases to capital outlay projects	722,650	
Flood damage repairs	14,500,000	
Aid to Redevelopment Agencies	3,500,000	
Additional transfer to Legislative Contingent Funds	250,000	
Changed financing of part of support and Capital Outlay for California Polytechnic College from Fair and Exposition Fund to General Fund	377,472	
Other net changes	1,067,554	
Total increases to Expenditure Program		—30,284,803
Provided for loans for flood damage repairs from the State Lands Act Fund which would reduce revenue for the General Fund		—3,120,000
Provided for transfer from the Employment Contingent Fund		+2,390,257
Net effect of other revenue measures		—33,500
ACCUMULATED SURPLUS (—DEFICIT) JUNE **30, 1957,** as reported in the Summary of Financial Legislation dated **May 15, 1956**		—$10,714,810

Effect of revised estimates of revenues, expenditures and transfers as presented in the 1957-58 Budget:

	Previous Estimate	Revised Estimate	
Revised estimate of revenues:			
Revenues for 1955-56	$985,455,759	$1,005,040,608	+$19,584,849
Revenues for 1956-57	1,010,983,541	1,085,299,876	+74,316,335
Revised estimate of expenditures:			
Expenditures for 1955-56:			
State Operations	297,529,597	289,349,517	[a]+8,180,080
Capital Outlay	—984,852	—360,604	—624,248
Local Assistance	638,111,968	633,576,890	[b]+4,535,078
Expenditures for 1956-57:			
State Operations	344,413,918	340,491,324	[c]+3,922,594
Capital Outlay	9,536,327	5,452,716	[d]+4,083,611
Local Assistance	694,588,898	688,722,175	[e]+5,866,723
Revised estimate of transfers from other funds	7,604,925	7,823,595	+218,670
Revised estimate of transfers to other funds	108,052,087	108,395,620	—343,533
Prior year surplus adjustments			+1,295,518
ACCUMULATED SURPLUS, JUNE **30, 1957** (as estimated in the **1957-58** Budget)			$110,320,867

---

[a] Of this total $4,525,204 is due to savings in the Salary Increase Fund and $1,013,717 is due to savings in Emergency Funds.

[b] Of this total $1,920,408 is due to delay in the local hospital construction program, and $2,996,864 is due to decrease in social welfare aid payments.

[c] Of this total $2,316,829 is due to savings in the Salary Increase Fund.

[d] Of this total $3,415,100 is due to delay in use of funds available for the Feather River Project.

[e] Of this total $3,500,000 is due to unused funds for loans to Redevelopment Agencies.

Budget Revenue Estimates

Revenue receipts during the 1957-58 fiscal year are estimated at $1,832,988,405, under the forecasts presented in this budget. Although predicated upon a moderate further improvement in general economic conditions, aggregate collections will be approximately $7,400,000 less than the total anticipated during the current fiscal year. The decline is due entirely to receipt by the State of accumulated royalties on oil and gas production from tidelands held in trust by the City of Long Beach. Under legislation adopted last year, a payment of $130,459,915 was received in October covering royalties and interest through June 30, 1956. Including this lump-sum payment, which has no counterpart in the coming budget period, estimated receipts during 1956-57 total $1,840,378,470. Elimination of the item shows an increase of $123,069,850 in normal revenues between this year and next.

Income for the State General Fund during 1957-58 is estimated at $1,171,302,000,* an increase of $86,002,000 over the total anticipated during the current fiscal year and $166,262,000 above actual receipts during 1955-56. Approximately 97 percent of the General Fund income will be derived from tax levies and 3 percent from such supplementary sources as interest on investments and miscellaneous departmental collections. General purpose tax receipts during the budget period are expected to reach $1,133,832,000, or $84,181,000 more than during the current year. Virtually all levies will contribute to this increase, but most of the advance is attributable to the sales, bank and corporation and personal income taxes—the three leading sources of General Fund revenue.

Aggregate receipts for the various special funds during 1957-58 are estimated at $661,686,000, or $93,392,000 less than during the current year. However, the oil and gas royalty settlement which accrued to the investment fund in 1956-57 distorts a comparison of the two fiscal-year totals. Excluding this abnormal feature, the rise in special fund receipts next year will be $37,068,000. Most of the increase will come from motor vehicle taxes, with very little change in other special fund income. Projected receipts for next year exceed actual collections during 1955-56 by $88,809,000, or more than 15 percent, with vehicle taxes and royalty income providing the lion's share of this change.

Actual and estimated revenues during the three fiscal years covered by this budget are summarized in the table below. A statement of the underlying economic assumptions and a description of developments in each tax source are given in the following pages.

COMPARATIVE REVENUE

(Thousands of dollars)

Taxes, Fees, and Other Sources	*Actual 1955-56*	*Estimated 1956-57*	*Estimated 1957-58*
General Fund:			
Sales and use	$564,225	$605,000	$651,100
Bank and corporation	157,088	167,300	181,000
Personal income	127,816	146,700	165,300
Insurance	39,104	42,533	45,100
Inheritance and gift	36,334	37,500	40,750
Alcoholic beverages	39,318	40,930	40,670
Other sources	41,156	45,337	47,382
Totals, General Fund	$1,005,041	$1,085,300	$1,171,302
Special Funds:			
Motor vehicle fuels	$273,086	$290,800	$308,500
Motor vehicle licenses	207,380	220,539	238,564
Long Beach oil and gas settlement	–	130,460	–
Other sources	92,411	113,280	114,622
Totals, Special Funds	$572,877	$755,079	$661,686
Grand Totals	$1,577,917	$1,840,378	$1,832,988

Prosperity plagued the budget revenue estimates again last year, a development at once gratifying and mildly annoying. Economic conditions in both the Nation and the State during 1956 were moderately better than the forecast made a year ago, and tax collections have reacted accordingly. Against gross national production projected at $403 billion, the indicated total last year was $411.5 billion. Personal income of the people of California reached an estimated $32.3 billion, or $1.0 billion above the expectations which underlay the original 1956-57 revenue forecasts. Largely as a result of this larger aggregate income, State revenues this fiscal year will be approximately 4.8 percent above the estimate prepared a year ago, with most of the gain comprising receipts for the General Fund.

The personal income tax has proved especially productive at the current high level of aggregate individual incomes. The increase in total income coupled with an up-grading of average earnings throughout the lower brackets has produced a marked change in the State's total receipts from this source. Against a 50 percent increase in the gross base between 1950 and 1955, self-assessed income tax advanced 61.5 percent. Assessments which amounted to less than 34 cents per $100 of aggregate personal income in 1953 jumped to nearly 41 cents last year. The rises in income and in tax yield, both greater than had been expected on past performance, account for the $20.4 million revision in the personal income tax estimate for the current fiscal year.

Corporate profits in 1955 were greater than indicated in the sample taken at the close of last year, and preliminary information on 1956 operations shows an extension of this gain in the year just completed. On the basis of these data, the estimate of 1956-57 revenue from the bank and corporation franchise tax has been raised by $16.0 million.

Although the sales tax will return more revenue than was anticipated a year ago, this source is relatively less out-of-line with the initial estimate than either of the income taxes. A higher rate of personal savings and a smaller rise in consumer credit last year made the sales tax less productive in relation to income than it was in 1955. The unusually high volume of business investment in plant and equipment and the anticipated acceleration in new car sales during 1957 are other factors contributing to the $25.0 million revision in sales tax revenue this fiscal year.

---

* This and all subsequent amounts have been rounded to the nearest thousand dollars.

For the most part, other sources have performed only slightly better than expected despite the higher volumes of business and incomes. A comparison of the original and revised estimates of receipts from principal sources during 1956-57 is shown in the following table.

(Millions of dollars)

Taxes, Fees, and Other Sources	*Budget Estimate*	*Revised Estimate*	*Change*	*Percent Change*
General Fund:				
Sales and use	$580.0	$605.0	$25.0	4.3
Bank and corporation	151.3 *	167.3	16.0	10.6
Personal income	126.3	146.7	20.4	16.1
Other General Fund	156.5 *	166.3	9.8	6.3
Totals	$1,014.1 *	$1,085.3	$71.2	7.0
Special Funds:				
Motor vehicle fuels	282.5	290.8	8.3	2.9
Motor vehicle fees	218.2	220.5	2.3	1.0
Other special funds	241.2 *	243.7	2.5	1.0
Totals	$741.9	$755.1	$13.2	1.8
Grand Totals	$1,756.1	$1,840.4	$84.3	4.8

* Adjusted for estimated effect of legislation adopted in 1956.

ECONOMIC CONDITIONS

Budget revenue estimates for the coming fiscal year are predicated upon a further moderate increase in the volume of business transactions and personal incomes during 1957. This assumption rests upon a careful analysis of economic trends, consultation with a number of economists and a review of recent published predictions regarding probable developments this year. Although there are a number of uncertainties in the present outlook, the underlying forces of tremendous growth, industrial expansion and technological progress should carry both national and State economic activity to higher levels during the ensuing twelve months. Supplementing these expansionary elements will be an increase in governmental expenditures, a further rise in wage and salary rates, a larger volume of consumer spending and slightly higher prices.

Implicit in this anticipated pattern of events is the assumption that there will be no drastic change in the international situation which would call for either the mobilization of manpower and industry in a full or a limited war effort or a material reduction in the national defense program occasioned by an upheaval in Russia. Such developments would require the complete reappraisal of the State's immediate financial future.

Possibly the most important question in the current outlook—one which will influence all types of spending—is the effect of the current monetary policy. In an effort to avoid the excesses of an unrestrained business boom and the subsequent readjustment, the supply of credit has been restricted gradually over the last eighteen months to keep the demand for goods and services in line with productive capacity. Interest rates have increased and action has been taken to improve the quality of both business and consumer loans. These elements of control require delicate handling, and much depends upon the ability of money managers to provide only the funds necessary for full employment, yet avoid the credit restraints which might lead to temporary economic stagnation or recession.

Under the pattern of assumptions made regarding spending by government, business and consumers in 1957, the demand for credit will be large. The supply may not increase sufficiently to satisfy all potential requirements, but adjustments can be made which would allow an extension of the rise in business volume. These include the activation of idle funds, further reduction in corporate liquidity, higher velocity of turn-over in bank deposits, further sales of government securities held by banks and more careful forward planning by business and industry. The fact that interest payments are deductible in determining taxable income places a profitable business operation in a preferred position in bidding for funds. Since a large part of the interest cost is charged off against taxes in the case of profit-making corporations and individuals in the higher tax brackets, the effect of higher interest rates is more theoretical than real.

Strong Points

The basic factors of strength which carried economic activity in the Nation to a new high in 1956 should continue to exercise at least equal, if not greater, force in the coming year. Perhaps the most fundamental of these is population growth which expanded the needs of the Nation by approximately 3,000,000 people and of the State by more than 500,000 last year. Although population growth does not guarantee prosperity in a particular year, this rate of growth is an important feature in the current domestic market and a vital element in future planning. Supplemented by a strong interstate movement of people and the trend to suburban living, growth must be a primary consideration in any appraisal of the immediate future.

Technological progress is a second dominant force. Tremendous strides are being made in developing new materials, new processes, new products and new standards of quality and performance. These are the result of research in virtually all fields of activity. This research has three characteristics which have great bearing on economic progress: (1) it is being expanded rapidly, (2) its results appear to follow a geometric progression and (3) there is great competition in adopting its successful findings. Like population growth, technological progress does not guarantee economic expansion in a particular year, but it imparts a powerful forward thrust that must be recognized.

A third basic factor is the rapid increase and better distribution of personal income. Greater buying power in the lower part of the income scale will continue to provide a broad support for current and future markets.

The fourth underlying force is generated by the first three. Growth, technical revolution and deeper markets will stimulate large capital investments. In the course of ten years, the national population will grow to 200,000,000—more than one-sixth above today's total. California will have 17,500,000 residents—a gain of more than one-fourth over the current figure. This growth, together with new processes, new products and mass markets, indicates the degree of capital formation in prospect for the next ten years.

Supplementing these primary elements of strength are a number of secondary and more temporary factors. Included are better labor-management relations resulting from long-term wage contracts in many of the basic industries; inauguration of the new highway construction program which will stimulate increased production of materials and greater employment in this segment of the construction industry; continued need for public works and the voter approval of an unusually large number of bond proposals at the last general election; and the prospect of improvement in the farm income situation.

Questions

Against this array of expansionary forces, the uncertainties and potential sources of weakness are considerably less impressive. Chief among them is the fact that during the last ten years this country has enjoyed an unprecedented period of prosperity. Economic readjustments have been relatively modest in degree or have been limited to specific industries at irregular intervals. Possibly these "rolling adjustments" have replaced major cycles in the economic pattern, but the apprehension still exists that this postwar prosperity may follow the familiar pattern of earlier periods.

Triggered by an imbalance between production costs and selling prices, temporary inventory accumulation, realignment of debt and income, or a change in business or consumer psychology, a recession is possible in 1957—modified only in degree by the factors of strength outlined above and the greater ability of business and government to deal with such a development. In revenue forecasting, apprehension on this point is compounded by the knowledge that changes in business and income are almost immediately and directly reflected in the volume of State revenue, especially in connection with tax levies accruing to the General Fund.

A further uncertainty has been introduced recently by the likelihood of economic difficulties in some of the important European countries as a result of the Near East situation. Repercussions of this crisis could easily affect the international business outlook adversely.

Analysis

Business investment in plant and equipment is one of the key elements in the 1957 economic outlook. Capital expenditures rose moderately until 1956, then flashed to a new record of $36 billion last year and were a major influence in carrying private nonresidential investment to a new high of $46.6 billion. Despite this unprecedented volume, a further gain is in prospect for the coming period. Estimates by Federal agencies indicate that total expenditures for private nonresidential construction next year will be approximately 8 percent above the corresponding figure for 1956.[*] Among the largest contributors to this expanding program will be the utility group and agencies in the religious, educational and social welfare fields. Only minor increases are anticipated in commercial and industrial building. These official forecasts are supported by private surveys which show an increase of 4 percent in private nonresidential building[†] and a gain of approximately 12 percent in capital outlays for plant and equipment.[‡] Based largely upon these forecasts, private nonresidential construction this year has been estimated at $19.5 billion and producers' equipment at $31.0 billion, compared with $18.0 and $28.6, respectively, indicated for 1956.

Value of business inventories is likely to increase next year, but only in proportion to the anticipated price rise. In general, the inventory situation is encouraging. Stocks appear adequate but not heavy. Large-scale liquidation is only a remote possibility and inventory speculation will be discouraged by tight credit, relatively stable prices and long-term labor contracts in important basic industries.

Unit volume of residential building may be somewhat lower both in the Nation and in the State. However, with higher costs and a continued trend toward larger homes, expenditures should not be off as sharply as the number of units. Availability of funds is one of the determining elements in this outlook and, although moves have been made to channel more money into this industry, it is likely that business will be in a more advantageous position than home builders to bid for the limited credit supply. Total expenditures for private residential construction this year are estimated at $14.5 billion, compared with $15.2 billion in 1956 and $16.6 billion in the record year of 1955.

Governmental expenditures appear certain to increase at all levels. Federal expenditures for national security apparently reached the bottom of the curtailment program in 1955-56 and were scheduled to increase even before the outbreak of unrest and dissension in Europe and the Middle East. These developments will augment the rise in prospect for this year. In addition, public works and other Federal activities will be maintained at a higher tempo as a result of increased appropriations authorized at the last session of Congress.

State and local expenditures will rise as a result of population growth, expanded public works projects and higher prices. In the last five years, purchases of goods and services by these agencies have shown an up-trend of approximately $2.5 billion annually. During 1957, this will be supplemented by an increase of approximately $900 million in Federal aid for highways and other purposes and by expenditures from the $2.3 billion in bond funds approved by voters last November. In total, governmental expenditures—Federal, state and local—during 1957 are estimated at $85.5 billion, against less than $80 billion last year and $76.8 billion in 1955.*

---

[*] Excluding public construction, which is expected to increase 12 percent but for this analysis is treated as part of total governmental expenditures for goods and services. The data on estimated private and public expenditures are from a joint study by the U. S. Department of Commerce and Department of Labor.

[†] F. W. Dodge Corporation.

[‡] *Fortune*, December 1956, and *Business Week*, December 15, 1956.

The projected pattern of larger business investment, increasing expenditures by government, slightly higher prices and greater personal income forms a foundation for higher personal consumption expenditures. Purchases of durable goods—the weakest sector in 1956—should expand as a result of newly designed and engineered cars for 1957. Although a repetition of the fabulous 1955 sales has been suggested, the automobile market is likely to experience some financing difficulty and a more moderate advance from 5.9 million new car sales in 1956 to 6.5 million this year has been assumed for purposes of this analysis. Household durables, the second important category of consumer hard-goods, should hold at last year's level, with an advance in price offsetting the reduction in volume attributable to curtailed home building. On this reasoning, consumer expenditures for durable goods have been projected at $36 billion this year, compared with $34 billion in 1956.

Estimated at $139 billion, personal expenditures for nondurable goods—food, clothing, household supplies and the like—are expected to parallel the increase in population and advance in prices to register a 4.4 percent gain over last year. Payments for consumer services, such as utilities, rents and medical care, which have shown a strong and persistent uptrend for many years, are expected to total $104 billion, or more than $5 billion above the estimate for last year.

In total, individual expenditures for goods and services during 1957 should reach $279 billion, an increase of nearly $13 billion over the record established in the year just closed. A comparison of this projection with the comparative amounts for other recent years in per capita terms is shown in the following table.

PER CAPITA PERSONAL EXPENDITURES

	Durables	*Non-durables*	*Services*	*Total*
1950	$189	$664	$430	$1,283
1951	177	724	457	1,358
1952	171	745	485	1,402
1953	188	752	516	1,456
1954	182	750	535	1,467
1955	217	767	561	1,546
1956 Est.	203	798	590	1,592
1957 Est.	212	818	612	1,641

Amounts projected for each broad section of the national economy in 1957 give a total gross production of $433.0 billion †, compared with $411.5 billion last year and $390.9 billion in 1955. The expected increase ($21.5 billion) is a little greater than that registered in 1956. About half of the rise is traceable to the assumption regarding higher prices and the remainder to a larger physical volume of goods and services. Amounts comprising these production totals are shown in the adjoining table.

In spite of this advance in gross production, corporate profits are not likely to show a material rise. This is an area where it is extremely difficult to make accurate predictions, since profits represent the residual between costs and selling price. They are vitally influenced by productivity, where a minor fluctuation has great cumulative effect. However, it seems probable that corporations in general will remain in a cost-price squeeze with a further narrowing of profit margins and a considerably smaller increase in net earnings than would be indicated by the rise in gross business. Aggregate profits are estimated at $44 billion, against a tentative figure of $43.3 billion ‡ last year and $42.7 billion in 1955.

Unless there is a sharp increase in productivity, this year will show a continuation of the full employment achieved since early in 1955. Wage and salary rates are likely to be somewhat higher, as adjustments and cost-of-living clauses in existing labor contracts come into play. Wage rate increases occurring recently in major industries will be in effect for the full year and can be expected to spread more generally through the economy.

Although the cost-price squeeze will also affect some segments of noncorporate business, proprietorship income should be greater this year than last. The farm situation will show some improvement as prices rise and the threat of overhanging surpluses in basic agricultural commodities is reduced by government action. Hence, net farm income—the weak part of this income sector in recent years—should show improvement in 1957. Gains are probable as well in the professional service group—financial, legal, medical and other.

Income from property can be expected to trace the gradual upward trend displayed in the last few years—with interest receipts moderately higher, some rise in dividends and essential stability in rental receipts. Curiously, the latter has shown a marked weakness in reports for recent years, after the gains following the elimination of rent controls.

Receipts from pensions, disability allowances, social insurance and similar sources will continue to rise, chiefly as the result of the broader coverage of social insurance, higher benefit payments and normal growth. Personal contributions for social insurance will also be greater, offsetting to a slight extent the anticipated increase in personal income.

In total, personal income is estimated at $342 billion, or approximately $17 billion above the indicated total for last year. No change is expected in personal tax rates; hence, approximately $40.7 billion of this sum will be paid to the Federal and state governments in the form of income taxes. On this basis, disposable income will amount to $301.3 billion — sufficient to support the estimate of personal spending ($279 billion) and afford savings of $22.3 billion, or approximately $1.7 billion above the savings total for 1956.

---

* These amounts represent governmental purchases of goods and services, excluding such items as public assistance, pensions and expenditures of public service enterprises. The concept is that used in the national economic accounts.

† Includes $1 billion net foreign investment not discussed in this statement.

‡ Based largely on data for the first nine months of 1956.

ECONOMIC DATA

(Dollar amounts in billions)

	1955 Actual	*1956 Preliminary*	*1957 Estimated*
Gross national product	$390.9	$411.5	$433.0

California population July 1 (thousands)	13,035	13,600	14,115

* Expenditures of California residents represents disposable income adjusted for estimated change in short-term consumer credit and estimated change in liquid asset holdings of individuals—e.g. money, bank accounts, savings bonds. Amounts are estimated by the State Department of Finance.

Source: Data for 1955 from reports of the Office of Business Economics, U. S. Department of Commerce; preliminary figures for 1956 based on Department of Commerce reports for the first three quarters with fourth quarter estimated by the State Department of Finance; estimates for 1957, the estimates of California's personal income (except 1955), personal taxes, disposable income and population are based upon studies by the Financial Research Section, Budget Division, State Department of Finance.

CALIFORNIA SITUATION

California's economic outlook as 1957 gets under way is even more promising than that of the Nation. Continuation of high level business conditions should maintain the State's population growth at about the 500,000 annual rate characteristic of the post-Korea years, bringing the total to more than 14,600,000 residents by July of 1958. Aircraft production, the principal manufacturing industry, is assured capacity volume by the tremendous backlog of orders for new type military and civilian planes. Production of guided missiles will continue to expand, and further growth in the comparatively infant electronics industry is virtually assured. Numbered among the other activities in a strong position are chemicals, petroleum, primary metals, electrical machinery and motor vehicle production. As a result of advance planning during recent years, this State is in a position to go forward rapidly with its share of the new, expanded Federal highway project.

California agriculture will not obtain direct benefits from the soil-bank program to the same extent as some of the other states, but its situation last year was slightly better than the Nation in general. With average weather conditions and moderately higher prices for farm products, this industry should score further advances this year.

Residential construction may decline, but other building should hold up well, especially in the industrial and public utility fields where the backlog of plans and work-in-progress at the year's outset undoubtedly exceeded any earlier period by a wide margin. Public works other than highways should also expand as a result of the several important bond issues approved at the November election.

Personal income of California residents is expected to increase to $34.8 billion, from an estimated total of $32.3 billion in 1956 and $29.4 billion in 1955. With no change in Federal and State tax rates, disposable income in 1957 is estimated at $30.3 billion, up $2.0 billion from last year. Allowing for an increase in personal savings and a slightly larger volume of consumer credit extensions, expenditures by California residents are projected at $29.8 billion, against an estimated $27.8 billion in 1956. Taxable corporate profits in 1957 are estimated at $4.1 billion, compared with an indicated $3.9 billion* last year. These estimates of total personal income, personal spending and corporate profits, with allowances for the normal lag in tax collections and other influences, are key factors in the budget revenue forecasts for 1957-58.

GENERAL FUND REVENUE

Sales Tax—$651,100,000

Revenue from the retail sales tax, use tax and permit fees is forecast at $651,100,000 for 1957-58, compared with a probable total for the current fiscal year of $605,000,000 and actual receipts of $564,225,000 in 1955-56.

For the most part, revenues during the budget year will be determined by taxable sales in 1957, and two basic approaches were used in estimating the sales volume for that period. The first was based on the overall relationship between taxable sales and disposable income of Californians (personal income less Federal and State income taxes), adjusted for changes in consumer credit outstanding and changes in holdings of liquid assets of individuals in this State. This series has proved to be a remarkably accurate indicator of taxable sales volume, although the latter includes taxable transactions of businesses as well as individuals. Based on this relationship and assuming a moderate increase in liquid assets and consumer credit, taxable sales of $20,960,000,000 appear probable for 1957. The same relationship would have placed sales for 1956 at $19,408,000,000 compared with an apparent † $19,281,000,000.

The second estimate of sales for 1957 was based on a detailed analysis of trends over the past seven years in the 43 business classifications for which sales tax data are published by the Board of Equalization. In addition, surveys and forecasts for special groups such as motor vehicles, construction and capital outlay for plant and equipment by industrial and commercial establishments have been used. In line with the growth in population and personal income and the expected moderate rise in prices, consumer purchases of nondurable goods are expected to increase by about 6.5 percent during the current year to total $8,113,000,000. By comparison, purchases of nondurables in 1956 were 10.2 percent higher than during the preceding year.

---

* Based upon reports from corporations sampled in connection with the bank and corporation tax estimate.

† Taxable sales of only the first three quarters were known at the time this estimate was prepared. The total includes an estimate for the fourth quarter.

Purchases of consumer durable goods, excluding automobiles and building materials, are expected to total $1,869,000,000—3.7 percent higher than similar purchases in 1956 which in turn were 7.4 percent above the 1955 level. In part, the relatively higher purchases of nondurables and household durables during 1956 is traceable to the slump in automobile sales last year. Dollarwise, a new high in automobile sales is expected in 1957, exceeding the previous year by almost 13 percent. Although the number of new cars produced in 1957 is expected to be down from the record established in 1955, a greater allocation to California, plus a 7 percent increase in average prices, will be the contributing factors in the expected record sales total. Used car sales will also rise, but only a slight increase is anticipated in sales of parts and other taxable automotive supplies.

The decline in expenditures for residential construction will be tempered by the trend to larger and more expensive units. Recent surveys of business plans for outlays for plant and equipment in 1957 indicate another big year for this type of expenditure, but the increase is not expected to be as great as last year. Expenditures for industrial and commercial building should more than offset the decline in home construction. Consequently, taxable sales of the building materials group have been estimated to increase 4 percent to total $2,335,000,000. The corresponding increase in 1956 was 6.7 percent.

In line with the announced plans for plant and equipment expenditures, taxable sales of producers' equipment and supplies have been estimated at $4,170,000,000. This total is 12.6 percent higher than 1956 but the gain is less than that recorded last year (15.3%).

Total taxable sales for 1957 have been placed at $20,907,000,000, or 8.4 percent above the preceding year. This estimate, developed by a detailed analysis of the industry groups, was substantially the same as that obtained by the correlation between sales and adjusted personal income. Estimated sales for 1957 compared with apparent sales in 1956 and actual amounts for 1955, summarized in five broad groups, are given below.

TAXABLE SALES IN CALIFORNIA
(Millions of dollars)

	Actual 1955	Apparent 1956[1]	Percent change from 1955	Estimated 1957	Percent change from 1956
Consumer nondurables	$6,916	$7,618	10.2	$8,113	6.5
Consumer durables[2]	1,678	1,802	7.4	1,869	3.7
Motor vehicles and motor vehicle supplies and parts	4,084	3,915	—4.1	4,420	12.9
Building materials	2,104	2,244	6.7	2,335	4.1
Producers' equipment and supplies	3,213	3,703	15.3	4,170	12.6
Total	$17,994	$19,281	7.2	$20,907	8.4

[1] First three quarters actual, fourth quarter estimated.
[2] Other than motor vehicles and building materials.

Taxable sales of $20,907,000,000 forecast for 1957 were allocated by quarters assuming the seasonal pattern shown for the years 1949 through 1955. To complete the estimate for the fiscal year, sales for the first and second quarters of 1958 were projected at 6 percent greater than the corresponding periods of 1957.*

Receipts from the sales tax audit program and other miscellaneous assessments have been estimated at $12,600,000, the amount apparent for the current fiscal year, or slightly less than the $12,736,000 received in 1955-56. Sales tax on gasoline tax refunds (fuel consumed off the highways) has been projected at $1,200,000 for 1957-58, compared with an apparent $1,200,000 for the current fiscal year and $1,272,000 for 1955-56.

Bank and Corporation Tax—$181,000,000

Corporate profits during 1955, 1956, and 1957 largely determine collections of the bank and corporation tax in the fiscal years 1956-57 and 1957-58. These revenue estimates are based on the amount of corporate income attributable to California operations. The latest data indicate that almost $3,650,000,000 was earned during 1955. In order to estimate 1956 corporate earnings, a questionnaire was sent to 400 corporations in 68 fields of activity. Usable replies were received from 345 corporations comprising almost 46 percent of the bank and corporation tax base. The percentage change as shown by this selected sample was used to estimate 1956 earnings subject to this tax. Of the 68 industrial divisions, 48 indicated that 1956 was more profitable than the previous year, 4 showed no substantial change, while 16 industries had lower earnings. Those scoring the largest gains were mining, construction, financial corporations, and utilities. Manufacturers of transportation equipment and the oil production industry, ranking one and two incomewise, were among those reporting less income in 1956 than in the prior year. Because of the decline in the transportation equipment group, manufacturing as a whole is estimated to have shown little change last year.

A comparison of income, by major industries, for 1955 and 1956 is shown in the following table.

CORPORATE PROFITS BY MAJOR INDUSTRY
1955 AND 1956
(Thousands of dollars)

	1955 Actual	*1956 Estimated*	*Percent change*
General Corporations:			
Agriculture	$41,638	$45,800	+10.0
Mining	17,326	39,270	+126.7
Construction	79,875	113,526	+42.1
Manufacturing	1,537,625	1,542,500	+0.3
Oil production	280,125	267,240	—4.6
Trade	488,244	522,100	+6.9
Services	150,334	165,100	+9.8
Miscellaneous	1,750	1,800	+2.9
Total, General Corporations	$2,596,917	$2,697,336	+3.9
Financial group	$557,772	$633,600	+13.6
Utilities	494,361	540,582	+9.3
Grand Total	$3,649,050	$3,871,518	+6.1

In general, the estimate of taxable corporate profits during 1957 rests upon the basic assumption that earnings this year will remain relatively stable as a result of the cost-price squeeze mentioned above. Exceptions to this general pattern include: (1) the transportation equipment industry, which should benefit by a recovery in the volume of motor vehicle output; (2) oil production and refining, which is likely to experience a more orderly marketing situation as a by-product of the diversion of American oil to Europe; (3) the financial group—particularly banks; and (4) public utilities. Higher interest rates, together with a lower offset for losses on government securities, should materially improve the operating ratios of banks, while the demand for the services performed by utilities should continue strong as a result of increasing population and business activity. These two groups, financials and utilities, are each expected to increase their earnings by approximately 10 percent in 1957. In total, corporate profits during 1957 are estimated at $4,080,000,000, or $208,000,000 more than the volume indicated for last year.

---

* Although taxable sales of the first quarter of 1958 are reflected in collections during 1957-58, only about 15 percent of the tax on sales of the second quarter will be received before June 30, 1958.

Collections from the audit program are expected to total $7,800,000 and $8,300,000 in 1957 and 1958, respectively, compared to $8,300,000 estimated for 1956. The second installment of the bank tax, due in January 1957, will total $10,427,000, and the corresponding payment in 1958 is estimated at $13,750,000. After conversion of these calendar year data to fiscal years, bank and corporation tax revenue is estimated to total $181,000,000 in the budget year, compared with $167,300,000 currently and $157,088,000 in 1955-56.†

Personal Income Tax—$165,300,000

Three factors are of primary importance in determining the volume of collections under the State income tax: (1) the aggregate receipts by individuals from such sources as wages and salaries, proprietorships, dividends, interest, rentals and other sources, (2) the distribution of this aggregate amount among the several taxable income brackets and (3) the net gain realized from sales of property—both tangible and intangible.* In estimating the first of these variables, the budget agency relies upon estimates of personal income, by states, reported annually by the United States Department of Commerce. As the latest official estimate relates to the 1955 calendar year, the Commerce series is brought up to date on the basis of studies by the State Department of Finance covering recent trends in wage and salary disbursements in California, proprietorship income, property income and receipts from other sources. In the past, these studies have provided a firm basis for estimating total personal income, and the current analysis shows a continuation of the dramatic gains reported for other recent years. From a total of $29,438,000,000 in 1955, aggregate income from all sources other than capital gains advanced to $32,286,000,000 in the twelve months just closed. Under the assumptions discussed above relative to the national and State economic pattern in 1957, personal income receipts by Californians this year are estimated at $34,800,000,000.

Allowance for the second variable—distribution by income brackets—rests essentially upon the fact that, in general, the bulk of wage and salary disbursements is received by those in the lower and middle income groups, proprietorship income by people in the middle range and property income by those in the upper levels. Relationships between the income from these sources and the resulting State tax payments have been established by analyses of tax returns over a period of years.

Personal income of California residents during the three calendar years essential to the budget revenue estimates is shown in the following table.

ESTIMATED PERSONAL INCOME
(Millions of dollars)

	1955	*1956*	*1957*
Wages and salaries	$20,184	$22,392	$24,300
Proprietors' income	3,858	4,131	4,400
Property income *	3,666	3,882	4,070
Other income †	2,306	2,507	2,710
Less: Social insurance contributions	—575	—627	—680
Totals	$29,438	$32,286	$34,800

* Dividends, interest and rents.
† Chiefly pensions, unemployment benefits, disability allowances and direct relief.

The third tax source—capital gains—has no counterpart in the personal income series and must be estimated separately. For lack of a better index, the estimate is based upon stock market activity—one of the factors influencing this type of income, though by no means the only one. A relationship between the total market value of all stocks traded on the registered stock exchanges in the United States and the amount of taxable income attributable to capital gains has been established. On the basis of this correlation and the fact that the total value of traded stocks in 1956 was approximately 5 percent below that of the previous year, estimated tax payments in 1956-57 arising by reason of this type of income were reduced accordingly. A return to the 1955 volume of transactions was assumed for 1957, with a consequent recovery in capital gains and in the 1957-58 tax payments traceable to this source.

Allowance is made for audit assessments of $7,100,000 and $7,600,000 in 1957 and 1958, respectively, against a total of $6,600,000 under the audit program of the Franchise Tax Board in 1956.

On the basis of this analysis, the personal income tax is estimated to yield $165,300,000 during the 1957-58 fiscal year, compared with $146,700,000 in the current period and actual receipts of $127,816,000 in 1955-56.

Insurance Tax—$45,100,000

Premium payments on insurance policies in California during 1956 increased at a rate roughly paralleling the population growth and price rises. Reports from 116 insurance companies, accounting for more than two-thirds of the total business and including the principal carriers in each field, indicate an advance of 8.7 percent in premium payments compared with the previous year. This will raise the gross tax base to $2,158,000,000. With allowance for dividends and other credits to policyholders, the net base for 1957-58 collections will exceed $2 billion and at the fixed 2.35 percent tax rate assessments are estimated at $47,519,000. Deductions for property taxes paid in connection with principal offices maintained in California will reduce net collections to $45,100,000. Comparative amounts in 1956-57 and 1955-56 were $42,533,000 and $39,104,000, respectively.

---

† The supplementary corporation income tax is combined with the bank and corporation franchise tax for purposes of revenue estimating and reporting in this budget. The two levies are identical in essential features. The corporation income tax is estimated to yield $1,300,000 in 1956-57 and $1,400,000 in 1957-58. Actual receipts last year were $1,326.145.

* As indicated below, capital gains are not considered to be personal income in the concept of economic accounting and must be estimated separately for purposes of the personal income tax projection.

Inheritance and Gift Taxes—$40,750,000

Inheritance and gift tax revenues depend primarily upon the number and size of bequests and upon the relationship between the decedent or donor and the beneficiary. In general, the rates of tax vary directly with the size of the inheritance or gift and with remoteness of the relationship. Exemptions are scaled down as the relationship recedes. General business conditions and property values also influence the volume of collections, but there is a lag between changes in property values and the resultant change in tax receipts. Hence, collections should continue for some time to reflect the increases in value of real property and intangibles occurring during recent years. Inheritance tax collections are currently running at a per capita rate of $2.60 a year, and receipts totalling $35,000,000 can be anticipated for the current fiscal year. This compares with actual collections of $34,172,000 during 1955-56. A further rise is expected and on this basis inheritance tax collections in 1957-58 have been estimated at $38,000,000. Two large estates remaining to be settled could augment the total materially, but there is not sufficient information at hand regarding either the size or time of payments to warrant including them in the projection for 1957-58.

Gift tax transactions picked up last year, both in number of returns and in volume of collections. Receipts from this source amounted to $2,161,000, against $1,821,000 the previous year. With better estate planning and greater recognition of the tax advantage in making gifts, receipts from this source should continue to increase. A total of $2,500,000 has been estimated for the current year and $2,750,000 for 1957-58.

Alcoholic Beverage Taxes—$39,685,000

Two sources contribute to the total of nearly forty million dollars expected from taxes on alcoholic beverages during 1957-58: the excise on distilled spirits and the levy on beer and wines. A little more than 88 percent of the total will be derived from the excise of $1.50 per gallon on hard liquor, 10 percent by the two cent tax on each gallon of beer and the remaining 2 percent from wines.

Per capita consumption of distilled spirits has shown very little change over the last seven years. From a total of 2.578 gallons per adult in 1950, the trend was slightly downward until 1954, when the rate reached 2.428 gallons. However, the movement has been reversed in the last two years, reaching 2.584 gallons in 1956—the highest volume since 1946, when the ratio was distorted by the replenishing of dealer stocks. A continuation of the minor upward cycle is assumed for 1957 and 1958, sufficient to carry the consumption rate to 2.63 gallons per adult in the latter year. With a growing population and rising consumption, receipts from this source are estimated at $33,450,000 in 1956-57 and $35,075,000 in the budget year. Actual receipts during the last fiscal year were $33,970,000, including $3,100,000 collected under the non-recurring 70 cent per gallon tax on dealers' stocks on July 1, 1955, when the distilled spirits excise tax was increased from 80 cents to $1.50 a gallon.

The slight decline in beer consumption per adult, apparent in the record over several years, persisted through 1956. From an average of 22.52 gallons for each person over 21 years of age in 1950, this ratio has fluctuated gradually downward to an indicated 22.14 gallons last year. Until there is a clear indication of a reversal in this trend, future consumption must be assumed to remain at the 22 gallon level. Allowing for an increase in the number of adults, aggregate consumption in 1956-57 has been projected at 192,400,000 gallons and in 1957-58 at 197,300,000 gallons. The two cent tax on these volumes will produce $3,848,000 in the current year and $3,946,000 in the coming fiscal period. Actual receipts during 1955-56 were $3,800,000.

Use of dry wines has marked a consistent upward trend throughout the postwar period, reaching an all-time high of 1.22 gallons per adult last year. A roughly parallel trend at a much lower level is shown for sparkling types, while sweet wine consumption has fluctuated between 1.5 and 2.1 gallons, with the latter figure more characteristic of recent years. The tax rates of one cent per gallon on dry varieties, two cents on sweet and 30 cents on sparkling wines are estimated to return $664,000 in 1957-58 and $642,000 currently, compared with approximately $573,000 in 1955-56.

These amounts are summarized in the following table.

	(Thousands of dollars)		
	Actual 1955-56	*Estimated 1956-57*	*Estimated 1957-58*
Beer	4,373†	3,848	3,946
Dry wine		108	112
Sweet wine		354	356
Sparkling wine		180	196
Distilled spirits	$33,970*	$33,450	$35,075
Totals	$38,343	$37,940	$39,685

† Cannot be distributed according to sources, due to audit adjustments and other factors.

* Includes $3,100,000 non-recurring tax on dealers' stocks July 1, 1955.

Private Car Tax—$1,510,000

Anticipated increases in the assessment of railroad cars owned by nonrailroad companies and a moderate rise in the applicable tax rate are expected to produce a record volume of income from the private car tax in 1957-58. The levy, imposed in lieu of local property taxes on this type of equipment, is based upon the assessed value and the number of days each unit is located in California. The rate imposed is the average tax on real and personal property throughout the State in the preceding fiscal year. Although the number of cars subject to the tax has remained relatively stable for several years, there has been a gradual increase in values and a moderate rise in the tax rate. A continuation of these trends has been assumed in making the projections for 1957-58. Total receipts, including minor amounts of interest and penalties, are estimated at $1,510,000, compared with $1,425,000 in the current year and $1,330,000 during 1955-56.

Other General Fund Revenue—$46,857,000

For the most part, other revenue to the General Fund represents such nontax items as receipts from the care of patients at State hospitals, a share of the oil and mineral royalties, interest income and departmental charges of various types. In addition, there is included the General Fund share of liquor license fees, horse racing revenue and motor vehicle license fees shown with major taxes and fees in Schedule 2. These account for $9,387,000, or approximately one-fifth of the total treated as "other revenue." Departmental revenue available for general use has shown a gradual increase over the years, and will continue to rise in 1957-58, reaching an estimated $19,046,000.

The total of $46,857,000 in other General Fund revenue anticipated for next year compares with $46,902,000 currently and $40,799,000 in 1955-56. Approximately two-thirds of the increase over the two-year period can be traced to income from investment due to the higher interest rates and a more complete investment of idle funds.

SPECIAL FUND REVENUE

Approximately one-third of the State's revenue is restricted as to use by provisions of the Constitution or statutes, and under California's financial procedure this money is separately accounted in various special funds. Three categories of income comprised in the special fund total are: (1) the receipts from broad tax levies which are dedicated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees which must be used for highways and activities related to motor vehicles illustrate the first of these classes. License fees for the regulation of businesses and professions are typical of the second, while oil royalties dedicated at least in part to beach and park development are examples of the third group. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

Roughly 85 percent of all special fund revenues relate to the ownership or operation of motor vehicles, and all but a minor share of this money must be used for highway purposes—including the maintenance and construction of roads and streets, traffic control, or motor vehicle regulation. During the 1957-58 fiscal year, $566,314,000 will be obtained from the several motor vehicle taxes and fees, an increase of $37,175,000 over the amount anticipated for the current year and $69,927,000 more than was received in 1955-56. A major cause of this growth has been the rapid rise in the number of registered vehicles—from $6\frac{3}{4}$ million at the end of 1955 to more than $7\frac{1}{2}$ million by the end of this calendar year. Adding to this "domestic" base, out-of-State vehicles entering California increased from 1,966,000 in 1955 to 2,100,000 last year and this trend undoubtedly will extend into the coming years.

Fees for regulatory services and charges for special assistance to various sections of industry, business and the professions are normally the second largest source of special fund revenue, but in the current year this rank will be taken by the non-recurring lump sum payment of accrued oil royalties and gas revenue by the City of Long Beach. Among the relatively smaller special fund revenues—amounting, however, to many millions of dollars a year—are horse racing license fees, liquor license fees, interest income from special fund investments and miscellaneous departmental collections.

Motor Vehicle Fees—$240,850,000

A number of motor vehicle items are brought together in this total of nearly a quarter of a billion dollars. Principal among them are the registration fee paid by all vehicle owners, weight fees required on trucks and buses and the license fee levied in lieu of local property taxes on motor vehicles. Drivers' license, caravan, transfer of ownership and testing fees together with miscellaneous other charges are also included in the total.

With a pick-up in new car sales anticipated for 1957 and continued large-scale migration to this State, fee-paid registrations are expected to increase from 7,077,000 (partly estimated) at the end of 1956 to 7,537,000 by the close of 1957 and 7,960,000 in December 1958. Because of an increase in the proportion of trucks and heavy trailers, the average registration and weight fee is expected to rise slightly—from $14.35 last year to $14.48 in 1958. The combination of a growing registration roll and larger average payments will carry aggregate registration and weight fee collections from $102,043,000 in 1955-56 to $108,108,000 in the current period and $114,646,000 in the budget year.

A third factor, vehicle values, must be taken into consideration in projecting the motor vehicle "in lieu" tax and, for purposes of administering this law, value depends upon purchase price and age of the vehicle. The number of registrations and distribution by type of vehicle have been analyzed in terms of original cost and age. Under provisions of the statute, vehicles are depreciated to a nominal value over a period of nine years. Hence the aging of vehicles sold in a record year like 1955 tends to reduce the tax base rapidly, and an advance in sales coupled with higher prices—both of which are indicated for 1957—tends to produce a sharp expansion. The rate is fixed by law at $2 per hundred dollars of assigned value. Allowance for these considerations and the fact that legislation adopted in 1955 extended the tax to all house trailers, even though not used on the highways, results in an estimate of $117,600,000 in revenue from this source in 1957-58, compared with $107,250,000 for the present fiscal year and $100,484,000 in the twelve months ending last June 30.

A wave-like pattern in drivers' license renewals will carry receipts from this source to a record level in 1957-58. Other charges will increase moderately. Amounts anticipated from each source, compared with actual collections last year, are:

	(Millions of dollars)		
	Actual 1955-56	*Estimated 1956-57*	*Estimated 1957-58*
Registration and weight fees	$102.2	$108.1	$114.6
License (in lieu) fees	100.5	107.2	117.6
Drivers' licenses	5.9	6.1	7.1
Caravan fees	0.6	0.6	0.6
Other fees and charges	0.8	0.9	0.9
Totals	$209.8	$222.9	$240.8

Motor Vehicle Fuel Taxes—$308,500,000

Well over five billion gallons of motor vehicle fuel will be subject to the six cent gasoline tax or the seven cent use (diesel) fuel tax during 1957-58. This compares with approximately four billion gallons in 1954-55—a 25 percent growth over the course of three years.

The long-term downward drift in gasoline consumption per vehicle appears to have been arrested at least temporarily in 1955-56. From an average of more than 700 gallons just after the war, this trend carried consumption per vehicle down to 631 gallons (adjusted for delayed collections) in 1954-55. The following year the ratio increased to 639 gallons, and in the current period it appears to be about 637. The increase in multiple-car families, modernized highways with better traffic situations and improved fuel should cause a resumption of the downward trend, and for this reason average consumption in 1957-58 has been estimated at 635 gallons. Based on a total of 7,620,000 vehicles (including those exempt from registration fees), gasoline tax receipts in the coming year have been estimated at $290,300,000, extending again the increase which has marked receipts from this source. Estimated collections this year are $273,600,000, while actual receipts in 1955-56 were $257,243,000.

The use fuel tax is expected to show some reaction to the "pickaback" movement of heavy commercial trailers by rail or boat rather than over the highways. It is reported that some 500 trailers are now used in this way and the number is increasing. This development will restrict the normal increase in use fuel revenue; hence, receipts during the budget year have been estimated at $18,200,000, against $17,200,000 in the current period, and $15,843,000 in 1955-56.

Receipts from the two levies during the fiscal years covered by this budget are:

	(Millions of dollars)		
	Actual 1955-56	*Estimated 1956-57*	*Estimated 1957-58*
Motor vehicle (gasoline) fuel	$257.2	$273.6	$290.3
Use (diesel) fuel	15.8	17.2	18.2
Totals	$273.0	$290.8	$308.5

Motor Vehicle Transportation Tax—$19,250,000

The rail-trailer combination will also affect the gross receipts tax on highway haulers. This tax applies only to operation involving use of State highways outside cities. Thus, it is possible for transportation companies to avoid or minimize the use of highways by loading trailers on flat cars for an intercity haul, or, where deliveries outside the point of destination are involved, by using rail facilities over most of the route with only the short delivery outside the point of destination subject to tax. The extent of these operations in dollar terms is not known but, whatever the amount, it will serve to diminish the volume of receipts otherwise to be expected. In the past, the estimate of transportation tax revenue has been based upon the long-term relationship between gross receipts of highway transportation companies and personal income of California residents. This method has been used again this year, except that deductions of $500,000 in 1956-57 and $750,000 in 1957-58 have been made to adjust for the pickaback development. The adjusted totals are $19,250,000 for the coming year, $17,800,000 for 1956-57, and $15,921,000 in the last fiscal year.

Horse Racing Fees—$28,278,000

Parimutuel wagering on horse races has shown a general relationship to disposable income over a period of many years, and the increase in revenue from this source in 1957-58 is predicated largely upon the anticipated rise in personal incomes. After an increase this year, the number of authorized racing days will remain unchanged in the coming fiscal period. As the license tax is graduated according to the aggregate volume of betting at a meet, each of these factors influences revenue yields.

Aggregate parimutuel pools during 1957-58 are projected at $493.3 million, compared with $480.5 million estimated for the current year and an actual total of $442.8 million in 1955-56. Actual and estimated revenue and the distribution of this money among the participating funds are shown in the table below.

	(Thousands of dollars)		
	Actual 1955-56	*Estimated 1956-57*	*Estimated 1957-58*
Tax on parimutuel pools	$23,289	$25,600	$26,314
Breakage	1,329	1,650	1,682
Unclaimed tickets	272	250	280
Fines and penalties	1	2	2
Totals	$24,891	$27,502	$28,278
General Fund	5,176	5,902	6,116
Fair and Exposition Fund	17,636	19,200	19,730
State College Fund	1,329	1,650	1,682
Wildlife Restoration Fund	750	750	750

Liquor License Fees—$10,150,000

As indicated in the revenue statement last year, the principal developments in the ordinarily stable liquor license fee collections have been the result of recent legislation. Beginning with the 10 percent surcharge in 1954, which was extended to all fees in 1955, and continuing with the application fee required by Chapter 1748 of the Statutes of 1955, receipts from this source have increased more than $3,000,000 a year. The application fee is a one-time charge, however, applying to original on-sale and off-sale general licenses but not to transfers or renewals. The Department of Alcoholic Beverage Control plans to issue additional on-sale and off-sale permits this year. Applications for the former at $6,000 each and the latter at $3,000 account for virtually the entire increase anticipated in connection with liquor license collections during the current fiscal year.

Revenues from the 10 percent surcharge and the application fee accrue to the General Fund; receipts from the normal fee for all permits are deposited in a special fund for return to the cities and counties. Actual collections in 1955-56, together with estimates for 1956-57 and 1957-58 are shown below.

	(Thousands of dollars)		
	Actual 1955-56	*Estimated 1956-57*	*Estimated 1957-58*
General Fund	$974	$2,990	$985
Alcoholic Beverage Control Fund	8,664	8,910	9,165
Totals	$9,638	$11,900	$10,150

Other Special Funds—$64,045,000

The budget estimate of $64,045,000 from other special fund sources in 1957-58 represents an abrupt drop from the current year, but is substantially more than the amount actually received in 1955-56. As indicated above, settlement of the Long Beach tideland oil royalty question by a lump-sum payment of $130,460,000 last October and the deposit of this money in a special investment fund brought the total of miscellaneous special fund revenue to a sharp peak in 1956-57. This sum had accrued over a period of many years and a payment of this size will not recur next year. However, the legislation adopted last year provided for continued sharing by the State in current and future revenue from oil and gas production in the Long Beach tideland area, involving payments estimated at $11,600,000 annually.

TAX TRENDS

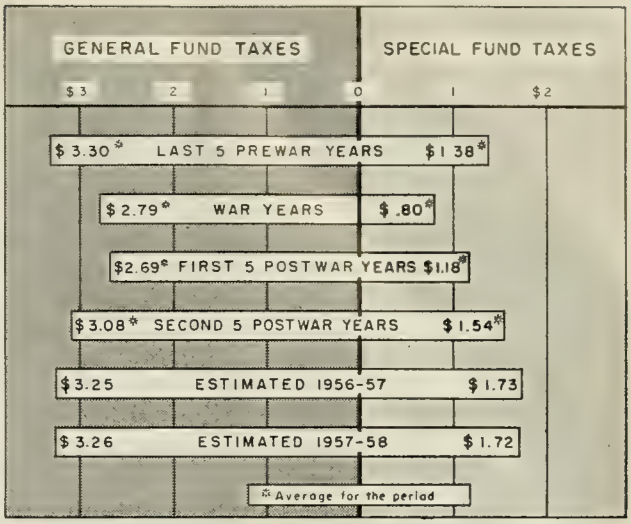
Last fiscal year brought to a close the first postwar decade—a period which saw State revenue receipts increase from $496,847,000 to $1,577,917,000. More than 95 percent of the $1,081,070,000 revenue gain came from tax levies—less than 5 percent from nontax sources. Approximately 60 percent of the increase accrued to the State General Fund and 40 percent to special funds. However, the relative advance in special fund revenue (341.6%) was much greater than that which occurred in General Fund receipts (173.7%), due chiefly to the increase in number of motor vehicles and the adjustments in highway user taxes required to finance the State's road construction program. As a result, 36.2 percent of all revenues received in 1955-56 were earmarked for special purposes, compared with 26.1 percent ten years earlier.

A little more than one-third of the ten-year revenue increase can be traced directly to higher tax rates. (See box.) During the war and early postwar years California taxpayers enjoyed the benefits of a lower sales tax rate, a credit against corporation income tax liability and liberalized provisions under the personal income tax. Enacted in 1943 as a temporary measure, the tax reduction program was extended at each regular legislative session until 1949. The higher permanent rates of these three major General Fund levies, in effect since 1950, account for roughly $150,000,000 of the decade's revenue rise.

Highway user taxes have been increased on two occasions as the State attempted to keep its highways, roads and streets in shape to meet the ever growing traffic demands. A doubling of the gasoline tax rate, an even larger change in the levy on diesel fuel, and numerous adjustments in motor vehicle registration, weight and other fees accounts for $182,000,000 of the ten-year change. Other levies in which rate adjustments have been made include the distilled spirits excise, liquor license fees and the motor vehicle license (in lieu) tax. All told, rate changes account for approximately $380,000,000 of the $1,081,000,000 increase in revenues since 1945-46.

STATE TAX BURDEN

TOTAL STATE TAXES PER $100 OF PERSONAL INCOME



A number of factors contribute to the $700,000,000 remainder—among them rapid population growth, tremendous industrial and business development, price inflation and a larger, more evenly distributed volume of personal income. It is not possible to appraise accurately the effect of each, but these in combination with other elements provided 65 percent of the revenue increase. Productivity of California's revenue structure is, in fact, one of its most impressive features. The taxes which in the five years just before World War II developed an average of $245,000,000 a year and in 1950-51 produced $1,032,000,000, will next fiscal year yield a total of $1,731,000,000. Trends in total tax revenue over the 22 year period since the present system was developed and the yield of each levy since 1945-46 are shown in the accompanying tables.

It is a further testimony to this structure that the additional revenue has been generated with very little change in the burden of taxes upon personal income. During the five prewar years, tax collections averaged $4.68* per $100 of personal income. Under the tax reduction program and restricted motor vehicle operation, this ratio dropped to $3.59 during World War II. After the rate increases mentioned above, the average advanced to $4.62 between 1950 and 1955—still below prewar. (See chart) The high level of activity last fiscal year produced $5.09 in State taxes per $100 received as income by the residents of California, but most of the gain occurred in special fund levies. General Fund taxes amounted to $3.30, precisely the same average burden as before the war. Estimated tax receipts in the current and ensuing fiscal years represent $4.98 per $100 of income estimated for the calendar years 1956 and 1957.

---

* In making this and the following comparison, tax receipts during a fiscal year have been related to aggregate personal income received in the previous calendar year.

---

[1] Includes the corporation income tax and includes amounts credited to the postwar employment reserve in 1945-46.

[2] Includes the motor vehicle (gasoline) fuel tax and the use (diesel) fuel tax.

[3] Includes registration and weight fees, motor vehicle license fee (in lieu tax) and other fees. Part of the revenue from the motor vehicle license fee is credited to the General Fund.

[4] Motor vehicle transportation tax. All revenue from this source accrued to the General Fund in 1945-46 and 1946-47 and the early months of 1947-48.

[5] Includes General Fund share of revenue from horse racing and liquor license fees.

* Estimated.

NOTE: Receipts from the retail sales and use taxes, the bank and corporation tax, and the personal income tax were affected by the temporary tax reduction program during the period from 1943 through 1949. Rate changes also affected collections under the insurance, distilled spirits, private car and motor vehicle fuel and use fuel taxes; motor vehicle fees and liquor license fees during the period shown above.

SUMMARY OF CALIFORNIA STATE TAX RATES
1935-1956

Tax	*Base or Measure*	*Rate*					
		1935-43	*1944*	*1948*	*1950*	*1954*	*1956*

Retail Sales and Use (15)	Gross receipts from sales of taxable items	3%	2½%	2½%	3%	3%	3%

(1) Dry wine 1 cent (2 cents 1933-37) and sweet wine 2 cents per gallon; champagne, sparkling wine, etc., 24 cents per gallon 1935-1955 and 30 cents per gallon thereafter.

(2) Distilled spirits excise increased to $1.50 per gallon effective July 1, 1955. Liquor in excess of proof strength taxed at double the rates shown.

(3) A 15 percent credit against the tax was allowed in the years 1944-1949, inclusive, making the effective rate 3.4% in these years.

(4) Rate is computed for each year, based upon the ratio of State corporation income tax and personal property taxes paid by general corporations, other than public utilities, to the taxable income of such corporations, but cannot exceed the rates shown above. A 15 percent credit was allowed during 1944-49, inclusive, making the effective maximum rate 6.8 percent in these years.

(5) Enacted in 1939.

(6) From 1933 to 1941 the horse racing parimutuel license fee was 4 percent of the parimutuel pool; in 1941 legislation was adopted specifying a rate of 4 percent of the first $10,000,000 handled in a parimutuel pool, 5 percent of the next $10,000,000, and 6 percent of the pool over $20,000,000.

(7) Motor vehicle license fee (in lieu tax) was increased from 1.75 percent of the market value to 2 percent of a specified depreciated value depending on age of the vehicle, effective January 1, 1949.

(8) Gasoline tax increased to 4.5 cents per gallon effective July 1, 1947 and to 6 cents per gallon effective July 1, 1953.

(9) Enacted in 1937. Diesel fuel tax increased to 4.5 cents per gallon effective July 1, 1947 and to 7 cents per gallon effective July 1, 1953.

(10) Motor vehicle registration fee increased to $6 effective January 1, 1948 and to $8 effective upon the first registration or registration after June 30, 1953.

(11) Various, depending upon unladen weight and number of axles.

(12) Motor vehicle transportation tax was amended in 1947 to allow a credit against tax in the amount of one-third of the motor vehicle weight fees paid by each taxpayer. This had the effect of a tax rate reduction, although the rate remained at 3 percent.

(13) Personal income tax exemptions were increased from $1,000 (single) and $2,500 (married or head of family) to $2,000 and $3,500, respectively, effective January 1, 1944 and to $3,000 and $4,500 effective January 1, 1946. The exemptions returned to $2,000 and $3,500 on January 1, 1950.
The maximum rate was reduced from 15 percent on taxable income over $250,000 to 6 percent over $30,000, effective January 1, 1944. Between that date and January 1, 1950, the 1 percent rate applied to the first $10,000 of taxable income, rather than the first $5,000 as originally enacted in 1935. On January 1, 1950, the 1 percent tax again became applicable to the first $5,000 and the 6 percent rate was levied on all taxable income over $25,000.

(14) Private car tax was enacted in 1937. The rate is computed annually at the average property tax rate in the State during the next preceding year.

(15) Retail sales tax rate was originally 2.5 percent and applied to sale of foodstuffs as well as other tangible personal property. In 1935, food items (except restaurant meals) were exempted from tax, the use tax was enacted, and the rate was increased to 3 percent. As part of a wartime tax reduction program the rate was reduced to 2.5 percent on July 1, 1943. It returned to 3 percent on July 1, 1949.

POSTWAR TRENDS IN GENERAL FUND REVENUE AND PERSONAL INCOME

Expenditure Requirements, 1957-58

Three factors springing directly from California's sustained, large-scale population growth set the pattern of expenditure recommendations in this budget:

(1) Pressures generated by rapidly expanding enrollments at all levels of the educational system;

(2) Urgencies of further conservation and development of California's potential water resources; and

(3) The necessity of providing immediately funds for the construction of facilities to be required by future growth.

Compounded with increasing work loads in other fields of governmental activity, higher prices and moderate improvements in the level of service, these three factors carry the proposed expenditure program to the highest point in the State's history—a record held successively by all but four of the twenty-two preceding budgets.

Expenditure requirements of State government during the 1957-58 fiscal year total $1,947,964,993 under the recommended program presented here, an increase of $119,580,110 over the revised amount for the current year and $138,528,000* above the sum authorized by the last session of the State Legislature. An additional $50,000,000 will be spent from proceeds of the $200,000,000 building bond issue authorized by the voters of California at the last general election. Under the State's accounting and reporting practice, payments from the proceeds of bond sales are excluded from current expenditures, but are reported as outgo at the time the bonds are redeemed. Thus, outlays from the "State Construction Program Fund" are not shown in the expenditure total. However, amounts involved in each item are noted in the following statement and in the capital outlay section of the budget.

Viewed in financial perspective, education is the outstanding function of State government. Approximately 40 cents of each expenditure dollar will be used for some phase of educational activity during the coming fiscal year. Even more impressive is the fact that this area accounts for 76.2 percent of the expenditure increase over the current period. Highways, roads, streets and motor vehicle regulation rank second in fiscal importance with 23.2 cents of the average dollar and 5.9 percent of the increase. In combination, these two broad functions account for a little more than five-eighths of the entire outgo.

Substantially below these two leading activities are: welfare, health and related activities with 10.1 cents and 4.5 percent of the increase; mental hygiene—8.5 cents and 1.1 percent; conservation and development of natural resources—7.3 cents and 4.8 percent; fiscal affairs (tax collecting, business management, etc.)—1.8 cents and 2.5 percent; and other expenditures—9.3 cents of the expenditure dollar and 5.1 percent of the aggregate increase. A summary of State expenditures during the three years covered by this budget is presented in the following table.

Expenditures by Functions
(Millions of dollars)

	Actual 1955-56	Estimated 1956-57	Proposed 1957-58	% of Total 1957-58	Increase over 1956-57 Amount	%	% of Total
Education	$606.9	$683.6	$774.7	39.8	$91.1	13.3	76.2
Highways and vehicle regulations	384.5	444.7	451.8	23.2	7.1	1.6	5.9

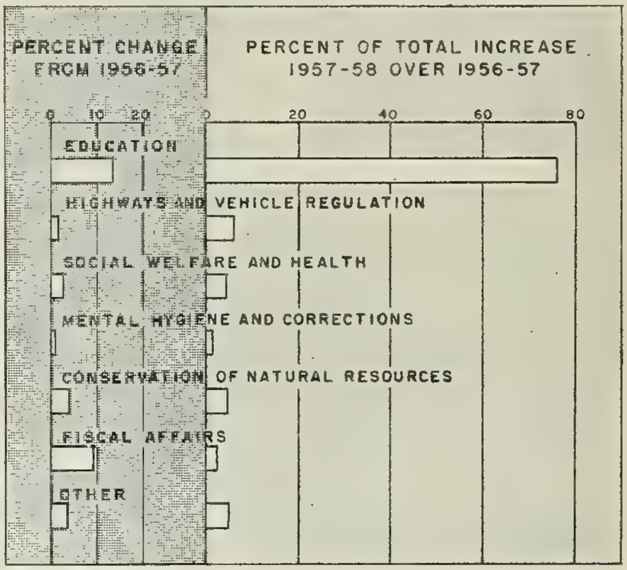
Other expenditures	143.5	174.8	180.9	9.3	6.1	3.5	5.1
Totals	$1,532.8	$1,828.4	$1,948.0	100.0	$119.6	6.5	100.0

CHANGES IN BUDGET EXPENDITURES
BY MAJOR FUNCTIONS



Nearly half of all proposed expenditures represent assistance to counties, cities, school districts and other special districts in maintaining governmental services. A little more than one-fourth of the total will be spent by the State in support of its current activities, and almost one-fourth is comprised in the capital outlay program, including land acquisitions, highway construction and other building. Summarized in these three broad classifications, the 1957-58 expenditure plan shows:

	Total Expenditures (millions)	Percent of Total	Increase over 1956-57 Amount (millions)	Percent	Percent of Increase
State operations	$543.3	27.9	$75.0	16.0	62.7
Capital outlay	439.8	22.6	14.9	3.5	12.5
Local assistance	964.8	49.5	29.7	3.2	24.8
Totals	$1,948.0	100.0	$119.6	6.5	100.0

---

* This and all subsequent totals are rounded to the nearest thousand dollars. Percentage changes have been computed from unrounded figures.

CHART 5

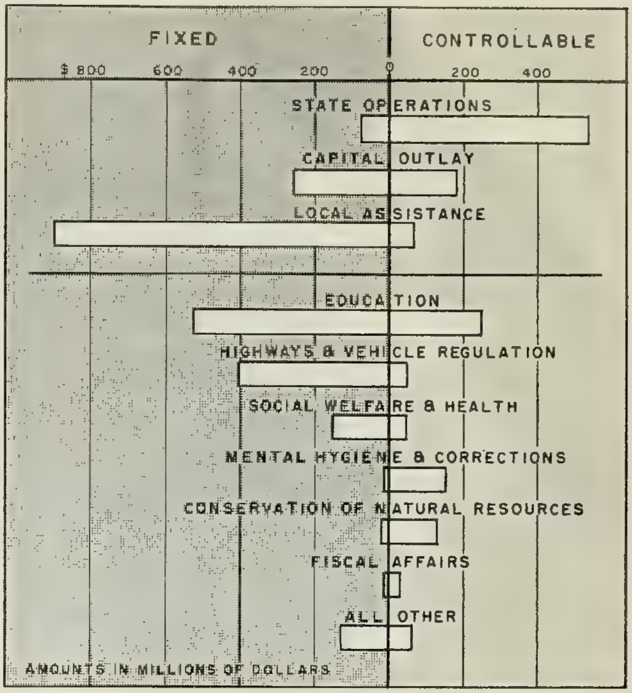
One of the important items in State operations is the 5 percent salary adjustment recommended for State employees. Provision for this general raise grows out of the Personnel Board finding that current salary scales are below the levels paid for work of comparable skill and responsibility in private industry and other governmental jurisdictions. Coupled with the additional contribution for employees' retirement which would accompany such a salary increase, this recommendation accounts for $27,275,000, or 36.5 percent of the advance in State operating costs. Excluding this adjustment, the increase in State operations is 10.2 percent. *In this connection it should be noted that the appropriation for salary increase and additional retirement contribution has been distributed to the various agencies in the expenditure data presented in this statement. In all other budget schedules this amount is given in a lump sum. The deviation is made at this point in order to show as accurately as possible the total to be spent for each function of government. Differences between the amounts shown here and the corresponding data in Schedule 3 and in the detailed budget are due entirely to this adjustment.*

Other principal developments in State operations, expenditures for capital outlay and payments of local assistance are summarized under the seven functional groups presented in the following pages.

Fixed and Controllable Costs

Section 34 of Article IV of the State Constitution requires that the budget shall contain all expenditures required by existing law or recommended by the Governor. Over the years the expenses incurred under existing law have come to be known as "fixed charges" and those recommended by the Governor as "controllable costs." Although the distinction has little real meaning, it is of some interest that $1,225,106,000 (63%) of the $1,947,965,000 total is determined by provisions of the Constitution or statutes; $722,859,000 is controllable in the sense that the amount is determined within some modest area of discretion by the Governor. Obviously that area is relatively small in the instance of mental hospital requirements, support of educational institutions, maintenance of prisons and correctional schools, forest protection or even such wholly controllable items as assistance to crippled children. More interesting and instructive is the analysis of fixed charges by functions showing the extent to which expenditures in some areas are largely fixed by law regardless of overall needs and resources while others are subject to determination in the preparation and approval of the annual budget. This aspect of fixed and controllable costs is shown in the accompanying chart.

FIXED AND CONTROLLABLE EXPENDITURES
BY MAJOR PURPOSE AND FUNCTION



Education—$774,670,000

Support of public education, one of the most pressing financial problems of government, is fully as critical at the State level as in the local communities of California. Elementary school enrollments are increasing at a rate one and one-half times that of the total population, high schools are growing at two and one-half times the general rate, and colleges are tripling the overall ratio. With State government paying more than half the aggregate current expense of public schools (elementary, high schools and junior colleges) and providing all the public funds required for support of the State colleges and University, there is little wonder that expenditures for education account for almost 40 percent of the budget recommended for next fiscal year and more than 75 percent of the increase over the current outgo level.

Assistance to local governments for education during the 1957-58 fiscal year will require $548,506,000, an increase of $41,250,000 over the amount allocated for this purpose in the current year. The largest part of this total—$498,631,000, up $37,715,000—will be provided for direct support of the public school system. Under the constitutional guarantee of $180 for each unit of average daily attendance during the previous school year, the current attendance of 2,760,000 pupils will generate a mandatory expenditure of $496,800,000 in 1957-58. An additional $1,831,000 will be apportioned for support of the driver training program, a highly beneficial and increasingly popular course among high school students.

Other items of local assistance for education include contributions toward the teachers' retirement program, $27,228,000; interest and redemption payments on school building bonds, $12,112,000; elementary textbooks, $5,730,000; child care centers, which would become a permanent part of the school system under this budget proposal, $4,604,000; and vocational education, $201,000. In the aggregate, these supplementary items will increase $3,535,000 over the comparable amounts during the current fiscal year, due chiefly to a rise in the State's share of debt service on school bonds.

In addition to these expenditures for the direct support of local schools, the State maintains and operates instructional institutions for physically handicapped children. These include the schools for the deaf at Berkeley and Riverside, a school for the blind at Berkeley and schools for cerebral palsied children in both northern and southern California. The total of enrollments at these places will increase approximately 12 percent next year, with most of the rise occurring at the new school for the deaf at Riverside. Services to physically handicapped adults include training, sheltered workshop employment and physical restoration and rehabilitation. For this purpose, an orientation center for the blind is maintained in Oakland which not only trains newly blinded persons but provides as well a residence for a limited number of the blind. Three centers, Oakland, Los Angeles and San Diego, serve as training schools and workshops for the blind. These facilities are projected at approximately the same level as in 1955-56. Operating expenses of the special schools and blind centers are budgeted at $4,679,000 for next year—an increase of $443,000 over the present level. Capital outlay projects amount to $555,000, largely for additional classrooms at the Berkeley school.

Operating programs of the ten State colleges and the Maritime Academy directly reflect the increasing demand for higher education. College enrollments are expected to rise sharply from 47,331 in the present year to 54,190 in 1957-58. This increase of 14.5 percent is but one step in the trend which will witness a doubling of State college attendance rolls during the next decade. Expenditures for support of the public college system in the coming year are budgeted at $42,112,000, compared with $34,052,000 currently. This increase of $8,059,000 includes not only the amount required by growth, but also a further broadening of the educational services performed by these institutions and allowances for the general 5 percent adjustment in salary scales.

The tremendous problem of future growth is met head-on in the budget recommendations for expanding the capacity of our State colleges. A total of $91,954,000 is provided for this purpose in the 1957-58 fiscal year, an increase of $51,835,000 over the corresponding figure for the current year. Of this investment, $30,111,000 will be paid from the proceeds of bond sales and $61,843,000 will be provided from current resources. While a summary description of projects comprised in this expansion plan is not possible, it is of major significance that $16,138,000 is allotted for the construction of residence halls for 4,200 students. Under this proposal, State colleges will more effectively meet the present and regional student needs, with more adequate and better supervised housing facilities for a greater number of students than has ever been accommodated previously. It is expected that one-half of the cost of this program will be repaid out of the net income from operation of these residence halls.

The budget recommended for the support of the University of California totals $117,548,000, an increase of $14,342,000 over 1956-57. Of this amount, $87,788,000 is from State funds and $29,760,000 from University sources. This budget is designed to meet the needs of an enrollment of 42,559 in 1957-58, compared to 39,683 in 1956-57—an increase of 7.2 percent.

To this must be added $23,579,000 for capital outlay purposes on the eight campuses of the University and its numerous field stations. Of this amount, $16,889,000 is from current general revenue resources, $4,573,000 from the fair and exposition fund and $2,117,000 from the State construction program (bond) fund. Included in this latter amount is $1,043,700 to match funds from other sources for working drawings for residence halls accommodating 1,600 students and the construction of a 400-unit residence hall. The balance from the construction program fund is for the partial cost of a multistoried parking structure at the medical center in San Francisco.

Expenditures by the State Department of Education in carrying out its function of general supervision and guidance in the broad field of education are recommended at $6,806,000, an increase of $939,000 over this year. Requirements for the vocational rehabilitation program conducted jointly by the State and Federal governments account for approximately 30 percent of the budgeted total and 35 percent of the increase. For the most part, this change springs directly from Federal legislation authorizing disability payments to persons at 50 years of age.

The program of the scholarship commission follows provisions of Chapter 1846, Statutes of 1955, granting State scholarships at both private and public educational institutions on the basis of financial need and competitive examinations. In 1957-58 a total of 1,920 scholarships will be awarded, although payments, $658,352, will be for the 1,280 scholarships awarded in 1956-57.

Highways, Streets and Motor Vehicle Regulation—$451,828,000

Second of the principal governmental functions from the financial viewpoint, expenditures for highways, roads, streets and motor vehicle regulation will total $451,828,000 during the next fiscal year. More than half of this money ($252,143,000) will be spent for State highway construction and other outlays, about one-fourth ($111,737,000) for local roads and streets and one-fifth ($87,949,000) for other services —including highway maintenance, licensing of vehicles and drivers, traffic regulation and the enforcement of motor vehicle laws. Compared with the current year, payments for this function will increase $7,097,000. However, this broad comparison fails to emphasize the concerted attack to be made upon the problem of highway accidents by means of driver education and examination, vigilant supervision and the apprehension of vehicle code violators.

The record of 2,484 deaths on the rural highways of California last year presents a challenge that must be met in budgeting for motor vehicle regulation and traffic control. In order to cope with these fatalities and the alarming ten percent increase in injury accidents, the 1957-58 budget proposes an additional 380 uniformed positions to strengthen the Highway Patrol. It is proposed that 110 of these traffic officers shall be employed during the current fiscal year to provide additional enforcement at the earliest practical date. As another step toward highway safety, the Patrol will be equipped with radar sets. This equipment will be used to determine the validity of complaints of excessive speed near schools, intersections and in other restricted areas, and to monitor the flow of highway traffic. Including a number of relatively minor capital outlay items, expenditures of the Highway Patrol during 1957-58 are budgeted at $26,329,000, or $3,621,000 above the level for the current year.

An anticipated 7,622,000 registered motor vehicles and 7,292,000 licensed drivers will create a substantially heavier workload for the Department of Motor Vehicles. As the Department's part in the coordinated fight against traffic accidents and deaths, the 1957-58 budget provides for 50 drivers' license examiners in addition to those required for workload increases in order that more thorough and comprehensive driver examinations may be given. An additional 21 positions proposed for the driver improvement program will further aid in the campaign against highway accidents and fatalities. All told, the proposals advanced in the interest of highway safety in the Patrol and Motor Vehicle Department budgets amount to $2,738,000, or approximately 36 cents annually for each car, truck and motorcycle on the registry rolls of this State. This emphasis upon driver training and examination, coupled with other improvements in services to motorists and the increase in normal workload, will carry expenditures of the Motor Vehicle Department to $26,325,000 during 1957-58, including $976,000 for capital outlay. The comparable total for the current year is $21,356,000.

Two factors contribute to a decline in estimated expenditures for highway construction: current year use of a substantial accumulated balance in the State highway fund and a reimbursement from the Toll Bridge Authority of funds previously spent on the maintenance of the San Francisco-Oakland Bay Bridge. Expenditure of this reimbursement will carry the actual outlay for State highways to a record level this year. In combination with the expanded Federal aid, highway construction next year will be far above any previously carried out in California.

State grants-in-aid and payments to local governments of shared revenue from highway user taxes are estimated at $111,737,000, or $4,635,000 more than during the current year. Roughly three-fourths of this sum will be allocated to counties for use on the rural and suburban road systems and one-fourth to cities for street purposes.

Welfare, Health and Related Activities—$196,348,000

Four functions affecting California's social and industrial well-being are brought together under this heading: public assistance, health protection, labor law enforcement and services to veterans. Of the $196,348,000 required to meet the State's responsibilities in this area in 1957-58, over 78 percent will be spent as financial aid to the aged, the needy children and the blind; 12 percent on health activities; 6 percent on industrial welfare problems; and 4 percent on veterans' affairs, chiefly support of the Veterans' Home and educational benefits. As a group, these welfare expenditures show only a fractional change (2.8%) from the level of the current year, but relative stability in payments for old age security occasioned by the growing importance of the old age and survivors insurance program tends to conceal important changes in the recommended expenditures for industrial relations and public health.

The rapid industrial development of California in recent years has materially increased the work loads of the agency primarily responsible for the welfare of the State's 4½ million wage and salary workers—the Department of Industrial Relations. Directed by law "to foster, promote, and develop the welfare of the wage earners of California, to improve their working conditions, and to advance their opportunities for profitable employment", the Department will spend $9,108,000 in carrying out its duties next year—approximately $2 for each wage and salary worker. Particular emphasis will be placed upon processing the backlog of cases before the Industrial Accident Commission and adjudicating industrial injury claims within the legally prescribed time. Here and in its other activities, such as enforcement of laws governing the employment of women and children, apprenticeship standards, safety and housing, and in conciliation service, the Department will spend $2,026,000 more than in the current year. Expenditures by the office of the Fire Marshal will amount to $433,000.

Expenditures for support of the Department of Public Health will advance $796,000 to a total of $6,031,000 in 1957-58. The major increases are directly related to the population and industrial growth of the State and to the need for a stronger administrative organization. Additional efforts will be made to provide more accurate data on the routine illnesses of the population as well as on health conditions of special interest to California. Proposals for additional research and consultation in relation to industrial diseases contribute to the over-all increase.

Subventions for public health in 1957-58 total $18,184,000, a decrease of $3,150,000 from the current year. However, the budget year decline is traceable almost entirely to the recommended deficiency appropriation in the current fiscal year of $3,000,000 to local health departments for assistance in providing poliomyelitis vaccinations for persons under 40 years of age. Virtually a "crash" program to get underway before the start of the next polio season, this money is provided in the current year only; hence, there is no corresponding amount in the 1957-58 recommendations. A decrease of $533,000 is shown in the program of hospital construction, due to a change in policy in 1955 which allowed the State to match all Federal money available to California. The State appropriation for the current year, therefore, was increased to match two years of Federal allocations to nonprofit organizations. By returning to a one-year basis, an apparent decrease occurs. Increases in the care of crippled and cerebral palsied children to a total of $4,003,000 result from a growth in the number of cases and the higher costs of hospitalization. A reduction in expenditures for tuberculosis control is made possible by a decline in the incidence of the disease and improved treatment techniques.

Assistance to local governments for old age security, assistance to the blind, aid to needy children and other social welfare activities will total $150,100,000. In addition, the sum of $14,000,000 has been set aside in the recommended financial plan to meet the State's share of expenditures incurred in extending medical care to recipients of public assistance as provided in amendments to the Federal Social Security Act adopted by Congress last year. State participation in this supplementary aid program will require legislative approval. Excluding this item, the State's expenditures for public assistance are summarized in the accompanying table.

	Average number of recipients	Average monthly payments		State expenditures	
		Total	State's share	Total (000)	Increase (000)
Old age security	266,300	$74.75	$33.28	$106,345	$925
Aid to needy children					
Family groups *	181,000	39.20	13.50	29,322	863
Foster homes	9,800	63.75	39.70	4,669	129
Aid to the blind	13,500	92.00	41.18	6,671	336
Aid to partially self-supporting blind	365	96.70	80.60	353	5
Boarding home inspection, aged and children	–	–	–	916	14
Adoption program	–	–	–	1,820	331
Transportation of children	–	–	–	2	-
Totals	470,965	–	–	$150,100	$2,603

* Includes needy parent or relative.

Administrative and supervisory activities of the State Department of Social Welfare, the Recreation Commission and other related agencies in this field will require support expenditures of $2,918,000, or $201,000 more than during the current year, chiefly as a result of the proposed general salary adjustment.

In the field of veterans' affairs, budget recommendations call for an expenditure increase of $1,216,000 to a total of $8,369,000. The larger part of this amount represents expenses incurred in the operation of the Veterans' Home at Yountville ($2,984,000) and the educational assistance provided to veterans or their dependents attending school ($3,218,000). Of the total for veterans' welfare, $770,000 will be used for capital improvements at the Home.

Mental Hygiene and Corrections—$164,864,000

State government will be responsible for the care and treatment of an estimated 47,309 patients in fifteen mental hospitals operated by the Department of Mental Hygiene during the coming fiscal year. In discharging this responsibility it will spend $96,660,000 under the operating program recommended in this budget. With a moderate increase in patient population, improvements in program, strengthening of the professional and nursing staff and the opening of a new hospital, operating costs will exceed the total for the current year by $12,396,000.

Results of the orderly improvement in the quality of care and treatment at the mental hospitals are graphically shown in current operating reports. Although the number of patients continues to increase, the rate of growth is far less than expected a few years ago. Against a 13 percent increase in the State's total population since 1953, admissions to mental hospitals have risen only 8 percent and the average hospital population only 5 percent. Projections of patient population based upon earlier trends showed a need for 46,074 beds by 1963. This number is reduced to 40,050 in the latest projections—a saving of 6,024 beds, or a number nearly equal to the largest hospital now operated. Moreover, last year 21.3 persons were discharged for each 100 patients treated, compared with 17.9 per hundred patients in 1953 and 10.9 in 1947.

Recognition of these accomplishments is taken in the 1957-58 budget program by providing better medical treatment, expanding the research activities at hospitals and clinics and establishing a program of after-treatment care at three of the institutions. The Alcoholic Rehabilitation Commission will spend $710,000 in clinical and laboratory research, surveys and studies, treatment and an information program on the problems in this field.

The capital outlay recommendations contained in the 1957-58 budget program are designed to meet specialized needs through construction of an additional maximum security hospital at Atascadero (432 beds) and a new juvenile unit at Napa (192 beds). It will be necessary to provide facilities for 355 beds now in unsuitable structures at the Stockton Hospital. A total of 366 beds to be deactivated at other hospitals will not be replaced because of the revised estimate of future needs. Expenditures for capital outlay in the coming fiscal year are estimated at $20,205,000, of which $4,956,000 will be derived from bond funds and $15,249,000 from current revenues or existing surplus. This represents a decrease of $7,669,000 from the current year provision for capital outlay at mental hospitals.

In total, expenditures for mental hygiene—current expense and capital outlay—will amount to $117,574,000, with $112,618,000 of this reflected in the budget totals and $4,956,000 derived from the proceeds of bond sales. The comparable figure for the current year is $112,695,000, while actual expenditures for this function last year were $83,943,000.

CORRECTIONS

Correctional agencies of the State will be charged with the custody, treatment and supervision of 34,220 individuals during the coming fiscal year. In discharging this responsibility they will spend $41,913,000 on current operations and $20,197,000 for capital outlay (including $11,500,000 of bond money). In addition, the State will provide $1,636,000 for the operation of juvenile homes and camps by county governments, making a total of $63,746,000 for correctional activities—an increase of $12,835,000 over current year needs.

Basically, the State's approach to the problems of custody and correction involves the classification and segregation of offenders into groups with similar characteristics. Felons and the older, more recalcitrant juveniles are placed under the jurisdiction of the Department of Corrections, which operates eight facilities ranging from a minimum security, farm-type institution to maximum security prisons, having in all an estimated 16,196 inmates next year. Juvenile offenders are committed to the Youth Authority which operates two reception center-clinics, six training schools and three forestry honor camps, with an average daily population of 2,661. So far as possible, one objective of both agencies is to return their charges to a useful life under strict supervision outside the custodial facilities. As a result of this policy there are nearly half as many adult parolees as there are prisoners and nearly three times as many youngsters on parole as there are in the training schools.

Pursuant to these basic policies and objectives, improvements in level of service provided in this budget relate to: (1) expansion of the intensive treatment program; (2) additional research in parole supervision; (3) special treatment for Youth Authority wards with serious personality problems who are not amenable to the usual correctional school program; and (4) an increase in counseling for wards not under such special treatment.

Expenditures for support of the correctional facilities for adults, including general administrative expense and the cost of parole supervision, are budgeted at $29,536,000, or $2,975,000 above the corresponding figure for the current year. Operations of the Youth Authority will require payments totalling $12,377,000, up $1,962,000.

Capital outlay projects of the two agencies for next year involve expenditures of $20,197,000, with $11,500,000 of this sum to be met from bond funds. Significant items include the start of construction for a new medium security prison at a cost of $12,120,000; a new reception and guidance center for the processing of older Youth Authority wards and young adults at a cost of $2,527,000; replacement of obsolete structures at San Quentin Prison; and the initial drawings for the new school for girls replacing existing facilities near Ventura.

Assistance to counties in the support of juvenile homes and camps and in meeting the problems of juvenile crime is designed to alleviate the pressing demand for care of youthful offenders in State institutions. Payments for this purpose ($1,636,000) will increase by approximately 50 percent next year, chiefly for the operation of nine additional county camps.

Conservation and Development of Natural Resources—$143,961,000

Included in this classification are the activities of the State agencies concerned with the broad field of development, conservation and protection of our natural resources. This extensive area of operation embraces services to the agricultural and mining industries, conservation and propagation of fish and game, operation of park and beach areas, timber and watershed protection and wildland management, water resource development and conservation, flood control, and support of agricultural fairs. Aggregate expenditures during 1957-58 for the many activities comprised under this general heading will be $143,961,000, an increase of $5,739,000 over the current year's total. However, it should be noted that the expenditures reported for 1956-57 include a proposed deficiency appropriation for water resource development of $25,190,000 made in order to get active construction on the Feather River project underway as soon as possible. Ordinarily this would have been contained in the recommendations for the budget year; hence, a more accurate measure of the program for resource development would involve a total of $169,151,000 and an increase of $56,120,000 over the presently authorized amount for 1956-57.

The Department of Water Resources and the State Water Rights Board were established pursuant to Chapter 52, Statutes of 1956, (First Extraordinary Session). The Department's program continues the long standing activities in the areas of water quality investigations, flood control and various special activities. The 1957-58 appropriation enlarges upon the California Water Development Program commenced in the 1956-57 fiscal year. A total of $10,017,000 will be used for the support of the Department of Water Resources and other agencies concerned with the problems of water conservation and development.

A major expansion on the Oroville Dam and other features of the Feather River Project are provided in the capital outlay budget. As indicated above, provision is made for starting this vitally important project this fiscal year through a $25,190,000 appropriation to become effective immediately upon passage by the Legislature. A further allotment of $40,100,000 is recommended for expenditure on this project in 1957-58. An additional $12,568,900 is allowed for property acquisition and construction on other projects, including flood control and reclamation activities.

The 1957-58 program for the State Water Rights Board provides for more intensive engineering investigation into factual conditions relating to applications in order to put determination of water rights on a sounder basis.

Several major program changes are reflected in the operating plan of the Department of Natural Resources during the budget year. The budget for the Division of Forestry, totalling $16,466,000, shows an increase of $3,236,000 over the current year. This represents a partial implementation of the 1956 Fire Plan adopted by the State Board of Forestry and in addition includes coverage of problems in forest, range, and watershed management. The approved Fire Plan recognizes several basic deficiencies in the existing program for the Division of Forestry. A major portion of the increase is directed toward strengthening the initial attack power, both in men and equipment, available for wildland firefighting and fire prevention activities. Experience with disastrous fires in northern California during 1955 and in the southern area last year has demonstrated the need for more intensive fire protection facilities. Demonstrated, also, is the direct relationship of watershed fire protection and the conservation of California's water resources.

The Division of Soil Conservation, created by Chapter 1680, Statutes of 1955, is charged with the administration of the Soil Conservation District Act. This responsibility includes assistance to local groups in the formation and operation of soil conservation districts, which in turn are concerned with the problems of erosion, drainage, flood prevention and protection, soil limitations and similar matters. The 1957-58 budget proposes the field staff necessary to provide the assistance required by the rapidly growing number of soil conservation districts.

The Division of Beaches and Parks proposes an increase of $758,000 over the current year providing for operation of the growing park system and the management of new areas obtained under the acquisition and development plan approved by the Legislature in 1956.

The capital outlay program for the Department of Natural Resources includes $10,991,000 to be expended on beach and park development both at existing facilities and at new park locations originally proposed in the long range development plan adopted in 1956. The sum of $2,430,000 is provided the Division of Forestry for the construction of two additional 80-man forestry work camps for inmates of the Department of Corrections.

The activities of the Department of Agriculture and the Department of Fish and Game will be continued during the budget year at the approximate level provided in the current period. As indicated in the Governor's Budget Message, the fish and game agency is confronted with a financial problem in that its current resources are inadequate to support current operations. As a result, the number of game farms and hatcheries is being reduced by closing or placing in custodial status nine such facilities. The substantial declines shown in capital outlay plans for district and county agricultural fairs results entirely from the fact that these agencies are spending from accumulated balances in the current year and are expected to return to the normal level in 1957-58.

The program of the California Olympic Commission for the purpose of bringing the 1960 Winter Olympics to California is continued. The location of the facilities and the overall plans for the development of the site have been completed. During the current fiscal year it is anticipated that all detail plans, specifications, and working drawings will be finished and that during the budget year actual construction will begin. The capital outlay increase to $4,307,000 shown for 1957-58, therefore, represents expenditures for construction of facilities out of the $5,000,000 appropriated for this purpose during the last two years.

Fiscal Affairs—$35,427,000

Administration of the State's business affairs and principal taxes is expected to cost $35,427,000 during the 1957-58 fiscal year, an increase of $2,962,000 over the comparable total for 1956-57. Of this amount, $1,898,000 is due to the proposed salary adjustment and $1,499,000 to increases in work load and changes in programs—offset by a $434,000 decline in outlay for office buildings.

Control and management functions such as maintenance and operation of buildings, purchasing, disbursing, auditing, financial reporting and budgeting will cost $10,218,000, an increase of $881,000 over the current sum. While the salary adjustment provision is by far the largest item in this increment, the necessity for maintenance service in connection with new buildings is also a significant factor.

Expenses for equalization of local property assessments and administration of State tax programs will amount to $22,179,000. Included is an additional $340,000 in the Board of Equalization budget for the sample appraisal of local property assessments, required by Section 1831 of the Revenue and Taxation Code, and for further assistance to county assessors by the Board's technical staff. The Uniform Local Sales and Use Tax Law is budgeted at a gross cost of $850,000, which will be financed by reimbursements from contracting cities and counties. Other expenditures for tax administration are provided mainly on the basis of expanding work load, with only minor changes in program scope.

Capital outlay for acquisition of building sites, office buildings and other improvements will decline from $3,465,000 in 1956-57 to $3,031,000 in 1957-58. Items in the proposed program include the acquisition of an office building site in San Jose, the acquisition of a site and construction of an office building in San Bernardino, the construction of an addition to the textbook warehouse in Sacramento and initial phases of construction for the Los Angeles State Building garage.

Office buildings, etc.	$1,517	$3,465	$3,031	—$434	—12.5
Grand Totals	$29,106	$32,465	$35,427	$2,962	9.1

Other Expenditures—$180,868,000

General expenses which cannot be assigned precisely to any of the foregoing six broad functions have been combined for convenience in this group of miscellaneous expenditures. They include support of the legislative and judicial branches of government, cost of general administration, maintenance of regulatory agencies, debt service, and the sharing of certain revenues with cities and counties for support of these local units. In total, miscellaneous costs will amount to $180,868,000, up approximately $6,097,000 from the present year.

Most of the expenditures in this category, $123,960,000, are comprised in items of assistance to local governments—the payment of revenue collected by the State on behalf of these units, grants-in-aid and other subventions. Leading items are the apportionments of revenue collected under the motor vehicle license fee in lieu of local taxes on this type of property and return of liquor license fees. In total, these shared revenues will increase from $111,143,000 in the current year to $121,428,000 during 1957-58. Although other subventions will also increase, there will be a drop of $5,677,000 in the aggregate local assistance, due mostly to the fact that in the current year emergency payments amounting to $14,677,000 were provided by the State to assist cities, counties and districts in meeting the expense of last year's disastrous floods. This item and a $1,360,000 appropriation for local public works have no counterparts in the 1957-58 expenditure plan.

Miscellaneous capital outlay costs will increase materially due to the inclusion of an unallocated sum of $6,761,000 under the State building program. A comparison between years is artificial, since it involves the relationship of this unallocated sum to the amount remaining to be allotted from a similar fund contained initially in the current year's budget. As funds are apportioned to specific projects, they are shifted from this miscellaneous category to one of the other functions.

EXPENDITURE TRENDS

From a total of less than a quarter of a billion dollars twenty years ago to nearly two billion in the program projected for next year, State expenditures have shown a rise interrupted only by the four years of World War II and termination of the short-lived pension plan of 1949-50. Part of this growth has been due to a doubling of the State's population, part to inflation, and part to a change in the concept of State government's responsibilities. Interrelated as these three factors are, it is not possible to assign values to each. However, per capita costs have risen roughly three and one-half times—from a little less than $37 twenty years ago to $135.58 in the coming fiscal year.

Aggregate personal income from which the governmental expenditures ultimately are paid has risen from $5.1 billion in 1937 to an estimated $34.8 billion in the current calendar year. Hence, State expenditures next year in relation to income of the people of California will be only slightly higher than they were 20 years ago. From $4.75 per hundred dollars in 1937-38, the expenditure-income ratio will rise to $5.60 next year.* This entire change can be attributed to capital outlay needs, since a 44-cent advance in the expenditure-income ratio for local assistance has been offset by an equal drop in expenses for State operation.

One-half of the increase in State expenditures over the last two decades has taken place in payments of assistance to local governments. As the traditional items of school support, welfare aids and shared revenue have increased or have been expanded and new features added, expenditures for this purpose have risen from less than $120,000,000 twenty years ago to the $965,000,000 projected for next year. The remaining half of the growth is divided evenly between the expenses of State operation and capital outlay. Most of the increase in State operating expense has occurred in payments for education and the mental hygiene-corrections group, while more than half the change in capital outlay has related to highway construction.

In terms of total expenditures—i.e. State operations, capital outlay and local assistance—payments for mental hygiene and corrections show the largest percentage increase over the twenty-year period.

---

* In making these and the following comparisons between State expenditures and personal income, payments during the fiscal year have been related to income received during the preceding calendar year. In the case of 1957-58 comparisons, the 1957 income is the estimate used in preparing the budget revenue forecasts.

Virtually the neglected activities of government two decades ago, expenditures for these purposes next year will be 17½ times the amount expended in 1937-38. The rise per capita of total population has been ten-fold. In relationship to aggregate income, the people of California will spend nearly three times as much for mental hygiene and corrections in the coming fiscal period as they did in the late depression year. Conservation of natural resources ranks second in relative rate of gain over the two decades. Chiefly because of the expanding allowances for water development, but including as well forest protection, conservation of wildlife resources and the promotion of recreational areas, expenditures for the preservation and improvement of California's natural resources will be sixteen times the amount recorded in 1937-38. Hovering near the eight-fold average advance are expenditures for education (9 times 1937-38), miscellaneous expenditures (8 times), highways (7 times) and fiscal affairs (6½ times). Below these with a four-fold advance are payments for social welfare, health and related items, because the relatively expensive unemployment relief payments of the depression era are no longer in the expenditure picture. The lower rate shown by this expenditure group is entirely in the social welfare segment, however: payments for public health next year will be 30 times the volume of 1937-38, while industrial relations will show a twelve-fold total and veterans' affairs an equally impressive advance.

Again relating State expenditures to personal income, the people of California next year will spend for support of educational activities $2.22 per hundred dollars received as income. The corresponding ratio was $1.65 in 1937-38. They will contribute $1.30 for highways, against $1.23 twenty years ago. The relative amounts for mental hygiene and corrections have risen to 47 cents from the 18 cents of 1937-38. A summary of expenditures by character and major function at five-year intervals since 1937-38 together with per capita amounts and the total in relation to personal income is given in the table below.

STATE EXPENDITURES AT FIVE-YEAR INTERVALS BY CHARACTER AND MAJOR FUNCTION

		Thousands of Dollars					
	Fiscal Year	State Operations	Capital Outlay	Local Assistance	Total	Per Capita	Per $100 of Income *

The amounts of estimated savings are offset by the following proposed deficiency appropriations:

a $57,000 increased travel allowances.

b $137,000 for additional cost of printing voters pamphlets.

c $252,223 for additional cost of the Attorney General for services to the Colorado River Board.

d $177,454 for the State Water Rights Board.

d $46,768 for the Colorado River Board.

e $951,958 for the Highway Patrol for increased expenses including 110 additional uniform personnel.

f $650,000 for acquisition of site for construction of a state office building.

g $25,190,000 for immediate construction and relocation of highways and railroads at the Oroville Dam project.

h $3,000,000 for distribution of polio vaccine.

NET BONDED DEBT						$871,482,584	

---

1 There is $499,981 in the Sacramento State Building Interest and Sinking Fund in excess of the amount necessary to retire all outstanding bonds.

2 Money was transferred from the General Fund to the Bond Sinking Fund of 1943 to pay the principal and interest on these issues to final maturity; however, $5,000,000 was loaned to the Highway Fund for the Golden Gate Bridge and Highway District. This loan will not be repaid until after final maturity of the bonds.

3 Money is transferred from the Motor Vehicle License Fee Fund to the General Fund in the amount to meet the annual interest and redemption payments.

4 Money was transferred to the School Board Retirement Fund to pay part of the annual redemption requirements on the School Building Bonds. In addition, repayments from school districts and interest earned on the bond funds is available to pay part of the interest and redemption payments.

5 The servicing of these bonds is primarily the responsibility of the San Francisco Harbor Improvement Fund and the Veterans Farm and Home Building Fund; however, in the last analysis they are general obligation bonds.

6 Callable on or after January 2, 1951, in the amount available in the sinking fund.

7 Callable on or after January 2, 1955, in the amount available in the sinking fund.

8 $500,000 callable on or after March 1, 1971.

9 Callable on or after January 2, 1941, in the amount available in the sinking fund.

10 An additional $20,000,000 subject to Section 7910.1, Chapter 28, Statutes of 1952, is unsold and not available for State school building aid allocation as it was restricted to surplus requirements of General Fund as of June 30, 1953.

Salaries and Wages

Position Titles

In the detailed departmental and agency budgets, positions included in the state civil service have been set forth under the official class titles established therefor by the Personnel Board. Positions exempt from civil service have been listed by their departmental titles, as set forth on the official roster of employees maintained by the Personnel Board, or as maintained by the State Controller under the central pay installation.

Positions Now Authorized

In general, the positions included under this heading are those which were established as of July 1, 1956, together with those for which funds were provided in the 1956-57 Fiscal Year Budget or otherwise authorized as of that date. Amounts shown for positions now authorized represent actual salary payments for 1955-56 and estimated salary payments during 1956-57 and 1957-58, assuming full-year employment, unless the position is estimated to be established materially later than July 1st. In such cases only the cost from date of establishment is shown and the positions are so noted.

Replacement of positions at a higher level either (a) upon completion of a training period or (b) after temporarily "down grading" are included under this heading. Such transactions are indicated by showing both class titles on the same line, with a salary range of the minimum salary of the lower class and the maximum of the higher class. Examples: (a) administrative trainee-junior staff analyst, $358–458, (b) junior-intermediate clerk, $231–325.

Continuation during 1957-58 of positions authorized temporarily until June 30, 1957, are included under "Positions Now Authorized." These positions may be identified by an explanation in parentheses indicating the extent of the continuation, such as: (extended to December 31, 1957) or (extended to permanent).

Proposed New Positions

Proposed positions for the budget year which have not yet been established or authorized have been listed under this heading. Proposed increases in time of part-time positions are also listed under this heading, if the increase amounts to one-half time or more; otherwise the position is shown under "Positions Now Authorized" on the increased time basis.

Proposed new positions include upward replacement of positions only to extent that they involve major organizational changes.

Estimated Salary Savings

Unless indicated to the contrary by experience and anticipated conditions, a lump sum deduction is made from each group total of salaries and wages in anticipation of savings which are estimated to accrue because of temporarily vacant positions, and the lower entrance rates of salary at which replacement personnel are paid.

The amounts of such estimated savings may not correspond to the number of positions deducted because of adjustments to the latter for positions authorized to start after July 1st. The amounts shown opposite such positions are for the estimated costs for the period of occupancy only and, therefore, there is no money savings to be anticipated.

Number of Positions

Filled positions in 1955-56 are counted to the nearest tenth of full-time and full-year employment, except for members of boards and commissions, temporary help, etc.

Authorized positions for 1956-57 and 1957-58 are counted to the nearest tenth of full time. Full-time positions authorized to start later than July 1st are counted as full positions, but the totals are adjusted for the unused time by a deduction under estimated salary savings.

All items enclosed in parentheses in the number of positions columns are excluded from position totals.

Salary Range

Rates of pay listed under this heading represent salary ranges established by the State Personnel Board for civil service, state college, and Maritime Academy classifications, or fixed by statute or by the appointing authority and approved by the Director of Finance for other exempt positions.

The amounts shown indicate (1) the minimum rate and (2) the maximum rate. The minimum of the range serves as the normal entrance rate for new appointees to any position in a class and represents the lowest rate to be paid to any employee who is considered qualified for appointment to or retention in a position. The maximum of the range represents the highest rate payable to an employee who occupies any position in the class.

Under the revised pay plan adopted by the State Personnel Board, the intermediate steps in each salary range have been fixed at a uniform percentage interval of 5 percent, except that no interval is less than $10 and none more than $50. This plan is used also for most salaries fixed for exempt positions. A table of salary ranges in the state service is included at the end of this section. Thus, $220-268 indicates a monthly salary range having steps of $220-$231-$243-$255-$268. Salary ranges for instructional positions in the state colleges and in other state agencies are set forth on page 4.

*Schedule of Salary Ranges in Use in the State Service**

Range No.	Steps				
18	$231	$243	$255	$268	$281

* Four-step salary ranges, with one step higher minimum, are established for certain classes with recruiting difficulties.

Salary Schedule for Instructional Positions—State Colleges

(Based Upon Salaries Effective September 1, 1956)

RANK [a]	ACADEMIC		VOCATIONAL
	CLASS I [b]	CLASS II [c]	
Assistant	$4,092–4,512	–	–
Instructor	4,512–5,496	$4,740–5,772	–
Junior instructor [d]	4,512–5,496	4,740–5,772	$4,512–5,496
Assistant professor	4,980–6,060	5,232–6,360	–
Intermediate instructor [d]	4,980–6,060	5,232–6,360	4,980–6,060
Associate professor	6,060–7,356	6,360–7,728	–
Senior instructor [d]	6,060–7,356	6,360–7,728	6,360–7,728
Professor	7,356–8,940	8,112–9,852	–
Principal instructor [d]	7,356–8,940	8,112–9,852	8,112–9,852

[a] Budgetary limitations on appointment to each range are 15 percent to 20 percent for instructor or below, 25 percent to 35 percent for assistant professor, 20 percent to 25 percent for associate professor, and 25 percent to 35 percent for professor, of total authorized teaching positions.

[b] Persons whose academic or professional preparation is equivalent to a college degree.

[c] Persons whose academic or professional preparation is equivalent to a doctor's degree.

[d] Instructors and vocational instructors receive, in addition to the above schedule, three steps, or approximately 15 percent, if employed for 12 months instead of the normal 10-month teaching period.

Salary Schedule for Instructional Positions—Other State Agencies

(Ranges and Criteria of Application for Teachers)

Range	Steps				
A	$395	$415	$436	$458	$481
B	415	436	458	481	505
C	436	458	481	505	530
D	458	481	505	530	556
E	481	505	530	556	584
F	505	530	556	584	613

CRITERIA FOR RANGE DETERMINATION	ACADEMIC (Preparation)	VOCATIONAL (Preparation)
Range A	Provisional or special credential, without bachelor's degree.	–
Range B	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential.	–
Range C	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential; plus 12 upper division or graduate units which were not counted toward **degree or which were** taken subsequent to obtaining credential.	Three years' experience as journeyman craftsman.
Range D—	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential; plus 24 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential. Or regular secondary credential.	Qualification for special secondary vocational Class A Credential in T and I and PS Education.
Ranges E and F	Used only for "incentive increases" when a teacher receiving less than Range F completes at least six units in college level courses approved by his department and taken after appointment. He shall then be entitled to advance to the corresponding step in the next higher salary range for the class, and such an advance shall be known as an "incentive increase."	

Merit Salary Adjustments

Subject to availability of funds, Section 18854 of the Government Code requires that each employee in the civil service receive an increase of one intermediate step in his salary range during each year in a position in which his service rating is equal to or above a reasonable minimum, which has been fixed by the Personnel Board as "Standard."

All employees in salary ranges with a maximum step of $325 and below and who have received permanent appointments may receive an increase from the first step to the second step of their salary range upon completing six months of qualifying service as defined by Personnel Board rules. In addition, employees in salary ranges with a maximum step of $341 to and including $436 may receive a similar salary adjustment when the predominant recruitment source is from outside state service. This same adjustment may be granted to employees in classes with salary ranges not exceeding $481 where acute recruitment difficulty is experienced.

Provision for the salary adjustments to which present employees will become entitled during the balance of the current year and in the budget year has been included in the amounts shown opposite each position or group of like positions. Inasmuch as turnover of personnel generally results in replacement at a lower step in the salary range, the amount budgeted for salary adjustments opposite each position is offset by a lump sum deduction for downward adjustments included in the deduction for "estimated salary savings."

Similar amounts for salary adjustments have been provided for exempt positions, where requested by the agency. Such adjustments have been computed in accordance with the salary schedule in effect for the respective positions.

Salary Range Adjustments

In determining the appropriate salary level for a class, a number of factors are taken into consideration by the State Personnel Board:

1. Rates of pay of private employers and of other public jurisdictions for comparable work.
2. Internal consistency of rates; equal pay for equal work, and pay differentials based on differences in the kind, difficulty, and responsibility of the work.
3. Conditions of work in the class.
4. The adequacy of existing appropriations which may be used for salary increase purposes.

The rates of pay of a group of approximately 950 laborers, tradesmen, and mechanics in the state service are established at the hourly wage rates negotiated by unions with private employers in the county in which they are employed. They receive all the collateral benefits, such as premium pay for night work, travel time, and overtime received by employees in private industry and, in addition, they receive the added state benefits of vacation and sick leave with pay, plus 5 cents and 10 cents an hour increase after one and two years' employment with the State.

The salary ranges shown are those in effect on September 15, 1956, and salaries and wages expenditures for both the 1956-57 and 1957-58 Fiscal Years reflect rates of pay then in effect. Statutory salaries are provided for at rates inclusive of enactment by the 1955 and 1956 Legislatures (Chapter 1168, Statutes of 1955, and other special enactments).

GENERAL ANALYSIS

Number of positions	*44.5*	*47*	*47*	–

The decrease in total expenditures, 1957-58 Fiscal Year as compared with 1956-57 Fiscal Year, is due to the decrease in the number of days in the legislative session. Expenditures are more comparable to those in the 1955-56 Fiscal Year. Generally, provision is made to render the same level of service as that provided in the 1955-56 Fiscal Year, with no major items of increase.

Number of positions	*3.1*	*4*	*5*	*1*

Provision is made for the estimated needs to accomplish a program of research on approximately 15 topics to be recommended by the Legislature at the 1957 Session, to take care of any unfinished research carried over from the 1956-57 fiscal year. Provision is made for $5,000 to meet the cost of additional work assigned by the Legislature to the Commission. The budget also provides for the printing of reports for each study upon which it will report to the 1957 Session of the Legislature.

JUDICIAL COUNCIL

The Judicial Council surveys the condition of business in the courts with the view of simplifying and improving the administration of justice. Suggestions are submitted to the courts for expediting business and helping to secure uniformity. The chairman also equalizes the work of judges by making assignments to courts with heavy dockets. The council also collects and compiles statistics on all courts and makes many special studies looking to the improvement of the administration of justice, some o which are required by the Legislature and others voluntarily undertaken.

Governor's Office

DISASTER OFFICE

Pursuant to Chapter 1, Division 7, of the Military and Veterans Code the Governor has assigned the duties thereunder to a section in his office known as the Disaster Office. This office is responsible for coordinating the plan and program for the civil defense and for natural disasters of the State.

Headquarters Office at Sacramento

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*95*	*96.6*	*100.5*	*3.9*

The budget provides for additional staffing and equipment to meet increased work load and deficiencies that have developed since the reorganization was made during the 1954-55 Fiscal Year. The First Extraordinary Session of the 1956 Legislature increased the responsibility of this agency relating to disasters arising from natural causes.

The practice of purchasing equipment from appropriations for Capital Outlay appropriations is being discontinued and needs for equipment are being reflected in the support budget.

The following summarizes the significant changes from the current program:

	Number of Positions	*Amount*
Engineering—Replacement of part-time services on contract ($6,000) with a full-time employee to meet added work	1	$9,384
Communication and Attack Warning—Present staff is unable to meet the work involved in periodically testing presently installed equipment	1	6,672
Fire and Rescue—Present staff is unable to properly supervise the use of emergency equipment and to coordinate the local activities	1	6,672
Information and Education—To meet the needs of properly informing the public, particularly in the fields of radio and television, as to civil defense policies and instructions	1	6,672
Transportation and Supply—To make periodic inspection of equipment and supplies purchased from federal and state funds for use in case of major disasters. These materials have been widely dispersed	1	4,512
General Office—1 position to meet clerical needs generated by the augmented staff as shown above	1	3,372
Communications equipment for fire and rescue services to meet existing deficiencies. The equipment for north coastal area was not included in former program	–	15,548
Radio equipment for 41 trucks not now equipped	–	27,378
Expansion of radiological communications network due to increased hazards of radioactive fallout from improved nuclear weapons	–	38,480
Increased reimbursements from United States Government for approximately one-half of the cost of communications equipment	–	—43,243

STATE EMPLOYEES' RETIREMENT SYSTEM

Administers the State Employees' Retirement System and the Legislators' Retirement System. This involves determination of membership, computation, collection, and recording of employer contributions and member contributions, service and compensation; the computation and payment of withdrawals of member contributions and death and retirement benefits, including retirement for service, ordinary and industrial disability and industrial death; the investment of funds; the preparation of periodic and special valuations, the preparation of annual and special reports.

Members of the State Employees' Retirement System consist of state employees (including most university employees) and employees of approximately 340 local governmental jurisdictions participating on a contractual basis. Members of the Legislators Retirement System consist of legislators and elective state officials who elect membership.

OTHER SERVICES

Analysis

The amount of $13,500 is provided in temporary help and $10,000 in operating expenses for the quadrennial actuarial valuation of th State Employees' Retirement System.

The contracting public agencies reimburse the State for their pro rata share of the cost of the valuation in addition to their regula reimbursements for administrative costs.

The amount of $7,000 is provided in the 1956-57 Fiscal Year to gather data to evaluate survivor benefit costs.

PERSONNEL BOARD—Continued

ADMINISTRATION

Within the general policies, this division plans, directs, coordinates, and controls the work of the agency.

Analysis

Increase is due to a proposal for the State Personnel Board to contract with an outside firm to survey salaries of personnel positions,

GENERAL PERSONNEL SERVICES

This division is responsible for conducting the day-to-day classification and examining work; recommends civil service and state college pay ranges to the Personnel Board; recruits and is responsible for conducting the oral examination program, the development of written examination materials and the maintenance of quality standards in examination work.

Analysis

It is proposed to increase the total recruiting effort in line with the growing needs of the state service. This proposal includes an accelerated out-of-state engineer and medical recruitment program as well as an increased general in-state recruiting effort. Provision is made for increased work load in the branch offices.

PERSONNEL BOARD—Continued

COOPERATIVE PERSONNEL SERVICES

The operations of this division are governed by requests of local agencies for personnel services which are performed on a contract basis by which cost is to be reimbursed and therefore no increase in the net appropriation is required for this function.

Analysis

Increases are due to the addition of six positions and related expenses on a work load basis.

---

[a] Composed of savings in salaries and wages, $430; operating expenses, $4,161; equipment, $128; and loss in estimated reimbursements, $527.

[b] Composed of savings in salaries and wages, $254; operating expenses, $214; and equipment, $139.

[c] The proposed deficiency results from the increased number of ballot pamphlets required to be printed and the increased size of the pamphlets.

SECRETARY OF STATE—Continued

ADMINISTRATION

Analysis

The increase is due to an additional position which is required for increased work in microfilming corporate records.

SECRETARY OF STATE—Continued

CENTRAL RECORDS DEPOSITORY

This bureau has receipt and custody of all records required or permitted by law to be deposited in the Office of the Secretary of State.

Analysis

Increases are due to the expansion of the Record Center so that state agencies may avail themselves of the services. The increase pertains to the purchase of additional Record Center equipment and supplies.

DEPARTMENT OF AGRICULTURE

Administers and enforces the provisions of the Agricultural Code and related statutes. These laws call for regulatory and service activities dealing with the protection of plantings and livestock from infectious diseases, pest animals, weeds and injurious insects, and with aids to insure the marketing of quality agricultural products. In this broad field of activity the department cooperates extensively with the United States Department of Agriculture and with county agricultural services. The General Fund finances activities which are of general public benefit and the Department of Agriculture Fund finances other activities for which the beneficiaries are charged.

GENERAL ANALYSIS

Number of positions—General Fund	*796.8*	*845.2*	*878.5*	*33.3*
Number of positions—Department of Agriculture Fund	*486.6*	*512.8*	*526.4*	*15.6*

The proposed budget for the Department of Agriculture in general provides for continuation of existing programs with provision for increased work load. However, it was necessary during the current year to start an emergency melon fly survey and limited treatment program, due to the finding of this serious insect pest in California for the first time. This program is proposed for continuance on a reduced survey basis.

---

[a] Composed of savings in salaries and wages, $36,484; operating expenses, $13,883; equipment, $20,263; and loss in reimbursements, $3,761.

[b] Composed of savings in salaries and wages, $102,267; operating expenses, $64,516; equipment, $13,341; and loss in reimbursements, $4,521.

[c] Not included in budget totals. See Schedule 9 for Summary of Federal Receipts and Expenditures.

General Fund Activities

DEPARTMENTAL ADMINISTRATION

Analysis

This function provides for the office of the director, State Board of Agriculture, other general administrative officers, fiscal and personnel offices, public information and related activities. Supervision of the duplicating and office service unit has been provided by the secretary to the director, but due to an increasing volume of work this is no longer feasible and therefore a supervisor of central services is requested.

DIVISION OF PLANT INDUSTRY

ADMINISTRATION

Analysis

The function and duties of the Chief of the Division of Plant Industry are to supervise, administer and correlate the office and field activities of the 6 bureaus comprising the division, which are concerned with pest control and quarantine programs to minimize agricultural crop losses.

BUREAU OF ENTOMOLOGY

Analysis

This bureau conducts major insect eradication-control programs, apiary inspection, general insect pest survey, insect identification, and the development of commodity treatments and insect pest control advice.

Major programs include (1) the destruction and control of beet leafhoppers which transmit a serious virus disease affecting sugar beets, tomatoes, and other crops; (2) the elimination of Hall scale, a pest of stone fruits; (3) survey and control measures for the Mexican fruit fly; (4) Khapra beetle suppression; and (5) melon fly survey and treatment.

The finding of a single melon fly in Los Angeles on August 2, 1956, was the first discovery of this serious insect pest of fruit and vegetables in the Western Hemisphere. Emergency funds were made available to participate at once on a cooperative federal-state-county program of limited treatment and survey. The 1957-58 program will continue only the survey work, upon the assumption that no more of these pests will be found and treatments will not be required.

One additional entomologist position is recommended for a cooperative insect reporting service performed under agreement with the United States Department of Agriculture and for which they reimburse the bureau to the extent of $5,000 annually.

BUREAU OF PLANT QUARANTINE

Analysis

This bureau is charged with the enforcement of provisions of the Agricultural Code, and regulations of the Director of Agricultur and the United States Department of Agriculture pertaining to plant quarantine activities. It directs plant quarantine activities of the 53 agricultural commissioners' offices, maintains 17 border stations on the interstate highways entering California 3 maritime port stations, and the headquarters office at Sacramento. The program is projected at the current level with provision for an additional position to provide for increased inspections at the Los Angeles International Airport.

BUREAU OF PLANT PATHOLOGY

Analysis

The work of the Bureau of Plant Pathology is concerned with the infectious and contagious diseases of plants, such as those cause by bacteria, fungi, viruses, and plant parasitic nematodes, as distinguished from insect pests. It includes the prevention of th introduction and spread of serious and destructive new diseases, their detection when they become introduced, and their suppression and eradication when outbreaks occur. The bureau cooperates with the county agricultural commissioners and the Unite States Department of Agriculture in these functions. A major program involves the virus disease of citrus trees known as “quic decline,” which includes work directed toward eradication of Meyer lemon plants in certain areas.

One new position of junior plant pathologist is proposed to assist in meeting the increased work load in the Sacramento laborator arising from a greater number of specimens being received for examination, an increased need for technical assistance to th county agricultural commissioners, and to maintain the plant nematology and general plant pathology laboratory work in Sacra mento on a sufficiently thorough and sound current basis.

BUREAU OF RODENT AND WEED CONTROL AND SEED INSPECTION

Analysis

This function is concerned with the eradication and control of noxious weeds and poisonous plants where found to be detrimental to agriculture or livestock and to control field rodents where known to harbor diseases transmissible to humans as well as to reduce losses to crops. The bureau also carries on seed inspection work for the enforcement of the California Seed Law and in cooperation with the United States Department of Agriculture for the enforcement of the Federal Seed Act as well as handling the self-supporting phase of testing of service and certification samples.

The addition of an assistant chief is proposed due to the continued increase in administrative work in the bureau consistent with the continuing work load increase.

BUREAU OF CHEMISTRY

Analysis

The General Fund activities of this bureau enforce provisions of the Agricultural Code which protect consumers from poisonous spray residue on fresh and dried fruits and vegetables, and administer regulations concerning the use and application of injurious herbicides, and other injurious pesticide materials. No increase in scope or level of service is proposed.

BUREAU OF LIVESTOCK DISEASE CONTROL

Analysis

Field Services

The Field Services of this bureau is concerned with the control and eradication of infectious, contagious and serious diseases of livestock and poultry, also the prevention of diseases from becoming introduced which are not now present in this State. In addition to the control of incidental disease outbreaks, 3 major programs are regularly carried on: namely, bovine tuberculosis eradication, bovine brucellosis control based on vaccination of calves and the control of movements of unvaccinated cattle and the eradication of vesicular exanthema in swine. For supervision and immediate action in disease control, 10 district offices are maintained.

A new position, livestock disease control inspector, is proposed for the Modesto district to assist in vesicular exanthema eradication work and the new brucellosis regulation pertaining to movement of dairy cattle. Also 2 intermediate typist-clerks are set to assist in the clerical work of the San Bernardino and Fresno district offices.

Laboratory Services

Laboratory services include operation of laboratories at Sacramento, Petaluma, Fresno and San Gabriel for the diagnosis of diseases of both poultry and livestock; and at Turlock and Lancaster laboratories for poultry diseases.

Legislation has made possible the replacement of the army barracks building now occupied by the Turlock laboratory with a new building. Occupancy of the new building is expected in the later months of the current year or the first of the budget year.

Two additional veterinarian I positions are proposed for an increased number of cases for diagnosis at Turlock and San Gabriel.

BUREAU OF DAIRY SERVICE

Analysis

This bureau enforces the Milk and Milk Products Act of 1947, the purpose of which is to maintain standards and prevent adulteration of dairy products and conduct sanitary inspection of dairy products, plants and dairy farms. It also has the responsibility of licensing various employees of the dairy industry in the performance of their technical work. The program is projected in the current and budget year at the same level of service maintained during the past year.

BUREAU OF MEAT INSPECTION

Analysis

This bureau conducts inspection of animals and meat food products in slaughtering and processing establishments, for the purpose of protecting the public from diseased or otherwise unwholesome meat or products. The bureau also supervises state-approved municipal meat inspection conducted by Marysville and San Francisco. A meat inspection laboratory is maintained by the bureau to assist the inspectors in detecting the use of adulterants, preservatives, or other unapproved or unsatisfactory materials in meat food products. The bureau also inspects foreign cold storage meat, issues licenses for handling same and enforces laws prohibiting the sale of uninspected meat or products in the State. State meat inspection is proposed for Oakland and Sacramento as of July 1, 1957, due to the discontinuance of city inspection services requiring 6 additional meat inspectors, the same number used by the cities, and 1 clerical position.

BUREAU OF POULTRY INSPECTION

Analysis

Chapters 1843 and 1844, Statutes of 1955, provide that, beginning July 1, 1956, this agency will enforce provisions for the licensing of establishments slaughtering and processing poultry and rabbits, including the inspection of such establishments for sanitation and the sanitary handling and wholesomeness inspection of dressed poultry and rabbits. 8 additional positions are being requested to take care of the additional work load that has developed now that the bureau is activated and to provide for a weekly visit to each plant.

BUREAU OF MARKETS

Analysis

This bureau provides assistance in the solution of marketing problems of agricultural groups which are not organized under formal marketing laws; assistance to new industries in formulating or obtaining marketing programs under the general marketing laws; and administration of the marketing programs formulated under general marketing laws.
The General Fund is reimbursed for all expenditures for the latter 2 types of the services from deposits received and assessments collected. This program is projected at the current level in the current and budget years.

BUREAU OF MARKET NEWS

Analysis

The Bureau of Market News operates in California under a cooperative agreement with the United States Department of Agriculture under the title of Federal-State Market News Service. All costs are borne so far as is practicable on an approximately 50-50 basis. Daily reports are published in the marketing of agricultural commodities in intrastate, interstate, and foreign markets. These reports contain current data on prices, market conditions, demand, supply, truck and carlot movements inbound and outbound, daily truck unloads at terminal markets, cold storage holdings, and other related information. Commodity groups included in this service are fresh fruits and vegetables; livestock and dressed meats; dairy and poultry products; hay, grain and feedstuffs; dried fruits; olive oil; bulk wine movement in carlots interstate, winery prices to growers, and a current census of grape crush tonnage; honey; dry edible beans; hops; rice; and a number of other miscellaneous products.

Provision is made for continuation of the present level of service with necessary adjustment to operate intraoffice communication by leased landline and to provide personnel and services for a year-round livestock market news office in the Imperial Valley in accordance with legislative budget augmentation.

1 additional market data compiler for Los Angeles fruit and vegetable reporting and 1 teletypewriter operator for Stockton livestock reporting are proposed for increases in volume of marketing.

BUREAU OF AGRICULTURAL STATISTICS

Analysis

The Bureau of Agricultural Statistics functions on a cooperative basis with the Federal Department of Agriculture. Its duties are to prepare and publish the official estimates pertaining to agriculture for the state and federal departments, and to otherwise collect, develop, maintain, publish and disseminate systematic statistical and similar information relating to the agriculture of California.

One additional clerical position, and part salary of another professional (cooperative) position are requested for the increased work load of the bureau.

BUREAU OF FRUIT AND VEGETABLE STANDARDIZATION

Analysis

The General Fund function of this bureau enforces quality standards and deceptive pack provisions of the Agricultural Code relatin to fruits, nuts, vegetables, honey, eggs, and poultry meat; while its special fund function enforces plantings and canning tomat inspection. Poultry meat standardization is a new activity which became effective July 1, 1956.

BUREAU OF WEIGHTS AND MEASURES

Analysis

This function directs the enforcement of the Business and Professions Code regulating all commercial weighing and measuring devices used in the State.

Reduction in current and budget years as compared to past year results from transfer of activities concerning public weighmasters to the Department of Agriculture Fund pursuant to Chapter 5, Statutes of 1956.

FEDERAL COOPERATIVE MARKETING RESEARCH

Bureau of Agricultural Statistics

Projects in marketing research are conducted in cooperation with the United States Department of Agriculture on a matching basi under the provisions of Public Law 733 (79th Congress) and Section 1286 of the Agricultural Code.

Analysis

Surveys and checks of the bearing and nonbearing acreages of fruits and tree nut crops in the State are carried on throughout th year in cooperation with the county agricultural commissioners, as well as surveys of the acreages and production of mino crops. The results of surveys of these crops are published in mimeograph form for the use of growers, processors and deale in marketing these crops.

DIVISION OF PLANT INDUSTRY						
BUREAU OF PLANT QUARANTINE						
Analysis						
The special fund activities of this bureau include a Nursery Service which is charged with the regulation of the movement of nursery stock to prevent the distribution of pests; the licensing of persons selling nursery stock; the enforcement of nursery stock grades and standards; the registry and certification of trees and plants as to freedom from pests and the identification of fruit and nut tree root and top stock. The increase in the current year includes 1 additional clerical position for expanding certification programs and license work. Additional seasonal help is requested in the budget year for an increased volume of strawberry plant certification.

BUREAU OF FIELD CROPS

Analysis

This bureau is charged with inspection and grade certification under United States Standards, upon application, of such field crops and their products as grain, flaxseed, rough and milled rice, beans, peas, hay, castor beans, sunflower seed, safflower seed, and hops; enforcement of proper labeling of commercial feeding stuffs through inspection, sampling, and analysis of feeds and feed materials; registration and inspection of public grain warehouses, primarily for control of insects in stored grain; and optional licensing, bonding, and inspection of warehouses storing agricultural products. No change in the nature of the services is contemplated, but some growth in the major functions is expected. 1 additional supervising field crop inspector position is requested for the Stockton office which has become a major inspection point.

BUREAU OF RODENT AND WEED CONTROL AND SEED INSPECTION

Analysis

The special fund activities include an optional seed testing and certification service performed in connection with production and marketing of certified seed. Activities are proposed to be continued at the existing level as required by requests for service. Fees are being increased during the current year to compensate for the increase in salaries, supplies and other costs necessary in testing of samples submitted for testing.

BUREAU OF CHEMISTRY

Analysis

The special fund activities of this bureau include the control and regulation of economic poisons and fertilizing materials by sampling and analyzing materials to compare their composition with their guaranteed analyses; and licensing agricultural pest control operators and pilots.

3 additional positions are proposed to meet increased work load for fertilizing materials; 1 inspector of economic poisons and fertilizers to inspect and sample the increased quantities of agricultural chemicals now being sold and used; 1 junior chemist to analyze these added samples necessary to maintain the rate of sampling previously carried on; and a stenographer-clerk to handle the increased correspondence, reports, and certificates.

BUREAU OF LIVESTOCK IDENTIFICATION

Analysis

This bureau registers livestock brands; inspects cattle and hides for protection of cattle owners against theft; licenses and regulates public cattle salesyards and slaughterhouses; issues horse transportation licenses; cooperates with local county and state law-enforcement agencies in collecting evidence and prosecuting violators of the hide and brand law; issues weekly bulletins on lost, strayed or stolen animals; seizes and sells estrays as provided in the estray law; and issues permits for capture of wild burros.

4 new positions are requested in the budget year to take care of increased work load and to provide relief for compensating time off made necessary by holiday work of regular inspectors.

BUREAU OF MARKET ENFORCEMENT

Analysis

The bureau administers and enforces the provisions of Chapters 6 and 9, Division 6, of the Agricultural Code, referred to as the Produce Dealers Act, and Processors Law, respectively. To adequately take care of an increasing work load 2 new investigator positions are provided to be headquartered at Sacramento and San Francisco; otherwise the program is projected at current levels.

BUREAU OF MILK CONTROL

Analysis

The Bureau of Milk Control administers and enforces the California milk control statutes relating to the establishment of minimum prices for fluid milk and fluid cream and dealing with fair trade practices in the marketing of milk and other dairy products; also the Dairy Produce Exchange Act and the California Dairy Industry Advisory Board Act.

The California Milk Control Act provides for the establishment of milk marketing areas; presently there are 37 separate areas where minimum producer and minimum resale prices are established. The bureau is also required to license market milk distributors and secure bonds guaranteeing payment to producers. The statutes provide for an assessment to support these functions.

The budget as proposed is based upon continuation of the current year level of service.

BUREAU OF FRUIT AND VEGETABLE STANDARDIZATION

Analysis

The special fund activities of this bureau include canning tomato inspection which involves inspection of all loads of canning tomatoes received by processors. Activity is governed by the tonnage of canning tomatoes marketed. The current year's production is estimated at 2,900,000 tons due to an increase in acreage planted and favorable weather and marketing conditions. The budget year is based on an estimate of 2,500,000 tons since a reduction generally follows an oversize season. No significant change is anticipated in the budget year.

Another activity includes seed potato certification under which acres of seed potatoes entered for certification must be inspected to determine purity of strain and freedom from disease and defects. The same level of activity is continued.

BUREAU OF SHIPPING POINT INSPECTION

Analysis

This bureau, in cooperation with the United States Department of Agriculture, makes inspections and issues federal-state certificates covering pack, size, quality, condition, and grade of fruits, nuts, and vegetables based on United States standards or other recognized standards. This service is optional, self-supporting, and is furnished at requests of shippers, growers or other financially interested parties. It is also required by certain federal and state marketing control boards to show compliance with standards established under marketing order regulations. It is expected that the volume of work will continue at approximately the same level as the current year with provision for a new position to handle cost accounting problems arising in connection with establishing proper charges for work performed.

BUREAU OF WEIGHTS AND MEASURES

Analysis

The special fund activities of this bureau are concerned with: (1) Issuance of motor fuel pump license tags and permits to sell antifreeze and brake fluid, and enforcement of the laws concerning misrepresentation and adulteration of gasoline, motor oil, brake fluid, and antifreeze. 1 additional supervising investigator, petroleum products, grade II, is recommended for the purpose of coordinating the field activities of the county sealers of weights and measures and the state employees in connection with the enforcement work covering the above automotive products.

(2) Enforcement of that portion of the Business and Professions Code, Chapter 7, Division 5, relating to public weighmasters. Chapter 5, Statutes of 1956, transferred this function from the General Fund to the Department of Agriculture Fund, where it now appears for the first time. A more intensive program to establish proper weighmaster procedures was desired when the legislation was enacted, but this was not possible with available revenue. 1 additional senior weighing and measuring inspector is recommended upon the basis that estimated revenue will be adequate.

CALIFORNIA DAIRY INDUSTRY ADVISORY BOARD

The California Dairy Industry Advisory Board provides the means for the dairy industry to develop, maintain, and expand markets for California dairy products. The board, made up of industry representatives, acts in an advisory capacity to the Director of the Department of Agriculture, who is designated as the administrative and enforcement officer for duties outlined in Division 4, Chapter 14, of the Agricultural Code. The cost of this program is defrayed entirely from fees paid by producers and handlers of dairy products.

GENERAL ANALYSIS

Number of positions	*11.4*	*14.8*	*14.9*	*0.1*

The chicken testing program continues with the random sample egg laying and random sample meat tests at the site near Modesto. The turkey testing program started its first test May 10, 1956, and the budget year continues the program with random sample turkey meat production and turkey fryer tests at the site near Keyes. Additional positions of a specialist in poultry tests and an intermediate clerk are proposed, in addition to continuation of 3 reclassified positions, in order to relieve the commission members and the University of California at Davis from work load increases partially performed by them, but which are a staff responsibility. Analysis and planning of tests, and continuous contact with the poultry industry is necessary to make poultry tests meaningful to industry.

DEPARTMENT OF CORRECTIONS

The department has the responsibility for the coordination of the correctional activities of the State. It is responsible for the administrative control and operation of all state institutions for adult felons. The department also inspects prisons and jails and makes recommendations on plans and specifications of facilities.

[a] Active parole cases under California supervision including cases supervised for other states under cooperative agreements.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS

The 1957-58 Budget is based on an average inmate population of 16,196, an increase of 759 or 4.9 percent over the 15,437 average for the 1956-57 Fiscal Year. The latter population estimate is 456 less than the 15,893 on which the 1956-57 Budget is based, and permitted reduction in overcrowding in several of the institutions. The average number of active parolees under California supervision is estimated to be 7,610 in the 1957-58 Fiscal Year, an increase of 390 or 5.4 percent over the 1956-57 Fiscal Year. Of this increase, 121 additional parolees will be assigned to the experimental Special Intensive Parole Unit, for a total of 700 in this program.

The total increase in the department's budgets in the amount of $1,773,499 or 6.7 percent, reflects the net effect of the following changes involving more than one institution:

1. Additional facilities.
2. Extension of the intensive treatment program.
3. Reduction in the classification and parole staff in accordance with the accepted work load formula.
4. Increase in the psychiatric treatment program.
5. Increased dental services with emphasis on treatment in the reception-guidance centers.
6. Provision for a more uniform supervisory custodial staffing pattern.
7. Addition of 3 student professional assistant positions to give college or university students meaningful experience in the correctional field.
8. Relief for instructors in recreation and physical education.
9. Extension of the Jewish chaplaincy service in the institutions, and provision for religious services for the permanent State forestry and road camps.
10. Change in relationship between Inmate Welfare Fund and General Fund support expenditures.

The following major changes in the individual budgets which contribute to the increase are discussed in the respective budgets:

1. Additional staff necessary to implement a management study of the Institution for Women made by the department.
2. Increase in the number of parolees supervised by the Adult Authority including an increased number under the Special Intensive Parole Unit, and increased staff to eliminate parole officer overtime.
3. Increase in the number of female parolees supervised by the Board of Trustees, Institution for Women.

In order to make a better use of the existing authorized staff and in lieu of requesting additional personnel, several positions have been transferred between institutions and between functions in the same institution. These changes are footnoted in the several budgets. 223 new positions are proposed, and a total of 33 are abolished during both the 1956-57 and 1957-58 Fiscal Years, for a net increase of 190 positions.

ADDITIONAL FACILITIES

Additional facilities scheduled for occupancy during the 1957-58 Fiscal Year are as follows:

Medical Facility:
  Reception-guidance center—600 capacity.
Institution for Men:
  Two new 80-man state forestry camps.
State Prison at Folsom:
  A new 80-man state forestry camp planned for the 1956-57 Fiscal Year will not open until July 1, 1957.
State Prison at San Quentin:
  A new 80-man state forestry camp planned for activation about October 1, 1956, will not open until July 1, 1957.
Institution for Women, Corona:
  A 20-bed Tuberculosis Unit addition to the hospital will be available about January 1, 1958, and 20-bed additions to 4 existing cottages will be completed about June, 1958.

INTENSIVE TREATMENT PROGRAM

The following new positions are proposed for this program initiated at the State Prison at San Quentin July 1, 1956, and extended to the Institution for Men, Chino, on January 1, 1957 and proposed for the State Prison at Soledad on January 1, 1958:

Institution		*Proposed new positions*	*Estimated cost*
Institution for Men	1	Correctional classificational officer IV	$6,360
	0.2	Psychiatrist II	2,172
State Prison at San Quentin	0.2	Psychiatrist II	2,172
State Prison at Soledad	12	Regular staff (effective Jan. 1, 1958)	29,653
	0.2	Psychiatrist II (effective Jan. 1, 1958)	1,086
		Operating expenses	925
		Equipment	8,855
Total	13.6		$51,233

The correctional classification officer IV position at the Institution for Men will head up the program at this institution and is part of the approved staffing. A position of this classification was temporarily established, effective January 1, 1957, in lieu of a classification officer II, as experience with the program at the State Prison at San Quentin indicated need for leadership upon inception of the program.

Part-time psychiatric consultant service is proposed for the program to provide the clinical staff and administration with expert interpretation of human behavior and detailed knowledge of psychiatrically oriented treatment techniques.

The extension of the program to the State Prison at Soledad was originally planned for July 1, 1957, but is now proposed effective January 1, 1958. Establishment at this time is contingent upon (1) determining the necessity of obtaining a larger and/or a more representative sample for the experiment, and (2) the verification of availability of a sufficient number of inmates at this institution to carry on the program. This information should be available prior to that time upon completion of a model of the study and from experience gained.

The Board of Corrections has appointed an advisory research committee to aid with this experiment as well as with other studies currently being conducted by the department.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS—Continued

CLASSIFICATION AND PAROLE

A reduction in the classification and parole staffs of the various institutions is due to a decrease in the estimated movement of the inmate population. The Legislature requested a study of actual movement figures experienced in prior years. The projected estimate of these figures, together with an estimated decrease in the number of paroles from the 1955-56 Fiscal Year, resulted in a reduction in work load figures for both the 1956-57 and 1957-58 Fiscal Years. The following 8 positions are abolished in the respective institutions on the basis of the established work load formulas. 7 are deleted in the 1956-57 Fiscal Year and 1 is deleted effective July 1, 1957.

Institution	*Clerical Positions*	*Professional Positions*	*Total*
Medical Facility	—1	–	—1
Men's Colony	—1	–	—1
State Prison at Folsom	—3	—1	—4
State Prison at San Quentin	—2	–	—2
Totals	—7	—1	—8

PSYCHIATRIC TREATMENT PROGRAM

Provision is made to increase the psychiatric treatment program of the department by the addition of 6 positions as follows:

2	Medical Facility (plus reclassification of psychiatrist II to III)	$22,320
3	Men's Colony	15,426
3	State Prison at Folsom	15,426
—2	State Prison at San Quentin	—10,212
6	Total	$42,960

The reclassification of the existing psychiatrist II position to psychiatrist III at the Medical Facility is to provide a position for coordination of the total departmental psychiatric program on a half-time basis, and to direct the in-service training of the 2 proposed new psychiatrist II positions during the remainder of his time. The latter positions will be filled with recent graduates who have taken their resident training at the Langley Porter Clinic. It is anticipated that they will spend a minimum of 6 months at the Medical Facility as part of their agreement to spend 2 years in State service. It is hoped that some of these psychiatrists will choose to continue working in the correctional field. The 2 psychiatric resident positions at the State Prison at San Quentin were abolished as the resident training program will be conducted entirely at the Langley Porter Clinic in the future, and residents will not be available to San Quentin on a rotating basis as in the past.

A nucleus staff is provided at the Men's Colony and the State Prison at Folsom because of the particular need of these institutions, which now have only one authorized psychiatrist position each. The Men's Colony houses many inmates who have been convicted of crimes against young children, as well as many others needing psychiatric treatment. The Folsom institution houses a large number of the most difficult inmates in the State prison system. At least 700 of these inmates have been convicted of such crimes as assault, rape, narcotics violations, and habitual criminal charges, and it is believed that many will profit from psychiatric attention. Treatment will be given to the cases having the greatest need at each institution and the limited staff will not attempt to serve the total population.

A study will be made by the department before additional staff is requested to define and determine:

a. The role of the psychiatrist and what he is expected to accomplish in the institution, both individually and as the leader of the psychiatric team.

b. The extent of the psychiatric work load, both for the psychiatrist individually and the psychiatric team.

c. Time factors applicable to work load, which will make it possible to determine staff needs.

DENTAL PROGRAM

10.5 additional dentist positions, together with equipment, operating expenses and minor capital outlay, are proposed for this program as follows:

	Number of positions	*Cost*	*Operating expenses*	*Equipment*	*Alterations*	*Total*
Reception-guidance centers at						
Medical Facility	3.5	$36,204	$5,250	–	–	$41,454
Institution for Men	3	31,032	4,500	$10,380	$4,000	49,912
Deuel Vocational Institution	1	10,344	1,500	5,190	750	17,784
Institution for Women	0.5	5,172	1,000	–	–	6,172
Institutions						
Men's Colony	1	10,344	2,000	5,190	1,000	18,534
Institution for Men (Tehachapi branch)	0.5	5,172	750	–	–	5,922
State Prison at Folsom	1	10,344	2,000	5,190	–	17,534
Totals	10.5	$108,612	$17,000	$25,950	$5,750	$157,312

Initial operative dentistry will be performed in the 3 reception centers and at the women's institution. This includes extractions, fillings, prophylaxis, root canal treatments, treatment of oral diseases and a complete examination. Work load for this service is proposed at 3.11 hours per new admission, and 50 percent of this time for parole violators.

Prosthetic and maintenance dentistry will be performed in the institutions. Prosthetic appliances are limited to restoring enough teeth to, (a) achieve sufficient mastication to restore or maintain health; (b) replace an anterior or lateral tooth or teeth, the absence of which is disfiguring. This work will be performed by existing staff in the institutions with the exception of 3 institutions. 1 additional position is proposed for the Men's Colony and Folsom based on work load occasioned by the large number of older inmates requiring prosthetic appliances. 1 half-time position is proposed for the Tehachapi Branch bringing services at this 500 capacity institution to 1 full-time position. Only 2 days service per week can be obtained under the present arrangement, which is conducted on a contractual arrangement at a cost of $55 per visit and is inadequate to the needs. This would permit the facility to obtain a full-time dentist at a slight increase in cost over that which would be necessary under a part-time contractual service.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS—Continued

SUPERVISORY CUSTODIAL STAFFING

2 additional correctional lieutenant and 4 correctional sergeant posts are provided to implement a study made by the department of the supervisory custodial staffs of the various institutions. Several reclassifications, transfers between custodial posts, and post title changes in addition to the proposed new posts are necessary to obtain the proper organizational structure and to achieve as much uniformity as possible. These changes will provide standards in staffing which can be used in providing custodial personnel for future institutions.

No additional funds have been provided for reclassifications other than the normal decrease in estimated salary savings that is made. The 9.6 additional positions, which include relief, will cost $47,016 and are distributed as follows:

3.4	Men's Colony	$16,872
1	Institution for Men	4,740
2.4	State Prison at Folsom	11,376
1.4	State Prison at Soledad	7,392
1.4	Deuel Vocational Institution	6,636
9.6	Total	$47,016

STUDENT PROFESSIONAL ASSISTANTS

4 additional positions at a cost of $11,952 are proposed, 1 each at the Men's Colony, the State Prison at Soledad, Deuel Vocational Institution, and 1 for the Parole Outpatient Clinic. At the present time, 6 positions are authorized for the various institutions and 2 are provided the Division of Adult Paroles.

This program is undertaken in cooperation with various colleges and universities in the State to provide meaningful experiences for students in preparation for careers in the correctional service. Besides aiding the students in their training, the State has the opportunity to recruit well qualified young people.

RELIEF FOR INSTRUCTORS IN RECREATION AND PHYSICAL EDUCATION

Provides a total of 2.4 correctional sergeant positions, or 0.6 of a position at each of four institutions for weekend, vacation, holidays and sick leave relief for the instructor in recreation and physical education. The 4 institutions needing this relief are the Men's Colony, the State Prison at Folsom, the Deuel Vocational Institution, and the State Prison at Soledad. These institutions have only 1 authorized instructor position, who is available only 228 days of the year. As the recreation program is conducted 7 days a week, additional staff is required to provide supervision of the inmate group leaders, the other 137 days. The total cost of the additional positions is $11,376.

The total program is planned and directed by the instructor, and the correctional sergeant will carry it out during his absence.

INCREASED CHAPLAINCY SERVICE

Provision is made for part-time (0.2) Jewish chaplaincy service in those institutions having a minimum of 25 inmates of this religion which do not now have such service authorized. This involves the Medical Facility and the Men's Colony at a total cost of $2,160.

Religious service for the permanent state forestry and road camps is proposed equivalent to one-tenth of a chaplain position for each of the 2 major faiths (Protestant and Catholic). Services for each faith will be held on alternate Sundays. A total of 2.6 chaplain positions will be needed at the various camps at a cost of $14,773.

CHANGE IN RELATIONSHIP BETWEEN INMATE WELFARE FUND AND GENERAL FUND SUPPORT EXPENDITURES

A revised policy of allocation of expenditures between the Inmate Welfare Fund and the General Fund has been established due to inconsistencies in the original policy. Under the revised policy, the General Fund assumes the cost of the entire organized athletic, educational and religious programs of which part was previously financed from both funds. In return, the Inmate Welfare Fund is to assume the purchase of original complements of television sets for the institutions, the replacement thereof, upkeep of all television equipment and the cost of film rentals. Original complements of television sets in the permanent camps will still be financed from the General Fund, but serviced and replaced by the Inmate Welfare Fund. The cost transferred to support approximates $26,000. The cost assumed by the Inmate Welfare Fund is approximately the same, consisting of $12,000 for film rentals in camps and $14,000 in purchase and upkeep of television sets.

STANDARDIZED INMATE CLOTHING RATION

When the clothing ration was originally established on a trial basis at 3 institutions, it was thought that the necessary information for extension of the ration to the other institutions could be accumulaed by July 1, 1956. However, due to the inability to establish the ration on July 1, 1955 because of delays in receiving shipments and misinterpretations of the ration and the lack of uniformity in the clothing records at the institutions, the information will not be available until July, 1957. Therefore, no additional funds are being requested in the 1957-58 Fiscal Year to establish rations at any of the remaining institutions. These funds will be requested in the 1958-59 Fiscal Year Budget when the current survey is completed.

Department of Corrections

DEPARTMENTAL ADMINISTRATION

eneral administrative office for all Department of Corrections facilities. Over-all supervision and coordination is provided by the agency.

GENERAL ANALYSIS

Number of positions	*71.3*	*74.2*	*80.5*	*6.3*

This budget provides for increased advisory service to cities and counties on the planning of jail and detention facilities, for the supervision of the group counseling program, and for an additional staff member to supervise the departmental minor construction and maintenance programs. The staff connected with the Special Study Commission on Correctional Services and Facilities is continued until September 30, 1957, in order to process and preserve the accumulated data.

SALARIES AND WAGES: The increased cost of $22,227 is mainly due to the transfer of 1 position from the State Prison at San Quentin and to 5 proposed new positions. Salary increases are more than offset by increased salary savings and the elimination of the staff for the Special Study Commission on Correctional Facilities and Services.

Proposed New Positions:

1 Field representative To provide additional advisory service to cities and counties on jail and detention facilities, as specified in Sections 4015 and 6029 of the Penal Code. 1 such position for this service is presently authorized.	$7,356
1 Associate construction analyst To provide for supervision and coordination of the minor construction and maintenance programs, assisting the presently authorized position of departmental maintenance and construction supervisor. The latter position is now supervising these activities in addition to coordinating the major construction program. This will enable the present position to devote the major portion of his time to major construction problems.	7,008
1 Supervising psychiatric social worker II To provide coordination and direction of the departmental group counseling program. This activity will include about 8,000 inmates in the various institutions. The position was established on a temporary basis at the State Prison at Soledad in the 1956-57 Fiscal Year, and was financed by curtailment of the program at the several institutions.	6,360
2 Intermediate stenographer-clerk 1 position will provide for the increased work load in the executive offices. The last position was provided for these offices in the 1948-49 Fiscal Year. The other position will provide clerical service for the proposed new positions of field representative and associate construction analyst.	6,912

---

[a] Composed of savings in salaries and wages, $5,808; operating expenses, $3,048; and equipment, $604.

Department of Corrections

DEPARTMENTAL ADMINISTRATION—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

OPERATING EXPENSES: The increase of $3,760 is primarily due to operating expenses for the proposed new positions partially offset by the completion of staff work of the Special Study Commission on Correctional Facilities and Services. The $75,615 proposed includes $6,800 for a research planning project in cooperation with the University of California at Los Angeles, $1,200 for statistical consultant service for experimental programs now in progress, $600 for staff consultants for in-service training of the administrative personnel of the various institutions and departmental administration, and $1,000 for an experimental proximity alarm system to be constructed and installed at the Medical Facility. Out-of-state traveling is increased $3,690, which is primarily due to the Congress of Corrections being held in another state. The 1956-57 session was held in California for the first time in several years. All of the out-of-state travel for the department is reflected in this budget beginning in the 1956-57 Fiscal Year.

EQUIPMENT: The $11,242 proposed is an increase of $6,337 over the 1956-57 Fiscal Year and includes office equipment for the proposed new positions, $1,814; replacement and additional files for the central records office, $2,854; mailing scale and postage meter, $752; and new furniture for the director's office, $2,550.

OTHER CURRENT EXPENSES: The small increase in transporation of prisoners is related to the estimated increase in movement of prison population.

The increase of $4,200 for returning fugitives from justice from outside the State is due to an estimated increase in work load. The average cost per claim has been reduced from $354 in the 1952-53 Fiscal Year to $274 for the 1955-56 Fiscal Year.

ADMINISTRATION

The administrative staff supervises and coordinates the following functions: (1) accounting, budgeting, and business management; (2) personnel and in-service training of employees; (3) maintenance and upkeep of plant and construction; (4) feeding and nutrition; (5) custody and treatment; (6) prison industries; (7) compilation and dissemination of crime study data.

Department of Corrections

MEDICAL FACILITY—Continued

GENERAL ANALYSIS—Continued

The main institution population is estimated to remain the same in both the 1956-57 and 1957-58 Fiscal Years. The new 600-capacity reception-guidance center will be completed about February, 1957, and will begin receiving inmates July 1, 1957. Full capacity will be reached by the second quarter and the total institution population will increase by 540, or 40 percent, over the 1,350 estimated for the 1956-57 Fiscal Year. The intervening period between completion of the construction and receipt of inmates will be used to equip the new facility and recruit and train custodial staff. Temporary help funds in the amount of $19,190 are provided for the training activities in the 1956-57 Fiscal Year.

Per capita costs are estimated to decrease $258 or 13.9 percent. This is due to the increase in population of 40 percent which more than offsets the increased expenditures in the main institution functions.

SALARIES AND WAGES: The increased cost of $626,387 is mainly due to the transfer of positions from the State Prison at San Quentin to staff the reception function and otherwise care for the additional inmates occupying the new facilities, to the additional dental service in the reception-guidance center, and the increased psychiatric program. Most of the proposed new positions are to provide custodial staff for the reception-guidance center. Salary savings have been increased and partially offset the cost of merit salary increases.

Positions Transferred:	
For the Main Institution:	
1 Intermediate clerk (mail)	$3,196
To provide for the work load in the mail function due to increased population. A similar position is being deleted from the budget of the State Prison at Folsom. Two other mail clerk positions are proposed below. One is explained as a transfer for the reception-guidance center and the other under proposed new positions.	
3 Correctional officer	12,582
Transferred from the State Prison at Folsom to act as state agents in returning prisoners from out-of-state. This function will be supervised by this institution in the future.	
1 Prison records officer II (identification unit)	4,980
Transferred from the State Prison at San Quentin to supervise the departmental identification unit. This will be the only position for this function.	
For the Reception-guidance Center:	
32 Positions (reception-guidance center)	181,445
Transferred from the State Prison at San Quentin and are currently budgeted for the reception function at that institution.	
1 Intermediate clerk (mail)	3,196
Transferred from the State Prison at San Quentin for the increased work load in the mail function occasioned by the reception process.	
1 Physician and surgeon II	10,860
1 Senior dentist	10,344
Transferred from the State Prison at San Quentin to provide medical and dental care for the reception-guidance center inmates.	
1 Prison records officer I	4,512
Transferred from the State Prison at San Quentin. It was budgeted as a senior stenographer-clerk in the classification and parole unit at that institution, but performed work for the reception-guidance center. This position will now be budgeted in the reception function, which will provide a staff comparable to that of the reception center at Chino.	
2 Intermediate typist-clerk	6,588
Transferred from the State Prison at San Quentin where they were budgeted in the classification and parole function, but performed work for the reception-guidance center. These positions will now be budgeted in the reception function.	
1 Instructor in general shop	5,232
Transferred from the State Prison at San Quentin where it was budgeted in the education unit, but performed vocational testing service for the reception process. It will now be budgeted in the reception function. An additional position for this service is proposed below as a new position.	
Proposed New Positions:	
1 Instructor in meat cutting and butchering	5,232
To supervise the preparation of meat and to give vocational training in the butchering trade. This will be the first position in this institution for this service, and all other male institutions have a similar position.	
3 Supervising cook I	12,582
To provide for the additional feeding work load due to the new reception-guidance center, and to supervise preparation of special diets necessary for the type of inmates cared for in this institution.	
1 Correctional captain	6,672
4 Correctional lieutenant	21,984
6 Correctional sergeant	28,440
39 Correctional officer	163,566
To provide custodial coverage for the reception-guidance center posts shown below:	

Post	*Coverage*	*Number of posts*
Correctional Captain:		
Chief custodial officer	Second watch	1
		1
Correctional Lieutenant:

		39

This is comparable staffing to that used at the Reception-Guidance Center at Chino.

10 Correctional officer $41,940

2 Posts for Tower No. 2

2 Posts for Tower No. 4

To provide coverage on the second and third watches, 7 days a week on Tower No. 2 located at the northeast corner of the institution adjacent to the new reception-guidance center and Tower No. 4 located at the southeast corner of the institution. These 4 posts are necessary for perimeter coverage upon activation of the new reception center.

1 Post for the maintenance vocational shop area.

To provide custodial coverage 5 days a week on the second watch for the area located outside, but directly adjacent to the main prison buildings. This area contains 4 vocational and 6 maintenance shops. Part of the duties of this position will be to make frequent shakedowns of inmates and inspections of the area to prevent weapons and contraband from being made or getting out of the shop area into the main institution.

1 Post for the main kitchen

This proposed additional post on a 7-day-a-week basis would allow 2 officers for each of 2 shifts, and 1 sergeant, who would overlap the 2 officer shifts, for over-all supervision. This plan has been effective in other institutions and is the accepted method of operation.

4 Positions for relief of the above 6 posts:

2 Medical technical assistant 8,388

To provide 1 post on a 7-day-a-week basis to process inmates for and conduct a daily clinic line in the new reception-guidance center. 1 position is required for relief.

1 Intermediate clerk (mail) 3,294

This position, together with 2 intermediate clerk positions transferred from other institutions as set forth above and 3 presently authorized positions, will provide a total staff of 6 for the mail function. This staff is comparable in size to the other male institutions with about the same inmate population.

3.5 Senior dentist 36,204

To provide additional dental service in the reception-guidance center. These positions are explained further in the general analysis of the departmental summary.

2 Psychiatrist II 21,720

1 Psychiatrist III (replacing a psychiatrist II) 600

These positions are part of the increased psychiatric program, and are explained further in the general analysis of the departmental summary. 2 psychiatric resident positions are being abolished at San Quentin in connection with these positions.

1 Instructor in recreation and physical education 5,232

To provide for the expanded recreation and physical education program due to the activation of the reception-guidance center. Also, this position will provide relief for the 1 other such position now budgeted.

0.2 Chaplain –Jewish (intermittent) 1,080

To provide religious services for about 30 inmates of the Jewish religion. This part-time position is explained further in the general analysis of the departmental summary.

1 Painter foreman 5,496

1 Electrician foreman 5,496

To provide additional maintenance staff for the increased size of the institution due to activation of the reception-guidance center, and for the increased maintenance necessary as the relatively new main institution ages. Other institutions of this type have comparable maintenance staffs in these trades.

1 Instructor in general shop 5,232

This position, together with 1 position transferred from the State Prison at San Quentin as set forth above, will provide vocational testing service for the inmates processed in the reception-guidance center. 2 such positions are budgeted for the other reception center at the Institution for Men, Chino.

Positions Deleted:

1 Intermediate typist-clerk —3,294

This position is abolished on the basis of accepted work load standards for the classification and parole function.

Department of Corrections

MEDICAL FACILITY—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

OPERATING EXPENSES: The increase of $245,412 is primarily due to the activation of the new reception-guidance center with a population increase of 540 inmates or 40 percent. Medical prosthetic appliances were formerly budgeted at both the State Prison at San Quentin and this institution, with $2,500 being provided at each facility. The entire amount of $5,000 is now budgeted at this institution.

EQUIPMENT: The increase of $10,203 from the $3,250 provided in the 1956-57 Fiscal Year includes the following significant items: replacement mattresses, $4,200; equipment for proposed new positions, $2,291; and an additional automobile, $1,550.

REIMBURSEMENTS: The increase of $36,810 is due to increases in service to employees of $3,860 for the proposed additional staff, and an increase of $32,950 for the care of 15 additional recalcitrant tuberculars which is paid for by the Department of Public Health.

OTHER CURRENT EXPENSES: $20,180 is proposed to provide initial inventories of materials and supplies; for expenses of moving and relocating employees and their belongings; and for the expense of refinishing furniture to be transferred from San Quentin to Vacaville.

[f] 1 position of physician and surgeon and 1 position of senior dentist transferred from the State Prison at San Quentin to service the reception-guidance center.

[g] Group counseling will not be conducted at this institution.

[h] Funds transferred from operating expenses to obtain consultant services on an intermittent rather than a contractual basis.

[i] Transferred from Maintenance and Operation of Plant to conform with policy of carrying instructor classifications under education program.

[j] These academic education positions established in lieu of contracting with local school district for the service. Funds for contractual service have been reduced accordingly.

[k] Transferred from the State Prison at San Quentin to supervise the departmental identification unit which will be operated by this institution.

[l] 1 position eliminated based on the accepted work load formula.

† Salary range determined by education and experience in accordance with "Ranges and Criteria of Application for Teachers."

Total Expenditures, Purchase of Materials and Supplies to Provide Initial Inventory, and Moving Expenses of Employees	$23,624	–	–	
Purchase of Materials and Supplies to Provide Additional Inventory:				
Budget Act appropriation (expenditures)	–	$11,625	–	—11,625
TOTAL EXPENDITURES	$1,337,570	$1,683,277	$1,823,817	$140,540 (8.3%)
GENERAL ANALYSIS				
Number of positions	*176*	*192*	*208.2*	*16.2*
POPULATION AND UNIT COSTS				
Average inmate population	915	1,100	1,150	50
End of year population	(959)	(1,150)	(1,150)	(–)
Cost per inmate [b]	$1,456	$1,520	$1,586	$66 (4.3%)

This institution was activated in October, 1954, with an initial capacity of 600 inmates, and has subsequently been increased to 1,200, with an average daily population of 1,150 estimated for the 1957-58 Fiscal Year. Over 90 percent of the inmates are 40 years of age or older, with about 30 percent of these being past the age of 60. Limited academic and vocational education programs are provided, and 2 light industrial projects are planned.

Due to the arrangement of this barracks-type temporary facility, it has been necessary to activate an area adjacent, though somewhat removed from the housing facilities, for warehousing and some other activities. Some of the new positions are to supervise this area, while others are to complete the staffing of this relatively new institution.

SALARIES AND WAGES: The increase of $123,997 is due to salary increases, partially offset by an increase in estimated salary savings and the deletion of 1 position, plus 18.2 proposed new positions.

Proposed New Positions:	
1 Supervising cook I	$4,194
To provide cooking supervision for the separate dining room where special feeding problems are accommodated, and to supervise the preparation and serving of special diets.	
1 Correctional lieutenant	5,496
To provide a post to supervise the housing area 7 days a week. This position is explained further in the general analysis of the departmental summary.	
3 Correctional sergeant	14,220
1 post for the receiving and release function on a 7-day-a-week basis. This position is explained further in the general analysis of the departmental summary.	
2 positions are needed for relief of the above lieutenant and sergeant positions, and for relief of the instructor in recreation and physical education. The need for relief of the latter position is explained further in the general analysis of the departmental summary.	

---

[a] Composed of savings in salaries and wages, $10,329; operating expenses, $15,963; equipment, $891; inmate pay-work projects, $4; and loss in reimbursements, $6,574.

[b] Includes cost of academic education program for all three years.

Department of Corrections

MEN'S COLONY—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
GENERAL ANALYSIS—Continued				
SALARIES AND WAGES—Continued				
6 Correctional officer				$25,164
1 post for supervision of the custodial office.				
This position on a 7-day-a-week basis will direct the activities of 25 inmate clerks, supervise and route inmates reporting to the associate warden custody, captain or watch lieutenants, and personally handle confidential letters, files and security equipment located in the area.				
3 posts for the outside area.				
These posts will provide 24-hour, 7-day-a-week coverage for the area adjacent to, but outside the main confines of the institution. This area contains about 40 acres with 22 buildings housing the employees' dining room, the automotive equipment, and the warehouse facilities for the institution. About 50 inmates are employed daily in this area.				
2 positions are needed for relief of the above 4 posts.				
1 Senior dentist				10,344
This position is needed for the heavy work load occasioned by the large number of older inmates requiring minimum prosthetic work. This position is explained further in the general analysis of the departmental summary.				
1 Pharmacist				5,496
To provide a full-time position for the pharmacy. 1 medical technical position is now budgeted to supervise the pharmacy, the clinical laboratory and the X-ray room. Experience has indicated that the work load for the pharmacy requires 1 position, and that the clinical and X-ray activities require 1 position.				
1 Clinical psychologist II				6,360
1 Correctional classification officer III				5,772
1 Intermediate typist-clerk				3,456
These positions will provide minimum additional psychiatric service, and are explained further in the general analysis of the departmental summary.				
1 Instructor in electronics				5,232
To provide supervision for the second vocational class, and to aid with the maintenance work.				
0.2 Chaplain—Jewish (part time)				1,080
To provide religious services for about 30 inmates of the Jewish religion. This part-time position is explained further in the general analysis of the departmental summary.				
1 Student professional assistant				2,988
To provide a training position in cooperation with college or university institutions for students interested in the correctional field. This position is explained further in the general analysis of the departmental summary.				
Positions Deleted:				
1 Intermediate typist-clerk				—3,294
This position is abolished based on accepted work load standards for the classification and parole function. Estimated salary savings have been increased in the 1956-57 Fiscal Year to provide for deletion of this position, effective January 1, 1957.				

OPERATING EXPENSES: The increase of $5,490 is due to an increase in population of 4.5 percent, partly offset by a decreas in feeding, which is due to activation of the bakery.

EQUIPMENT: The total of $31,277 represents an increase of $16,033 and includes the following significant items: $5,190 for denta equipment for the proposed new dental position; $2,500 for additional surgical instruments; $1,000 for nonfiction library books $2,582 for additional fire-fighting equipment; and $1,400 for a replacement automobile. Most of the equipment for this relativel new facility has been recently purchased with Capital Outlay funds, and many items are obtained from the U. S. Army on rental basis.

[c] This position was originally budgeted as a chief psychiatrist. It was reclassified to physician and surgeon III for recruiting purposes, and subsequently upgraded to chief prison medical officer. The position will head up the psychiatric as well as the medical program.

[d] One position eliminated based on the accepted work load formula.

† Salary range determined by education and experience in accordance with "Ranges and Criteria of Application for Teachers."

TOTAL EXPENDITURES FOR SUPPORT	$3,774,870	$4,243,677	$4,491,879	
GENERAL ANALYSIS				
Number of positions	*492.4*	*517.2*	*539.3*	*22.1*
POPULATION AND UNIT COSTS				
Chino Facilities:				
Average Inmate Population:				
Main institution	1,373	1,340	1,360	20
Reception-guidance center [b]	377	400	400	–
Totals	1,750	1,740	1,760	20 (1.1%)
Cost per inmate [b]	$1,600	$1,718	$1,761	$43 (2.5%)
Tehachapi Branch:				
Average inmate population	433	485	500	15 (3.1%)
Cost per inmate [c]	$1,704	$1,819	$1,889	$70 (3.8%)
Highway Road Camp Operations:				
Average inmate population	92	100	100	–
Cost per inmate	$1,136	$1,150	$1,200	$50 (4.3%)
State Forestry Camp Operations:				
Average inmate population	237	240	340	100 (41.6%)
Cost per inmate	$1,313	$1,413	$1,418	$5 (0.3%)

The institution's average population is estimated to increase by 20 inmates. However, the estimated populations for the 1956-57 and 1957-58 Fiscal Years is about 200 less than the 1,972 inmate population estimated in the 1956-57 Governor's Budget. As a result of the population decrease, 2 of the temporary barracks have been deactivated. The increase in per capita costs at the Chino facilities of $43 or 2.5 percent is primarily due to the full-year cost of the intensive treatment program and to the addition of 3 new dental positions.

---

[a] Composed of savings in salaries and wages, $61,103; operating expenses, $34,015; equipment, $942; inmate pay-work projects, $6,759; and loss in reimbursements, $22,237.

[b] Excluding cost of operating reception-guidance center, but includes cost of feeding, housing, medical, and other expenses of the inmates being processed therein and academic educational costs in all three fiscal years.

[c] Does not include administrative services rendered by main institution personnel, but includes academic educational costs in all three years.

Department of Corrections

INSTITUTION FOR MEN, CHINO—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

POPULATION AND UNIT COSTS—Continued

The Tehachapi branch will reach full capacity of 500 by the third quarter of the 1956-57 Fiscal Year. Approximately 240 medium custody inmates replaced the same number of minimum custody inmates in the 1956-57 Fiscal Year, and this change in composition of the population is expected to be permanent. The increase in per capita costs at Tehachapi of $70 or 3.8 percent is mainly due to the 7.5 proposed new positions and to a substantial increase in equipment costs. 5 of these positions are necessary due to the aforementioned change in the composition of the population.

2 new state forestry camps will be activated about October 1, 1957.

SALARIES AND WAGES: The increase of $148,169 is mainly due to the cost of 27.1 proposed new positions and to salary increases partially offset by increased estimated salary savings and the elimination of 13 authorized positions.

Proposed New Positions:

1 Correctional sergeant	$4,740
To provide a supervisory post for week-end visiting equivalent to 0.4 of a position, and to provide relief for the other custodial supervisory posts now budgeted. The need for a week-end visiting position is explained further in the general analysis of the departmental summary.	
3 Senior dentist	31,032
To provide additional dental service in the reception-guidance center. These positions are explained further in the general analysis of the departmental summary.	
1 Correctional classification officer IV	6,360
0.2 Psychiatrist II	2,172
These positions are for the new intensive treatment program, and are explained further in the general analysis of the departmental summary.	
0.2 Chaplain (intermittent) highway road camps	780
1.2 Chaplain (intermittent) (0.4 effective October 1, 1957) state forestry camps	4,290
To provide religious services for the permanent road and forestry camps. These positions are explained further in the general analysis of the departmental summary.	
1 Correctional officer (effective October 1, 1957)	3,120
To serve as transportation officer for the camp program. 2 new 80-man state forestry camps are scheduled to open October 1, 1957. This position is needed to serve these new camps as well as the existing highway road camp and 4 state forestry camps. Other institutions having camp programs of this size have such a position.	
2 Correctional lieutenant (effective October 1, 1957)	8,244
10 Correctional officer (effective October 1, 1957)	31,200
To provide custodial staff for 2 new 80-man state forestry camps to be activated October 1, 1957. This size staff is currently used for all other state forestry camps.	

Positions Deleted:

—12 Correctional officer	—50,328
10 of these positions are no longer needed due to a decrease in inmate population permitting the closing of temporary barracks No. 6 and No. 7, and the elimination of 1 inmate work crew. 2 other work crew positions have been transferred to the Correctional Industries Revolving Fund budget in lieu of reimbursements for custodial services.	
—1 Instructor in plumbing	—5,232
This position was approved in the 1956-57 Budget and not established as it was not needed in the vocational education program due to the decline in inmate population.	

TEHACHAPI BRANCH UNIT

Proposed New Positions:

1 Storekeeper II	4,512
To provide half-time service for the clothing distribution function and half-time service as commissary manager. The commissary warehouse has been moved outside the security area, precluding the present storekeeping position from supervising the clothing function. The business manager now handles the commissary duties in addition to his other duties, and this position will relieve him of much of the clerical work connected with the commissary function.	
1 Baker II	4,194
To supervise the baking of bread and other bakery goods, and to provide part-time relief to the other cooking positions. The institution has purchased bread heretofore, and the baking of bread will save about $2,500 in addition to the cost of the salary of this position. This saving is reflected in feeding costs in operating expenses.	
(0.2) Overtime (lieutenant—in-service training)	1,100
To increase overtime for the in-service training function from (0.4) to (0.6).	
5 Correctional officer	20,970
To provide additional coverage 24 hours, 7 days a week for Barracks C and H, which will house medium instead of minimum custody inmates. This requires 3 posts plus 2 positions for relief. These posts were activated in the 1956-57 Fiscal Year on a temporary basis, and were provided for by transferring officers from the main institution at Chino.	
0.5 Senior dentist	5,172
To increase the dental service from one-half to full-time. This position is explained further in the general analysis of the departmental summary.	

OPERATING EXPENSES: The increase of $98,865 is primarily due to an increase in population at Chino; to the 2 new state forestry camps at a cost of $69,560, part of which is offset by increased reimbursements; to the increased dental program, $4,500; and to 3 nonrecurring maintenance projects at a cost of $18,600.

EQUIPMENT: The increase of $39,296 includes the following significant items: 1 replacement extractor for the laundry, $3,300; 1 replacement dental unit, $2,105, and 2 additional dental chairs and units, $10,380; an additional fire truck, $13,650; automotive replacements for both the main institution and Tehachapi branch, $22,633; and the replacement of 2 low pressure boilers at Tehachapi, $8,500.

REIMBURSEMENTS: The increase of $68,425 in reimbursements is mainly due to the 2 new state forestry camps.

---

[f] This was a proposed new position in the 1956-57 budget. It was not established as it was not needed in the vocational program due to a decrease in population.

[g] A correctional classification officer IV will be temporarily established in lieu of a correctional classification officer II to provide leadership to the new intensive treatment program, which will be activated January 1, 1957. The former position is a proposed new position in this budget.

† Salary range determined by education and experience in accordance with "Ranges and Criteria of Application for Teachers."

Number of positions	*376.4*	*388.3*	*398.1*	*9.8*
POPULATION AND UNIT COSTS				
Institution Operations:				
Average inmate population	2,436	2,115	2,245	130
Cost per inmate[b]	$1,194	$1,431	$1,409	—$22 (—1.5%)
Federal Forestry Camp Operations:				
Average inmate population	51	60	60	–
Cost per inmate	$1,886	$2,290	$2,286	—$4 (—0.1%)
State Forestry Camps:				
Average inmate population	150	160	200	40
Cost per inmate	$1,562	$1,657	$1,581	—$76 (—4.6%)

Analysis

The institution population is estimated to increase 130 or 5.8 percent in the 1957-58 Fiscal Year. However, there is a decline in average population of 395 or 15.7 percent in the 1956-57 Fiscal Year from the 2,510 inmates estimated in the 1956-57 Governor's Budget. This decline will partly reduce overcrowded conditions at this institution.

Per capita costs will decline $22 or 1.5 percent. The decline is due to the relatively small increase in expenditures being offset by the population increase.

The institution will operate 4 federal forestry camps in both the 1956-57 and 1957-58 Fiscal Years, or 1 more than anticipated in the 1956-57 Budget.

The state forestry camp population will include an additional 40 inmates in the 1957-58 Fiscal Year. This increase was to have taken place in the 1956-57 Fiscal Year, but was deferred due to delay in construction of Honor Camp No. 12, Vallecito. It is now expected to be completed about July 1, 1957.

SALARIES AND WAGES: The increase of $75,233 is primarily due to the cost of 18 proposed new positions. Salary increases are offset by increased salary savings, and the deletion and transfer of presently authorized positions.

Positions Transferred:

1 Supervising cook I $4,194

To provide additional coverage for the diversified feeding program which includes the hospital, ranch and personnel kitchens, the vegetable preparation and storage rooms, and the pot washing and storage rooms. This position was established in the 1956-57 Fiscal Year, and a supervising cook I at the State Prison at San Quentin has been deleted.

---

[a] Composed of savings in salaries and wages, $14,221; operating expenses, $71,141; equipment, $1,937; inmate pay-work projects, $407; and loss in reimbursements, $9,365.

[b] Includes cost of academic education program for all three years.

Department of Corrections

STATE PRISON AT FOLSOM—Continued

GENERAL ANALYSIS—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SALARIES AND WAGES—Continued				
—1 Intermediate clerk (mail room)				—$3,294
This position is deleted as it is not needed on the basis of comparison of staffs with the other institutions for the mail function. It will be established at the Medical Facility as it is needed there.				
—3 Correctional officers				—12,582
These positions of state agent are being transferred to the Medical Facility, which will supervise the function of returning prisoners from out-of-state.				
Proposed New Positions:				
3 Correctional sergeant				14,320
These positions are discussed in the general analysis of the departmental summary in the sections concerning the supervisory custodial positions and relief for instructors in recreation and physical education.				
4 Correctional officer (1 expire June 30, 1958)				16,776
1 Post for No. 5 post, sally port gate.				
This post was approved temporarily until June 30, 1957. It is needed on the 8 a.m. to 4 p.m. shift 5 days a week to control truck traffic into the lower yard where the maintenance department is planning to move, and will be necessary until a new road is constructed inside the wall. The new road is scheduled for completion in June, 1958.				
2 Posts for the segregation-isolation unit.				
To provide coverage 24 hours a day, 7 days a week for each floor instead of 2 officers for 3 floors on the first and third shifts. Assignment of officer personnel in this area will be as follows:				

	Shifts		
	12 m.-8 a.m.	*8 a.m.-4 p.m.*	*4 p.m.-12 m.*
Authorized posts	2	3	2
Proposed new posts	1	–	1

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Inmates housed in this unit are the most difficult disciplinary cases of the department and need constant surveillance.				
1 Position is required for relief of the above 3 posts.				
1 Senior dentist				10,344
To provide additional dental service for the older inmates housed in this institution. This position is explained further in the general analysis of the departmental summary.				
1 Clinical psychologist II				6,360
1 Correctional classification officer III				5,772
1 Intermediate typist-clerk				3,294
These positions are part of the increase in psychiatric service, and are explained further in the general analysis of the departmental summary.				
4 Medical technical assistants				16,776
These positions will provide complete 24-hour coverage by 1 medical technical assistant, nurse, or correctional officer for each of the 3 floors of the hospital, except the second floor on the 8 a.m. to 4 p.m. shift, which has 5-day-a-week coverage. In addition, there will be 1 medical technical assistant for the outpatient clinic on the 8 a.m. to 4 p.m. shift 7 days a week, a pharmacist, and 1 clerical position. The hospital contains 100 ward beds and 24 cells. In addition to their regular hospital ward duties, medical technical assistants visit other areas of the institution when called. Due to custodial measures necessary at a maximum security institution, especially in the evening and night hours, such calls to cell blocks practically monopolize the time of 1 man, leaving coverage in the hospital to 2 positions for the 3 floors.				
1 Senior typist-clerk				3,996
To provide clerical service for the medical department. This position was deleted in the 1956-57 Fiscal Year under provisions of Section 8 of the Budget Act. It was erroneously reported as being budgeted in classification and parole when deleted, but was actually part of the medical department. This would be the only clerical position to service the existing medical staff, and all male institutions have at least 1 such position.				
1 Instructor in painting				5,232
To provide for the training of inmates in the proper trade procedures in painting leading to eventual journeyman status as well as improving the maintenance program for the institution.				
0.4 Correctional officer (intermittent)				1,678
To provide for additional camp transportation services during the period that the federal forestry camps are in operation. Costs attributable to the federal forestry camp program are mostly offset by reimbursement from the United States Forestry Service.				
0.6 Chaplain (intermittent)				3,463
This service is explained in the general analysis of the departmental summary.				
Positions Deleted:				
—2 Correctional officer				—8,388
These positions of state agent performed the function of returning prisoners from outside the State. The work load has decreased, and 2 of the 5 positions presently budgeted are no longer needed. They have been deleted effective March 1, 1957.				
—1 Senior typist-clerk				—3,996
This position was subject to Section 8, Budget Act of 1955, and should have been deleted from the 1956-57 Budget. It is proposed as a new position in this budget.				
—1 Correctional classification officer I				—4,980
—3 Intermediate typist-clerk				—9,882
These positions are abolished based on accepted work load standards for the classification and parole function. The correctional classification officer I and 1 intermediate typist-clerk are deleted July 1, 1956, and the other 2 intermediate typist-clerks are deleted January 1, 1957.				

Department of Corrections

STATE PRISON AT FOLSOM—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

OPERATING EXPENSES: The increase of $86,580 is primarily due to the increase in population of 130 or 5.8 percent, to the activation of a new state forestry spike camp, to an increase in parole clothing of about $9,000 due to reduced expenditures in the 1956-57 Fiscal Year made possible by a surplus inventory available in the institution, and to increases in medical service of about $4,000 and educational service of about $5,000, to bring these programs up to a reasonable standard.

EQUIPMENT: The proposed $87,014 is an increase of $10,812, and includes the following significant items: first increment of cell cabinets, $4,836; an additional dental chair and unit, $5,190; additional technical and reference books, $2,400; replacement automotive equipment, $6,150; and a replacement bus, $21,300.

GENERAL ANALYSIS				
Number of positions	*581.9*	*592.8*	*552*	*—40.8*
POPULATION AND UNIT COSTS				
Institution Operations:				
Average Inmate Population:				
Main prison	3,480	3,185	3,470	285
Reception-guidance center	481	600	60	—540
Totals	3,961	3,785	3,530	—255 (—6.7%)
End of year population	(3,933)	(3,935)	(3,635)	(—300)
Cost per inmate[b]	$1,210	$1,328	$1,377	$49 (3.7%)
Federal Forestry Camp Operations:				
Average inmate population	8	–	–	–
Cost per inmate	$2,307	–	–	–
State Forestry Camp Operations:				
Average inmate population	98	135	215	80 (59.2%)
Cost per inmate	$1,715	$1,641	$1,495	—$146 (—8.9%)
Highway Road Camp Operations:				
Average inmate population	107	115	115	–
Cost per inmate	$1,515	$1,620	$1,625	$5 (0.3%)

The estimated average institution population is expected to decline by 255 from the 1956-57 Fiscal Year. The reception-guidance center will be transferred to the Medical Facility beginning July 1, 1957, and the move will be completed by about August 31, 1957. The cell block now occupied by the reception-guidance center inmates will house inmates from the regular population resulting in a population increase of 285 for regular institutional activities.

The new 80-man state forestry camp was expected to be activated on October 1, 1956, but will not open until July 1, 1957. The institution will then be operating 3 state forestry camps with a total population of 225.

1 federal forestry seasonal camp budgeted for the 1956-57 Fiscal Year will not open, and no seasonal camps are planned for this budget.

The 2 state highway road camps presently budgeted will continue in operation.

---

[a] Composed of savings in salaries and wages, $38,901; operating expenses, $203,558; equipment, $13,541; inmate pay-work projects, $25,402; and loss in reimbursements, $16,760.

[b] Excluding cost of operating reception-guidance center, but includes cost of feeding, housing, medical, and other expenses of the inmates being processed therein. Academic educational costs are reflected in all 3 years.

Department of Corrections

STATE PRISON AT SAN QUENTIN—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

SALARIES AND WAGES: The decrease of $221,836 is primarily due to the move of the reception-guidance center to the Medical Facility, which involves the transfer of 40 and the deletion of 7 positions, and to an increase in estimated salary savings of $49,500. A total of 6.2 new positions are proposed.

Positions Transferred:		
1	Supervising cook I	$4,194
	Transferred to the State Prison at Folsom, effective February 1, 1957, because of a reduction in the open hours for the employees' dining room, and a need for the position at Folsom.	
1	Instructor in recreation and physical education	6,285
	Transferred to Departmental Administration as this position serves as a judo instructor in the departmental training program, and is more properly budgeted there.	
1	Intermediate typist-clerk (mail)	3,294
1	Physician and surgeon II	10,860
1	Senior dentist	10,344
1	Instructor in general shop	5,232
1	Prison records officer II	6,060
1	Senior stenographer-clerk	3,996
2	Intermediate typist-clerk	6,588
32	Reception-guidance center employee	186,421
	Transferred to the Medical Facility in connection with the move of the reception-guidance center to that institution, and explained further in the Medical Facility budget.	
Proposed New Positions:		
1	Associate budget analyst	6,672
	To provide a position which can devote full time to the preparation of budget analyses and control, and to survey existing management and operational policies and procedures so as to recommend more efficient and economical procedures. This position will report directly to the business manager, and will be reviewed after a two-year period to determine the increased efficiencies placed into effect.	
1	Correctional officer	4,194
	To provide custodial coverage 8 hours a day 5 days per week on the new industrial area gate which controls both vehicular and pedestrian traffic between the main institution compound and the cotton textile mill area. Approximately 1,600 inmates and 25 trucks are processed daily through this gate.	
0.2	Psychiatrist II	2,172
	To provide consultative service to the intensive treatment staff. This position is explained further in the general analysis of the departmental summary.	
1	Instructor in janitorial services	5,232
	To provide training for those inmates unadaptable to skilled trades. Standardization of institutional janitorial practices and having trained inmates should result in a more economical operation.	
1	Instructor in painting	5,232
	To provide training of inmates in the proper trade procedures in painting. These trained inmates will be used in the institution maintenance program, and will be qualified for positive employment at the time of release. Only 1 painter foreman position is now budgeted to accomplish the painting program.	
1	Stationary engineer	4,980
	To provide additional maintenance help to care for the steam lines, and the steam and refrigeration equipment. Since the inception of production in the cotton textile mill, the work load has increased beyond the capacity of the available staff.	
0.4	Chaplain—intermittent (state road camps)	1,560
0.6	Chaplain—intermittent (state forestry camps)	2,340
	This service is explained in the general analysis of the departmental summary.	
Positions Deleted:		
—1	Assistant correctional captain	—6,672
—1	Correctional sergeant	—4,740
—5	Correctional officer	—20,970
	These positions abolished due to transfer of the reception-guidance center. Custodial coverage will be reduced in the area presently occupied by the newly received inmates, who required more supervision.	
—2	Psychiatric residents	—10,212
	These positions abolished at this institution due to the shift of the in-service training program for psychiatrists to the Medical Facility. This program is explained further in the general analysis of the departmental summary.	
—2	Intermediate typist-clerks	6,588
	These positions are being abolished January 1, 1957, on the basis of accepted work load standards for the classification and parole function.	

OPERATING EXPENSES: The decrease of $17,784 is due to a decline in institution population of 255 or 6.7 percent, and th transfer of the reception-guidance center partially offset by the activation of the new 80-man state forestry camp. $2,500 fo prosthetic devices has been deleted from medical operating expenses and placed in the Medical Facility budget where a tota amount of $5,000 will be available on a department-wide basis. $10,100 has been added to recreation and religion funds for certai items that were formerly budgeted in the Inmate Welfare Fund. The general analysis of the departmental summary explains th change in policy involving these expenditures.

EQUIPMENT: The proposed $57,500 is a decrease of $5,678 from the 1956-57 Fiscal Year, and includes the following significan items: replacement of a strip casting machine, $4,751, and a paper cutter, $2,190, for the print shop; 2 additional dryers for th institution laundry, $1,800; 16 files, $2,502; automotive equipment, $4,725; 2 additional dryers and 2 additional extractors fo the 2 highway road camps; and 5 additional television sets and antennas for the highway road and state forestry camps. Th latter items are discussed further in the general analysis of the departmental summary concerning the Inmate Welfare Funds

INMATE PAY-WORK PROJECTS: The increase of $16,660 is mainly due to the activation of the new state forestry camp.

REIMBURSEMENTS: The increase of $69,750 is primarily due to the activation of the new state forestry camp.

Average inmate population	21	25	25	–
Cost per inmate	$1,975	$2,553	$2,568	$15 (0.6%)

Analysis

Institution average population is estimated to decrease 43 or 2.1 percent in both the 1956-57 and 1957-58 Fiscal Years from the 1955-56 Fiscal Year. The increase in per capita costs of $76 is mainly due to proposed new positions, net cost of salary increases and increased equipment costs.

The new intensive treatment program at a cost of $37,299 is proposed to begin January 1, 1958, at this institution. Also, this budget proposes to provide minimum staffing for the hospital.

SALARIES AND WAGES: The increased cost of $116,044 is mainly due to salary increases partially offset by increased estimated salary savings, and to 24.8 proposed new positions.

Positions Transferred:

1 Accountant-auditor I	$4,512

To provide a position to aid with the increased accounting and equipment procurement work load due to the new 1,200 capacity satellite now under construction at this institution. It will become a part of the staff of that facility when it is activated the first part of the 1958-59 Fiscal Year. This position is being established in the 1956-57 Fiscal Year and a similar position has been deleted from the Deuel Vocational Institution.

Proposed New Positions:

1 Correctional lieutenant	$5,496

To provide a post of watch supervisor on the second shift, 7 days a week, at the barracks. This position is provided for all other institutions and is explained further in the general analysis of the departmental summary.

1 Correctional sergeant	4,740

To provide relief for the above watch lieutenant post, as well as relief for the instructor in recreation and physical education which is explained further in the general analysis of the departmental summary.

---

[a] Composed of savings in salaries and wages, $30,776; operating expenses, $66,269; equipment, $985; inmate pay-work projects, $2,358; and excess reimbursements, $8,124.

[b] Including cost of academic education program in all 3 fiscal years.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

SALARIES AND WAGES—Continued

Proposed New Positions—Continued

3 Correctional officer for the hospital $12,582

To provide 3 posts for custodial coverage 24 hours a day, 7 days a week for the 44-bed, 2-story hospital. The entire staff, including the proposed new positions which will be located on the second floor, will be assigned as follows:

Post	Total	Shifts 12 m.-8 a.m.	Shifts 8 a.m.-4 p.m.	Shifts 4 p.m.-12 m.	Relief
Supervising nurse (surgery and general nursing)	1	–	1	–	–
Barracks	1	–	1	–	–
Outpatient clinic	1	–	1	–	–
Pharmacy and X-ray	1	–	1	–	–
Correctional sergeant (entrance)	1	–	1	–	–
Hospital (general nursing)	2	1	–	1	–
Hospital (second floor)	3	1*	1*	1*	–
Relief	5	–	–	–	5
Totals	15	2	6	2	5
Positions now authorized	10				
Additional positions required	5				

2 positions for each of the 2 night shifts will permit 1 person to remain in the hospital when the other is called out to cell blocks.

1 Correctional officer (receiving and release) $4,194

To provide an additional post for the receiving and release function 5 days a week. Due to increased movement, 1 position in addition to the sergeant post now budgeted is required to meet the work load of this activity.

1 Correctional officer (kitchen and mess hall) 4,194

This proposed additional post on a 7-day-a-week basis would allow 2 officers for each of the 2 shifts, and 1 sergeant, who would overlap the 2 officers shifts, for over-all supervision. This plan has been effective in other institutions and is the accepted method of operation.

3 Correctional officer 12,582

These positions are required for relief of the above 5 posts.

1 Correctional classification officer IV 3,180
1 Clinical psychologist II 3,180
7 Correctional classification officer 18,312
3 Intermediate typist-clerk 4,941
0.2 Psychiatrist II 1,086

These 12.2 positions are for the intensive treatment program to begin January 1, 1958, and are explained in the general analysis of the departmental summary.

1 Student professional assistant 2,916

This position will provide for 2 half-time students to work at the institution, and is further explained in the general analysis of the departmental summary.

1 Supervising clerk I 4,512

To provide an institution employee to direct and instruct the inmate clerical workers, keep accurate time records on work orders, oversee and direct the maintenance warehousing, supply ordering and estimating, and supervise the preventive maintenance system.

0.6 Chaplain service (state forestry camps) 2,340

This service is explained in the general analysis of the departmental summary.

OPERATING EXPENSES: The net increase in operating expenses of $4,224 is due to several minor adjustments.

EQUIPMENT: The increase of $31,942 includes the following significant items: equipment for the intensive treatment program, $8,855; automotive replacement, $19,289; 1 welder, $1,200; technical books, $2,750; and a power mower, $1,022.

---

[e] This position was temporarily established in the current year to supervise the group counseling program in all institutions, and proposed as a new position in the departmental administration budget in 1957-58 Fiscal Year. It is financed in the curre year by curtailing the overtime funds for group counseling at the various institutions.

[f] Funds appropriated to departmental administration in the 1955-56 Fiscal Year in accordance with Section 2054 of the Penal Cod

GENERAL ANALYSIS

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*325.7*	*329*	*335*	*6*
POPULATION AND UNIT COST				
Average Inmate Population:				
Institution	1,064	1,080	1,080	
Reception-Guidance Center	122	140	145	
Totals	1,186	1,220	1,225	
Cost per inmate [b]	$2,220	$2,424	$2,479	$55 (2.3%)

Average daily population is estimated to increase by 25 from the 1,200 currently budgeted and is composed of 145 youths in the Reception-Guidance Center plus 500 young adult felons and 580 youths in the main institution. This represents a change in the composition of the population. Young adult felons have been increased by 100 and the youth population has been reduced by the same number. A new intensive counseling unit was initiated in the 1955-56 Fiscal Year as a two-year experimental program to end June 30, 1957. The results of the study will not be available by that time, and the positions are being continued to June 30, 1958, pending the outcome of the experiment.

SALARIES AND WAGES: The increased cost of $59,852 is mainly due to salary adjustments and to 5 new positions, which are partially offset by an increase in estimated salary savings and the transfer of one position to the State Prison at Soledad.

Positions Transferred:

—1 Accountant-auditor I —$4,512

This position was originally established to help with the extra work of opening the new institution at Tracy. Subsequently, it was to be used as a budget officer. A different concept of the budget officer position is being proposed at the State Prison at San Quentin in this budget. A new 1,200 capacity satellite is under construction at the State Prison at Soledad, and this position is being transferred there in the current year to aid with the increased accounting and equipment processing work load. It will become part of the staff of the new satellite when this facility is activated.

Proposed New Positions:

2 Correctional sergeants 9,480

One position will provide a supervisory post for "K" Wing where the Reception-Guidance Center is located. The need for this position is further explained in the general analysis of the departmental summary. The other position will provide relief for the above post and for the Instructor in Recreation and Physical Education. The latter item is also discussed in the general analysis of the departmental summary.

1 Senior dentist 10,344

This position is explained in the general analysis of the departmental summary.

1 Correctional classification officer II 5,232

This position is for the Reception-Guidance Center and is needed on the basis of established work load standards.

1 Student professional assistant 2,988

This position is explained in the general analysis of the departmental summary.

---

[a] Composed of savings in salaries and wages $25,650, operating expenses $30,923, equipment $1,248, inmate pay-work projects $796, and loss in reimbursements $3,919.

[b] Excluding cost of operating Reception-Guidance Center, but includes cost of feeding, housing, and other expenses of the inmates being processed therein. Academic education costs are reflected in all three years.

Department of Corrections

DEUEL VOCATIONAL INSTITUTION—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

OPERATING EXPENSES: The increase of $12,140 is primarily due to price increases, and to the change in allocation of expenditures between the Inmate Welfare Fund and the support budget which is explained in the general analysis of the departmental summary.

EQUIPMENT: There is a decrease of $3,426 in estimated equipment expenditures. The most significant items in the total proposed expenditure of $23,876 are a replacement dry cleaning unit for $8,000 and one replacement automobile for $1,400.

CALIFORNIA INSTITUTION FOR WOMEN

Receives and houses all female felons committed to prison. Academic and limited vocational training and a sewing industry are available.

Located near Corona, San Bernardino County

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$812,228	$950,139	$1,160,237	
Allocation from Salary Increase Fund	22,354	41,176	–	
Total Available	$834,582	$991,315	$1,160,237	
Unexpended balance, estimated savings	—26,029 [a]	–	–	
TOTALS, SUPPORT	$808,553	$991,315	$1,160,237	$168,922
Contributions to State Employees' Retirement Fund	39,168	48,965	59,085	10,120
TOTAL EXPENDITURES FOR SUPPORT	$847,721	$1,040,280	$1,219,322	$179,042 (17.2%)
GENERAL ANALYSIS				
Number of positions	*104.3*	*127.3*	*149.8*	*22.5*
POPULATION AND UNIT COSTS				
Average inmate population	566	607	641	34 (5.6%)
End of year population	(596)	(620)	(655)	(35)
Cost per inmate [b]	$1,557	$1,714	$1,902	$188 (11%)

Average daily population is estimated to increase by 34 or 5.6 percent over the 1956-57 Fiscal Year. The new fifth inmate cottage is schedules for completion in May, 1957, and will provide an additional capacity of 120 beds. Funds were appropriated in the current year to construct 20-bed additions to the 4 existing cottages, and a 20-bed addition to the hospital. The cottage additions are estimated to be completed by June 1958, and the hospital addition in January 1958. On June 30, 1958, the institution will have a rated capacity of 659 as compared to the year-end population estimate of 655 inmates. The new classroom building is expected to be completed in April 1957.

The 1956-57 Governor's Budget pointed out that the inmate population had increased by about 75 percent since the 1950-51 Fiscal Year, with little change in organization. It provided for a reorganization of the supervisory custodial staff of the institution, partially implementing a management study of the institution made by the department. Most of the proposed new positions in this budget are to effect the remainder of the changes recommended by that study, and to provide for the increased hospital capacity.

SALARIES AND WAGES: The increase of $138,297 is due to salary increases partially offset by an increase in estimated salary savings, to the full-year cost of positions established during the 1956-57 Fiscal Year, and to 22.5 proposed new positions.

Proposed New Positions:

1 Telephone operator	$3,138
To handle all telephone, telegraph and teletype work during the day shift, as well as doing some typing and clerical work. These duties were formerly accomplished for the most part by a women's correctional supervisor as part of the control room function. The telephone and clerical function and the control room function each demands the full time of one person now due to the population increase.	
1 Women's correctional supervisor I	4,194
To assist in the laundry on a 5-day a week basis and furnish relief for the instructor in laundry and dry cleaning who now supervises this function. A position of women's correctional supervisor is now budgeted part time in the laundry, with the remainder of the time devoted to clothing distribution. The latter function now requires the full time of one position due to the increased inmate population. A position for the laundry is needed for the increased population in both this institution and the Riverside School for the Deaf. Laundry for the deaf school is done here, and the population at that institution has about doubled since commencing this service in the 1953-54 Fiscal Year.	
1 Women's correctional supervisor III	5,496
To provide an in-service training officer on a five-day-a-week basis. All other institutions of the department have such a position.	
3 Women's correctional supervisor II	14,220
1 Post for the receiving, segregation, and hospital area. To provide coverage on the 2 p.m. to 10 p.m. shift, seven days a week. A similar position is now budgeted for the 6 a.m. to 2 p.m. shift and this will give needed supervision to this area during the remainder of the day when inmate activity is greatest.	
1 Post for yard supervision. To provide supervision of inmate movement in the yard during the day shift seven days a week. Similar positions are provided in the male institutions.	
1 Position for relief.	

---

[a] Composed of savings in salaries and wages, $4,838; operating expenses, $17,142; equipment, $3,032; inmate pay-work projects, $933; and excess reimbursements, $84.

[b] Academic education costs reflected in all 3 years.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

SALARIES AND WAGES—Continued

3 Women's correctional supervisor I — $12,582

1 Post for night patrol and emergency coverage.

To provide a position on the 10 p.m. to 6 a.m. shift, seven days a week, to escort inmates and help cottage supervisors in cases of illness or emergency, and to patrol inside the fenced enclosure.

1 Post for outside work crew supervision.

To provide supervision of inmate crews working outside the fenced enclosure on grounds maintenance on a five-day-a-week basis.

1 Position for relief.

3 Correctional officer — 12,582

To provide an additional post on the 6 a.m. to 2 p.m. and on the 2 p.m. to 10 p.m. shifts seven days a week for front and back gate control, fence patrol, and assistance to female custodial officers in handling disturbed inmates. The post assignments will be as follows:

Shifts		
12 m.-8 a.m.	*8 a.m.-4 p.m.*	*4 p.m.-12 m.*
1	1	2
1 *	1 *	–

* Proposed new positions.

The second post will permit one officer to cover the front gate at all times while the other officer patrols the fence, supervises the rear gate as necessary, and renders emergency assistance.

1 Physician and surgeon II (expires June 30, 1959) — 10,860

To provide additional medical help to reduce the large backlog of 76 existing surgical cases. It is anticipated that the medical work can be brought to a current basis in a 2-year period. The need for continuing this position will be reviewed before the 1959-60 budget is presented.

0.5 Senior dentist — 5,172

This position is discussed in the general analysis of the departmental summary.

5 Graduate nurse (effective January 1, 1958) — 10,230

To provide 24-hour, 7-day a week coverage for the new 20-bed tuberculosis addition to the hospital.

1 Intermediate typist-clerk (expires June 30, 1959) — 3,294

To provide clerical service for the existing positions of chief prison medical officer, psychiatrist and dentist, and for the proposed new physician and surgeon and half-time dentist positions. The new physician and surgeon position will expire June 30, 1959, also, and the need to continue this position beyond that time will be reviewed before the 1959-60 budget request is presented.

1 Instructor in vocational nursing — 5,232

To provide training of inmates in the field of vocational nursing. Practical experience will be given in the institution's hospital and clinic.

1 Intermediate stenographer-clerk — 3,456

To provide clerical help for the education department and the library. This position is needed due to expansion of the school program to keep pace with the increasing inmate population.

1 Painter — 4,980

The new institution, activated in August, 1952, has now reached the point where the first painting position is needed to maintain the interior and exterior surfaces.

OPERATING EXPENSES: The increase of $20,745 is primarily due to the increased population, the opening of new facilities, and special maintenance projects.

EQUIPMENT: The increase of $7,775 includes the following significant items: 1 apparel press unit, $2,912; additional equipment for the hospital, $4,618; and one replacement automobile, $1,400. Increasing replacement equipment costs may be expected in the next few years as original complement items need replacement.

ADULT AUTHORITY

This is the paroling agency for adult male prisoners of the State. The Adult Authority issues and revokes paroles, fixes and refixes terms of imprisonment, and determines punishment of prisoners. The Division of Adult Paroles supervises all adult male parolees within the State.

In the 1953-54 Fiscal Year two experimental programs were established. The Special Intensive Parole Unit permits early release of certain prisoners and the Parole Outpatient Clinic offers psychotherapy to certain parolees.

Cost per parolee	$158	$177	$192	$15 (8.5%)
Special Intensive Parole Unit:				
Number of parolees supervised, end of year	406	600	800	200 (33.3%)
Number of case load parole officers, end of year	14	21	21	–
Ratio of parolees to parole officers, end of year	29	29	38	9 (31%)
Average number of parolees supervised	282	579	700	121 (20.9%)
Cost per parolee	$576	$444	$365	—$79 (—17.8%)

Analysis

The increase in Division of Adult Paroles per capita cost is primarily due to a proposed improvement in the staffing formula to eliminate parole officer overtime. The increase in total parole case load will be absorbed by the Special Intensive Parole Unit. The study to determine the results of intensive parole supervision of a case load of 30 parolees for the first 6 months of parole will be concluded December 31, 1957. A new study to determine parole success of a relatively smaller case load per officer compared to the regular parole officer's case load is proposed beginning July 1, 1958, using the same positions as budgeted for the Special Intensive Parole Unit. The interim period will be used for adjustment in case load size, detailed study of certain aspects of parole supervision, and completion and testing of the research design.

ADULT AUTHORITY—Continued

LINE	EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

SALARIES AND WAGES: The increase of $141,158 is due to the full-year cost of positions authorized during the 1956-57 Fiscal Year, salary adjustments partially offset by increased salary savings, and the following:

Proposed New Positions:

1 Executive officer $12,600

This position is proposed to handle administrative aspects of the Adult Authority Board, establish and maintain liaison with related agencies in the field of corrections as a representative of the Adult Authority, represent the Adult Authority to the Legislature, and provide administrative supervision for the Adult Authority Board of the operating divisions and units of the agency. These include the Division of Adult Paroles, the executive clemency unit, and the Adult Authority clerical pool.

1 Parole officer III 6,360

This position will supervise a new field investigations unit, develop procedures for carrying out such investigations, and perform investigations in his headquarters area. The present executive clemency unit of 2 parole specialist positions will become the field investigations unit. The unit's investigations will be to clarify conflicting or inadequate information in the file prior to the inmate's first appearance before the Adult Authority and to verify facts about social conditions involving an inmate which would have a bearing on granting parole. The executive clemency work will also be handled by this unit.

1 Intermediate stenographer-clerk 3,456

This position will be added to the Adult Authority administrative clerical pool to handle the clerical work of the above positions.

11 Parole officer I 54,780

These positions are proposed on the basis of a reduction in the over-all ratio from 60 parolees to 55 parolees per professional position in the Division of Adult Paroles. The new ratio results from 3 factors: (1) the elimination of overtime worked by parole officers I and II; (2) an increase in size of supervisory units from 7 to 8-man units; (3) the exclusion of the deputy chief and the 2 positions in the out-of-state unit from the number of professional positions used in determining the over-all ratio. The division chief position which is now excluded in the computation will continue to be excluded.

2 Senior stenographer-clerk 7,992

These positions will provide clerical assistance for the 2 parole officer IV positions. They are parole supervisors of the 2 regions into which the State is divided. No additional clerical positions are being added for the 11 parole officers proposed due to the reduction in the over-all ratio. All other clerical positions in the district offices of the Division of Adult Paroles, except 2 telephone operators, will be budgeted on the basis of 188 parolees per typist, effective in the 1957-58 Fiscal Year. This is the typist ratio immediately prior to the proposed reduction in the over-all parole officer ratio.

0.5 Intermediate clerk (half time) 1,608

This position is budgeted on the basis of increased work load in the Division of Adult Paroles central office.

1 Student professional assistant 2,988

This position will provide relatively low cost professional assistance and a training opportunity for a highly qualified graduate student at the parole outpatient clinic.

OPERATING EXPENSES: The increase of $35,628 is primarily due to increased caseload and proposed new positions.

EQUIPMENT: The total of $59,448 is a decrease of $2,355 below the amount budgeted for the 1956-57 Fiscal Year. The amount proposed is largely to provide equipment for new positions and the replacement of motor vehicles.

Unexpended balance, estimated savings	—12,277 [a]	–	–	
TOTALS, SUPPORT	$100,596	$139,072	$149,908	$10,836
Contributions to State Employees' Retirement Fund	5,296	8,100	8,800	700
TOTAL EXPENDITURES FOR SUPPORT	$105,892	$147,172	$158,708	$11,536 (7.8%)
GENERAL ANALYSIS				
Number of positions	*12.4*	*15.4*	*17.6*	*2.2*
PAROLE RATIOS				
Number of parolees supervised, end of year	496	550	575	25
Number of parole officers, end of year	7	9	10	1
Ratio of parolees to parole officers, end of year	70.8	61.6	57.5	—4.1
Average number of parolees supervised	451	521	565	44

The increase in expenditures is primarily due to the additional number of parolees. 2 additional parole officers were added in the current year due to increased work load. It is proposed that, in order to allow the supervising women's parole officer time to develop administrative procedures and policies, the one-half case load requirement be removed until June 30, 1958. This position will be filled in the 1956-57 Fiscal Year.

SALARIES AND WAGES: The increase of $9,000 is due to salary increases, the full-year cost of positions established during the 1956-57 Fiscal Year, a decrease in estimated salary savings and the following:

Proposed New Positions:

1 Women's parole officer I (effective April 1, 1958) This additional position is proposed on the basis of the approved ratio of 60 parolees per officer.	$1,245
1 Intermediate stenographer-clerk (effective April 1, 1958) This position will provide clerical assistance to the 2 parole officers added in the current year and the 1 proposed for the budget year.	843

DEPARTMENT OF THE YOUTH AUTHORITY

his department has the responsibility for classification, segregation, rehabilitation, and parole of all young offenders committed to it. It exercises over-all supervision of the 2 reception centers and various correctional facilities for youths for custody and rehabilitation. It also administers the parole program.

onsultant services are provided to judges, probation officers, juvenile halls, and law enforcement bureaus. Inspections of county-operated camps are made and standards set for payment of subsidies. Advisory services are also rendered to community agencies interested in youth welfare and delinquency prevention.

GENERAL ANALYSIS

The budget for the 1957-58 Fiscal Year is based on an average population of 2,661, an increase of 111 or 4.4 percent over the average of 2,550 for the 1956-57 Fiscal Year. The population at the end of the budget year is estimated to total 2,776, an increase of 171 or 6.6 percent over the estimate for June 30, 1957. The average number of parolees under California supervision is estimated to be 7,188 in the 1957-58 Fiscal Year, an increase of 643 or 9.8 percent over the 1957-58 Fiscal Year.

The increase in the department's budget in the amount of $1,403,030, 13.5 percent, includes the following changes involving more than 1 institution:

1. Additional facilities.
2. Vacation relief for teachers.
3. Supervisor of academic instruction positions for 3 institutions.
4. Improvement in the staffing ratio in the classification and counseling units.
5. A sixth group supervisor post for 2 recently completed, restricted-detention units.
6. Reception center and clinic staffing:
   a. An improvement in the senior psychiatric social worker staffing ratio at the reception centers.
   b. An increase in dental staff at the 2 reception centers to permit complete dental care for all wards processed.
7. A new special treatment program primarily intended to treat wards with serious personality problems who are not amenable to the usual correctional school program.

In addition, there are material changes in 2 individual budgets which contribute significantly to the increase.

1. The Departmental Administration budget includes a reduction in the parolee-parole officer over-all staffing ratio and a parole research unit.
2. Culinary staff is proposed for Fricot Ranch School for Boys to permit the elimination of boy help in the kitchen and dishwashing operations.

ADDITIONAL FACILITIES

Additional facilities scheduled for occupancy during the 1957-58 Fiscal Year are as follows:

Northern California Reception Center and Clinic:
A 50-boy dormitory and a 20-bed segregation unit housing 16 boys and 4 girls.
Fricot Ranch School for Boys:
A 20-bed segregation-administration building and 2 classrooms.
Fred C. Nelles School for Boys:
A powerhouse, laundry, and trades building.
Paso Robles School for Boys:
Two 50-boy dormitories and dining room, classroom and commissary additions.
Los Guilucos School for Girls:
A 21-girl dormitory will be reactivated.

Necessary staffing for these facilities is discussed in the respective budgets.

TEACHER VACATION RELIEF

The teacher vacation relief program includes the following:

Institution	*Number of positions*	*Temporary help*	*Estimated cost*
Northern Reception Center	–	$3,210	$3,210
Southern Reception Center	1	–	5,232
Fricot Ranch School for Boys	1	–	5,232
Fred C. Nelles School for Boys	1	1,465	6,697
Paso Robles School for Boys	2	–	9,156
Preston School of Industry	2	1,310	11,774
Los Guilucos School for Girls	1	1,100	6,332
Ventura School for Girls	1	–	5,232
Totals	9	$7,085	$52,865
Sabbatical leave deleted			—5,160
Net total, 1957-58 Fiscal Year			$47,705

This proposed program will provide 15 days vacation relief and 5 days relief for holidays normally worked in Youth Authority schools for all teacher positions except music teachers. Sick leave relief is not included.

Since Youth Authority wards are typically educationally retarded 3 to 5 years behind the educational achievement level commensurate with their chronological age, every effort is made to increase their educational achievement level as much as possible. The loss of 20 days due to teacher absence has a very detrimental effect on accomplishing this objective.

The amount identified as teacher vacation relief also includes part of sabbatical leave relief when vacation relief requirements are less than a full position and the balance can be made up in sabbatical leave relief.

Partial vacation relief has been provided by local school districts at Paso Robles School for Boys and Preston School of Industry. This relief, equivalent to approximately 2 positions, will be eliminated when this program is authorized.

SUPERVISORS OF ACADEMIC INSTRUCTION

These 3 positions, at a total estimated cost of $20,016, are proposed, 1 each, at Fred C. Nelles School for Boys, Paso Robles School for Boys, and Los Guilucos School for Girls.

These positions are budgeted on the basis of a full-time supervisor at Youth Authority schools when 10 or more teachers are budgeted. There is an average of 19 teachers budgeted for each of these 3 institutions.

A full-time supervisor of academic instruction is needed because of the size of the educational staff, for continued educational program, staff development, teachers meetings, and pupil guidance and counseling. Pupil movement in and out of the school requires considerable attention in assigning wards to classes and approving educational transcripts of wards released.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

GENERAL ANALYSIS—Continued

CLASSIFICATION AND COUNSELING UNIT STAFF

A reduction in the ward-counselor ratio from 125 wards per counselor to 100 each is proposed except wards assigned to the proposed special treatment program. For these wards, the ratio proposed is 180 per counselor since the counseling part of the classification and counseling function will be handled by treatment unit staff. The new ratio excludes the clinical psychologists in determining the number of counselors available. A counseling unit supervisor is budgeted when 5 or more counselors are provided. Clerical positions are budgeted on a ratio of 2 counselors per typist. These ratios result in the following proposed new positions:

Institution	*Number of counselors*	*Number of clerical positions*	*Total cost*
Fricot Ranch School for Boys	1	0.5	$6,918
Fred C. Nelles School for Boys	1	–	5,232
Paso Robles School for Boys	2	1	11,304
Preston School of Industry	3	–	16,824
Los Guilucos School for Girls	1	0.5	6,918
Ventura School for Girls	1	0.5	6,918
Totals	9	2.5	$54,114

The main purpose of the proposed ratio change is to increase the counseling time per ward (including recording) from an average of 13 minutes per month to 45 minutes per month. This counseling time is primarily for dealing with problems of the wards arising during their stay at the institution and other counseling necessary to their rehabilitation as opposed to time required for ordinary ward processes. These include orientation, program adjustments, progress reports, summarizing and presenting cases to the Youth Authority Board, and preparole work. At present, insufficient time is available for more than minimum counseling.

3 part-time classes which have contributed towards meeting the classification and counseling work load, have been conducted by the local school district at Preston School of Industry. These classes, at a cost equivalent to approximately 1 counselor's salary, will be discontinued if this change in ratio is approved.

RESTRICTED-DETENTION UNIT STAFFING

An increase in custodial posts for the 2 recently constructed restricted-detention units from 5 to 6 posts per unit is proposed. This is accomplished by reclassification of an authorized position at Fred C. Nelles School for Boys with an additional position required at Paso Robles School for Boys. The capacity of the unit at the former institution is 50 beds, and the latter, 40 beds. The total added cost of this increase in staff for both institutions is $5,250. The post assignment as now authorized and proposed for each of the 2 units is as follows:

	5 a.m.–1 p.m.	*1 p.m.–9 p.m.*	*9 p.m.–5 a.m.*	*Total*
Proposed	2	3	1	6
Now authorized	2	2	1	5
Added post	–	1	–	1

These units are divided into 2 wings, each with a completely separate program. 1 is for the chronic discipline problems who are housed there permanently and the other wing is for short-term discipline. The proposed staffing pattern will permit 1 supervisor on each wing during the 5 a.m.–1 p.m. shift, 1 supervisor covering both wings at night, and 1 supervisor on each wing during the afternoon and evening hours. The senior group supervisor will be available for either wing as the need arises during this period of greatest activity and movement. This staffing is identical with that already authorized at Preston School of Industry.

RECEPTION CENTER AND CLINIC STAFFING

3 Senior psychiatric social workers	
Northern Reception Center, 1 position	$5,232
Southern Reception Center, 2 positions	10,464
Total, 3 positions	$15,696

An improvement in the senior psychiatric social worker formula to allow an increase from 5 to 6 hours per ward processed is proposed. The present formula was developed for the initial reception center staffing with no prior experience available. It has now been found that insufficient time is available to adequately carry out this function.

Functions not directly related to the diagnostic study for which no provision was made in the original staffing include time for ward management or adjustment in the institution, interviews with visitors, administrative staff meeting time, and board hearings.

In addition to other institutional requirements, the special treatment program and the parole experiment will both rely heavily on reception center findings.

The proposed ratio is a minimum request with further study to be conducted as to the adequacy of this standard.

Dental staff increase.

An increase in dental staff is proposed for the 2 reception centers to make it possible to complete all necessary dental work on the wards who will accept treatment while being processed. The staff required is based on the cavity rate (cavities filled per dentist) achieved during 1955 and a 4-month survey indicating the needed dental work and the amount being completed. The survey revealed completion of only 60 percent of all necessary dental work, including only 47 percent of the cavities being filled. The additional positions proposed are as follows:

Institution	*Number of proposed new positions* *Senior dentist*	*Dental assistant*	*Total*	*Cost*
Northern California Reception Center	1	1	2	$13,482
Southern California Reception Center	2	1	3	23,826
Total	3	2	5	$37,308

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

GENERAL ANALYSIS—Continued

SPECIAL TREATMENT PROGRAM

A new program is proposed to meet the special needs of a group of approximately 800 wards who are regarded as not suited for existing Youth Authority programs because of serious personality problems or because of the need for professional therapy not now provided. Many organizational and staffing problems are anticipated in implementing this new program. For this reason, it is proposed to add this staff on a gradual basis, beginning with central office staff, with the program to be added to one institution at a time approximately every 6 months thereafter. Central office staff is proposed 4 months prior to the first institution's staff. The treatment unit supervisor and a clerical position are budgeted 2 months in advance of the remaining treatment unit staff at each institution.

The staff and other expenses included in this budget for the special treatment program, at an estimated cost of $121,140 in the 1957-58 Fiscal Year, are as follows:

Departmental Administration

1 Special treatment program supervisor	$13,800
1 Administrative assistant I	5,496
1 Intermediate stenographer-clerk	3,456
Operating expenses and equipment	3,596
Total, 3 positions	$26,348

	Preston School of Industry (effective January 1, 1958)		Los Guilucos School for Girls (effective June 1, 1958)	
	No. Positions	*Amount*	*No. Positions*	*Amount*
Supervisor of treatment unit [a]	1	$5,152	1	$1,932
Psychiatrist II	1	5,430	1	905
Clinical psychologist II	3	9,540	2	1,060
Case worker	6	15,696	5	2,180
Group worker	3	7,470	3	1,245
Senior typist-clerk [a]	1	2,632	1	975
Intermediate typist-clerk	6	10,116	5	1,405
Operating expenses and equipment	–	15,543	–	13,511
Totals	21	$71,579	18	$23,213

A clinical psychologist II and a half-time stenographer position now authorized at each institution will be transferred to the special treatment units in addition to the above positions.

A study of case records of wards committed to the department in 1955 revealed that a large number of cases are received each year which might be described as special problem cases. These wards are believed to be in need of psychiatric-type, long-term treatment. They are characterized by mental retardation or by serious forms of mental disturbance which interfere with their being able to benefit from the program. They likewise tend to diminish the value of the regular program to the other wards. These wards are not generally acceptable by the Department of Mental Hygiene since they are not diagnosed as true psychotic or psychopathic delinquents.

The special problem cases may be grouped as follows: (1) borderline psychiatric (69 percent), (2) mentally retarded (10 percent), psychopathic or defective delinquent (14 percent), aggressive sexual deviates (4 percent), other special problems (3 percent). This group constitutes about 17 percent of annual admissions—14.1 percent of new commitments and 25.9 percent of returns from parole.

It is estimated that 550 wards described as special problem cases will be admitted to the department in the 1957-58 Fiscal Year. If these wards require an average of 18 months treatment they will result in an eventual population of approximately 800. It is estimated that this group will be distributed as follows and institutions added in the order indicated below:

Institution	*Wards*
1. Preston School of Industry	150
2. Los Guilucos School for Girls	125
3. Fred C. Nelles School for Boys	125
4. Paso Robles School for Boys	120
5. Fricot Ranch School for Boys	70
6. Ventura School for Girls	85
Bureau of Paroles	125
Total	800

In making therapy available to the wards on parole, it is planned to operate on an outpatient clinic basis with staff to be added to the reception centers. The program will be proposed for the reception centers when operational details and staffing requirements are further crystalized.

This program will provide the type of treatment for the emotionally disturbed delinquent that will integrate therapeutic practices with strong environmental controls. This should provide an opportunity for the youths so treated to gain stability and at the same time protect society from their misbehavior. The living group and all environmental influences are an integral part of the treatment process. The staff will make maximum use of all the latest scientific methods including group counseling, tranquilizing drugs, interpersonal relationships, and individual counseling and therapy.

Departmental Administration staff is proposed to provide specialized, central supervision of this new, largely experimental program. Recruiting, development of operational details, coordinating and controlling the program on a department-wide basis, and conducting and supervising research on the types of treatment best suited to the needs of the wards justify the minimum central office staff proposed.

Proposed staffs are generally on the basis of approximately 1 clinician for each 10 resident cases. The composition of the staff is based on the classic psychiatric team approach of 5 professional positions for each 50 cases. This approach was compromised to some extent, in recognition of the difficulty in recruiting psychiatrists and to provide a single unified treatment staff at each facility. Thus, 1 psychiatrist and a treatment unit supervisor are proposed for each institution with the size of the balance of the staff adjusted within the approximate limits of the team staffing approach.

For the first year it is necessary to improvise offices and other facilities needed for the treatment program. It is deemed advisable to gain operating experience before proposing building alterations or new construction to house these units.

The annual cost of this program when fully implemented will total at least $800,000 involving a minimum of 116 additional positions plus 9 positions now authorized. The cost of building alterations and new construction cannot be determined at this time.

---

[a] Effective two months early.

Department of the Youth Authority

DEPARTMENTAL ADMINISTRATION

Departmental Administration includes a number of divisions supervising or exercising central control over all phases of the Youth Authority program. Included are Youth Authority Board in which is budgeted the expenses of four members of the five-member board, the chairman (who is the director) being included in the Division of Administration. The Division of Administration provides central control and unified business management of the several divisions and facilities, and maintains central case files. The Division of Diagnosis and Treatment supervises the operation of the reception centers, schools and camps and is responsible for the continuing re-evaluation and development of their programs, handles deportations, and provides transportation of wards between the Youth Authority facilities. The Bureau of Probation and Delinquency Prevention Services functions in direct contact with community agencies interested in youth welfare and delinquency prevention and includes the administrative expenses of the Interstate Probation Compact and the Interstate Compact on Juveniles. The Bureau of Paroles provides parole supervision of wards released on parole from the reception centers or after a training period in the various schools and camps.

TOTAL EXPENDITURES	$1,807,498	$2,171,034	$2,698,393	

GENERAL ANALYSIS

The increases in support are primarily due to the increased number of parolees, changes in the parole officer staffing formula, a parole research unit, the special treatment program, and other work load increases.

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*225.1*	*246.5*	*297.7*	*51.2*
PAROLE RATIOS AND UNIT COSTS				
Number of parolees supervised end of year	6,053	6,805	7,505	700 (10.3%)
Number of parole officers end of year	93	106	135	29 (27.4%)
Ratios of parolees to parole officers	65	64	55	9 (14.1%)
Average number of parolees supervised	5,861	6,545	7,188	643 (9.8%)
Cost per parolee	$162	$177	$217	$40 (22.6%)

SALARIES AND WAGES: The increase of $287,597 is due to the full-year cost of positions established during the 1956-57 Fiscal Year, salary adjustments partially offset by increased salary savings, and the following:

Proposed New Positions:

1 Deputy director	$13,200
This position is proposed to provide coordination of the activities of the divisions of the department, provide over-all administrative planning, and act as head of the department in the director's absence. This position is recommended in a Division of Organization and Cost Control survey report.	
1 Senior stenographer-clerk	3,996
This position will provide clerical assistance for the deputy director.	
1 Training officer I	6,672
This position will in effect provide a full-time training officer and a full-time supervisor of the educational program. These duties have been combined in 1 position which will become a full-time supervisor of education. A training officer is necessary to supervise and increase the training program which has been developed. In-service training is especially essential for custodial personnel and parole officers. At present, the educational program is one of the most important parts of the rehabilitation program both in size and effect on the wards. This position is also recommended by the Division of Organization and Cost Control survey.	
1 Intermediate stenographer-clerk	3,456
This position will provide clerical service for the training officer and other personnel in the business services division as time permits.	
0.5 Intermediate stenographer-clerk (half time)	(1,686)
0.5 Intermediate file clerk (half time)	(1,608)
These positions are proposed to meet increased work load in the records office.	
1 Accounting officer II	5,496
1 Intermediate stenographer-clerk	3,456
0.5 Junior-intermediate clerk (increase to full time)	1,728
These positions are proposed to meet increased work load in the departmental accounting office resulting from increases in number of institutions, institutional population, number of parolees, number of employees, and number of district offices. The accounting officer position is the first to be added since 1948.	
1 Intermediate typist-clerk	3,294
This position for the personnel section is to meet increased work load created by additional positions in both the institutions and departmental administration.	
2 Parole officer III	10,600
27 Parole officer I	108,730
5 Intermediate stenographer-clerk	11,731
These positions are proposed to meet the increased work load created by the growing number of parolees to be supervised and an improvement in the over-all parolee-parole officer ratio. It is proposed to reduce the 64 to 1 over-all parole officer ratio to 55 to 1. This reduction is based on three factors: (1) reduction to the same ratio as the Division of Adult Paroles; (2) elimination of parole officer overtime; (3) revision of the supervisory unit size from 7 to 8 positions. Clerical assistance for parole officers I and II is budgeted on the basis of 220 parolees per typist. This is the same ratio which exists when the parole officer over-all ratio is reduced to the same level as the Division of Adult Paroles but prior to the reduction due to the elimination of parole officer overtime.	
1 Research supervisor	6,360
1 Assistant research supervisor	5,772
1 Parole officer III (effective January 1, 1958)	3,180

Department of the Youth Authority

DEPARTMENTAL ADMINISTRATION—Continued

GENERAL ANALYSIS—Continued

SALARIES AND WAGES—Continued

1	Parole officer II (effective January 1, 1958)	$2,616
5	Parole officer I (effective January 1, 1958)	12,450
4	Intermediate stenographer-clerk (2 effective January 1, 1958)	10,284
0.5	Intermediate stenographer-clerk (half time, effective January 1, 1958)	843

These positions together with 21 positions now authorized for 900 parolees will provide staff for the 900-parolee parole research unit. The primary purpose of this unit will be to determine the size of an optimum parole case load. Information on the possible classification of parolees into specialized types of supervision required and the classification of parole officers by type of supervision they are best suited to give will also be developed. The research supervisor, assistant research supervisor, and 2 clerical positions will be effective July 1, 1957. The first 6 months will be spent in organization and developmental work. The necessary additional parole officers required to make possible the reduction of cases per officer for the research unit will be effective January 1, 1958. Necessary case load and staff adjustments, research design development, and initial trial testing will take place during the next 6 months. The actual experiment is scheduled to begin July 1, 1958, to last for several years thereafter.

1	Special treatment supervisor	13,800
1	Administrative assistant I	5,496
1	Intermediate stenographer-clerk	3,456

These positions are for the special treatment program for special problem cases and are discussed in the general analysis of the departmental summary.

OPERATING EXPENSES: The increase of $91,930 is primarily due to increased parole population and the expenses related to the proposed new positions.

EQUIPMENT: The total of $150,001 is an increase of $101,652 over the amount budgeted in the 1956-57 Fiscal Year. Major items include additional conference room and director's office furniture $6,701, dictating equipment for parole officers, $5,850, equipment for proposed new positions, $87,657, replacement of manual typewriters with electric typewriters, $9,360, and replacement of motor vehicles, $21,190.

OTHER CURRENT EXPENSES: The increase of $25,400 in these items is all related to increased work load, primarily the increased number of parolees.

NORTHERN CALIFORNIA RECEPTION CENTER AND CLINIC

A reception center for boys and girls received from Northern California.

Located near Sacramento

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$682,510	$720,961	$911,233	
Allocations from Salary Increase Fund	23,115	36,099	–	
Transferred to another institution	–	—1,251	–	
Total Available	$705,625	$755,809	$911,233	
Unexpended balance, estimated savings	—28,922[a]	–	–	
TOTALS, SUPPORT	$676,703	$755,809	$911,233	$155,424
Contributions to State Employees' Retirement Fund	38,728	44,700	51,700	7,000
TOTAL EXPENDITURES FOR SUPPORT	$715,431	$800,509	$962,933	$162,424 (20.3%)
GENERAL ANALYSIS				
Number of positions	*110.4*	*115*	*133.5*	*18.5*
WARDS PROCESSED AND UNIT COSTS				
Average population	131	130	178	48 (36.9%)
Total wards processed	1,292	1,353	1,388	35 (2.6%)
Cost per ward processed	$554	$592	$694	$102 (17.2%)

The increased cost per ward processed is primarily due to increased salaries and wages costs and the proportionately larger increase in average population than in number of wards processed. In the 1957-58 Fiscal Year the average time per ward (6.7 weeks) at this reception center will be approximately equal that of the Southern California Reception Center and Clinic. In the 1956-57 Fiscal Year, the average time per ward (5 weeks) at the Northern California Reception Center and Clinic will be approximately 30 percent less than the other reception center.

SALARIES AND WAGES: The increase of $98,921 is due to merit salary adjustments, partially offset by increased salary savings, and the following:

Proposed New Positions:

3 Food service assistants $8,622

These positions, together with 2 positions now authorized, will provide 12 hours per day single coverage in the boys' dining room and the same coverage for one assignment covering both the girls' and employees' dining rooms. When not required to supervise setup, food serving, and cleanup in the dining rooms, they will be available to supervise and help in the dishwashing and food preparation areas. The only other feeding personnel available will be a cook on each shift plus 1 supervising cook without any relief. This cost is partially offset by elimination of temporary help, $620.

1 Senior group supervisor 4,512

12 Group supervisor 50,328

These positions are proposed to staff the new 50-boy dormitory and the 20-bed segregation units to be completed in July, 1957. The segregation unit will house 16 boys and 4 girls. 5 post staffing is proposed for the new dormitory, the same as is now authorized for the other dormitories. The 20-bed segregation unit is attached to one end of the hospital and will receive night custodial supervision from the hospital. Only 16-hour per day male group supervisor single coverage and 1 shift per day female group supervisor coverage is proposed for this unit during the daytime.

0.5 Groundsman (6 months) 1,686

This will provide a second position during the heavier growing season to supervise a boy work crew and otherwise assist in maintaining the 10 acres of lawns, trees, shrubs, flowers, and ground cover. It is impossible for one position to properly maintain this large area even though the wards maintain most of the grounds within the security fence.

1 Senior psychiatric social worker 5,232

1 Senior dentist 10,344

1 Dental assistant 3,138

(0.6) Temporary help (teacher vacation relief) 3,210

These positions are discussed in the general analysis in the departmental summary.

Abolishment of Positions Now Authorized:

(0.8) Institution fire fighter (part time) —3,840

OPERATING EXPENSES: The increase of $44,350 is largely due to increased population and facilities.

EQUIPMENT: The total of $14,399 is an increase of $12,263 over the amount of $2,136 authorized for the 1956-57 Fiscal Year. Major items include equipment for the new dentist position, $5,190, and other additional medical and dental equipment, $1,289.

---

[a] Composed of savings in salaries and wages, $12,404; operating expenses, $17,871; equipment, $575; and loss in reimbursements, $1,928.

Contributions to State Employees' Retirement Fund	55,067	65,900	71,700	5,800
TOTAL EXPENDITURES FOR SUPPORT	$1,029,258	$1,216,036	$1,321,378	$105,342 (8.7%)

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*163.7*	*175.1*	*182.6*	*7.5*
WARDS PROCESSED AND UNIT COSTS				
Average population	287	318	318	–
Total wards processed	2,211	2,242	2,408	166 (7.4%)
Cost per ward processed	$466	$542	$549	$7 (1.3%)

The increased cost per ward processed is primarily due to new positions and salary adjustments.

SALARIES AND WAGES: The increase of $77,893 is due to salary adjustments, partially offset by increased salary savings, and the following:

Proposed New Positions:

1 Group supervisor	$4,194
This position is to assist the receiving and departure post primarily and to assist the clothing-laundry officer as time permits. An average of 10 wards are received at this institution and another 10 depart each day. New arrivals take an hour and 20 minutes each to process, although two at a time may be processed in 40 minutes each. Frequently, as many as 20 boys are received in one day. In addition, time is required for processing wards for departure.	
1 Groundsman	3,456
This position is proposed to assist the groundsman now authorized in the maintenance of 17 acres of lawns, trees, shrubs, flowers, and various types of ground cover and another 17 acres of uncultivated land which is used for flood control purposes. In addition, there is 1,000 feet of ditches that must be maintained and kept clear for flood control. A portion of the grounds is bordered by a main thoroughfare. Refuse must be removed from this area weekly. The flood control problem and the need for good grounds maintenance will be increased by a new residential area constructed immediately adjacent to the institution grounds. Temporary help in the amount of $210 has been eliminated.	
2 Senior psychiatric social worker	10,464
2 Senior dentist	20,688
1 Dental assistant	3,138
1 Youth Authority teacher (vacation and sabbatical leave relief)	5,232
These positions are discussed in the general analysis in the departmental summary.	

OPERATING EXPENSES: The increase of $12,095 is primarily due to the increased number of wards processed.

EQUIPMENT: The total of $11,885 is an increase of $9,659 over the 1956-57 Fiscal Year total of $2,226. Major items include dental equipment, $5,190; equipment for other new positions, $1,590; and replacement of manual typewriters with electric, $2,430. The latter equipment is in lieu of a proposed new position.

Number of positions	*62.4*	*64.3*	*66.3*	*2*
POPULATION AND UNIT COSTS				
Average Population:				
Pine Grove Camp	77	90	90	–
Mount Bullion Camp	91	105	105	–
Ben Lomond Camp	57	70	70	–
TOTALS, ALL CAMPS	225	265	265	–
Average cost per boy (excluding boys' pay)	$2,252	$2,206	$2,259	$53 (2.4%)

During October, 1956, the main camp located near Coarsegold was moved to Mount Bullion. One of the spike camps was transferred to Coarsegold.

The increase in per capita cost is due to proposed new positions and increased equipment.

SALARIES AND WAGES: The increase of $6,925 is due to salary adjustments partially offset by increased salary savings and the following new positions:

Proposed New Positions:

0.5	Junior-intermediate typist-clerk (increase to full time)—Pine Grove Camp	$1,830
0.5	Junior-intermediate typist-clerk (increase to full time)—Ben Lomond Camp	1,608
	These positions will provide one full time clerical position at each forestry camp. One is now authorized for Mount Bullion Camp. They will relieve a group supervisor of clerical duties thus making it possible to have two men available for supervision and counseling of wards during the evening hours when 60 to 70 boys are in camp. Even with the increase of these positions to full time, clerical work equivalent to about a half-time position at each camp remains to be done by a group supervisor.	
1	Group supervisor—Ben Lomond Camp	4,194
	This position is proposed to provide increased custodial supervision in order to reduce escapes during the evening hours when up to 70 boys are in camp. This position is proposed on a trial basis to determine whether or not added coverage during this period will actually reduce escapes.	

OPERATING EXPENSES: The decrease of $2,202 is primarily due to a reduction in special repairs and maintenance projects.

EQUIPMENT: The total of $12,042 represents an increase of $5,169 over the 1956-57 Fiscal Year. Major items include radio equipment, $3,000, and a water tank, $1,000, for Pine Grove and a replacement station wagon, $2,350, for Mount Bullion Camp.

---

[a] Composed of savings in salaries and wages, $12,377; operating expenses, $26,929; equipment, $694; inmate pay-work projects, $5,010; and loss in reimbursements, $18,024.

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*59.5*	*64.1*	*79.3*	*15.2*
POPULATION AND UNIT COSTS				
Pupil Population:				
Average pupil population	149	152	160	8 (5.3%)
Year-end pupil population	150	159	170	11 (6.9%)
Average cost per pupil	$2,844	$3,279	$3,589	$310 (9.5%)

The increase in per capita cost is primarily due to new positions, both proposed for the 1957-58 Fiscal Year and authorized for the 1956-57 Fiscal Year. The latter positions were delayed due to delayed completion of a new segregation-administration building and new classrooms originally scheduled for completion during the 1956-57 Fiscal Year. The 20-bed segregation-administration building should be completed in July, 1957, and two new classrooms in October, 1957.

Proposed New Positions:

3	Assistant cook	$9,414
2	Food service assistant	5,688
(0.6)	Overtime (feeding personnel)	1,923
	These positions, together with positions now authorized, will provide sufficient personnel to permit the elimination of boy help in the kitchen and dishwashing operations. The staff assignments will be a cook, assistant cook, and a food service assistant on each of two overlapping shifts per day. In addition, there will be a supervising cook I on a 40-hours per week basis. Ward help will be used for dining room setup, serving, and dining room cleanup. The injury rate of boys on the culinary assignment is 5 times that of the other boys.	
1	Youth Authority teacher (effective June 1, 1958)	436
	This position is based on the 15:1 pupil-teacher ratio. Increased ADA results from changing the boys on the culinary assignment from part time school to full time and increased population.	
1	Music teacher	5,232
	This position is based on the 300:1 population-teacher ratio with the first to be added when the population exceeds 150.	
1	Youth Authority teacher (vacation and sabbatical leave relief)	5,232
1	Parole officer II	5,232
0.5	Intermediate stenographer-clerk (half time)	1,686
	These positions are discussed in the general analysis in the departmental summary.	

Positions Abolished:

(0.5)	Temporary help (hospital aid)	—1,458

OPERATING EXPENSES: The increase of $3,980 is primarily due to increased population and additional facilities.

EQUIPMENT: The total of $9,114 is a decrease of $1,735 below the total of $10,849 for the 1956-57 Fiscal Year. Major items include replacement of dining room tables, $2,320, and additional equipment for two new positions, $1,729.

---

[a] Composed of savings in salaries and wages, $8,599; operating expenses, $9,888; equipment, $2,290; and loss in reimbursements, $1,455.

FRED C. NELLES SCHOOL FOR BOYS

A correctional school for boys under 16 years of age.

Located at Whittier, Los Angeles County

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$847,051	$878,725	$967,697	
Transferred from another institution	–	1,444	–	
Allocations from Emergency Fund	–	8,099	–	
Allocations from Salary Increase Fund	31,289	43,171	–	
Total Available	$878,340	$931,439	$967,697	
Unexpended balance, estimated savings	—22,565 [a]	–	–	
TOTALS, SUPPORT	$855,775	$931,439	$967,697	$36,258
Contributions to State Employees' Retirement Fund	52,775	58,450	59,650	1,200
TOTAL EXPENDITURES FOR SUPPORT	$908,550	$989,889	$1,027,347	$37,458 (3.8%)
GENERAL ANALYSIS				
Number of positions	*139*	*143*	*146*	*3*
POPULATION AND UNIT COSTS				
Average pupil population	308	300	300	–
Average cost per pupil	$2,950	$3,300	$3,424	$124 (3.8%)

The increase in per capita cost is primarily due to increased salaries and wages, new facilities, and increased maintenance costs. A new 30-boy admission unit—control center building is to be completed in May, 1957. This will result in virtual elimination of overcrowding at this institution. New admissions are being temporarily housed in existing units. The powerhouse, laundry and trades building is to be completed in August, 1957.

SALARIES AND WAGES: The increase of $29,955 is due to salary adjustments partially offset by increased salary savings and the following:

Proposed New Positions:

–	Group supervisor (replaces one housekeeper)	$1,056
1	Supervisor of academic instruction	6,672
1	Youth Authority teacher (vacation relief)	5,232
(0.3)	Temporary help (teacher vacation relief)	1,465
1	Parole officer II	5,232

These positions are discussed in the general analysis in the departmental summary.

OPERATING EXPENSES: The increase of $5,855 is primarily due to several special maintenance projects, new facilities, and restoration of depleted clothing inventory.

EQUIPMENT: The total of $13,244 is an increase of $1,003 over the 1956-57 Fiscal Year. Major items include replacement of housekeeping equipment, $1,448; a concrete mixer, $1,000; a bus, $3,000; and an automobile, $1,450; and additional educational equipment, $1,283; and equipment for a proposed new position, $782.

PASO ROBLES SCHOOL FOR BOYS

A correctional school for boys in the 15 to 17 age group.

Located Near Paso Robles, San Luis Obispo County

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$796,756	$843,787	$1,029,424	
Allocations from Salary Increase Fund	29,425	42,317	–	
Total Available	$826,181	$886,104	$1,029,424	
Unexpended balance, estimated savings	—35,634 [a]	—582 [b]	–	
TOTALS, SUPPORT	$790,547	$885,522	$1,029,424	$143,902
Contributions to State Employees' Retirement Fund	45,109	49,200	57,400	8,200
TOTAL EXPENDITURES FOR SUPPORT	$835,656	$934,722	$1,086,824	$152,102 (16.3%)
GENERAL ANALYSIS				
Number of positions	*123.5*	*127.8*	*148.3*	*20.5*
POPULATION AND UNIT COSTS				
Population:				
Average pupil population	320	330	355	25 (7.6%)
End of year pupil population	338	338	438	100 (29.6%)
Average cost per pupil	$2,611	$2,833	$3,061	$228 (8%)

The increase in per capita cost is primarily due to proposed new positions not completely offset by the increase in average population, equipment for new positions, and merit salary increases. Two additional 50-bed dormitories are scheduled for completion in January 1958. Dining room, commissary, and classroom additions will be completed in the months immediately prior to this date. A new 40-bed restricted-detention unit is scheduled to be occupied in January 1957. This building replaces a 20-bed detention building. It consists of a 20-bed restricted wing and a 20-bed detention wing.

SALARIES AND WAGES: The increase of $119,463 is largely due to proposed new positions.

Proposed New Positions:

1	Intermediate stenographer-clerk	$3,456
	This position provides a full time stenographer for the assistant superintendent.	
1	Intermediate typist-clerk (effective January 1, 1958)	1,608
	This position is proposed to meet increased work load in the mail and boy records unit due to increased population.	
1	Accounting technician II (effective October 1, 1957)	2,973
0.5	Intermediate typist-clerk (half time—effective October 1, 1957)	1,206
	These two accounting office positions are to meet increased work load resulting from the growth of the institution in recent years and the increased population anticipated beginning in January 1958.	
1	Cook (effective January 1, 1958)	1,860
	This cook is proposed to meet increased work load due to population increase and the installation of a second serving line in the boys dining room.	
1	Laundryman (effective January 1, 1958)	1,608
	This will be the second laundry position at this institution. It is proposed to meet increased work load due to population growth. The laundry personnel also handle clothing control and distribution at this institution.	
2	Senior group supervisor (1 effective January 1, 1958 and 1 February 1, 1958)	4,136
16	Group supervisor (11 January 1, 1958 and 5 February 1, 1958)	28,883
	These positions are proposed to staff the two new 50-boy dormitories, increase control post coverage from 8 hours per day to 24 hours, and provide one dining room supervisor post.	
3	Youth Authority teacher (effective January 1, 1958)	7,848
3	Instructor in indusrtial arts (effective January 1, 1958)	7,848
	These positions are proposed to provide teachers on the 15:1 pupil-teacher ratio.	
1	Recreation and physical education teacher (effective April 1, 1958)	1,308
	This position is requested on the 150:1 population-physical education teacher ratio.	
1	Stationary fireman	4,404
	This position, in lieu of 0.6 temporary help ($2,578) now authorized, will provide sufficient staff to permit an increase from 16- to 20-hour per day boiler operation during the five coldest months of the year plus approximately two days per week for maintenance of the steam distribution system and equipment.	
1	Group supervisor (Restricted-Detention Unit)	4,194
1	Supervisor of academic instruction	6,672
2	Youth Authority teacher (vacation and sabbatical leave relief)	9,156
2	Parole officer II (1 effective January 1, 1958)	7,848
1	Intermediate stenographer-clerk	3,456
	These 7 positions are discussed in the general analysis in the departmental summary.	

---

[a] Composed of savings in salaries and wages, $1,291; operating expenses, $33,935; equipment, $505; and loss in reimbursements, $97.

[b] Composed of savings in equipment.

TOTAL EXPENDITURES FOR SUPPORT	$1,692,320	$1,906,216	$2,082,614	$176,398 (9.3%)
GENERAL ANALYSIS				
Number of positions	*252.9*	*275.3*	*293.8*	*18.5*
POPULATION AND UNIT COSTS				
Average pupil population	617	660	680	20 (3%)
Average cost per pupil	$2,743	$2,888	$3,063	$175 (6.1%)

The increase in per capita cost is primarily due to proposed new positions and the initial complement of equipment for the special treatment program. This is the first of 2 institutions for which the special treatment program is proposed. It is scheduled to start January 1, 1958, at this facility with the supervisor and a typist position effective November 1, 1957. The additional cost of this program for the 1957-58 Fiscal Year is $71,579. An addition to the academic school is scheduled for completion in July, 1957. The remodeling of a 42-bed dormitory is expected to take 6 months during the 1956-57 Fiscal Year and results in a reduction in population during this period. Vocational trades buildings and the new control and guidance center are being completed during the 1956-57 Fiscal Year.

SALARIES AND WAGES: The increase of $128,396 is due to salary adjustments, partially offset by increased salary savings and the following:

Proposed New Positions:

6 Group supervisor	$25,164
These positions are proposed to provide the fourth post (1 shift of double coverage) on each of 3 50-boy dormitories and 1 46-boy unit. This will complete 4-post coverage on all dormitories at this institution with the exception of a 36-bed unit.	
1 Youth Authority teacher (teacher vacation relief)	5,232
1 Instructor in general shop (teacher vacation relief)	5,232
(0.3) Temporary help (teacher vacation relief)	1,310
1 Parole officer III—classification and counseling unit	6,360
2 Parole officer II—classification and counseling unit	10,464

Special Treatment Program

1 Supervisor of treatment unit (effective November 1, 1957)	$5,152
1 Psychiatrist II (effective January 1, 1958)	5,430
3 Clinical psychologist II (effective January 1, 1958)	9,540
6 Case worker (effective January 1, 1958)	15,696
3 Group worker (effective January 1, 1958)	7,470
1 Senior typist-clerk (effective November 1, 1957)	2,632
6 Intermediate typist-clerk (effective January 1, 1958)	10,116
These positions are discussed in the general analysis in the departmental summary.	
Position Abolished:	
1 Surgical nurse I	—4,740

OPERATING EXPENSES: The increase of $25,975 is primarily due to increased population, increased maintenance and farm costs, and the special treatment program.

EQUIPMENT: The total of $66,947 is an increase of $23,137 over the 1956-57 Fiscal Year. Major items include additional equipment for the special treatment program, $12,493; additional educational items, $3,475; motor vehicles, $3,200; a homogenizer, $2,800; replacement of educational equipment, $5,430; motor vehicles, $15,714; and an ensilage harvester, $3,350.

REIMBURSEMENTS: The increase of $10,010 is primarily due to the sale of pork, milk, eggs, and bread to 3 Youth Authority facilities for a full year. The sale of these commodities to these institutions began during the 1956-57 Fiscal Year.

---

[a] Composed of savings in salaries and wages, $14,001; operating expenses, $3,673; equipment, $2,824; and excess reimbursements, $4,334.

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*91.8*	*107.2*	*122.5*	*15.*
POPULATION AND UNIT COSTS				
Average pupil population	174	220	230	10 (4.5%)
Average cost per pupil	$3,467	$3,409	$3,799	$390 (11.4%)

The increase in per capita cost is primarily due to proposed new positions and the cost of equipment for the special treatment pr gram. The special treatment program is scheduled to begin June 1, 1958, at this institution with 2 of the positions effective months earlier. The increased population requires the reactivation of a 21-girl dormitory in the 1957-58 Fiscal Year. Some the proposed new positions are positions which were previously abolished when the actual population was below budgeted level

SALARIES AND WAGES: The increase of $79,818 is due to salary adjustments, partially offset by increased salary savings, an the following:

Proposed New Positions:

1	Intermediate stenographer-clerk	$3,456
	This position's primary assignment will be to the assistant superintendent and custody. The other 4 stenographers' primary assignments are superintendent, education, business office, and classification and counseling unit. The assistant superintendent and the custody section require the full-time assistance of a stenographer. Comparable staffing is provided in other institutions.	
1	Intermediate typist-clerk	3,294
(0.2)	Overtime (receptionist-switchboard)	710
	These positions are proposed to increase the receptionist-switchboard coverage from 10 hours per day to 16. In addition to reception, switchboard, and miscellaneous typing previously covered by this post, the teletype machine installed in the 1956-57 Fiscal Year and the sound security system to be added in 1957-58 will also be handled by this assignment. 16-hour-per-day coverage is necessary for proper switchboard and sound security system coverage.	
1	Group supervisor	4,194
	This position is proposed to handle clothing issue, control, repair, and local clothing purchases. At present, a housekeeper is spending half time on the assignment, with help from the superintendent, assistant superintendent, and an assistant head group supervisor. The many responsibilities of these positions preclude their devoting much time to this function.	
1	Senior group supervisor	4,512
3	Group supervisor	12,582
	These positions are proposed to staff the 21-girl dormitory to be reactivated in the 1957-58 Fiscal Year.	
2	Youth Authority teacher	10,464
	These positions are proposed on the basis of the 15 to 1 pupil-teacher ratio.	
1	Recreation and physical education teacher	5,232
	This position is proposed on the basis of the 150-to-1 population-teacher ratio.	
1	Supervisor of academic instruction	6,672
1	Youth Authority teacher—vacation relief	5,232
(0.2)	Temporary help—teacher vacation relief	1,100
1	Parole officer II—classification and counseling unit	5,232
0.5	Intermediate stenographer-clerk (half time)—classification and counseling unit	1,686

---

[a] Composed of savings in salaries and wages, $67,395; operating expenses, $16,282; equipment, $322; and loss in reimbursements $652.

Department of the Youth Authority

LOS GUILUCOS SCHOOL FOR GIRLS—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
GENERAL ANALYSIS—Continued				
SALARIES AND WAGES—Continued				
Special Treatment Program				
1 Supervisor of treatment unit (effective April 1, 1958)				$1,932
1 Senior typist-clerk (effective April 1, 1958)				975
1 Psychiatrist II (effective June 1, 1958)				905
2 Clinical psychologist II (effective June 1, 1958)				1,060
5 Case worker (effective June 1, 1958)				2,180
3 Group worker (effective June 1, 1958)				1,245
5 Intermediate typist-clerk (effective June 1, 1958)				1,405

These positions are discussed in the general analysis in the departmental summary.

OPERATING EXPENSES: The increase of $13,730 is primarily due to increased population and initial expenses of the special treatment program.

EQUIPMENT: The total of $30,766 is an increase of $25,936 over the 1956-57 Fiscal Year. Major items include additional equipment for the special treatment program, $11,561; food carts for decentralized feeding, $8,378; grounds maintenance equipment, $1,567; replacement of an automobile, $1,400; and dictating equipment, $1,416.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$682,548	$700,663	$759,681	
Allocations from Salary Increase Fund	16,850	33,428	–	
Total Available	$699,398	$734,091	$759,681	
Unexpended Balance, Estimated Savings	—17,815[a]	–	–	
TOTALS, SUPPORT	$681,583	$734,091	$759,681	$25,590
Contributions to State Employees' Retirement Fund	40,650	45,500	46,950	1,450
TOTAL EXPENDITURES FOR SUPPORT	$722,233	$779,591	$806,631	$27,040 (3.5%)
GENERAL ANALYSIS				
Number of positions	*108.3*	*112.2*	*114.9*	*2.7*
POPULATION AND UNIT COSTS				
Population:				
Average pupil population	174	175	175	–
Average cost per pupil	$4,151	$4,455	$4,609	$154 (3.5%)

SALARIES AND WAGES: The increase of $18,051 is due to salary increases partially offset by increased salary savings and proposed new positions.

Proposed New Positions:	
1 Youth Authority teacher (vacation and sabbatical leave relief)	$5,232
1 Parole officer II	5,232
0.5 Intermediate stenographer-clerk	1,686
These positions are discussed in the general analysis in the departmental summary.	
Positions Now Authorized:	
1 Vocational counselor	5,726
1 Intermediate typist-clerk	3,795
These positions are continued for one year pending submission of a progress report during the 1957-58 Fiscal Year.	

OPERATING EXPENSES: The increase of $3,775 is largely due to increased telephone exchange charges, traveling, education, and recurring maintenance.

EQUIPMENT: The total of $16,098 represents an increase of $3,749 over the 1956-57 Fiscal Year. Major items include replacement of a refrigerator, $650; beds, $2,790; and dictating units $662.

DEPARTMENT OF EDUCATION

General Activities

Performs administrative, supervisorial and advisory functions for the Public School System under the general direction of the Board of Education. It also is responsible for the administration of 10 state colleges, the California Maritime Academy, 5 special schools for physically handicapped children, 3 workshops for the blind, 1 orientation center for the blind, the vocational rehabilitation program, and the state-federal program of vocational education. These activities are carried on through the Divisions of Departmental Administration, Public School Administration, Instruction, State Colleges and Teacher Education, Special Schools and Services, and Libraries.

GENERAL ANALYSIS

Number of positions	*396.4*	*412.1*	*431.7*	*19.6*

The budget reflects anticipated work load increases throughout the operating units. Organization changes proposed or reported include the establishment of a bureau of junior college education and the transfer of the credentials unit from the Division of State Colleges and Teacher Education to the Division of Departmental Administration.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 55-56 (Filled)	56-57 (Auth.)	57-58 (Auth.)	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	

DIVISION OF DEPARTMENTAL ADMINISTRATION

Administrative Unit

Includes the Office of the Superintendent of Public Instruction and his general administrative, fiscal, personnel, and legal staffs.

Analysis

An assistant personnel analyst and 3 clerks are provided to assist the personnel officer in handling increased personnel work load in the state colleges as well as in the department. A clerical position is included to process the increased volume of minutes of the Board of Education. 2 half-time positions are provided to handle additional work load in the Accounts and Claims Audits Sections.

Credentials

Evaluates applications and issues credentials.

Analysis

This unit, with the exception of one specialist in teacher education and corresponding staff, have been transferred from the Division of State Colleges and Teacher Education. Work load increases estimated to occur by the budget year account for the 7 new positions proposed in this unit. It is proposed that credential fees be made reimbursable to this program.

DIVISION OF PUBLIC SCHOOL ADMINISTRATION

Administrative Unit

Includes the Office of the Associate Superintendent of Public Instruction in charge of the following public school programs: school planning, school district organization, school lunch, free textbooks, surplus educational property, supervision of child care centers, approval of educational institutions offering veteran training, and advisory service in the fields of school finance and attendance.

Analysis

No change in level of operations is expected for this unit.

Administrative Services Bureau

Provides consultative and advisory services to districts on matters of school records, accounts, attendance laws, and child care centers.

Analysis

The program is expected to continue at approximately the same level of operations as in the current year, with the exception that reimbursements from the Federal Government are expected to decrease because of the Federal Government's gradual discontinuance of the program of Indian education.

School Apportionments and Reports

Apportions the State School Fund, verifies reports of school districts, and compiles financial data for use of the public schools.

Analysis

The unit will function at approximately the same level as the current year, although a realignment of duties results in the abolishment of one clerical position.

School Lunch Program

Provides administration of the federal school lunch program, and special milk programs, advises school districts on nutritional problems, and apportions federal grants for school lunches to districts.

Analysis

A senior account clerk is proposed to handle increased claims arising out of the growth of the special milk program.

Textbooks and Publications

Responsible for the editorial policy of all department bulletins and for administration of the free textbook program.

Analysis

The State Curriculum Commission will review social studies, spelling and handwriting texts for adoption. Sample copies of these textbooks are provided for review, accounting for the increased budgeted expense in textbooks for review.

Vocational Education

Provides consultative services in those vocational fields which cannot be supported under the joint federal-state program of vocational education. All equipment, except teacher training equipment, for the Vocational Education Fund is budgeted here.

Analysis

No change in the level of service is anticipated in this unit.

DIVISION OF STATE COLLEGES AND TEACHER EDUCATION

Administrative Unit

Includes over-all administration of the 10 state colleges and the California Maritime Academy and general supervision of the state program of teacher education. The function of issuance of credentials has been transferred to the Departmental Administrative Unit.

Analysis

1 field representative is included for the college planning office on a work load basis.

The Credentials Unit, with the exception of the specialist in teacher education and necessary staff, have been transferred from this unit to Departmental Administration.

DIVISION OF SPECIAL SCHOOLS AND SERVICES

Administrative Unit

Provides administrative control over the state special schools for the deaf, blind, and cerebral palsied children and blind adults; coordinates the operations of the three workshops for the adult blind; and administers the vocational rehabilitation program.

Analysis

No change is anticipated in the level of program for this unit. Diagnostic and clinical costs are transferred here from the budgets of the 2 cerebral palsied schools.

Field Rehabilitation Services for the Blind

Acquaints newly blinded persons with the opportunities available to them; trains the blind in the use of physical aids and the making of handicraft articles; and arranges the sale of such articles on a consignment basis. Administers 3 opportunity work centers at San Bernardino, Visalia, and San Jose.

Analysis

2 additional field worker positions are proposed to provide service to the blind population not now receiving such aid.

Department of Education

VOCATIONAL EDUCATION

The California program for vocational education is based upon a cooperative plan between the local school districts, the Department of Education, and the U. S. Office of Education. The program is administered through the Bureaus of Agricultural Education, Business Education, Homemaking Education, and Industrial Education, under the Division of Instruction in the Department of Education. Funds are made available for the operation of the total program by the local school districts, the State of California, and the Federal Government. These funds are expended for state-level supervision and teacher training, and for reimbursement to local school districts which meet standards of the California Plan for Vocational Education. The reimbursement is based on the amount of excess costs in meeting the prescribed standards.

The Smith-Hughes Act provides for agricultural education, industrial education, and homemaking education, while the George-Barden Act covers agricultural education, industrial education, homemaking education, and business education. Each of these federal acts requires expenditures from federal funds be matched by at least an equal amount of state and local expenditures. The George-Barden Act allows reimbursement for salaries, travel, and instructional equipment. The Smith-Hughes Act allows reimbursement for salaries only.

---

[a] Appropriations for these programs included in single Budget Act item for Vocational Education.

[b] These state appropriations, together with all federal grants, are deposited in the Vocational Education Fund, from which expenditures are made.

[c] Neither federal aid revenues, nor expenditures therefrom, are included in the over-all budget totals.

[d] Does not include reimbursements to school districts maintaining approved vocational instruction. See Local Assistance section.

[e] Salary increase funds provided for fire training and related instruction.

[f] Distribution of these funds by program shows in Local Assistance section.

VOCATIONAL EDUCATION—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
GENERAL ANALYSIS				
Number of positions	*85.8*	*83.2*	*85.7*	*2.5*

The budget for 1957-58 is at approximately the same level as in 1956-57 with some slight increases in the General Fund appropriation to reflect increased activity in apprenticeship instructional materials, a state-financed portion of the program.

The increased positions are added to provide better direction to the state-wide program and are financed from federal funds that would have been used as reimbursements for excess costs in local school districts. Total federal funds are budgeted at the same level as 1956-57. Changes in program are shown below:

1. Provision is made for the employment in the Bureau of Industrial Education of a position of special supervisor II for a 2-year period for the purpose of assisting secondary schools in organizing programs of technical education.
2. The Bureau of Homemaking Education is proposing a program of reimbursement to state colleges to assist teacher education in home economics at an estimated cost of $4,500.
3. The Bureau of Business Education is proposing to restore a regional supervisor and a teacher trainer which were deleted at the time federal funds were decreased in 1950. At the time these positions were dropped federal financing in business education totaled $4,000 while in 1956-57 it totals $181,000. These positions will assist in developing more adequate programs of instruction and teacher training in the field of distributive education.

GENERAL ANALYSIS

Number of positions	*226.5*	*246.1*	*277.2*	*31.1*

This budget continues the basic program approved in conjunction with the passage of Chapter 1647, Statutes of 1953, which recognized the State's primary responsibilities in the area of vocational rehabilitation.

The intent of the bureau is to continue the program emphasis of accepting disabled clients most in need of rehabilitation services; however, the policy is to accept only those cases which come within the priority categories below:

(1) Those applicants most clearly in need of rehabilitation service. Need here is broadly defined in terms of severity of disability, extent of vocational handicap, as well as financial problems.

(2) Those cases most clearly representing a social and economic liability. Included in this category will be all types of public assistance cases for whose rehabilitation the State has a strong obligation.

(3) The industrially injured, as required by statute.

(4) Clients with dependents.

Within these restrictions, the estimated allocation of staff time to specific areas is as follows:

Percent of Staff Time	Program Area
50	*Recipients of Public Relief.* (Disabled recipients under the aid to needy children program, general relief recipients, those receiving aid to partially self-supporting blind and those receiving blind aid.)
10	*Industrial Accident Cases.*
10	*Referrals from Mental Hospitals.* (The State Department of Mental Hygiene, through its Bureau of Social Work, is urging the Bureau of Vocational Rehabilitation to accept as many referrals as possible. The Bureau of Social Work estimates a minimum of 2,400 referrals should be made in a fiscal year period.)
5	*Arrested Tuberculosis Cases.* (A case study is being made to determine the extent of the tuberculosis load by the Los Angeles County Tuberculosis Association which is now fully supporting a vocational rehabilitation officer I and clerical assistance. The staff member is working only with arrested tuberculosis or those approaching discharge.)
10	*Blind Aid Cases.*
15	*Severely Disabled.* (Certain cases which do not fall into the other groups will be given priority. Included in this group will be the deaf and severe hearing loss cases, severe orthopedic defects, severe cardiacs, epileptics, and cerebral palsied.)

---

[a] Composed of savings in salaries and wages, $5,003; operating expenses, $17,954; equipment, $6,789; and loss in reimbursements, $4,407.

[b] Composed of savings in salaries and wages, $4,414; and operating expenses, $12,749.

[c] Grants from the Federal Government and the expenditures therefrom are not included in the over-all budget totals. See Schedule 7 for summary of aid grants and expenditures.

Department of Education

VOCATIONAL REHABILITATION—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

While there was a 7 percent increase in total rehabilitations during fiscal 1956 over the previous year the number of public assistance recipients who were rehabilitated increased 47 percent. In the 1955-56 Fiscal Year there were 733 public assistance clients rehabilitated compared with 500 the previous year. These 733 clients who had approximately 1,500 dependents resulted in public assistance savings of approximately $1,000,000 per year. The sharp gain in the number of public assistance cases rehabilitated resulted principally from the emphasis in the past several years of service to those publicly dependent. During the past year public welfare recipients comprised about 50 percent of the total case load. Because priority policies of serving disabled public assistance recipients have been in effect for several years there are noticeable signs that the backlog of potential cases has been materially reduced in most counties. Future service will doubtlessly be extended in fewer numbers to welfare clients who are newly accepted for public assistance which will undoubtedly reduce the motivational impediments resulting from lengthy periods of uninterrupted welfare grants.

20 vocational rehabilitation officers have been added to the present counselor staff to provide for the increased work load caused by the Social Security Amendments of 1956 which authorize disability payments at age 50. The law requires that all claimants must be referred to the Bureau of Vocational Rehabilitation for service.

The following positions are provided on a work-load basis and in support of the 20 new vocational rehabilitation officers.

3 Vocational rehabilitation officer II.
1 Medical consultant (intermittent).
14 Clerical positions.

4 clinical psychologists are proposed to replace psychometric testing services currently being obtained on a fee for service basis.

Case service funds have been increased $253,337 over the current year to continue the present level of expenditures for experienced counselors as adjusted for estimated price increases.

Vending stand equipment is budgeted at $90,000 which will allow for the establishment of approximately 20 vending stands and also provide funds to compensate for the increased cost of equipment.

$10,500 has been added under case service funds to provide college reader services to blind students who are receiving all other services from the Bureau of Vocational Rehabilitation.

DISABILITY FREEZE PROGRAM

Included in the budget is an entirely new category of expenditure—that of all expenses in connection with the disability certification program for the Social Security Administration. All items in this category are federally supported 100 percent from the Social Security Trust Fund. At present there are 40 authorized positions for this program. The budget makes provision for 11 more positions because of work load. In addition the federal government has indicated that the professional staff should be increased 7 positions with supporting clerical staff because of the anticipated work load caused by the new disability payments program.

DIVISION OF LIBRARIES

Provides library facilities for state legislators, employees, and agencies. Maintains state-wide library services for the blind, including loans of talking-book machines. Assists in establishing public libraries in those parts of the State without such service. Lends books not available locally and does reference work requiring materials not in smaller libraries. Collects library statistics, acts as a clearinghouse for library information and supervises, inspects, and advises county libraries.

GENERAL ANALYSIS

Number of positions	*100.2*	*105*	*111.3*	*6.3*

The major increase in this budget reflects an accelerated program of microfilming California newspapers. This increase totaling approximately $25,000 includes 1 intermediate clerk ($3,216), additional equipment ($5,196), and operating expenses of $16,000. It is proposed that bound and unbound volumes of 70 newspapers be microfilmed.

Other items of expanded program include the purchase of catalog cards from the Bureau of Public Administration, University of California, $1,200, and an intermediate typist-clerk for 1 year to help catalog the books in the law library.

The balance of the program is based on increased work load in various sections of the library such as:

1. California Section—1 librarian and 1 junior-intermediate typist-clerk.
2. Administrative—Legislative Reference Section—1 librarian and 1 junior-intermediate typist.
3. Property and Shipping Section—1 intermediate clerk.
4. Blind and Reference Sections—1 intermediate typist-clerk.

Department of Education

STATE COLLEGES, SPECIAL SCHOOLS, AND BLIND CENTERS

STATE COLLEGES

The primary function of state colleges is the training of teachers. They may also offer courses appropriate for a general or liberal arts education; offer vocational training in such fields as business, industry, public service, homemaking, and social service; and offer the pre-professional courses needed by students who plan to transfer to universities for advanced professional study. The 1949 Legislature authorized the colleges to grant the master's degree. Until 1955, such degrees were limited to individuals who met the State's requirement for one of the various teaching credentials. As a result of extensive study over the past few years, multiple criteria have been established which must be met before a curricular field may be approved for a master degree by the Board of Education.

4 technical schools are administered by the Department of Education: California State Polytechnic College, which offers occupational training in agriculture, engineering, and industry, plus limited courses in the liberal arts; Chico State College and Fresno State College, Divisions of Agriculture, patterned after the agricultural instruction program at California State Polytechnic College, but specializing in problems affecting the central valleys; and the California Maritime Academy, which trains officers for the Merchant Marine and the Naval Reserve. Because of their vocational nature, instructional costs of these schools are normally greater than at the liberal arts type state colleges.

2 off-campus residence centers were authorized by the 1956 Legislature as a 2-year pilot study to determine whether an upper division teacher education program would help alleviate the shortage of qualified teachers. San Francisco State College operates a center at Santa Rosa, while Fresno State College operates the other at Bakersfield.

Analysis

In view of the growing teacher shortage now facing California's public schools, the state colleges are continuing to emphasize and encourage teacher training as their most important function. Major factors of change influencing the colleges during 1957-58 are:

1. The growth of regular session enrollment to an all-time peak of 54,190 full-time equivalent students representing an increase of 6,859 students over the 47,331 F. T. E. for 1956-57, predicated on actual fall semester experience. Statewide, long range forecasts based on birth rate and immigration factors indicate continued heavy growth in both high school graduates and attendance at higher education institutions. In addition, Korean veterans, attending school under Public Law 550, are influenced into enrolling at public colleges and universities because of the financial incentive of low fees. In general, enrollment increases are anticipated to be moderate at colleges in the rural areas, and heavy at colleges in the metropolitan areas.

   As a result of many recent State Board of Education actions authorizing new curricular programs in occupational and graduate areas, a major change in the composition of the enrollment is now under way. The enrollment is shifting proportionately from lower division to upper division—graduate fields in the older colleges and from liberal arts programs to occupational programs in all colleges. Enrollment estimates for all colleges have been based on admissions standards established by the State Board of Education.

2. The budget proposes the addition of 407.5 new faculty positions upon the basis of the teacher-staffing formula. Basically the formula allows staff in relation to the total work load of the college, which is the number of units of course work which the college offers. The total work load is then divided by the work load per individual instructor in order to determine the number of teaching positions necessary for a college. The work load per individual instructor is based on a work week of 45 hours which includes 36 hours of instructional work and 9 hours in advising students, work on college committees, and work on student activities.

   A revision in the formula, affecting laboratory teachers in the sciences, accounts for 52.4 of the proposed new teachers. Under present circumstances, the formula allows a load of 8 units of laboratory work to be the equivalent of 12 units of teacher load. The 8-unit load means that the instructor spends 24 hours in class, leaving only 12 hours for preparation, grading papers, student advising, etc. A special study was made to determine how much time an instructor spent on a 1-unit, 3-hour laboratory class. Using a standard set of courses from the natural sciences, the study showed that on the average, instructors spent 7.6 hours for each unit of laboratory instruction. On the basis of the study, it is proposed that the formula be revised to reduce the load to 6 units of laboratory work per instructor. Although 104.8 teachers are necessary to implement this revision, only half are proposed for 1957-58.

3. Professional and administrative staffing has been augmented in the budget by a total of 64.4 positions. An organization study has recently been concluded. It recommends the revision and expansion of the organizational staffing in effect in the colleges since 1950 to create a more effective organization for planning toward, and meeting, administrative problems occasioned by an expansion of enrollments, buildings, and curricula. The pattern of additional positions necessary to implement the reorganization are as follows:

   For Colleges Over 5,000 Full-time Equivalent Regular Students:
      Vice-President
      Research Assistant
      Dean of College
      Dean of Professional and Occupational Studies
      Chief of Admissions
      Staff Assistants to the Dean of Students, Dean of College, and Business Manager.
   For Colleges of 3,000 to 5,000 Full-time Equivalent Regular Students:
      Assistant to the President
      Dean of College
      Dean of Professional and Occupational Studies
   For Colleges of Less Than 3,000 Full-time Equivalent Regular Students:
      Staff Assistant (to the President)
      Admissions Officer (one-half time)
      Junior Staff Analyst

   Application of these points of differentiation to the college enrollments for 1957-58 would require the addition of 40 administrative positions. The 1957-58 budget, however, proposes to implement only half of the staffing at this time.

   4.5 medical officers are proposed for Fresno and Sacramento State Colleges to implement expanded health programs first authorized by the legislature in 1956-57. New health buildings at these colleges will enable expansion of the health services to include such services to students as immunization and vaccination, X-ray services, physiotherapy, medical care for intercollegiate sports, and laboratory services. To assist in financing this program, the student fee will be increased by $1 per regular student at these colleges.

   The remainder of the 64.4 positions include 14 for the student personnel functions of student counseling, student activities, student placement, student admissions, and student health services. Counselors, physicians and other officers are required in proportion to the increase in enrollment. Also included are 26.9 division chairmen and curriculum specialists for the instructional divisions. Their need is determined by the number of teachers provided.

4. State college libraries are budgeted under a library staffing formula which provides a measurement of work load in the staffing areas of administration, technical services, and public services. In addition to this formula, an organizational pattern is recognized to permit subdivision of work into logical functions, patterned in part from the organizational structure of the State Library. Application of this staffing pattern results in the addition of 25.5 professional and clerical positions. They are caused by additional demands on public service points resulting from increased enrollments and new library buildings, and by increases in library book allotments to meet the enrollment growth.

Department of Education

STATE COLLEGES, SPECIAL SCHOOLS, AND BLIND CENTERS—Continued

STATE COLLEGES—Continued

Analysis—Continued

5. Clerical and technical staffing is necessarily provided in conjunction with enrollment increases, professional positions and new building operations, resulting in 173.9 new positions during 1957-58. Of these allowances, the majority are provided for instructional assistance and student personnel needs.

   Staffing in the Registrar's Office is particularly affected in 1957-58 by the proposal to install tabulating machine punched card systems at each state college. The purpose is to facilitate the processing of student records and the reporting of enrollment data. As a result, 7 intermediate clerical positions were eliminated from the budget requests and it is anticipated that over the next 2 years more than 20 additional clerical positions will not be included in the budget that otherwise could be justified. This will eventually more than offset the cost of the system even though in 1957-58, the net cost of the system will be $34,000. Immediate savings are not feasible due to installation costs and transitional difficulties.
6. Additional facilities provided by the present college construction program will be occupied at nearly all colleges during 1957-58. These facilities result in the provision for 115.5 additional maintenance positions.

In addition to the above factors, individual allowances in positions, specialized operations, and equipment needs are provided at each school to meet special problems and substandard conditions. Over-all expenditures also include programs for summer sessions and extension, which are wholly offset by student fees for such purposes.

SPECIAL SCHOOLS FOR PHYSICALLY HANDICAPPED CHILDREN

Five special schools for the education of blind, deaf, and cerebral palsied children will be in operation during 1957-58; the School for the Blind at Berkeley, Schools for the Deaf at Berkeley and Riverside, and the Schools for the Cerebral Palsied at San Francisco and Altadena. Residential care and treatment needed for the proper training of these handicapped children is provided in addition to formal academic instruction. The two schools for the deaf and the school for the blind provide educational facilities from the primary grades through high school. The schools for the deaf also give extensive prevocational training. Education and medical treatment is provided for children afflicted with cerebral palsy at the two cerebral palsy schools. The student is usually enrolled for a period of from 3 to 12 months of education and observation, after which he is returned to the local district to receive continued medical supervision and treatment and to enroll at special classes where possible to do so. Diagnostic and treatment clinics are operated in conjunction with these two state cerebral palsy schools for children who are not residents of the schools. Under the provisions of Chapter 1766, Statutes of 1955, these schools may accept for enrollment children with other similar handicaps, such as aphasia.

Analysis

The School for the Blind expects an increase of 25 pupils. 1 teacher and 1 counselor are proposed to take care of this increased enrollment.

The School for the Deaf at Berkeley is budgeted for an increase in enrollment of 10 students. The addition of 1 speech correction teacher and the substitution of a supervising teacher for 2 deans of students, are the only changes proposed in the academic field while 3 nonteaching positions are proposed in other areas.

The School for the Deaf at Riverside is anticipating an increase in enrollment of 101 students. Completion of additional classroom and dormitory facilities during 1957 school year require provision for 10 teachers, 11 counselors, and 8 nonteaching personnel.

The Schools for Cerebral Palsied Children are budgeted at the existing level of operation with the exception of the transfer of funds for diagnostic services to the Department of Education for administrative purposes.

ORIENTATION CENTER FOR THE ADULT BLIND

The Oakland Orientation Center admits blind persons as residents and trainees in an intensive program designed to assist blind persons in becoming more self-sufficient, and in cases where feasible, partially prepare them for useful and remunerative work in trades, professions, private business, private industry, or public service. The program of the orientation center is closely coordinated with the services of the Bureau of Vocational Rehabilitation, with the home teacher and field service programs, and with programs for training teachers and other personnel directed toward serving the blind.

Analysis

This program is carried out through a curriculum made up of the following courses:

(a) Travel training
(b) Communication skills—Braille and typing
(c) Habits of daily living
(d) Counseling and guidance
(e) Business practices
(f) Physical education
(g) Shop

The budget reflects a reduction of 8 in the number of residents in the center but a continuation of the same number of students as in 1956-57. It is proposed that allowances for those persons with no source of funds for the purchase of incidentals be increased from $2 to $4 per week. This brings such allowances to the level allowed by the Department of Social Welfare.

CALIFORNIA INDUSTRIES FOR THE BLIND

The California Industries for the Blind consist of three subsidized production centers located at Los Angeles, Oakland, and San Diego. These centers supply sheltered factory employment to blind and partially sighted persons. Such items as brooms, mops, pillowcases, surgical drapes and wrappers, aprons, rugs, brushes, rubber mats, and leather goods are manufactured in addition to fabrication and assembly of many products on a subcontract basis.

The administrative and related expenses are a direct charge against the General Fund, and the manufacturing activities are financed from working capital supplied by the Workshops for the Blind Manufacturing Fund into which the proceeds of sales of products are deposited.

Analysis

Sales are estimated to increase slightly for 1956-57 and 1957-58 over 1955-56 when the volume of sales amounted to $2,341,983. Employment is expected to remain at approximately the same level in 1957-58 as in 1956-57, but is an increase of 34 full-time equivalent workers over 1955-56.

Department of Education

CHICO STATE COLLEGE

A liberal arts college with a primary function of teacher training. A graduate program is offered leading to the Master's degree in education. Besides liberal arts courses, preprofessional courses, and 4-year occupational curricula, the college provides some courses of a terminal nature to meet the junior college needs of the Chico area. A 4-year curriculum in agriculture has been authorized by the State Board of Education. It is proposed to establish a division of agriculture to be supported out of the State College Fund created by Section 19620.1, Business and Professions Code.

Located at Chico

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT *(General and Professional Divisions)*				
Budget Act appropriation	$1,307,444	$1,666,241	$2,056,965	
Allocation from Salary Increase Fund	53,799	81,000	–	
Total Available	$1,361,243	$1,747,241	$2,056,965	
Unexpended balance, estimated savings	–4,690 [a]	–7,868 [b]	–	
TOTALS, SUPPORT	$1,356,553	$1,739,373	$2,056,965	$317,592
Contributions to State Employees' Retirement Fund	89,406	115,182	118,646	6,056
TOTAL EXPENDITURES FOR SUPPORT	$1,445,959	$1,854,555	$2,175,611	$321,056 (17.3%)
OTHER CURRENT EXPENSES				
Replace Fire Losses:				
Allocation from Emergency Fund (expenditures)	$9,390	–	–	–
TOTAL EXPENDITURES	$1,455,349	$1,854,555	$2,175,611	$321,056 (17.3%)
State College Fund				
SUPPORT *(Division of Agriculture)*				
Budget Act Appropriation (Expenditures)	–	–	$55,105	$55,105
Contributions to State Employees' Retirement Fund	–	–	2,592	2,592
TOTAL EXPENDITURES FOR SUPPORT	–	–	$57,697	$57,697
TOTAL EXPENDITURES, ALL FUNDS	$1,455,349	$1,854,555	$2,233,308	$378,753 (20.4%)
GENERAL ANALYSIS				
Number of positions—General and Professions Divisions	*210.5*	*264.5*	*310.4*	*45.9*
Number of positions—Division of Agriculture	–	–	*7.5*	*7.5*
Totals	*210.5*	*264.5*	*317.9*	*53.4*
ENROLLMENT AND UNIT COST (Full-time equivalent students)				
General and Professional Divisions:				
Enrollment	1,944	2,375	2,645	270 (13.7%)
Cost per student	$743	$781	$823	$42 (5.4%)
Division of Agriculture:				
Enrollment	–	–	55	55
Cost per student	–	–	$1,049	$1,049

A projected increase in enrollment of 325 full-time equivalent students or 13.6 percent over 1956-57 is responsible for the largest portion of the $378,753 increase in expenditures. Other cost factors not directly related to enrollment are as follows:

1. An organizational study of the state colleges recommends that the dean of educational services and summer sessions and the coordinator of graduate studies be combined into a full-time position of dean of extended services and graduate studies	$1,074
2. A half-time vocational instructor has been provided to assist with planning of the building program	4,926
3. Reduction in the teaching load for science instructors requires 2.8 additional teachers	14,094
4. 1.9 additional teachers are required for a new program in electrical engineering and an expansion in the nursing program	9,139
5. A 4-year agriculture program has been approved for Chico by the State Board of Education. In anticipation of the expansion of the existing 2-year program, 5 positions have been provided	23,303
6. Extension of 1956-57 part-year positions and salary adjustments for the full 1957-58 school year will require	79,981

---

[a] Composed of savings in salaries and wages, $1,886; operating expenses, $3,266; equipment, $606; and a decrease in reimbursements, $1,068.

[b] Composed of savings in operating expenses, $7,655; and excess reimbursements, $213.

FRESNO STATE COLLEGE

A 4-year liberal arts college with a primary function of teacher training. The college also offers courses appropriate for a general c liberal arts education; offers vocational training in such fields as business, industry, public service, homemaking, and soci service; and offers the preprofessional courses needed by students who plan to transfer to universities for advanced professiona study. The 1949 Legislature authorized the college to grant the master's degree.

An off-campus center, authorized by the 1956 Legislature on a 2-year pilot basis and providing an instructional program in uppe division education courses leading to an elementary teaching credential, is located at Bakersfield.

A Division of Agriculture is operated at this school under authority of Chapters 1477 and 1490, Statutes of 1947, supported by Hor Racing Board breakage revenues deposited in the State College Fund.

Located at Fresno

Although this college will continue to operate on 2 separate campuses during the 1957-58 Fiscal Year, well over one-half of th students will be located at the new campus. Instructional facilities at the old campus are being occupied by the Fresno Juni College as rapidly as they can be vacated by the state college, under a long-range program whereby the city school district wi purchase the old campus site as soon as the state college can be transferred entirely to its new location.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

General and Professional Divisions

In common with other liberal arts state colleges, to which the General and Professional Divisions closely correspond, a substantial enrollment increase is projected for the 1957-58 school year.

The enrollment increase of 350 students justifies one-half of the increase in operating funds for the General and Professional Divisions in 1957-58. The remainder of the $474,838 increase in expenditures is caused by factors only partly related to increased 1957-58 enrollments, but which are necessary to maintain present levels of service. These are as follows:

1. New administrative organization to improve long-range planning for rising enrollments, building construction, and expanding curricula includes a new dean of college $9,852
2. A change in the composition of enrollment to an increased proportion of upper division, graduate and practice teaching students requires an additional 16.1 teachers 70,196
3. Revision of the faculty staffing formula to reduce the present overload on teachers of science laboratory courses requires 3 teachers 13,080
4. The completion of a new health facility enables an expansion of the student health service. An additional 8.4 positions and operating expenses are partially offset by a $4 increase in the regular student fee 28,587
5. Maintenance and operation of new buildings and grounds facilities 48,323
6. Extension of 1956-57 part-year positions and salary adjustments for the full 1957-58 school year 109,498

The positions added for Fresno State College Foundation purposes are completely reimbursed by that organization.

The off-campus residence center in Bakersfield is budgeted at an enrollment of 170 compared to 145 in 1956-57, an increase of 25 full-time equivalent students.

Division of Agriculture

An anticipated enrollment increase of 25 students over that of 1956-57 for this division of Fresno State College creates an increase in expenditures of $35,051, or 7.4 percent, over 1956-57. In addition to increases in operating expenses and equipment, the budget contains an increase of $12,478 for 1 teacher and 2 farm and maintenance positions to handle additional students and facilities and $4,360 for a teacher to start a new enology curriculum recently approved by the State Board of Education.

HUMBOLDT STATE COLLEGE

A liberal arts college specializing in teacher training curricula. This college serves the northwestern section of the State, and provides special vocational curricula in wild life management and forestry. Graduate programs leading to the M.A. and M.S. degrees are offered in selected fields.

Located at Arcata

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$1,085,841	$1,356,817	$1,610,486	
Allocation from Salary Increase Fund	40,000	48,200	–	
Total Available	$1,125,841	$1,405,017	$1,610,486	
Unexpended balance, estimated savings	—8,908 [a]	—1,301 [b]	–	
TOTALS, SUPPORT	$1,116,933	$1,403,716	$1,610,486	$206,770
Contributions to State Employees' Retirement Fund	65,260	83,185	93,468	10,283
TOTAL EXPENDITURES FOR SUPPORT	$1,182,193	$1,486,901	$1,703,954	$217,053
OTHER CURRENT EXPENSES				
Repair Fire Damage:				
Allocations from Emergency Fund (Expenditures)	16,000	1,805	–	—1,805
TOTAL EXPENDITURES	$1,198,193	$1,488,706	$1,703,954	$215,248 (14.5%)
GENERAL ANALYSIS				
Number of positions	*181.7*	*215.9*	*237.8*	*21.9*
Enrollment (full-time equivalent students)	1,063	1,130	1,325	195 (17.2%)
Cost per student	$1,127	$1,317	$1,286	—$31 (—2.4%)

The enrollment for 1957-58 represents an increase of 195 over 1956-57. The 1956-57 enrollment is now estimated at 170 lower than had been anticipated originally, due to conditions in the area attributable mainly to floods and the general economic situation in the lumbering industry.

A reduction in the per student cost of $31 reflects the increase in enrollments and also the failure to meet the planned enrollment for 1956-57 which will result in a high per capita cost in the current year.

The major program factors in the $215,248 increase in expenditures in 1957-58 are as follows:

1. New administrative organization to improve long range planning for rising enrollments, building construction, and expanding curricula	$3,043
2. Installation of a punched card system to facilitate the processing of student records and the reporting of enrollment data	2,270
3. Revision of the faculty staffing formula to reduce the present overload on teachers of laboratory courses in the sciences	9,160
4. Operation of new wild life and fisheries facilities	10,070
5. Maintenance of new physical education, music, art, and home economics facilities	59,278
6. Special maintenance projects to keep pace with increasing age and number of campus facilities	11,450
7. Extension of 1956-57 part-year positions and salary adjustments for the full 1957-58 school year	64,884

The remaining cost increases are attributable to work load arising directly from the increase in enrollment and to general price increases.

LONG BEACH STATE COLLEGE

A liberal arts college with a primary function of teacher training. This school was established in the fall of 1949 in temporary quarters near the City of Long Beach. On June 7, 1950, the Director of Education accepted a gift of 316 acres of land from the City of Long Beach for a permanent campus site. During the first 4 years of its existence the college was limited to a 2-year upper division curriculum. However, the college now offers work in all 4 years and 1 graduate year of its liberal arts program.

Located at Long Beach

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$1,739,740	$2,380,754	$3,169,886	
Allocations from Salary Increase Fund	70,843	101,859	–	
Total Available	$1,810,583	$2,482,613	$3,169,886	
Unexpended balance, estimated savings	—66,848 [a]	—105 [b]	–	
TOTALS, SUPPORT	$1,743,735	$2,482,508	$3,169,886	$687,378
Contributions to State Employees' Retirement Fund	114,462	161,604	205,940	44,336
TOTAL EXPENDITURES FOR SUPPORT	$1,858,197	$2,644,112	$3,375,826	$731,714 (27.7%)
GENERAL ANALYSIS				
Number of positions	*331.2*	*435.8*	*542.8*	*107*
ENROLLMENT AND UNIT COSTS				
Enrollment (full-time equivalent students)	3,217	4,300	5,450	1,150 (26.7%)
Cost per student	$577	$614	$619	$5 (0.8%)

The enrollment for 1957-58 represents an increase of 1,150 full-time equivalent students over 1956-57. The 1956-57 enrollment is now estimated at 100 lower than that which was originally anticipated.

The slight increase in per student cost in 1957-58 is attributable to the following major program changes not directly related to enrollment.

1. New administrative organization to improve long-range planning for rising enrollments, building construction, and expanding curricula	$9,852
2. Revision of the faculty staffing formula to reduce the present overload on teachers of laboratory courses in the sciences	19,172
3. New buildings require the addition of 12.5 positions to the maintenance staff	36,642

The remainder of the $731,714, or 27.7 percent increase in expenditures for support can be directly related to enrollment growth.

Department of Education

LOS ANGELES STATE COLLEGE OF APPLIED ARTS AND SCIENCES

An upper division college with 2 primary functions: first, the training of students for gainful occupations in arts and sciences as related to business and industry; and second, the training of students for teaching in the public schools. Courses appropriate for a liberal arts education are also offered in fields normally given at other state colleges. The college is at present conducting classes on the campus of the Los Angeles City College, under rental agreement with the Los Angeles City School District, and on its own 2 campuses, 1 in East Los Angeles, on a site contiguous to the San Bernardino Freeway, and 1 in the San Fernando Valley near the community of Northridge.

Located at Los Angeles

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$2,696,206	$3,701,327	$4,149,482	
Transferred to other state colleges	–	—50,000	–	
Allocations from Salary Increase Fund	22,779	103,413	–	
Total Available	$2,718,985	$3,754,740	$4,149,482	$394,742
Unexpended balance, estimated savings	—67,464[a]	–	–	–
TOTALS, SUPPORT	$2,651,521	$3,754,740	$4,149,482	$394,742
Contributions to State Employees' Retirement Fund	123,002	179,817	200,857	21,040
TOTAL EXPENDITURES FOR SUPPORT	$2,774,523	$3,934,557	$4,350,339	$415,782 (10.5%)
GENERAL ANALYSIS				
Number of positions	*478.8*	*615.3*	*651.7*	*36.4*
ENROLLMENT AND UNIT COSTS				
Enrollment (full-time equivalent students):				
Vermont campus	2,768	1,550	1,800	250
San Bernardino Freeway campus	1,389	3,150	3,700	550
San Fernando Valley campus	194	700	1,050	350
Totals	4,351	5,400	6,550	1,150 (21.2%)
Cost per student	$638	$728	$664	—$64 (—8.7%)

The projected total enrollment for 1957-58 represents an increase of 1,150 full-time equivalent students over that anticipated in 1956-57. The budget requests for 1956-57 were based on enrollment of 6,550 full-time equivalent students. It is now anticipated that only 5,400 full-time equivalent students will enroll. This disparity results in an extra high cost per student in the 1956-57 year. The savings produced by the failure of enrollments to materialize are transferred to other state colleges where enrollments exceeded expectations.

Major program changes which are reflected in the over-all increase in expenditures of $415,782 are as follows:

1. New administrative organization to improve long-range planning for rising enrollments, building construction, and expanding curricula — $6,060
2. Installation of a punched card system to facilitate the processing of student records and the reporting of enrollment data — 8,690
3. Revision of the faculty staffing formula to reduce the present work load on teachers of laboratory courses in the sciences — 7,568
4. Maintenance of new buildings — 6,588
5. Extension of 1956-57 part-year positions and salary adjustments for the full 1957-58 school year — 200,794

The remaining expenditure increases are attributable to work load arising directly from the increase in enrollment and to general price increases.

SACRAMENTO STATE COLLEGE

A four-year liberal arts college with the primary function of teacher training. An extensive evening program of course offerings is given with considerable emphasis on courses for the large number of governmental personnel in the surrounding area. A graduate program is also offered leading to the Master of Arts degree or the Master of Science degree.

Located at Sacramento

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriations	$1,620,005	$2,063,022	$2,514,850	
Allocations from Salary Increase Fund	51,350	98,340	–	
Total Available	$1,671,355	$2,161,362	$2,514,850	
Unexpended balance, estimated savings	—26,553 [a]	—55,292 [b]	–	
TOTALS, SUPPORT	$1,644,802	$2,106,070	$2,514,850	$408,780
Contributions to State Employees' Retirement Fund	105,605	136,740	162,415	25,675
TOTAL EXPENDITURES FOR SUPPORT	$1,750,407	$2,242,810	$2,677,265	$434,455 (19.4%)

GENERAL ANALYSIS	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*288.6*	*360*	*422.1*	*62.1*
ENROLLMENT AND UNIT COSTS				
Enrollment (full-time equivalent students)	2,588	3,145	3,850	705 (22.4%)
Cost per student	$676	$713	$695	—$18 (—2.5%)

The major portion of the $434,455, or 19.4%, increase over 1956-57 for Sacramento State College can be directly attributed to the 22.4% (705 FTE students) projected increase in enrollment. There are, however, factors only indirectly related to enrollment which are responsible for a portion of the increase. These factors are as follows:

1. A change in the teaching load for science teachers results in the addition of 2.7 new teaching positions at a cost of $12,366.
2. The addition of a dean of college in accordance with the recommendations of an organizational study of the state colleges results in an increase of $9,852.
3. The completion of a new health facility allows an expansion of the student health service which, in turn, requires the addition of 7.1 positions at a cost of $29,705. This is partially offset by a $4 increase in the student fee which increases reimbursements by $12,652.
4. New buildings require the addition of 10.5 positions of the maintenance staff at a cost of $35,902.
5. A decline in reimbursements from the Federal Government for services to veteran students results in decreased reimbursements of $6,662.

SAN DIEGO STATE COLLEGE

A liberal arts college with a primary purpose of teacher training. Besides liberal arts courses and preprofessional courses leading toward the bachelor's degree, the college offers occupational curricula in such fields as: business administration, engineering, journalism, laboratory technology, nursing, recreation, public administration, and social service. On the graduate level, the college offers the master of arts degree in a variety of teaching service fields, and the master of science degree in business administration, public administration, applied chemistry, applied mathematics, applied physics, and applied psychology.

Located at San Diego

SUMMARY AND RECONCILIATION WITH APPROPRIATIONS

Contributions to State Employees' Retirement Fund	200,921	257,218	303,717	46,499
TOTAL EXPENDITURES FOR SUPPORT	$3,056,335	$4,009,997	$4,788,785	$778,788 (19.4%)

GENERAL ANALYSIS

Number of positions	*501.2*	*623.6*	*719*	*95.4*
ENROLLMENT AND UNIT COSTS				
Enrollment (full-time equivalent students)	5,429	6,345	7,250	905 (14.2%)
Cost per student	$563	$631	$660	$29 (4.6%)

During the 1956-57 school year, enrollments at this college exceeded expectations by 95 students. To alleviate the pressures of this increase, 5 teachers, 1 administrative, and 6 clerical positions were provided in the current fiscal year. These additional positions were funded from increased student fees and a transfer of $13,719 from savings in another state college.

In the 1957-58 school year, an additional 905 students are anticipated. This enrollment increase accounts for approximately three-quarters of the $778,788 increase in expenditures. Factors not directly related to enrollment growth which account for the remainder of the increase in expenditures are as follows:

1. New administrative organization to improve long-range planning for rising enrollments, building construction and expanding curricula	$24,120
2. Revision of the faculty staffing formula to reduce the present overload on teachers of laboratory courses in the sciences	28,854
3. Maintenance of new buildings	35,230
4. Special maintenance projects to forestall deterioration of campus facilities	13,815
5. Extension of 1956-57 part-year positions and salary adjustments for the full 1957-58 school year	243,452

SAN FRANCISCO STATE COLLEGE

A liberal arts college emphasizing teacher training. In addition to liberal arts courses, preprofessional courses, and professional education courses needed by students going into public school work, the college offers occupational curricula in a variety of fields. The college also has a program for training teachers of exceptional children which is one of the most extensive in the Nation. An off-campus residence center is operated at Santa Rosa and consists of an upper division program leading to an elementary teaching credential.

Located at San Francisco

SUMMARY AND RECONCILIATION WITH APPROPRIATIONS

General Fund

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUPPORT				
Budget Act appropriation	$3,110,648	$3,733,847	$4,622,708	
Transferred from Los Angeles State College	–	36,281	–	
Allocations from Salary Increase Fund	127,485	183,188	–	
Total Available	$3,238,133	$3,953,316	$4,622,708	
Unexpended balance, estimated savings	—50,861 [a]	–	–	
TOTALS, SUPPORT	$3,187,272	$3,953,316	$4,622,708	$669,392
Contribution to State Employees' Retirement Fund	213,811	266,595	299,580	32,985
TOTAL EXPENDITURES FOR SUPPORT	$3,401,083	$4,219,911	$4,922,288	$702,377 (16.6%)

GENERAL ANALYSIS

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*573.2*	*672.1*	*734.2*	*62.1* (9.2%)
Enrollment (Full-time Equivalent Students):				
San Francisco campus	5,543	6,050	6,400	350 (5.7%)
Santa Rosa center	–	80	170	90 (112.5%)
Total Enrollment	5,543	6,130	6,570	440 (7.1%)
Cost Per Student:				
San Francisco campus	$613	$683	$747	$64 (9.3%)
Santa Rosa center	–	1,061	800	—261 (—24.5%)
Total Cost Per Student	$613	$688	$749	$51 (7.4%)

An increase of 110 students over the number budgeted for the current school year, plus an additional 440 students projected for 1957-58, results in an increase in the enrollment base of 550 students, or 9 percent, over that upon which the 1956-57 Budget was based.

The pressure of the enrollment increase of 110 students in the current year was alleviated by the addition of 14.5 new teachers, 10 clerical and technical positions, and 2 maintenance positions financed from increased reimbursements and $36,281 transferred from savings in the appropriation for Los Angeles State College.

Major program changes for 1957-58 not directly related to enrollment but which account for three-fifths of the increase of $702,377 over expenditures for 1956-57 are as follows:

1. New administrative organization to improve long-range planning for rising enrollments, building construction, and expanding curricula	$28,020
2. A change in the composition of enrollment to an increased proportion of upper division, graduate, and practice teaching students requires an additional 15.5 teachers	72,850
3. Revision of the faculty staffing formula to reduce the present overload on teachers of laboratory courses in the sciences	8,460
4. Maintenance of new buildings	33,270
5. Special maintenance projects to forestall deterioration of campus facilities	16,523
6. Extension of 1956-57 part-year positions and salary adjustments for the full 1957-58 school year	227,822

The remaining cost increases are attributable to work load arising directly from the increase in enrollment and to general price increases.

---

[a] Composed of savings in salaries and wages, $37,656; operating expenses, $20,423; equipment, $235; and loss in reimbursements, $7,453.

SAN JOSE STATE COLLEGE

4-year liberal arts college with a primary function of teacher training and a well-established vocational curricula in such fields as nursing, police training, occupational therapy, and engineering. This college, oldest and largest of California's state colleges, trains approximately 10 percent of the new teachers graduating from this State's teacher-training institutions.

Located at San Jose

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$4,232,613	$5,098,453	$6,442,014	
Allocations from Salary Increase Fund	120,507	117,112	–	
Total Available	$4,353,120	$5,215,565	$6,442,014	
Unexpended balance, estimated savings	—51,054 [a]	—1,598 [b]	–	
TOTALS, SUPPORT	$4,302,066	$5,213,967	$6,442,014	$1,228,047
Contributions to State Employees' Retirement Fund	276,102	334,030	410,206	76,176
TOTAL EXPENDITURES FOR SUPPORT	$4,578,168	$5,547,997	$6,852,220	$1,304,223 (23.5%)
GENERAL ANALYSIS				
Number of positions	*759.8*	*860.5*	*1,058.6*	*198.1*
ENROLLMENT AND UNIT COSTS				
Enrollment (full-time equivalent students)	8,249	9,050	9,900	850 (9.4%)
Cost per student	$555	$613	$692	$79 (12.9%)

In the 1957-58 school year, an additional 850 students are anticipated. Approximately 40 percent of the $1,304,223 increase in expenditures can be directly related to the enrollment expansion. Other factors influencing the increase are only partly related to total enrollment growth and include the following:

1. A change in the composition of the enrollment requires an additional 63.3 teachers with incidental administrative, clerical, and technical staffing and equipment	$402,312
These teachers were necessary to staff for: a. A shift of the bulk of the enrollment from lower division to upper division over a 2-year period. Upper division authorized class size limits are much smaller than those for lower division programs. b. Rapidly increasing graduate enrollments due to opening of new occupational master degree programs in psychology, mathematics, business administration, occupational therapy, and applied physics. c. Heavy increase in practice teaching enrollments for the second year in succession. d. A continuing shift in the enrollment from the liberal arts curricula to the occupational curricula.	
2. A reduction in the teaching load for teachers of laboratory courses requires an additional 10.7 teachers	51,467
3. Implementation of a study to create a more effective organization requires an additional 7 administrative positions and 3 clerical positions	69,192
4. The opening of newly constructed audio-visual facilities enables the expansion of the audio-visual services program. Incidental staffing of 6.5 positions requires	28,146
5. Maintenance and operation of new facilities including an administration building, classroom building, and a science building addition requires an additional 29.5 maintenance positions and other operating expenses	127,653
6. Extension of 1956-57 part-year positions and salary adjustments for the full 1957-58 school year	211,117

Department of Education

CALIFORNIA STATE POLYTECHNIC COLLEGE

A technical college providing occupational education in agriculture, engineering, and selected arts and science fields.

A limited number of teaching credentials and a graduate year leading to a master of arts degree in education is provided. 2-year technical curricula are offered in all agricultural majors.

In addition to the 2,850-acre campus and farm at San Luis Obispo, the college maintains 2 branches in Southern California—the 157-acre Voorhis Campus located at San Dimas, and the 816-acre Kellogg Campus located at Pomona. Completion of a science building at the Kellogg Campus made it possible to offer regular lecture and laboratory classes at this new site for the first time starting September, 1956. Agricultural laboratories, physical education, and housing and feeding facilities at the Voorhis Campus will continue to be used.

Located at San Luis Obispo, San Dimas, and Pomona

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

Fair and Exposition Fund:				
Equip Women's Dormitories:				
Budget Act appropriation	$37,000	–	–	
Unexpended balance, estimated savings	—6,081	–	–	
TOTALS, OTHER CURRENT EXPENSES	$30,919	–	–	
TOTAL EXPENDITURES, ALL FUNDS	$3,237,311	$4,170,447	$4,931,387	$760,940 (18.2%)

GENERAL ANALYSIS

Number of positions	*436*	*560.9*	*645.7*	*84.8*
ENROLLMENT AND UNIT COSTS				
Enrollment (Full-time Equivalent Students):				
San Luis Obispo campus	3,430	4,095	4,600	505
Kellogg-Voorhis campus	403	550	800	250
Totals	3,833	4,645	5,400	755 (16.3%)
Cost per student	$837	$898	$913	$15 (1.7%)

Enrollment projections indicate that this college will experience an over-all increase of 755 full-time equivalent students in the 1957-58 school year. This increase in enrollment results in a concomitant increase in expenditures.

Major program changes not directly related to enrollment which result in increased expenditures are as follows:

1. Revision of the faculty staffing formula to reduce the present overload on teachers of laboratory courses in the sciences	77,680
2. Addition of positions for the maintenance of new buildings	21,001
3. Part-year salary adjustments and positions extended for the full 1957-1958 school year	204,352

The remainder of the increase is directly attributable to the increased enrollment.

---

[a] Composed of savings in salaries and wages, $37,570; operating expenses, $25,524; equipment, $14,063; and excess reimbursements, $20,340.

[b] Composed of savings in operating expenses.

Department of Education

CALIFORNIA MARITIME ACADEMY

The academy educates and trains young men who are mentally, morally, and physically qualified for entrance, to become licensed officers in the Merchant Marine. The course is three years and leads to the Bachelor of Science degree in Nautical Science, specifying navigation and seamanship for those in the deck course, marine steam, diesel and electrical engineering for those in the engineering course. Prior to graduation, candidates for the degree take the U. S. Coast Guard examination for licenses as third mates or third assistant engineers. By virtue of the technical training received, selected graduates are also issued appointments as ensign in the U. S. Naval Reserve, similar to those received by graduates who have taken Naval R. O. T. C. training in the 52 leading universities of the Country. The academic course leading to the above attainments is supported by training at sea approximately three months each year on the training ship Golden Bear, which is on loan to the State from the Federal Maritime Administration.

The State receives for the academy an annual subsidy (currently $25,000) for general overhead from the Federal Government, which also pays the State 68 7/10 cents per diem for subsistence of qualified Naval Reserve students, and pays approximately $50,000 annually for the overhaul and drydocking of the training ship. The States of Maine, Massachusetts, and New York have similar maritime academies, similarly subsidized by the Federal Government.

Located at Morrow Cove, Vallejo

GENERAL ANALYSIS				
Number of positions	*59.8*	*61.3*	*64.3*	*3*
ENROLLMENT AND UNIT COSTS				
Average enrollment	135	166	175	9
Cost per student	$2,231	$1,990	$2,147	$157 (7.9%)

The enrollment for 1956-57 is 166, with an anticipated average enrollment for 1957-58 of 175, an increase of 9 or 5.4%. The budget presented shows an increase of $45,376 or 12.7% in 1957-58 over 1956-57. The increase in salaries and wages of $22,264 or 7.2% includes the establishment of 3 new positions. Provision has been made for 2 new instructors to correct deficiencies in the instructional program. One will conduct the physical education program; the other will teach mathematics. A senior account clerk was added to provide staff for increased work load.

A major program change is the provision for a modified 3-year sea training cycle for the academy's midshipmen on the training ship, Golden Bear. Since the basic program is designed to produce a highly qualified ship's officer, annual sea duty is a vitally essential part of the program. This sea training serves the following purposes:

1. It affords experience in ship operation under varied weather and emergency conditions such as fog, heavy seas, fire, abandon ship, and sea rescue.
2. It gives each officer candidate a total of 6 months of sea duty (2 months in each of 3 years of school) to meet the U. S. Coast Guard minimum requirements to sit for license examinations.
3. It familiarizes the student with cargo handling facilities and practices, docking and pilot operations, customs and health clearance procedures, and labor conditions in the various ports.
4. It provides the equivalent training given by all other merchant and naval officer training schools.

While at sea, the ship is operated entirely by the midshipmen under the supervision of the faculty who are experienced ship officers. During his 3 sea duties, each student is assigned to each job station in his department (deck or engineering) on a rotational basis. As the midshipmen advance from third class to first class, they are assigned duties of increasing responsibility on each successive sea voyage. The schedule for a 3-year sea training cycle is proposed as follows:

Sea duty	*Mileage*	*Barrels of fuel oil*
1. West coast of South America Provides training experience in working with the celestial differences in the southern hemisphere and in operation of engineering plant and care of ship and ship's stores in tropical waters.	8,744	7,416 *
2. Pacific Northwest including Alaska Affords training in particularly unique celestial navigational problems, extreme weather conditions, and navigation in narrow and tortuous channels.	4,394	4,736 *

---

[a] Composed of savings in salaries and wages, $213; operating expenses, $2,846; equipment, $2,369; and loss in reimbursements, $5,224.

[b] Composed of savings in operating expenses.

[c] Grants from the Federal Government and the expenditures therefrom are not included in the over-all budget totals. See Schedule 7 for summary of federal aid revenues and expenditures.

* Includes 1,400 barrels for in-port training and overhaul period in shipyard.

CALIFORNIA MARITIME ACADEMY—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

	Mileage	*Barrels of fuel oil*
3. Pacific Ocean Affords experience in midocean ship operation and navigation and in port problems peculiar to Hawaii and the South Pacific. If free transit of the Panama Canal can be secured from the Federal Government, an alternative voyage would be the Gulf of Mexico. This would afford experience in canal transit and in unique problems in river and delta navigation and strong ocean current effects.	10,032	8,189 *
Average, all sea training	7,723	6,780 *

In view of the more limited funds for fuel oil available in the two years prior to 1957-58, the budget proposes to provide $18,950 for 7,416 barrels of fuel oil in 1957-58 to enable the first sea duty, above. Thereafter, it is proposed that funds be provided for 6,780 barrels annually to provide flexibility to the academy in scheduling its sea training from year to year.

CALIFORNIA SCHOOL FOR THE BLIND

A residential school for the general education of the blind, partially blind, and deaf-blind children through the elementary and high school levels. The educational program utilizes specialized equipment such as braille writers, braille books, models, and various types of apparatus for corrective physical education. Guidance service is available for preschool blind children and parents to graduates and ex-pupils by the school's field services. The Helen Keller deaf-blind unit is the only one in the western United States where these doubly handicapped children may receive an education.

Located at Berkeley

CALIFORNIA SCHOOL FOR THE DEAF, BERKELEY

The California School for the Deaf, Berkeley, is a residential school admitting mentally normal deaf children from 5½ to 21 years of age. Students are given elementary and high school general education, with special emphasis on development of language concepts. Students are given special speech instruction using oral techniques as well as finger spelling and lip reading. Opportunities are provided for learning a trade in one or more of the following fields: home economics, commercial art, printing, cabinet making, shoe repair, baking, and business techniques. Opportunity is provided for the students to qualify for attendance at Gallaudet College in Washington, D. C., the only college in the United States providing collegiate instruction for deaf people.

Average Student Enrollment:				
Resident	415	422	432	10
Nonresident	10	20	20	–
Totals	425	442	452	10
Cost per student (excluding expenses for Gallaudet College)	$2,582	$2,797	$2,835	$38
Number of students attending Gallaudet College	44	28	38	10
Cost per Gallaudet student	$295	$430	$430	–

The program budgeted for 1957-58 reflects a continuation of the general level of service as in prior years with an increase of 10 resident students. Additions are made to staff as follows:

1. 1 clerk to provide better inventory record keeping.
2. 1 supervising teacher to replace 2 dean of students positions which will be abolished.
3. 1 speech correction teacher to provide remedial instruction to students in the intermediate and advanced departments.
4. 1 groundsman because of the completion of a new athletic field and running track.
5. 1 janitor to care for the recently completed gymnasium.

GENERAL ANALYSIS				
Number of positions	*159.5*	*169.1*	*200*	*30.9*
ENROLLMENT AND UNIT COSTS				
Average Student Enrollment:				
Resident	307	307	380	
Nonresident	23	28	40	
Totals	330	335	420	
	1955-56 Cost per student	*1956-57 Cost per student*	*1957-58 Cost per student*	
Administration	$172	$180	$151	
Instruction	1,032	1,213	1,168	
Care	842	988	931	
Maintenance and operation of plant	534	631	602	
Totals, School Operations	$2,580	$3,012	$2,852	

The major items of increase are based on a projected increase in student enrollment from 335 in 1956-57 to 420 in 1957-58. New dormitories and classrooms are to be completed and occupied in September, 1957, and February, 1958, which will increase resident capacity to 396 and nonresident capacity to 40. To care for this increase the following positions are provided:

1. 6 teachers and 7 counselors to staff the intermediate and advanced classroom building, intermediate girls' dormitory, and advanced boys' dormitory which are scheduled for occupancy during September, 1957.
2. 4 teachers and 4 counselors to staff the primary classroom and dormitory scheduled for occupancy during February, 1958.
3. The following miscellaneous positions have been added because of work load increases caused by the increase of student population from 335 to 420.
   1 Junior typist-clerk
   2 Food service assistant
   2 Janitor
   2 Groundsman
   1 Watchman
4. 2 special teachers are provided to offer additional coverage in the educational field within the following subject areas: physical education, speech correction, business machines and typing, and driver training.
5. Provision has been made for the attendance of 4 students at Gallaudet College, Washington, D. C.

SCHOOL FOR CEREBRAL PALSIED CHILDREN, NORTHERN CALIFORNIA

A residential school with a capacity of 32 children for differential diagnosis, education, and treatment of cerebral palsied and similarly handicapped children between the ages of 3 and 21. During the Fiscal Year 1955-56, a total of 75 children were served. The total stay of each child now averages 9 months. Before and during the child's stay at the school, a long-term individualized program is worked out with the agencies in his home community so that the enrollment may be only one phase in the child's total development. Following the establishment of a program of education and medical and therapy treatment, the child is returned to his home for the continuation of these programs.

The school also serves as a demonstration center for student therapists, teachers, and doctors.

Located at the San Francisco State College Campus

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS				
Number of positions	*50.1*	*57.1*	*57.3*	*0.2*
ENROLLMENT AND UNIT COSTS				
Average enrollment—resident students	28	32	32	–
Average cost per student (excluding diagnostic and treatment costs for nonresident children)	$12,321	$12,292	$12,042	—$250 (—2%)

Provision is made for continuation of the existing level of services. The proposed new position in the instruction function is for the purpose of providing service to residents which was formerly performed by the University of California under contract. With the transfer of the above-mentioned position to the school the separation of the treatment services from the University of California is complete. Funds for the existing contract for diagnostic services with the University have been transferred to the Department of Education for administrative purposes.

SCHOOL FOR CEREBRAL PALSIED CHILDREN, SOUTHERN CALIFORNIA

A resident school with a 30-bed capacity enrolling children afflicted with cerebral palsy from the 13 counties of Southern California. The ages of these children are from 3 to adolescence. They stay from 3 to 12 months for a diagnostic study and treatment program. Then the child returns to, or is referred to, the special class in his local school district.

The Division of Special Schools and Services will finance and operate, by contract, 3 state outpatient clinics at the Children's Hospital, Los Angeles; the Orthopedic Hospital, Los Angeles; and at the White Memorial Hospital, Los Angeles. Formerly, provision for these clinics was contained in the budget of the school. All children enrolled in the school are referred through the state cerebral palsy clinic at either Children's, Orthopedic, or White Memorial Hospitals, but receive consulting examinations and hospitalization at White.

Located at Altadena

OAKLAND ORIENTATION CENTER

The center admits blind persons as trainees in an intensive program designed to assist blind persons in becoming more self-sufficien and in cases where feasible, partially prepares them for useful and remunerative work in trades, professions, private busines private industry, or public service. The center also provides a residence for blind persons admitted prior to the separation of th orientation functions and the workshop manufacturing functions in 1951.

GENERAL ANALYSIS

Number of positions	*51.6*	*53.3*	*53.3*	–

This budget reflects a reduction of 8 in the number of residents in the center but a continuation of the same number of students as i 1956-57.

Allowances for those persons with no source of income for the purchase of incidentals is increased from $2 to $4 per week. This bring such allowances to approximately the level allowed in aid payments by the Department of Social Welfare. The increase in th budget for this purpose totals $1,640.

Reimbursements from the Oakland Center, California Industries for the Blind, decrease by $880 as the staff at that agency will pr vide its own maintenance.

LOS ANGELES CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

Provides sheltered factory employment to blind and partially blind persons, some of whom are unable to obtain, or retain, jobs in private industry. Industrial training and vocational guidance is also given to enable blind persons to contribute to their own support. The administrative and related expenses are supported by the General Fund and the manufacturing activities are financed from working capital supplied by the Manufacturing Revolving Fund, as shown in the Appendix.

Located in Los Angeles

OAKLAND CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

Provides sheltered factory employment to blind, partially sighted and physically handicapped persons some of whom are not able to obtain employment in private industry but need to be able to contribute to their own self-support. Administrative and related expenses are supported by the General Fund and manufacturing activities including supervision are financed from working capital supplied by the California Industries for the Blind Manufacturing Fund as shown in the Appendix. This center specializes in the manufacture of domestic and industrial type of corn brooms. Other products manufactured at this center are staple set street brooms, pillow cases, mailing bags, and sanitary brushes. Projects in sewing and assembly projects are also done at this center.

Located at Oakland

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$90,408	$90,114	$101,826	
Allocations from Salary Increase Fund	–	3,815	–	
Total Available	$90,408	$93,929	$101,826	
Unexpended balance, estimated savings	—3,077 [a]	–	–	
TOTALS, SUPPORT	$87,331	$93,929	$101,826	$7,897
Contributions to State Employees' Retirement Fund	4,247	4,672	4,811	139
TOTAL EXPENDITURES FOR SUPPORT	$91,578	$98,601	$106,637	$8,036 (8.2%)
GENERAL ANALYSIS				
Number of positions	*13.5*	*12.7*	*12.8*	*0.1*
POPULATION AND UNIT COSTS				
Average number of workers in factory	167	180	175	5
Direct support cost per worker	$548	$548	$609	$61 (11.3%)
Number of full-time equivalent workers	111	112	112	–
Average cost per full-time equivalent worker	$825	$880	$952	$72 (8.2%)

The budget provides for the continuation of the present level of activity. The increase is accounted for by an increase in the number of special maintenance projects as well as minor adjustments in other areas of operation.

SAN DIEGO CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

ovides sheltered employment to blind, visually handicapped and some physically handicapped men and women who are unable to obtain employment in private industry but who need an opportunity to enable them to contribute to their own self-support. This center specializes in the manufacture of wet and dry mops and other related items. The administrative expenses are supported by the General Fund while supervision and related manufacturing expenses are supplied from the California Industries for the Blind Manufacturing Fund, as shown in the Appendix.

TOTAL EXPENDITURES FOR SUPPORT	$13,384	$307,152	$658,352	$351,200 (114.3%)
GENERAL ANALYSIS				
Number of positions	*0.9*	*3*	*4*	*1*

A total of 613 scholarships were awarded in 1955-56 rather than the 640 authorized by law. The difference is due to the fact that the program was new and relatively unknown so that the number of applicants was small and some recipients declined the scholarships after the awards were made. The 1957-58 program estimates payments of $600,000 for 1,280 scholarships awarded in the spring of 1957. Awards will be made in the spring of 1958 of 1,920 scholarships for which payments will be contained in the 1958-59 Budget.

In general the 1957-58 program is a continuation of the 1956-57 program with the exception of an anticipated increase in the number of applicants for the increased number of scholarships available.

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*35.5*	*35.5*	*40.5*	*5*

The State Teachers' Retirement System will continue its growth into the budget year as reflected in the following table:

	1955-56	1956-57	1957-58
Active accounts	164,352	191,695	205,497
Retired accounts	15,654	19,250	21,000
Total case load	180,006	210,945	226,497
Closed accounts	7,250	10,300	11,255

Provision is made for 6 additional clerical positions to handle increased work load caused by a new retirement formula effective July 1, 1956, and by an increased number of accounts.

Average	$1,188	$1,329	$1,336	$7

GENERAL SUMMARY

The proposed budget of the University of California provides for a total expenditure of $112,064,502, including contributions to the State Employees' Retirement Fund of $4,030,000, for the year 1957-58, an increase of $8,859,148 or 8.6 percent.[b] Part of this increase results from increases of 13.1 percent in self-supporting auxiliary enterprises; 24.2 percent in student aid, chiefly from endowment income; and 15 percent in annuity and agency fund payments.

The proposed source of funding is as follows:

1. State General Fund	$82,039,863
2. State Accountancy Fund	30,000
3. Real Estate Fund	100,000
4. Fair and Exposition Fund	134,822
5. University Funds	29,759,817

The increase requested for educational and general expenses amounts to $7,982,115, or 8.4 percent, of which the State will provide about four-fifths or $6,498,880. The proposed state appropriation is magnified somewhat by an estimated decline of 18 percent in prior year University general fund income and balances available for use in 1957-58. In part this decline has been offset by an addition of $100,000 in overhead from federal contracts, and of $117,195 from other funds.

The expected enrollment increase of 2,876 students is the most important but not the only factor involved in the proposed increase in educational and general expenditures. It is of significance to note that 72 percent of the increase in University of California enrollment will be at the upper division and graduate levels, where costs are relatively much higher than in the lower division.

Further details of these increases by campus or activity are shown below.

State-wide Activities—Increase, $2,602,533

State-wide activities include the central administration of the University and service activities, institutes, the phases of which are contained on more than 1 campus, Agriculture Extension, University Extension, and general miscellaneous provisions.

The miscellaneous items show the largest increase, $1,517,288. This includes provisions for the extension of salary increases for a full year, $405,914; periodic salary increases for both academic and nonacademic employees, $1,283,762; promotions in rank, $266,623; and an executive reorganization, $45,000. These increases are offset by decreases in the provision for contingencies, $66,165, and an increase in salary savings, $397,366.

---

[a] Net current expenditures (including contributions to the State Employees' Retirement Fund) after deducting current revenue from sources other than state appropriations. Excludes expenditures, income, and enrollment, if any, for the following activities and functions, together with the proportionate amount of general administration, general expense, maintenance and operation of plant and state-wide expenditures attributable thereto:
(1) Summer sessions, extension, vocational education.
(2) Organized research activities, such as the Agricultural Experiment Station, the Scripps Institution at La Jolla, Lick Observatory, the Institute of Experimental Biology, etc. However, expenditures for research and investigation carried on by academic personnel under departmental auspices are included; these are particularly significant in the medical centers at San Francisco and Los Angeles.
(3) Auxiliary enterprises, such as dormitories and dining halls.
(4) Organized activities of educational departments, such as the University Creamery at Davis, and the Optometry Clinic at Berkeley, which are supported out of their own income. However, teaching hospital expenditures in excess of their income are included in computing expenditures per student.
(5) Student aid and annuity and agency fund payments.

[b] The University's supplemental request for $2,500,000 to assist in the recruitment of additional staff to meet the anticipated enrollment increases over the next 5 years has not been included in the budget.

LINE	EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL SUMMARY—Continued

State-wide Activities—Continued

Other areas of major increases include: organized research, $259,211, of which the largest single item is in water resources research, $150,000; University Extension, which shows an increase of $330,000, reflecting increased activity in that area and which is approximately 81 percent self-supporting; increases in the pension and retiring annuities contributions which show a net increase of $96,760 due to the general salary increases granted in 1956-57.

Increases in the departments of instruction and research are mainly in the field of agriculture.

Berkeley Campus—Increase, $2,034,105 or 7.8 percent

Of the increase of $2,034,105, or 7.8 percent, proposed for Berkeley, $118,964 represents growth of self-supporting activities, and $72,768 represents increased student aid, largely from endowments. The increase for educational and general purposes amounts to $1,842,373 or 7.5 percent. Of this, $66,144 is budgeted under general expense. The most important items are an increase of $12,718 in mail and messenger service, and $48,490 for increased costs of the student health service to be met from student fees.

An additional $195,510 goes for general maintenance and operation of plant, including such major items as $60,861 for building maintenance, $15,980 for grounds maintenance, $28,351 for janitors, $24,723 for steam heat, and a $40,000 contingency to cover probable increases in utilities usage. An increase of $56,032 or 6.1 percent is required for general administration in the chancellor's office, the dean of students office, and the business office.

The basic productive increase for Berkeley, that devoted to instruction and research, amounts to $1,015,997 or 6.9 percent.

While the increase for instruction and research is made up of a host of small departmental allowances to fill gaps and bolster weaknesses, it can be summarized in certain broad categories: the School of Business Administration, $41,609; College of Chemistry, $56,120; School of Education, $58,161; College of Engineering, $188,932, and College of Letters and Science, $511,060. Within the College of Letters and Science 4 departments receive a cut in budget, most receive a small increase. The major share of the increase is devoted to such pressure points as mathematics, physics, psychology, English, history, Italian, and French, speech, economics, social welfare, political science, and philosophy.

Of the 121.92 full-time equivalent new academic positions provided for by the proposed budget, 76 percent are concerned with carrying the student load for 1957-58, and of these 93 positions only 6 are of tenure rank. The rest are assistant professors, instructors, lecturers or teaching assistants. Almost 10 percent of the increase in academic positions goes to electrical engineering which has had a 71 percent increase in enrollment in the past 2 years, and 7 full-time equivalent positions go to mathematics which has had a 23 percent enrollment increase in the same period.

Davis Campus—Increase, $739,046 or 8.4 percent

Of the $739,046 increase proposed for Davis, $440,958 will go to the strengthening and expanding of departments of instruction and research, $346,747 within the College of Agriculture, including the School of Veterinary Medicine, and $94,211 in the College of Letters and Science.

Of the remaining $300,000, $151,016 represents increases in self-supporting auxiliary enterprise budgets, $65,349 goes for increased cost of maintenance and operation of plant, $21,758 to organized activities, $28,600 to general administration, $11,956 to general expense, $12,616 to the library, and the rest to small miscellaneous items. The increase in general administration, which appears large, results from a transfer of agricultural publication and information costs in the amount of $19,441, and therefore is not a true increase. General expense goes up as a result of a $9,807 increase in health service expenditures, and is supported by student fees.

The major items accounting for the increase in maintenance and operation of plant are $12,473 for steam heat, $11,001 for utilities, $20,000 for major repairs and alterations, and $17,695 for buildings and grounds maintenance and refuse disposal.

Academic staff increases proposed for Davis will just about maintain the status quo relative to student enrollment. With the proposed staff additions and the expected increase in student enrollment the ratio of students to teaching staff members will remain at 11.8.

La Jolla Campus—Increase, $154,561 or 11.5 percent

Of the $154,561 increase proposed for La Jolla $104,561 is for its present program of which 85.5 percent will go to organized research to strengthen the basic staff and plant which draws most of its working support from foundations and the Federal Government. Of the increase proposed $47,822 will go into salaries and wages for additional staff members. Other major items are $27,493 to meet increased cost of operating ships during the periods they are devoted to noncontract, basic research; $3,725 for use of docks at Point Loma; $10,000 for equipment and facilities; and $9,974 for supplies and expense.

A new special item of $50,000 is provided for initial staffing and supporting expenses in connection with planning and developing over a period of years a graduate program in science and technology with such undergraduate instruction as is essential to support the graduate program.

Los Angeles Campus—General Campus—Increase, $1,447,146 or 8.9 percent

The over-all increase of $2,060,817 or 8.8 percent includes $1,447,146 or an 8.9 percent increase for general campus activities. The remainder is allocated to the medical center.

This amount of $1,447,146 is a provision for the expected 6 percent increase in student enrollment, and for improving the readiness of staff and facilities for work loads already imposed.

The increase in organized research, amounting to $245,212 at Los Angeles, includes the western universities computing center, the data processing and statistical program, and air pollution research.

General expense at Los Angeles will show a net decline of $66,550 in 1957-58, as a result of a reduction of $79,561 in the budget for student health services, based on experience during the first full year of expanded operation in the new medical center, and a decrease of $9,930 in telephone and telegraph used in 1956-57 for switchboard remodeling. The only significant increase is a provision of $5,714 for the Bureau of Occupations, reflecting student enrollment growth.

Maintenance and operation of plant will increase $109,731, or 7 percent, of which $59,355 will go to building maintenance and major repairs and alterations. Expenditures for utilities will go up an estimated $12,666; refuse disposal, $8,685; police, $11,545; and janitorial expense, $8,049.

An increase of $100,517 is proposed for the library, about half of it for salaries and general assistance, and most of the rest for books, periodicals, binding, etc., to better meet demands by faculty and students.

An increase of $40,298 is proposed in organized activities, for the establishment of the School of Business Administration Management Review, and for engineering services to industry, library photographic services, etc., which are covered by income.

The increase for basic operations of departments of instruction and research is $756,787 or 7.5 percent, of which $160,113 is for the College of Applied Arts, $36,332 for the School of Business Administration, $56,967 for the School of Education, $147,269 for the College of Engineering, and $375,740 for the College of Letters and Science.

New positions provided for total 92.61 full-time equivalent academic, and 89.01 nonacademic. Of the 92.61 full-time equivalent academic positions, 8.50 are at tenure ranks, and 84.11 at the rank of assistant professor, instructor or other.

GENERAL SUMMARY—Continued

Los Angeles Medical Center—Increase, $613,671 or 8.5 percent

The increase of $613,671 for the Medical Center, Los Angeles, is largely made up of an increase of $468,199 for the hospital, which will be met by increased income without added cost to the University or the State. The increase in support is therefore only $145,472, of which $106,365 will go to instruction and research in the Medical School, $21,434 to the same purpose in nursing, and $20,210 for a research and development laboratory and visual aids. General expense and organized research are reduced slightly.

Inasmuch as there will be an estimated increase of 57 students in the Medical School, and 73 in the School of Nursing, the relationship between cost and students should be greatly improved in 1957-58.

Provision is made for an increase of 8.25 full-time equivalent in the academic staff of the Medical School, and 3.25 full-time equivalent in the academic staff of nursing. Nonacademic salary positions will increase 13.4 full-time equivalent, and general assistance increase 54.43 full-time equivalent, to increase clinic service and bring the hospital house staff to an accepted norm.

The budgets of 4 departments in the School of Medicine will be reduced slightly. The major increases are $12,125 for physical medicine, $14,322 for psychiatry, $13,039 for radiology, and $22,060 for surgery.

San Francisco Medical Center—Increase, $633,494 or 5.8 percent

The budget increase proposed for the Medical Center, San Francisco, amounting to $633,494, includes increases in hospital, dentistry clinic, physicians' office and service laboratory budgets totaling some $276,338, which will be covered by income and not involve University or state support. When allowances are made for these, the increase in support available for general purposes shrinks to $357,156.

Of this amount $160,948 will go to general administration, general expense, maintenance and operation of plant, libraries, organized research, and contingencies. The major increase in general administration results from the establishing of a long-postponed office of public information for the Medical Center. The major increase in general expense results from an increase of $11,271 in estimated expenditures for student health. The increase of $20,683 in maintenance and operation of plant results from an increase of 11.2 percent in space to be maintained. The library receives an increase of $9,321 chiefly for added part-time help and binding of books. Organized research will be increased by $87,787, for support of Hooper Foundation, the Cancer Research Institute, the Cardiovascular Research Institute, a research and development laboratory, arthritis and allied diseases, and funds for allocations as new ideas arise.

Departments of instruction and research at the Medical Center will receive an increase of $159,187. Amounts for the various schools and colleges are: College of Dentistry, $21,900; School of Medicine, $101,424; School of Nursing, $19,723; and School of Pharmacy, $16,140.

The total of new positions provided is 17.35 full-time equivalent academic, 28.36 nonacademic, and 58.83 general assistance. Only one part-time salaried tenure position is requested. The largest increase to any department is $18,622 to anesthesia which must be strengthened to regain the approval of the American Medical Association for residency training. The School of Nursing requires 3 additional instructors to care for a projected 11.6 percent increase in student enrollment in 1957-58.

Mount Hamilton—Increase, $32,882 or 14.2 percent

The budget increase proposed for Mount Hamilton is the largest, percentagewise, of all campuses, but this occurs because the ba budget is the smallest among the various campuses and relatively nominal preparations for the completion of the 120-inch tel scope bulk large. The proposed budget provides 2 additional nonacademic personnel, an engineer and a technician, and increase the amounts available for supplies and expense and repairs and maintenance. The most significant items, however, are nonr curring provisions for accessories to the telescope, and $6,625 to repair roads and weatherproof observatory residences.

Riverside—Increase, $125,059 or 3.1 percent

The increase proposed for Riverside is the smallest percentagewise, among all campuses, and reflects the fact that enrollment increases will be limited by the residence facilities available and inadequate transportation. However, the budget increase looks smaller than it actually is, because of a $30,610 downward adjustment of auxiliary enterprise income and expenditure estimates. Gross increases for educational and general purposes total $155,069 or 4.2 percent, $75,745 of which goes to the Citrus Experiment Station, $24,056 to maintenance and operation of plant, and $43,625 to the College of Letters and Science.

An increase in maintenance and operation of plant is necessary because of an expansion of 39,887 square feet of floor space. The cost of maintenance involved will be held down by a reduction in unit cost from 80.6 to 79 cents per square foot.

Of the $43,625 increase proposed for the College of Letters and Science, $14,144 will go to the Division of Physical Sciences for an instructor in physics, an electronics technician, general assistance, supplies and expense, and equipment and facilities to meet the unexpectedly heavy concentration of students in this division. The Division of Humanities will receive $12,571 to round out the program by adding an instructor in art and an instructor in music, as well as purchasing basic teaching aids, including slides, prints, etc. The Division of Life Sciences will receive $9,850, to be used entirely for teaching supplies and equipment.

Santa Barbara—Increase, $208,651 or 6.5 percent

Of the increase of $208,651 proposed for Santa Barbara, $32,800 represents an estimated increase in volume of business done by auxiliary enterprises, and $32,900 is the estimated increased cost of student health services and counseling services to be offset by fees, which means that the net increase for general purposes is $142,951. The expected increase in student enrollment for 1957-58 is 14.3 percent which will raise the average number of students on campus during the year from 2,170 to 2,480. The majority of the new students is expected in upper division.

10 new academic positions will be provided by the budget increase, all of them at the assistant professor, instructor or associate level, and 8 nonacademic. There will be a reduction of 1 academic position in industrial arts. The ratio of students to total teaching staff, including lecturers, associates, etc., will increase from 12.2 to 13.2.

Of the general purpose increase of $142,951, general administration will require $24,757 to provide additional help in the provost's office, the purchasing office, the registrar's office, and the student housing office. The principal increases occur in the provost's office, to provide a junior administrative analyst and a secretary-stenographer offset in part by a reduction in general assistance of $2,550.

Maintenance and operation of plant will increase $15,042 principally for increased utility costs.

Departments of instruction and research will receive $93,613, with the largest single allocation, $29,357, going to the Division of Humanities for the departments of art, English, foreign languages, music, and speech. The second largest amount, $19,679, is allocated to physical education, and smaller amounts are made available for the life sciences, the physical sciences, the social sciences, and education and home economics. The budget for industrial arts will be reduced $5,722 or 4 percent.

An increase of $5,458 is proposed for the library to provide additional service at the reference desk and the loan desk.

UNIVERSITY OF CALIFORNIA—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL SUMMARY—Continued

Agricultural Sciences—Increase, $692,418 or 4.4 percent

The Division of Agricultural Sciences is recommended for a budget increase of $692,418 or 4.4 percent to cover all of its operations state-wide, and on the Berkeley, Davis, Los Angeles, and Riverside campuses. More than half of the increase, $363,546, will go to the principal experiment station at Davis.

In line with the considered opinion of the Agricultural Advisory Council no major change in policy or emphasis is proposed for 1957-58, and $537,445 of the proposed increase will go to meet deficiencies or provide more adequate support for regular and continuing activities.

Among the major allocations are $50,677 to veterinary medicine, $48,301 to agricultural extension, $36,499 to irrigation, $26,553 to agronomy, $24,956 to field stations, $23,507 to home economics principally at Davis, $23,300 to agricultural engineering, $22,357 to soils and plant nutrition, $20,936 to vegetable crops, and slightly smaller amounts to range management, floriculture and ornamental horticulture, plant pathology, landscape management, subtropical horticulture, etc.

Approximately 20 percent of the 1957-58 budget increase in agriculture, $154,973, will go toward new and extended activities. One of the principal new activities will be an investigation of bacterial canker in accord with a resolution of the California State Board of Agriculture which was addressed to the Regents under date of September 17, 1956, and referred by them to the president.

Another new project is the establishing of a department of agricultural biochemistry at Davis. It is felt that a 2-man department will be sufficient to meet the present demand for research and instruction on biochemical problems as they relate particularly to agriculture. This development will supplement and not duplicate existing biochemical activities on other campuses.

REVENUE

Current revenue to university funds is budgeted at $26,912,605, an increase of $2,183,498. Broken down as to source the major increases in revenue are as follows:

Student Fees, Regular Session ---------- $278,270

This increase reflects the growth in enrollments. Student fees are continued at the present level, $42 a semester for residents.

Extension Fees ---------- $200,000

These fees reflect an increase of $250,000 in regular extension offset by the termination of the Far East Command program and an attendant decrease of $50,000.

Sales and Service ---------- $854,634

This increase is caused by fuller utilization of the hospitals and medical clinics, which account for $738,693, and the balance is attributable to increased miscellaneous income.

Endowments ---------- $196,687

Auxiliary and Service Enterprises ---------- $424,140

Income from residence halls and dining rooms are responsible for this increase.

HASTINGS COLLEGE OF LAW

The Hastings College of Law was founded in 1878 by S. C. Hastings with the grant of $100,000 to the State through the Regents of the University of California. By stipulation in the original agreement the State must pay the sum of 7 percent interest on the grant or repay the $100,000 in full to a Hastings heir. According to the act creating the college, it is affiliated with the University of the State.

The college offers facilities for the acquisition of learning in all branches of the law, and to this end it has established a complete curriculum of studies and matriculates students who are granted the degree of "Bachelor of Laws" by the University of California.

Located in San Francisco

ENROLLMENTS AND UNIT COSTS				
Enrollment	421	467	472	5 (1.1%)
Expenditures per student	$608	$649	$608	—$41 (—6.3%)

Enrollment at Hastings College of Law is estimated at 472 in 1957-58, an increase of 5 or 1.1% over the enrollment of 467 in 1956-57.

The program for 1957-58 is characterized by a decrease in instructional staff of approximately 3 positions due to the fact that the fourth year courses will not be offered in 1957-58. In addition the bar review courses will be discontinued in 1957-58, accounting for a decrease of $31,800 in expenditures and slightly more in revenue.

The college continues to operate at a deficit, estimated at $189,871 for 1957-58. The difference is made up out of surpluses accumulated during the immediate postwar years. This surplus will be depleted at the end of 1957-58 and other sources of financing will be necessary for the college to continue in operation. Revenues show a decrease of $38,571, mainly in the area of bar review course fees.

In accordance with the policy established by the Legislature in 1954, funds sufficient to cover the estimated cost of operating and maintaining the college building ($42,000) in addition to the required amount of $7,000 are included as General Fund financing.

[a] Constitutes the annual interest payment to the college of $7,000 on the original gift as required by Section 20152, Education Code, and an amount sufficient to pay for the cost of operating and maintaining the college building ($42,000).

[b] Funds of the college are not maintained in the Treasury. Neither the revenues nor expenditures of these funds are included in the over-all budget totals.

GENERAL ANALYSIS

Number of positions—General Fund activities	*398.4*	*401*	*410*	*9*
Number of positions—Special fund activities	*101.3*	*108.5*	*110.5*	*2*
Total Number of Positions	*499.7*	*509.5*	*520.5*	*11*

The increase for 1957-58 over 1956-57 provides for the following significant changes:

	NUMBER OF POSITIONS	COST
1. Accounting Division:		
a. Increased volume of accounting transactions	3	$16,500
b. Decrease in unclaimed property work load	—1	—4,000
2. Audits Division, additional school construction projects requiring audit	3	20,500
3. Inheritance and Gift Tax Division, increased number of returns	4	23,800
4. Tax Collection and Refund Division, increased audit coverage	2	15,000

---

[a] Expenditures from bond funds are not included in over-all budget totals.

GENERAL FUND—Continued

ACCOUNTING DIVISION

The principal functions of this division are to maintain the control accounts covering the receipts, disbursements and balances o all state funds, the audit and funding of all deposits into the State Treasury, to prepare the various financial statements cover ing the State's condition and operations, to make various apportionments of revenues to local government, and to administer th unclaimed and escheated property laws.

Analysis

The $13,802 increase provides for 3 additional permanent positions and $2,500 in temporary help to process an expected increas in the number of accounts and related work. 1 position is being abolished because of a decrease in unclaimed propert work load.

AUDITS DIVISION

This division audits all claims against the State for correctness, legality, and for sufficient provisions of law for payment. It field audits expenditures by counties, cities, and other local governmental agencies, under the state school building aid programs, social welfare and public health subventions, and postwar construction programs, to determine the State's share of the costs of the programs.

Analysis

The $29,047 increase for 1957-58 is for 3 additional auditors to audit an increasing number of completed school construction projects. This division audited 16 projects authorized by Chapter 27, Statutes of 1952, during 1955-56. In 1956-57 and 1957-58 it is anticipated that 89 and 435 such projects, respectively, will be ready for audit.

INHERITANCE AND GIFT TAX DIVISION

This division administers the state inheritance and gift tax laws.

Analysis

The $31,825 increase for 1957-58 over 1956-57 provides 4 additional positions for a continuing growth in inheritance tax returns. In recent years the volume of returns has increased at an average of 6 percent annually, which is a considerably greater rate than the increase in personnel during the same period.

COUNTY BUDGETS AND REPORTS DIVISION

This division administers the laws relating to county budgets and the reporting of county, city and district financial transactions, and provisions of the Collier-Burns Highway Act requiring local jurisdictions to report street and highway financial transactions. There is no significant change in program anticipated for the 1957-58 Fiscal Year.

STATE CONTROLLER—Continued

TAX COLLECTION AND REFUND DIVISION

This division enforces the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel License Tax Act, the tax on insurance companies, and the petroleum and gas production assessments; and administers the refund of motor vehicle fuel license tax to nonhighway users, collecting in the process sales tax on the purchases subject to such tax.

Analysis

The $26,348 increase for 1957-58 in excess of 1956-57 proposes 2 additional field positions to provide increased audit coverage of motor vehicle fuel tax refunds claims—particularly on the larger, more productive claims.

TAX-DEEDED LANDS DIVISION

Analysis

This division administers the general procedures for tax sales, tax deeds, and redemptions of lands sold or deeded to the State for nonpayment of taxes; administers property tax-deeded to the State; advises county officials regarding the levying and collection of taxes on property and renders services to the counties relative to delinquent tax accounting. There is no significant change in program anticipated for the 1957-58 Fiscal Year.

GENERAL ANALYSIS

Number of positions—General Fund activities	*1,955.4*	*2,137*	*2,247*	*110*
Number of positions—Special Fund activities	*207.1*	*213*	*220*	*7*
Total Number of Positions	*2,162.5*	*2,350*	*2,467*	*117*

The 1957-58 Fiscal Year Budget provides for the following major changes:

	Number of positions	*Cost*
1. Expansion of internal audit function	1	$8,000
2. Sample appraisal of property for intercounty equalization	27	194,000
3. Assistance to county assessors	21	146,000
4. Uniform Local Sales and Use Tax:		
a. Retail Sales Tax Division	36	253,000
b. Service Division	4	32,000
In the current fiscal year 130 positions and related expenses are being provided at a cost of approximately $350,000. The cost of these positions for the 1957-58 Fiscal Year is estimated to be $550,000.		
5. Increased work load:		
a. Valuation Division	7	37,000
b. Retail Sales Tax Division	20	111,000
c. Division of Highway Taxes	8	39,000
6. Anticipated increase in number of vacant positions	—7	—35,000
7. Automobile replacements	–	14,000

---

[c] Composed of savings in salaries and wages, $6,337; operating expenses, $7,508; and loss in reimbursements, $2,221.

SERVICE DIVISION

The principal functions of this division include cashiering, mailing, supply, tabulating, duplicating, and other general services.

Analysis

The $24,587 increase for the 1957-58 Fiscal Year provides for higher prices and rental rates (office and tabulating equipment).

4 new positions and related expenses, at a cost of approximately $32,000, are proposed to service the Uniform Local Sales and Use Tax Program administered by the Retail Sales Tax Division. In the current year 22 positions are being established for this purpose.

DIVISION OF ASSESSMENT STANDARDS

This division has the administrative responsibility of equalizing the assessment of local property between counties. To fulfill this responsibility the division is required to issue cost and other appraisal data to the county assessors, to prepare maps to county use and in general to assist the county assessors in the performance of their duties.

Analysis

The additional $375,995 for the 1957-58 Fiscal Year provides for 27 positions for the sample appraisals required by Section 1831 of the Revenue and Taxation Code, and 21 positions for assistance to county assessors.

Assessment Equalization

VALUATION DIVISION

This division administers the assessment of the public utility properties in the State.

Analysis

The additional $44,446 for 1957-58 provides 7 additional positions to process an increased number of tax district boundary changes, and to reduce the period during which a complete inspection of all state-assessed property is made.

RETAIL SALES TAX DIVISION

This division administers the State and Uniform Local Sales and Use Tax Acts.

Analysis

The $796,488 increase in gross expenditures provides approximately $111,000 for 20 field auditors to audit a larger number of sal tax accounts. Most of the remaining $796,000 is for 46 proposed new positions (10 temporary), and the complete year cost of 1 positions established in the current year, for the Uniform Local Sales and Use Tax Program created by Chapter 1311, Statutes 1955. This program is completely reimbursed by the counties and cities that conform to the provisions of Chapter 1311.

Division of Highway Taxes

MOTOR VEHICLE TRANSPORTATION TAX, ITINERANT MERCHANTS, AND MOTOR VEHICLE FUEL FUNDS

This division administers the Motor Transportation License Tax Act, the Itinerant Merchants Act, assesses the motor vehicle fuel tax and liquefied petroleum taxes, and assesses and collects the use fuel tax.

Analysis

The additional $57,537 for the 1957-58 Fiscal Year provides for 8 new field positions for audit and investigation of an increased number of fuel tax licensees, and to permit better coverage of all tax accounts. It will be necessary to replace a higher percentage of the division's automobile fleet at a cost of $29,300, compared to the $11,200 to be expended this year.

GENERAL ANALYSIS

Number of positions	*1,370.1*	*1,504.2*	*1,545.4*	*41.2*

The total expenditure program for support and other current expenses in 1957-58 is $318,977 more than 1956-57. The increase is primarily the result of increased work load in the various divisions requiring additional staffing; an increase in the estimated portion of the General Fund's share of the cost of insuring the State's liability in connection with automobile accidents and increased cost of existing positions.

The major increases are summarized as follows:

	No. of positions	*Amount*
New positions for increased work load in the various divisions	21	$94,824
Staffing new facilities (partial-year cost)	20	32,789
Full-year maintenance costs for buildings completed in the current year	–	38,165
Increase in automobile liability insurance	–	39,623

EXECUTIVE OFFICE

This unit is composed of the offices of the director, the administrative adviser, the insurance adviser, the investment adviser, and the local planning consultant. The local planning office was created by Chapter 33, Statutes of 1956 (First Extraordinary Session). The operating expenses and equipment of these offices has been included in the budget of the Administration Division.

Analysis

1 new position is proposed for the office of the investment adviser on a work load basis.

ADMINISTRATION DIVISION

This division is the department service division including departmental accounting, budgeting, personnel, and procurement. In addition the division performs office space planning services, automotive management and traffic management control for all stat agencies.

Analysis

Personnel officer I

This position will provide staff assistance in performing the personnel administration for the department.

Junior architectural draftsman

This position is to assist with office space planning for both state-owned and leased buildings. The detail programming of th office building construction program authorized by the Legislature in 1955 has added materially to the work load of the spac utilization section. This position will relieve presently authorized personnel of details in order to speed the completion o these projects.

AUDITS DIVISION

This division performs the internal audit functions; its staff examines the accounts of every state agency, reports any irregularit or unsound practices, and makes recommendations for improvements. The division also makes special audits upon request a authorizes destruction of old records.

Analysis

The budget proposes a continuation of the current level of service.

BUDGET DIVISION

The service and control functions affecting budgetary activities in all state agencies are performed by this division. The division prepares and controls the annual State Budget. State agency detailed estimates of its proposed expenditures and anticipated revenues for the coming fiscal year are analyzed by the division staff in terms of policies set by the Governor and the Director of Finance in the Governor's Budget. After legislative action on the budget, this division controls agency expenditures through continuous review and approval of each agency's financial operations.

Another unit of the division studies economic and population trends, and estimates revenues and expenditures for long-range financial planning.

Analysis

The budget proposes a continuation of the current level of service.

BUILDINGS AND GROUNDS DIVISION

The division maintains state-owned and leased buildings and grounds in Sacramento, San Francisco and Los Angeles areas.

Analysis

The proposed increase in the budget is made up primarily of the following:

1. Full-year occupancy of new facilities (Veterans' Building) as compared to part-year costs during the 1956-57 Fiscal Year (reimbursable)	$38,165
2. 20 new positions for the new Department of Employment Building in Los Angeles expected to be occupied about February, 1958 (reimbursable)	32,789
3. 6 new positions: 4 in Sacramento, 2 to meet increased work load of the maintenance staff, 1 for increased work load in the typewriter preventive maintenance program and 1 for the operation of additional telephone switchboards; 2 in Los Angeles, 1 to provide vacation and sick leave relief for the stationary engineers and 1 for increased work load of the maintenance staff	25,272

COMMUNICATIONS DIVISION

Under the policy guidance of the Communications Advisory Board, this division performs technical services to achieve an effect system of communications for the State Government and its political subdivisions. It performs communication engineering servi for state agencies, and assists in solving technical problems relating to publicly owned radio, telephone, and teletype syste It makes recommendations concerning communications systems to state and local authorities.

Analysis

The budget proposes a continuation of the current level of service.

FAIRS AND EXPOSITIONS DIVISION

This division exercises general supervision over the district, county, and citrus fairs, prepares a master premium list, approves premium lists and operating budgets of the fairs. Prepares claims for distribution of funds appropriated from the Fair and Exposition Fund and recommends allocations for Capital Outlay.

Analysis

1 additional full-time position is provided for increased clerical work load and is partially offset by a reduction in temporary help which was used previously.

DEPARTMENT OF FINANCE—Continued

LOCAL ALLOCATIONS DIVISION

This division is responsible for the administration of programs involving the allocation of funds to local agencies. These include allocations from the General Fund, the Postwar Unemployment and Construction Fund, and the State School Building Aid Fund. In addition, the division is responsible for the supervision of the Veterans' Housing Program.

Analysis

8 additional positions are proposed based on increased work load in school building aid operations. Application receipts in the 1955-56 Fiscal Year rose to nearly double the volume anticipated and give every indication of continuing at the increased level through the 1956-57 and the 1957-58 Fiscal Years. The effect on the work load of the division from a sustained higher level of application inflow is not completely realized for about 3 years, the normal period for an application processing cycle from initial receipt to final financial adjustments on the completed project. Work load requirements will, therefore, be on a rising trend through 1957-58. The increased work load has already required the following emergency adjustments: (1) augmentation of staff by 5 positions in the 1956-57 Fiscal Year, (2) postponement of a portion of the work load to later periods, and (3) reduction of time requirements for certain processing operations. The tabulation below shows the estimated percentage of work load time which will be devoted to programs supported by the following funds:

Fund	*1956-57 Percent*	*1957-58 Percent*
General Fund	3.9	2.6
Postwar Unemployment and Construction Fund	3.5	2.4
State School Building Aid Fund	92.6	95

ORGANIZATION AND COST CONTROL DIVISION

Provides assistance to departments and agencies of State Government in the development and application of sound management; in the preparation and installation of plans of organization; in improving methods, procedures and performance standards; in gathering and providing general management information related to management problems; in conducting studies on specific management and administrative problems.

Analysis

The division was created by Chapter 1857, Statutes of 1955. The staff for this division has been drawn from the Management Analysis Section of the Budget Division and from the Merit Award Board Unit in the Administration Division. The deputy director is chief of this division.

PROPERTY ACQUISITION DIVISION

This division serves as the central procurement and management agency for real estate transactions of the department. It also performs administrative services to the State Public Works Board.

Analysis

The budget proposes a continuation of the current level of service.

PURCHASING DIVISION

Supplies and equipment required by all state agencies except the University of California are procured through the State's system of centralized purchasing administered by this division.

Analysis

3 additional positions are proposed for added work load in the branch offices and are partially offset by the elimination of 1 position in the Sacramento office. The new positions are made necessary as the result of an increase of 33⅓ percent in work load in the branch offices due to administrative changes in flow of work to these offices. Also, as a result of statute changes, work load for bid and price requests have increased.

MAINTENANCE AND OPERATION OF PROPERTY ACQUIRED FOR BUILDING SITES

Analysis

This amount is for the management of property acquired under provisions of the Property Acquisition Law until such time as the property is required for actual construction. The revenue received for rental is used to support the operations of this function.

GENERAL ANALYSIS

Number of positions	*76*	*74.9*	*76.9*	*2*

A 12-day fair is proposed for 1957-58. The increase of approximately $40,000 in this budget is partially offset by a $26,000 increase in revenues estimated for the 1957-58 Fiscal Year.

The 2 additional half-time positions requested have been completely offset by a decrease in temporary help.

With the exception of $12,500 provided for a sew-it-yourself contest provision has been made to continue the same fair program level which is currently authorized. $30,000 is provided for newspaper, radio, and television advertising in the South California area, of which, $20,000 is for continuation of the currently budgeted amount for newspaper advertising.

GENERAL ANALYSIS

Number of positions	*26.4*	*28.9*	*28.9*	–

The increase in the proposed budget results principally from the inclusion of full-year staffing, maintenance and exhibit costs for new facilities to be completed and opened to the public during the current fiscal year; $2,000 for the establishment of a new service of museum tours for the benefit of school classes and the general public visiting the museum; and $3,500 to replace obsolete duplicating equipment and a museum directory.

GENERAL ANALYSIS

Number of positions	78.2	93	91	—2

Generally the budget proposes to continue the same level of service as previously authorized. During the current year 8 positions and related expenses were added to administer the operations of the City of Long Beach tideland oil fields as authorized by Chapter 29, Statutes of 1956 (First Extraordinary Session).

In addition to the continuation of the 8 positions authorized in the current year, 1 new position is provided in the budget year to meet the increased work load resulting from subsidence remedial work projects undertaken by the City of Long Beach and an item of $27,000 is included for completion of indexing state lands under jurisdiction of the United States. The budget also reflects the reduction of 3 reimbursable positions as a result of the estimated completion of special surveys of granted lands under the provisions of Chapters 1939, 647, and 413, Statutes of 1955.

ADMINISTRATION DIVISION

In addition to the general administration of the state income and franchise tax programs, this division includes the agency's sta functions of accounting, statistical, collection, legal, and special investigation.

Analysis

The $91,240 increase for 1957-58 over 1956-57 provides for 17 additional man-years of personnel, and for expenses required by rel cation of the agency's Sacramento office.

14 of the additional positions (10 permanent and 4 temporary) are required in the Accounting and Collection Divisions to servi the added work discussed in the analysis under Operations. 1 position is needed for 1 year to eliminate confidential materi from accumulated legal memoranda so that they may be published and distributed to interested professional groups. Two pos tions will permit the agency to expand its investigation of illegal activities as required by the Personal Income Tax and Ban and Corporation Tax Laws.

OPERATIONS

The agency's line functions including the clerical processing of tax returns and related reports, desk and field auditing, and field collection of delinquent taxes, as required by the Personal Income and Bank and Corporation Tax Laws.

Analysis

The $274,007 increase for 1957-58 over 1956-57 provides principally for continuation of the agency's project of comparing federal and state income tax returns; for 12 permanent positions and 28.4 temporary help man-years to process additional tax returns; and 2 positions for clerical services in the agency's 2 out-of-state offices.

The agency's current 3-year project of comparing 1951 and 1952 income year federal and state income tax returns will terminate June 30, 1957. This program has been worthwhile both in terms of additional revenue and obtaining compliance. Tests of a subsequent year indicate that this project should be continued for at least three more years.

In 1952, 57,000 corporations were required to file corporation tax returns. Currently there are 90,000 such corporations, and in excess of 100,000 are anticipated by June 30, 1958. The additional positions proposed for 1957-58 (3 permanent and 1.7 man-years of temporary help) provide a lower rate of increase in clerical personnel than the expected increase in returns filed.

There is a continuing growth in the volume of income tax returns received. It is anticipated that 4,100,000 will be processed in 1957-58, or 60 percent more than the 2,610,000 returns processed in 1953-54. During the same period it is proposed to increase the clerical staff from 296 man-years to 390 man-years, or approximately a 30 percent increase. In 1953-54, the Personal Income Tax Law required a staff of 69 auditors. It is proposed to increase this staff to 78, or an increase of 13 percent.

GENERAL ANALYSIS

Number of positions	*37.8*	*40*	*42*	2

The $18,584 increase provides for the following significant changes in the State Treasurer's program for the 1957-58 Fiscal Year:

1. Increased investment activity created by the Pooled Money Investment Law—1 assistant treasury deposit officer	$6,000
2. Increased number of maturing state-sold bonds and coupons, 1 intermediate-clerk and additional fiscal agency fees	25,000
3. Reduction in equipment due principally to the purchase of $32,500 worth of storage facilities for securities during the current year	—20,000

GENERAL ANALYSIS

Number of positions	*2,328.5*	*2,780*	*3,070*	*290*

The principal changes from the current fiscal year are the proposed increase of 270 positions in the uniformed strength of the Highway Patrol to provide a more adequate degree of enforcement and the addition of supporting personnel and equipment for more effective operations. In addition to the increase in the uniformed strength proposed for the 1957-58 Fiscal Year provision has been made for 110 additional uniformed positions to be established March 1, 1957, in order to cope with the increase in traffic accidents on the highways.

ADMINISTRATION

This function includes the office of the commissioner and the following staff sections: general administration, accounting, personnel, office services, facilities, motor transport, and stores and equipment.

Analysis

1 additional position is proposed to provide stenographic assistance to the captain and the inspector assigned to the commissioner's office. 4 additional positions are provided on the basis of increased work load and are to be assigned as follows: 2 for the accounting section, 1 for the personnel section, and 1 for the stores and equipment section.

FIELD OPERATIONS

This function includes all field personnel, field office operation, and the Los Angeles headquarters.

Analysis

To achieve more adequate policing of the highways, 10 additional traffic sergeants, 15 additional lieutenants, and 245 additional traffic officer positions are proposed. These positions together with related operating expenses and equipment comprise the bulk of the increase. 6 automotive servicemen positions are proposed in conjunction with the increasing number of automobiles while the 4 dispatcher-clerk positions are necessary to handle increased enforcement activities. The remaining positions are recommended to take care of janitorial work.

Provision is made for 14 radar units to be used to determine the validity of complaints of excessive speed near schools and intersections. They will also be used to monitor traffic flow. In addition to the 270 uniformed positions provided for in the 1957-58 Fiscal Year and to increase the strength of the Highway Patrol as soon as possible, provision has been made in the 1956-57 Fiscal Year for an additional 100 traffic officers and 10 traffic sergeants. These positions, to be established March 1, 1957, are required as a part of the program to reduce the number of accidents on the highways.

LAND AND BUILDINGS

This function includes rentals and maintenance, and repairs of headquarters and field offices.

Analysis

The major item of increase results from higher field office rentals due to renewal of leases and additional offices.

DEPARTMENT OF INDUSTRIAL RELATIONS

he department administers the state laws relative to labor through its 9 divisions. In general, it is the duty of the department to foster, promote, and develop the welfare of the wage earners of California; to improve their work conditions; and to advance their opportunities for profitable employment.

DIVISION OF ADMINISTRATION

The Division of Administration is composed of the director's office, the supervisor of industrial accident self-insurance plans, the personnel section, accounting section, offices services section and fiscal management.

Analysis

This division was reorganized during the current fiscal year. The confidential assistant to the director, an existing position, assumed the direction of the division which includes the fiscal responsibility and was reclassified as an administrative services officer. The accounting officer III position was reclassified to a personnel officer I. This latter position is shown as a proposed new position in the budget year for reporting purposes and approval by the Legislature. A graphic artist is proposed to assist the various divisions in preparing publications and other data for the dissemination of information. The clerical position is for the personnel office and is related to increased personnel in this budget.

The primary increase in departmental operating expenses is for rental of office space ($115,000) and is entirely related to housing the new personnel provided throughout the budget.

SALARIES AND WAGES				SALARY RANGE		
Director	1	1	1	$15,000	$15,000	$15,000
Administrative service officer II	0.2	1	1	710–862	8,555	8,977

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF CONCILIATION

The functions of this unit consist of the investigation, mediation, conciliation, and arbitration of labor disputes, the selection of arbitration boards, and the prevention of work stoppages.

Analysis

Two additional conciliators will be required to assist employers and employees in solving labor-management disputes. An estimated case load of 630 disputes in 1957-58 will maintain the existing work load of 70 cases per conciliator. The clerical position is required to assist the 2 conciliator positions.

DIVISION OF INDUSTRIAL ACCIDENTS

The Industrial Accident Commission is responsible for the adjudication of cases arising under the Workmen's Compensation Law.

Analysis

The additional personnel in this budget, consisting of 20 referee teams of 4 persons each, will reduce the backlog of pending cases and thereby reduce the elapsed time between the filing of an application and issuance of a decision. Because a new referee cannot produce to full capacity for approximately 2 years, this increase will not produce its full effect until June, 1959. The following table indicates the extent of new filings, decisions, and cases pending during the next 2 years.

FISCAL YEAR	DECISIONS RENDERED BY EXISTING REFEREES	PROPOSED NEW REFEREES	TOTAL	NEW FILINGS	CASES PENDING END OF FISCAL YEAR
1955-56	35,267	–	35,267	35,230	9,180
1956-57	36,100	–	36,100	37,696	10,776
1957-58	36,400	7,000	43,400	40,162	7,538
1958-59	36,400	10,000	46,400	42,973	4,111

5,000 cases are considered a normal carry-over from one year to the next for this operation. The projection assumes a 7 percent annual increase in filings.

4 hearing reporters, in addition to 1 for each referee, are provided to prepare transcripts when requested. This work has been done by the unit hearing reporters to the detriment of the continuing work load. An additional 3 stenographers are also provided to establish stenographic pools in the largest offices to act as relief to prevent the enforced idleness of a referee during the absence of his regular stenographer.

DIVISION OF INDUSTRIAL ACCIDENTS—Continued

Analysis—Continued

Supporting staff of 4 medical examiners, 4 permanent disability rating specialists, and 4 clerks are provided in ratio to the numb of referee units added.

2 clerks are provided to purge case folders in accordance with the Legislative Auditor's recommendations of 1955.

2 associate counsels and 2 legal stenographers are added to handle the increased number of appeals and to meet the deadlin prescribed by the superior courts.

Also included in this budget are provisions for additional branch offices at locations which now appear to warrant the full time of referee. These locations include San Jose, Redding, Van Nuys, and Santa Ana.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 55-56 (Filled)	56-57 (Auth.)	57-58 (Auth.)	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

DIVISION OF INDUSTRIAL SAFETY

The Division of Industrial Safety is vested with supervisory and jurisdictional responsibilities necessary for the protection of employees from injuries connected with or arising out of their employment. The division administers laws pertaining to safety, issues safety orders, investigates and studies causes of industrial injuries, prepares and distributes information on prevention of accidents, and makes inspections of places of employment for compliance with minimum standards for safety.

Analysis

Based on estimated increases in work load of this division 17 professional and 6 clerical positions are provided to maintain the present case load. The distribution of the professional staff is as follows:

2 boiler safety engineers are provided to maintain the inspection program of boilers, air tanks, and liquid petroleum gas tanks as required by law. 3 industrial safety engineers are included to provide a minimum level of inspection in manufacturing, lumbering, and sawmill operations, and 12 construction engineers are provided to halt the rapidly increasing injury and death rate to employees on construction projects. The 6 typists are included as supporting staff for the 17 additional engineers. The work load per engineer will not be affected by the addition of these positions.

DIVISION OF INDUSTRIAL WELFARE

The Division of Industrial Welfare has 5 major functions as follows: (1) enforcement of 11 industry orders regulating the minimum wages, maximum hours and working conditions of women and minors; (2) enforcement of Labor Code sections concerning the Eight-hour Law for Women, weight lifting restrictions, seating requirements, and equal pay; (3) licensing and regulating industrial homework; (4) enforcement of a prohibitory order restricting garment manufacturing in homes; (5) issuance of permits for a special minimum wage, permits for exemptions from certain provisions of the orders and investigation as prerequisite to the issuance by the Governor of defense production permits.

Enforcement is achieved by: (1) investigations of complaints by hearings or inspections; (2) regular field inspections to prevent violations; (3) legal action through the prosecuting attorney's office or justice of the peace courts; (4) processing of requests for permits by field investigation.

Analysis

An area supervisor is proposed to afford administrative direction of the work of 13 agents and 1 pay roll auditor in 8 branch offices in Northern California. 1 additional agent is included for Eureka, which, due to geographical isolation, and lack of division staff, has had very little service in the field of hours and working conditions for employed women. 1 agent is needed in Los Angeles to review increased activities in connection with the Industrial Homework Act and the processing of defense products permits. 3 clerks are included as supporting staff for the additional supervisor and agents and 1 stenographer is proposed for San Diego, where the clerical load has exceeded the limits of the existing staff.

Provision is made for the review of 1 wage order in the field of food preparation and preservation which has been requested by the industry. The printing of the 12 orders reviewed in 1956-57 is included in the 1957-58 Fiscal Year.

DIVISION OF LABOR LAW ENFORCEMENT

The Division of Labor Law Enforcement is responsible for the administration and enforcement of labor laws not specifically under the jurisdiction of other state agencies. Among these are laws relating to payment of wages, child labor laws, laws regulating private employment agencies, and laws relating to ventilation and sanitary conditions of places of employment, Weekly Day of Rest Law, and Public Works Law.

Analysis

This budget provides for an additional deputy and clerk each in San Bernardino and Bakersfield based on the existing complaint load.

2 special investigators and stenographers are proposed for the Long Beach-Los Angeles area for the inspection of public works projects, produce markets, employment agencies, and farm labor contractors.

This budget also includes provisions for an office in Redding, which would be staffed by a deputy and a senior stenographer-clerk. This area, currently served from the Sacramento office, now has a sufficient complaint load to warrant a full-time deputy.

Another supervisor is added so as to divide the central valley into 2 areas.

This division has developed to such a size, 16 branch offices and 132 employees, that relief for the division chief and assistant labor commissioner is considered necessary. To this end an administrative assistant is added.

DIVISION OF APPRENTICESHIP STANDARDS

The establishment and functioning of the Division of Apprenticeship Standards is provided by the Shelley-Maloney Apprenticeship Labor Standards Act of 1939. This act creates an Apprenticeship Council, which includes the Director of Industrial Relations as an ex officio officer, and provides that the council will establish standards for minimum wages, maximum hours, working conditions of apprentices; and advance their opportunities for profitable employment.

Analysis

This budget reflects a major increase in the number of indentured apprentices and accompanying registrations, completions, and cancellations. Under a formula computation with estimated work load, provision is made for 6 additional apprenticeship consultants and 3 clerks as supporting staff. No program change is reflected in this increase. With this increase in field consultants it will be necessary to provide additional supervision in Southern California. Provision is made for an additional area supervisor and stenographer-clerk in this area.

DIVISION OF HOUSING

The work of this division includes the administration and enforcement of laws relating to hotels, apartment houses, dwellings, auto courts, resorts, motels, and labor and trailer camps. The division disseminates information regarding housing and construction to owners, architects, builders, and the general public and also investigates reports of substandard housing conditions throughout the State.

Analysis

To provide 100 percent inspection of the estimated 7,750 labor camps and to provide a second inspection to one-half of that number that experience has shown will have major deficiencies, 5 housing representatives have been added to this budget. The allowance of 2.6 hours per inspection represents no work load change in inspection of employee housing. This additional staff provides for no increase in the number of inspections and consultations relative to the other activities of the division. With the increase in staff it will be necessary to provide an additional supervisor and clerical assistance.

DIVISION OF LABOR STATISTICS AND RESEARCH

This division collects and compiles facts and statistics relative to the condition of labor in the State; publishes monthly statistic of employment, and, in cooperation with the Department of Employment, prepares monthly estimates and forecasts on civilian employment and unemployment within the State. It works in conjunction with other state agencies and the U. S. Departmen of Labor-Bureau of Labor Statistics in the collection and presentation of this data. The division makes studies and investiga tions in the field of industrial relations. It compiles statistics of industrial accidents for use in accident prevention work. All new factories are required by law to be registered with the division.

Analysis

1 technician and 3 clerks are included in this budget to carry on a cooperative program with the Federal Government to provid adequate, reliable, and current labor statistics information. These positions will be authorized only to the extent that an equa number of positions are provided by the Federal Government.

In the field of work injuries 1 technician and 1 clerk will provide a finer breakdown as to type and location of injuries in a selecte few high accident rate industries. A sample survey indicates this expenditure can make the industrial safety program mor effective.

2 technicians and 3 clerks are added to develop statistics which will accurately depict the general pattern of hours, earnings, rates of pay and related data for women and minors in industry. Among other uses this will provide the Industrial Welfare Commission with reliable data for use when old industry orders are reviewed or when new ones are promulgated.

With this increase in division activities an additional clerk in the clerical pool will be necessary to handle mail, correspondence files, and related matter.

OFFICE OF FIRE MARSHAL—Continued

EXPENDITURES

GENERAL ANALYSIS—Continued

EQUIPMENT: Increase of $1,664. The budget provides for photocopy machines in each office, dictating equipment for the branc offices, replacement of 4 automobiles and other small equipment.

REIMBURSEMENTS: Increase of $11,223. The increase is composed of a reduction of $10,000 in services rendered to the Boai of Dry Cleaners and the establishment of a new charge for services rendered to the Division of Architecture for examining scho building plans. This new reimbursement is in lieu of making a direct appropriation from the Division of Architecture Publ School Building Fund.

A reduction of $47,500 during the current year in the amount payable from the Division of Architecture Public Building Fund the result of an Attorney General's opinion that the Fire Marshal cannot charge that fund for inspecting schools already buil

The following is a functional analysis of the agency's expenditures for comparative years:

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
GENERAL ANALYSIS				
Number of positions	*604.9*	*662.4*	*734.9*	*72.5*

The budget as proposed includes additional legal and stenographic assistance in the Division of Civil Law and the Bureau of Criminal Law to meet increases in the number of cases filed. Additional positions have been provided in the Bureau of Criminal Identification and Investigation in order to keep abreast of a continually increasing work load.

Provision has also been made for the establishment of a Bureau of Narcotic Enforcement office in San Diego.

Additional positions have been included in the budget to provide for a reorganization and expansion of the activities of the Bureau of Criminal Statistics.

DIVISION OF GENERAL ADMINISTRATION

Includes the Office of the Attorney General, the accounting and personnel sections, the stenographic pool, the teletype system, and other service functions.

Analysis

12 legal stenographer positions are included, 7 of which are necessary because of the additional attorneys and investigators proposed in this budget and 5 to provide full-time stenographic assistance to attorneys with heavier assignments or those serving as section heads. 2 additional positions are required in the legal divisions due to increases in clerical work. An additional position is included for the accounting office because of increases in the number of claims, invoices and purchase estimates, and 2 additional positions are required in the teletype section due to increases in message traffic.

DIVISION OF CIVIL LAW

Renders legal services to other state agencies, represents the State in civil litigation and provides assistance to local jurisdictions.

Analysis

4 additional attorneys and 3 additional special investigators are proposed, the former to meet increases in cases filed and the latter to properly investigate claims against the Subsequent Injury Fund.

Bureau of Criminal Statistics

This bureau compiles and analyzes data relative to correctional institutions, paroles, crimes, arrests, and disposition of cases by superior courts.

Analysis

5 new positions are required to carry on activities at the presently authorized level. 4 positions are necessary to reorganize the bureau so that additional analyses and studies can be made in connection with statistics collected from local governments. These positions will not be established unless fully justified by the results of an organizational study. 7 positions are included to establish a research unit in connection with special studies for the Department of Corrections and the Youth Authority.

DIVISION OF CRIMINAL LAW AND ENFORCEMENT—Continued

Bureau of Criminal Identification and Investigation

This bureau maintains central files of fingerprints, modus operandi, crime records of felons, registrations of sex offenders, and furnishes information contained in such files to law enforcement agencies; provides expert, technical assistance to local law enforcement agencies through the staff of investigators and criminologists; and renders assistance to local law enforcement agencies in the specialized fields of questioned document examinations and polygraph (lie detector) operation.

Analysis

Based upon current experience and the projection of recent trends, the volume of work in this bureau will require 24 additional positions: 4 in the fingerprint section; 12 in the special services section; 7 for the record section; and 1 clerk for the laboratory.

Bureau of Narcotic Enforcement

This bureau is responsible for the enforcement of the provisions of the State Narcotics Act governing the use, sale, possession, or transportation of narcotics and harmful drugs.

Analysis

3 inspectors and 1 clerk are proposed to staff a new office to be established in San Diego. and 2 inspectors are proposed for the Los Angeles office to augment the current program to provide adequate narcotics enforcement. 1 position is proposed to provide clerical relief for the San Francisco office. It is proposed that an existing half-time position in the Sacramento office be increased to full time to provide needed clerical assistance.

Fees to special counsel				$221	$2,500	$2,500

SERVICES RENDERED COLORADO RIVER BOARD

This function renders necessary legal services in clarification of the water rights in the Colorado River.

Analysis

Hearings before the special master appointed by the Supreme Court commenced during the 1956-57 Fiscal Year in San Francisco. As a result of the experience gained during the months of July and August, it has been necessary to increase the current fiscal year budget, and a deficiency appropriation in the amount of $252,223 is proposed to finance the additional cost. It is expected that the accelerated rate of expenditure will continue during the 1957-58 Fiscal Year.

[b] Both mental ill and mental retarded cared for in these hospitals.

DEPARTMENT OF MENTAL HYGIENE—Continued

GENERAL ANALYSIS

The activities of Department of Mental Hygiene are functionally grouped as follows:

A. DEPARTMENTAL ADMINISTRATION. The department carries on the activities of general direction of the hospitals, clinics, special programs, collection activities, deportations and transfers, guardianships, statistics, food administration, nursing service, maintenance service, community services, and private institution inspections.

B. RESEARCH, TEACHING, AND CLINICAL FACILITIES. This group includes the Langley Porter Clinic at the University of California, School of Medicine at San Francisco and the Neuropsychiatric Institute at the University of California at Los Angeles, School of Medicine, which are hospitals and clinics for treatment of early curable types of mental disorders and centers for teaching and research. This group also includes the outpatient clinic program embracing clinics headquartered in the Cities of Los Angeles, San Diego, Fresno, Sacramento, Berkeley, Riverside, and Chico.

C. STATE HOSPITALS FOR MENTAL ILL AND MENTAL RETARDED. This Group Includes the Following:
- 8 State Hospitals for the Care of Mental Ill Patients:
  Agnews, Atascadero, Camarillo, Mendocino, Metropolitan, Napa, Patton, and Stockton.
- 4 State Hospitals for the Care of Mental Retarded Patients:
  Fairview, Pacific, Porterville, and Sonoma.
- 2 State Hospitals for the Care of Both Mental Ill and Mental Retarded Patients:
  DeWitt and Modesto.

Treatment and care are provided at these hospitals for the mental ill, mental retarded, alcoholics, narcotic addicts, sexual psychopaths, and retarded and psychopathic delinquents with emphasis being on treatment centers rather than custodial institutions.

MAJOR PROGRAM AUGMENTATIONS AND COSTS

The following summary by program accounts for the greater part of the proposed increase of $7,931,148 (9.4 percent) over the 1956-57 expenditures. These increases provide the work load adjustments required to meet population and price changes at presently recognized standards of staffing and supply; they provide also for improvements in the level of service.

Additional personnel (other than nursing) for staffing new facilities:		
a. The new Fairview State Hospital (30)	$101,344	
b. The 1,600 beds, 16 wards at Metropolitan (11)	26,680	
c. The 700 beds, 6 wards at Sonoma (5)	13,206	
		$141,230
Additional personnel (other than nursing) for population growth and special programs (117)		369,432
Increase in operating expense and equipment:		
a. Increases primarily for feeding, clothing, housekeeping, regular medical supplies, and new special drugs to meet price and population changes	$861,829	
b. Increases due primarily to expansion of Langley Porter Clinic and Neuropsychiatric Institute, and for administration	103,338	
c. Increase in equipment	116,922	
		1,082,089
Additional nursing personnel:		
a. To provide for staffing of new facilities and for hospital ward reclassification resulting from changes in types of patients and prescribed treatment (498)	$382,424	
b. For increased and improved ward coverage representing 4½ percent additional nursing personnel throughout the hospitals (515)	1,414,191	
		1,796,615
Net increased cost in authorized positions due to improved employment conditions and salary changes as adjusted by salary savings		895,702
Additional positions including psychiatrists, psychologists, anesthetists, laboratory technicians, physical and rehabilitation therapists, public health nurses, food service personnel, hospital social workers, and field social workers (452)		1,934,874
Staff for strengthening the administration of the hospitals (30)		290,164
Establishment of after-care facilities at 3 hospitals (24)		173,880
Increase the staffing for Neuropsychiatric Institute and Langley Porter Clinic (55.2)		267,093
Additional departmental and central office personnel (36)		167,334
Additional funds for expansion of family care program		117,316
Establishment of fund for specific research projects		200,000
Increase in contributions to State Employees' Retirement Fund		488,935

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL RETARDED

NEW POSITIONS

The following 1,682 new positions totaling $4,706,195 for the mental ill and mental retarded hospitals, although included in the various hospital budgets, represent standard classes used at all of the mental hospitals and are, therefore, discussed functionally as groups as well as individually under each hospital. Operating expenses and equipment are discussed only under each individual hospital.

Nursing Personnel

WARD STAFFING

52	Senior psychiatric nurse	$72,648
19	Psychiatric nurse	30,788
891	Psychiatric technician trainee	1,665,099
962	Total	$1,768,535

This budget includes additional ward staffing to correspond with anticipated work load increases, and also provides a moderate improvement in the department-wide level of service. 16 new wards at Metropolitan and 6 new wards at Sonoma will be activated in July, 1958. Staffing of these new units on a staggered basis starting in February, 1958, and adjustments for ward classification and overcrowding changes requires a net total of 447 additional positions at the currently authorized staffing level by type of patient. In addition, 515 new positions are provided to improve the direct nursing care of mental ill and mental retarded patients in our state hospitals. The distribution of positions is indicated in the following schedule:

NURSING PERSONNEL—WARD STAFFING

SCHEDULE OF ADDITIONAL POSITIONS PROPOSED FOR NEW AND EXISTING FACILITIES (EXCEPT FAIRVIEW)

Hospital	NEW 1957-58 FACILITIES				Adjustments for ward classification changes and overcrowding at the authorized state-wide level of service	Total additional positions to continue authorized level of service	Additional positions proposed for improved service	Total additional positions proposed	New facility estimated date of occupancy

HOSPITAL NURSING ADMINISTRATION

3 Assistant superintendent of nursing services (psychiatric technician) $15,696

To provide assistance to the superintendent of nursing services at Camarillo for planning and directing hospital nursing services, by providing 2 employees on duty during the daily peak activity periods.

AREA SUPERVISION

4 Supervising psychiatric nurse 18,960

To meet the additional work loads and problems of the nursing areas at the hospitals with juvenile and tuberculosis units. 1 position each at Napa and Patton for the tuberculosis units and 1 position each at Camarillo and Napa for the juvenile units.

5 Supervising psychiatric technician 11,280

Positions are required for supervision of a new nursing area at Metropolitan. This additional area relates to the activation of new wards and increasing the capacity of the hospital.

Medical and Laboratory Personnel

40 Psychiatrist II 456,000

40 new positions together with 3 net presently authorized positions are provided in order to raise the level of care and treatment accorded patients. The 43 positions will provide a 10 percent increase in level of service. It is considered desirable to provide additional doctors in order to effect a significant improvement in the treatment program. The net 3 authorized positions are available for an improvement in service as a result of population estimate adjustments.

6 Clinical psychologist II 38,160

6 additional positions together with 3 presently authorized positions are provided in order to increase the level of service in this phase of the treatment program by 5 percent. This increase is considered essential in conjunction with other proposed increases in the treatment program to maintain a balanced treatment team. The 3 authorized positions are available for an improvement in service as a result of population estimate adjustments.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL RETARDED—Continued

NEW POSITIONS—Continued

Medical and Laboratory Personnel—Continued

10 Nurse-anesthetist — $52,320

10 new positions of nurse-anesthetist to meet the needs of the surgical and dental treatment programs. The positions will be used to administer anesthetics, supervise and assist in the immediate postoperative care of patients, and help with preoperative examinations.

3 Clinical laboratory technician — 13,212

3 clinical laboratory technician positions are provided to increase hospital laboratory staffing to 90 percent of the department's goal for mental ill patients. These 3 positions, which are established on a position to hospital population ratio, are for Metropolitan, DeWitt, and Modesto.

1 X-ray technician — 3,810

1 X-ray technician position is provided to meet the increased work load at Napa required by the activation of the new T. B. center.

5 Psychiatric technician — 16,470

5 additional positions are proposed to assist the chiropodist at those hospitals which do not now have an assistant. This position is used to schedule patients for treatment, maintaining treatment records, preparing patients for and giving actual assistance in the treatment process. The 5 technicians are for Camarillo, DeWitt, Mendocino, Modesto, and Porterville.

3 Public health nurse — 14,940

1 public health nurse for each of the 3 hospitals for mental retarded patients is proposed to perform public health nursing services. They will assist with the prevention and control of communicable diseases, carry out epidemiological investigations, detect and correct public health hazards, and give instructions in public health procedures.

Other Treatment Personnel

15	Recreation therapist	$64,440
14	Occupational therapist I	60,144
1	Industrial therapist	4,296
30	Total	$128,880

30 additional therapist positions together with 6 presently authorized therapist positions are proposed to provide an 8 per cent improvement in the level of this service. In working directly with patients through supervision of various activities, and in training nursing personnel to carry on some activities on the wards, the rehabilitation therapist performs an important function in the departmental treatment program. An increase in the rehabilitation therapy activity is considered necessary to provide a balanced treatment program. The 6 authorized positions are available for an improvement in service as a result of population estimate adjustments.

2 Physical therapist I — 9,384

2 additional positions are required for the physical therapy phase of the treatment program, consisting of hydrotherapy treatments, electrotherapy, diathermy, light therapy, ultrasonic, active, passive and resistive therapeutic exercises. 1 position is for Atascadero for the establishment of this phase, and the other position is for DeWitt to meet existing work load.

2	Supervising psychiatric social worker	11,544
29	Senior psychiatric social worker	151,728
31	Total	$163,272

31 additional positions together with 3 net presently authorized psychiatric social worker positions are proposed to provide an improvement in the staffing of this activity. Social workers at the hospitals obtain information for medical use from relatives, help patients with family problems, and work closely with the doctors in regard to releasing and placing patients. The net 3 authorized positions are available for an improvement in service as a result of population estimate adjustments.

After-care Facilities

3	Psychiatrist III	$39,600
6	Psychiatrist II	68,400
3	Clinical Psychologist II	19,080
3	Senior psychiatric social worker	15,696
9	Intermediate stenographer-clerk	31,104
24	Totals	$173,880

The 24 proposed positions represent the establishment of 3 after-care facilities to be located at Pacific, Metropolitan and Stockton. The after-care facilities are needed as an integral part of a complete and fully balanced treatment program. The facilities will provide necessary psychiatric, medical, and therapy treatment at periodic intervals as necessary to patients who could be placed in the program. Such patients would receive their treatments during the day, being released to return home at night. The program would also provide appropriate assistance to relatives or friends which is an essential element of the complete and lasting rehabilitation of mental patients.

Administrative Personnel

The following proposals under administrative personnel are based on recommendations contained in an organizational study of the top administrative structure of the State Hospitals. These recommendations are to strengthen the top administration of the hospitals required due to the growth and increased complexity of operations. That portion of the recommendations which it is estimated can be accomplished within the fiscal year is budgeted.

1 Assistant superintendent—treatment — 13,800

To establish a medical administrator responsible for all treatment functions directly under the superintendent. 1 such position was established at Camarillo last year and this proposal is to establish another at Napa, the second largest hospital.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL RETARDED—Continued

NEW POSITIONS—Continued

Administrative Personnel—Continued

8 Chief of service (psychiatric) $120,400

To establish a position responsible for a "treatment unit" reporting to the assistant superintendent—treatment. "Treatment units" to be developed individually based on all related factors within each hospital. 5 positions are for Camarillo and 3 positions are for Napa.

2 Chief of service (medical and surgical) 27,600

To establish one position each at Camarillo and Napa responsible for the acute medical and surgical treatment unit reporting to the assistant superintendent—treatment.

2 Chief of service (tuberculosis) 27,600

To establish 1 position each at Napa and Patton responsible for the tuberculosis treatment unit.

13 Administrative assistant to superintendent 78,780

To establish a position at each hospital assigned to the superintendent to assist him in his administrative duties.

4 Service and supply assistant 21,984

To establish a position at the 5 larger hospitals to strengthen the hospital service and supply function. 1 such position was authorized last year for Camarillo. These 4 positions are for Napa, Agnews, Patton and Stockton.

General Medical Records and Clerical

97 Intermediate typist-clerk 324,864

33 positions at a cost of $114,048 are included for central medical clerical pools at the various hospitals. These positions are required for the work load relating to the proposed new positions in the budget and are based on a standard of 1 typist for each 3 professional staff members.

5 positions at a cost of $16,470 are included for the personnel sections at the hospitals because of work load increases relating to new positions in the budget. The work load standard is based on 1 clerk for each 250 positions.

12 positions at a cost of $39,528 are proposed to meet the clerical work load present in the superintendent of nurses' office and the clinical laboratory section at 6 of the hospitals, which are not now authorized positions for this purpose. Professional time now used for the clerical work load will be released for more proper application to the treatment program.

5 positions at a cost of $16,470 are to provide a clerical position at five hospitals for the Rehabilitation Therapies Section. These hospitals qualify for a clerical position on the basis of a work load standard of 1 clerk for the section when the therapist staff reaches 10 or more positions.

6 positions at a cost of $19,764 are proposed for the Nursing Education Section at 6 hospitals which are not now authorized positions for the section. The clerical work load consists of trainee scheduling, record keeping, class work programing, preparation of lesson and lecture material and the related typing and mimeographing work.

33 positions at a cost of $108,702 are included to provide a clerk for each area nursing office at the various hospitals. Current authorizations provide for 2 clerical positions for area offices at each hospital. The clerical work loads have increased over the years to the point that a clerk is now needed for each area office. The addition of these positions will release a considerable portion of the area supervisor's time for ward nursing supervision, thereby improving the existing level of nursing services.

2 positions at a cost of $6,588 are included for the receptionist and information work load in the new Receiving and Treatment Unit, Metropolitan, and the new Hospital Annex at Pacific. This proposal is comparable to staffing of similar new units at the other hospitals.

1 position at a cost of $3,294 is proposed for the procurement section at Camarillo to meet the increased work load that has developed since the 1950-51 Fiscal Year. The operating expenses, which relate to the work load of the unit, have increased approximately 40 percent since the 1950-51 Fiscal Year.

3 Intermediate clerk 9,882

3 additional positions, 1 each for Mendocino, Pacific, and Porterville, are required to handle the work load in the marking, linen, and clothing room function.

7 Intermediate stenographer-clerk 24,192

7 additional positions are proposed for the increased work load that has occurred in the clinical conference activity at the various hospitals. Present authorization, which was established several years ago, provides only 1 clerical position at each hospital for this purpose. The 7 positions are included for the larger hospitals.

General Business Services Administration

2 Storekeeper 7,992

1 additional storekeeper position at both Camarillo and Napa are required by the increased work load in the recent years of receiving, storing, and issuing the tremendous quantity and variety of store items.

2 Telephone operator 6,276

2 additional positions are included for Sonoma to provide coverage of a new 2 position switchboard. Completion of the new receiving and treatment building will require expanded telephone facilities.

Food Service Personnel

3 Institution food administrator I 14,220

1 position each for DeWitt and Modesto are provided for supervision of the special diet kitchens and preparation of special meals as prescribed by the medical staff. These hospitals are without such a position at the present time. The third new position is for Camarillo where an additional food administrator position is required for supervision of various units of the food service department where because of the large size of this hospital and decentralization of the food services, the present staff is unable to handle the entire work load.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL RETARDED—Continued

NEW POSITIONS—Continued

Food Service Personnel—Continued

11	Cook	$41,910
8	Assistant cook	25,104
19	Total	$67,014

3 cooks for DeWitt, 1 cook for Stockton, 1 cook for Pacific, and 3 cooks for Porterville are provided for staffing the special diet kitchens on a comparable basis with other hospitals. 2 cooks for Sonoma and 1 cook for Atascadero are to increase the complement on a post assignment and work load basis. 6 of the assistant cooks are for Camarillo and 2 are for Metropolitan to augment their cooking staffs and provide staffing comparable to other hospitals based on work loads and post assignments.

1	Baker I	3,810

An additional baker is included for Metropolitan making a total baker staff of 3 positions. On the basis of population and work load 3 positions are required for 2 posts and relief.

1	Butcher-meat cutter I	3,810

A third position is provided for Napa for work load resulting from population growth to 5,600 patients.

15	Food service supervisor I	47,070

2 positions each at Agnews, Napa, Patton, and Stockton; and 1 position each at DeWitt, Mendocino, Metropolitan, Modesto, Pacific, Porterville, and Sonoma are proposed to increase supervision over the congregate dining halls and ward dining facilities and employees. At present only 1 authorized position of food service supervisor II for supervision of all dining rooms and facilities is provided at each of these hospitals.

180	Food service assistant	511,920

Distribution by hospital is as follows:

	Dining rooms	*Kitchen*	*Bakery*	*Meat cutter*
Agnews	26	–	–	1
Camarillo	16	3	–	1
Mendocino	32	3	–	1
Metropolitan	10	3	–	1
Napa	1	–	–	–
Patton	–	–	–	1
Stockton	29	5	–	–
Pacific	7	9	3	–
Porterville	–	2	–	–
Sonoma	9	12	3	2
Totals	130	37	6	7

130 positions as shown above are proposed to augment current staffs or staff congregate dining rooms not now staffed with food service assistant positions to increase the level of supervision of working patients and for handling and serving food in the congregate dining rooms. 23 of the 37 positions shown for kitchens above will staff the kitchens of the 3 hospitals for mental retarded patients with sufficient employees to eliminate the need to use patient help. This is considered necessary as a step toward control and prevention of communicable diseases in these hospitals. The remaining 14 positions are based on post assignments and work load increases and to provide parity in staffing between hospitals.

6 positions, 3 each for Pacific and Sonoma, are for assignment to the bakeries in order to eliminate the need to use patient help here, also in an effort to control communicable diseases.

7 positions are for assisting the butcher-meat cutter at the hospitals shown above. The 5 positions for hospitals for the mental ill will complete the staffing of these hospitals with 1 assistant for each. 2 positions for Sonoma will eliminate patient help from the butcher shop also.

Clothing, Housekeeping, and Laundry Personnel

3	Assistant seamstress	8,964

1 additional position is included for DeWitt to provide for supervision of more patients in the sewing room and to make the staffing comparable to other hospitals. 1 additional position is provided for both Pacific and Porterville to meet the work load of inspecting and repairing clothing, sheets and other items used by the patients.

1	Supervising housekeeper	$3,456
3	Housekeeper	9,414
2	Janitor	6,276
6	Total	$19,146

1 position of supervising housekeeper is required at Agnews as a working supervisory position to meet the additional area and cleaning work load. 2 housekeeper positions and 1 janitor position are included for Camarillo due to the completion of 6 new nurses homes with about 60,000 square feet and the new rehabilitation center with 19,000 square feet. 1 housekeeper position for Mendocino and 1 additional janitor position for Atascadero are proposed to meet the work load.

8	Laundryman	$26,352
29	Laundry helper	82,476
37	Total	$108,828

3 additional laundryman positions are included for Napa to meet the increased work load due to the opening of new facilities since 1952-53 for which no increased laundry help has been provided. 5 laundryman and 12 laundry helpers for Pacific and 17 laundry helpers for Sonoma are also included. These positions for the hospitals for the mentally retarded are necessary due to: (a) enteric and other communicable diseases which have been difficult to control because of the use of patient help in the laundries, (b) decrease in patient help available because of change in program emphasis, and (c) increases in the quantity of laundry processed.

Teaching Personnel

1	School teacher	4,404

1 additional position of school teacher is included to meet the work load increase of the juvenile unit at Camarillo.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL RETARDED—Continued

NEW POSITIONS—Continued

Maintenance and Operating Personnel

15	Maintenance personnel	$52,210
	3 locksmith positions, 1 each for Mendocino, Napa, and Stockton, are proposed to meet the continuing work load of lock repair and replacement. 1 mason position at Porterville is proposed for the normal work load in the repair and maintenance of the concrete structures and plastered surfaces. 1 steamfitter position at Patton is proposed to maintain and repair properly the steam installation system. 1 additional electrician position at Camarillo is included to handle the existing electrical work load. 1 plumber, 1 electrician, 1 carpenter, 2 painters, and 1 building maintenance man are provided for maintenance of the 16 new wards of 1,600 capacity at Metropolitan. 1 carpenter, 1 painter, and 1 building maintenance man are provided for maintenance of the 6 new ward buildings of 700 capacity at Sonoma.	
8	Groundsman	27,648
	1 additional groundsman is required at Agnews, Camarillo, Mendocino, Metropolitan, Patton, and Stockton, and 2 additional positions at Sonoma to cover the work load of current maintenance of grounds.	
6	Automotive equipment operator	23,976
	1 additional position for Stockton, Pacific, Porterville, and Sonoma, and 2 positions for Mendocino are provided to staff the required shifts at these hospitals.	
9	Supervising hospital police officer	37,746
26	Hospital police officer	94,380
35	Total	$132,126
	35 additional positions together with 26 existing positions are proposed to provide a basic police force with 1 officer on duty for 24-hour, 7-day coverage at each hospital (except Atascadero), for property protection, traffic control, and general security.	

Farming Personnel

1	Canning assistant	3,456
	1 additional position of canning assistant for Mendocino is proposed to meet the current work load requirements at the cannery.	

Fairview State Hospital

81	Positions	129,424
	81 additional positions are proposed in the areas of medical and nursing care, social service, food preparation and service, and laundry service. The positions are predicated on activation of the hospital in July, 1957, and the receiving of patients in September, 1957, therefore the 51 psychiatric technician trainee positions proposed for nursing care are not effective until May 1, 1958.	

Department of Mental Hygiene

DEPARTMENTAL ADMINISTRATION

Under the administration function, the department carries on the activities of general direction of the hospitals, clinics, special programs, fiscal accounting and budget control, collection activities, deportations and transfers, guardianships, statistics, personnel services, food administration, nursing service, maintenance service, community services, and private institution inspections.

ADMINISTRATION

Analysis

The $26,513 net increase in salaries and wages represents $8,315 for increased cost of authorized positions, $14,976 increase in estimated salary savings, and $33,174 for 7.5 new positions as follows:

Accounting:

1 intermediate account clerk for increased accounting work load generated by the expanded outpatient clinic program.

Personnel:

2 additional assistant personnel analysts for work load increases due to the increase in total number of department personnel and hospital units.

Statistics:

1 junior research technician and 1 intermediate typist-clerk to provide coverage for the analysis of statistical data on the mentally ill population. Positions were authorized in the current budget for 1 year. Continuation on a permanent basis of analysis of this data is considered necessary for administrative and budgetary purposes.

Guardianships:

1 additional assistant counsel for an increased guardianship case load and to relieve the administrator for supervisory duties.

1 additional intermediate typist-clerk to assist with preparation of legal documents, handling filing fees and court costs, and maintain the court appearance calendar.

One-half of an intermediate stenographer-clerk position to provide clerical assistance for an Agent I position located in a branch office in Oakland.

Operating expenses include a net increase of $47,926; due primarily to inclusion of $46,000 for hospital and nursing surveys, plus small increases totaling $2,425 for automobile operation and out-of-state traveling for new and recently filled positions, less a $4,080 reduction in funds for printing.

The $17,417 for equipment is composed of $2,539 for replacement and $14,878 for additional items. Office equipment for new positions, additional technical books, and films for the personnel section and food administration in-service training programs are the primary items.

Analysis

The $29,942 increase in salaries and wages represents $13,053 increased cost of authorized positions, $9,127 increase in estimated salary savings, and $26,016 for 6.5 new positions as follows:

2 Agent I positions and 1 intermediate typist-clerk for increased case load in the Sacramento regional field office. The addition of these positions will reduce the case load per agent to the same level as the other field offices.

3 intermediate typist-clerks, 1 each for the legal section, analysis section, and review section to provide additional clerical assistance.

One-half of an intermediate typist-clerk position for clerical assistance to an Agent I located in a branch office in Oakland. This part position will be combined with the one-half position included under guardianships for their agent located in the same office.

Operating expenses increase of $6,113; primarily due to additions in office, printing, postage, automobile operation and traveling related to work load and new positions and a rent increase due to moving the bureau to new quarters.

The $8,401 for equipment is composed of $5,019 for replacement and $3,382 for additional equipment. Dictating equipment, adding machines, and files are the principal additional items.

BUREAU OF SOCIAL SERVICE

Analysis

SUPPORT EXPENDITURES DETAIL	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SOCIAL WORKER CASE LOAD AND UNIT COST				
Year-end number of active assigned leave of absence cases	8,542	8,700	9,100	400 (4.6%)
Total number of social workers	126.5	130	143	13
Ratio of active assigned cases to all social workers (including supervisors)	67.5	66.9	63.6	3.3
Ratio of active assigned cases to case workers (excluding supervisors)	80.1	79.1	75.2	3.9
Cost per active assigned case	$131.66	$137.93	$144.98	$7.05 (5.1%)

The $92,906 net increase in salaries and wages represents $23,405 increased cost of authorized positions, $23,787 increase in salary savings estimate, and $93,288 for 20 proposed new positions as follows:

1 Intermediate stenographer-clerk for increased stenographic and clerical work load in the headquarters office of the bureau.

Positions	Purpose
2 Supervising psychiatric social worker 11 Senior psychiatric social worker 6 Intermediate stenographer-clerk	To provide an improvement in the staffing standard for field social workers. These positions provide essential services to patients released from the hospitals including preplacement investigations, family care home and work placements, and follow-up and consultation services.

Operating expenses show an increase of $13,067; primarily due to increases in telephone, printing, postage, and traveling, for new positions totaling $7,972, plus $5,085 for rent increases.

The $24,416 for equipment is composed of $13,236 for replacement and $11,180 for additional equipment. Tables and side chairs, technical books, dictating equipment, and automobiles for the new social worker positions are the significant additional items.

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*79.7*	*89.2*	*93.1*	*3.*

As administrator of National Mental Health Act funds for California, the Department of Mental Hygiene is responsible for t allocation of such funds to other state and local agencies and seeing that required standards of service are met and maintaine

The following schedules indicate the number of hours spent by professional employees in interviews with patients (on either an i dividual or a group basis), and in preventive services to communities during the Fiscal Years 1955-56, 1956-57 (estimated) a 1957-58 (projected). The hours spent by patients in individual and group therapy are also shown. Of the professional ti allocated to all services, 83 percent was directed toward treatment of clinic outpatients and 17 percent toward preventi work in the community in the year 1955-56. It is estimated that these percentages will amount to 85 percent and 15 percent r spectively, in 1956-57 and 86 percent and 14 percent respectively in 1957-58.

The chief factors responsible for the variation in cost per service hour from clinic to clinic are: (1) the duration of normally o curring vacancies (e.g., in areas remote from metropolitan centers, recruiting is more difficult); (2) the proportion betwe children and adults in the case load of patients (e.g., a child's case takes 2 to 3 times more staff time than does an adu case); (3) the ratio between group psychotherapy and individual psychotherapy offered in a given clinic (e.g., 10 hours of pr fessional staff time may produce 100 patient-hours in group therapy but only 10 patient-hours in individual treatment inte views); (4) other extraneous factors.

In conjunction with the rendering of these services, the Berkeley Clinic conducts an extensive training program for social worke psychologists, and psychiatrists.

---

[a] Federal funds, neither receipts nor expenditures, are included in the budget totals.

[b] Composed of savings in salaries and wages, $14,851; operating expenses, $2,815; and equipment, $767.

[c] Composed of savings in salaries and wages.

Analysis

The $36,886 increase in salaries and wages represents $14,856 for 2 new positions comprising 1 psychiatrist II to complete the complement of the psychiatric team at the Chico Clinic and 1 intermediate stenographer-clerk for increased work load at the San Diego Clinic. Increased cost of authorized positions requires $14,962 and a reduction in the salary savings estimate of $7,068 accounts for the balance of the total increase.

Operating expenses show a net decrease of $5,295 due primarily to a $22,964 reduction in the amount of federal funds available for contracts, an increase for renovation of clinic facilities, $4,500, and $14,996 for additional rent related to the Berkeley Clinic moving to new quarters.

The $15,056 for equipment is composed of $5,578 for replacement and $9,478 for additional items. Office equipment for the new positions and clinic offices, medical books, moving picture films, and furnishings for the new quarters of the Berkeley Clinic are the significant additional items.
